boner; (bones airing) removes, with a knife, bone from sections of pork, without waste, preparatory to rolling or sausage making; (meat preserving) bones, preparatory to preserving processes.

bottler, fruit, as for preserver, fruit. brawn maker; working from set recipe, cuts out meat and fat from pigs' heads, chops meat and sets into small pieces and places in steam-jacketed coppers; boils these pieces, and pours brawn, so made, into moulds to cool and set; cf. small goods man (sausages, etc.). butcher, vinegar; superintends processes of making, fermentation, acidification, and clarification, in manufacture of malt vinegar; determines temperature of steam rate and rate of flow of malt for mashing, amount of yeast for fermentation, etc., and instructs mash house man (449), vinegar pumper (449) g.v. and other workers engaged thereon.

brewer's saccharine maker, see insectivorous man.

butcher, see slaughterer; cf. butcher (757) and (770).

butcher, chicken, see slaughterer, Jewish.

butcher, pig, see killer, pig.

butcher, preserved meats and bacon factory; bacon cutter; cuts up pigs' carcasses for bacon curing; splits carcass into halves, and removes certain portions of side bones; in some Scottish works, cuts off only shoulders and flanks for curing purposes; cf. boner.

butter maker, butter churner, butter worker; tests cream with a thermometer to see whether it is at proper temperature for churning; tastes it, and otherwise examines it to ascertain whether it is "ripe"; if it is not, adds various agents to hasten process of "ripening"; pours cream, when ripe, into a churn, by hand; turns churn (if hand-driven) by wheel, with a handle, or, if mechanically driven, by driving belt or electric current, which turns churn mechanically; decides, by inspection or otherwise, when process of churning is complete; knocks out, by hand, plug at bottom of churn, to allow buttermilk to escape, and replaces plug; removes lid of churn, by hand, takes out cream (now become butter), and puts it on table of working-up machine, i.e. a large cylinder revolving in water in a well grooved wooden roller fixed from centre to one edge, which kneads butter, and squeezes out superfluous buttermilk or moisture; adds salt or washes with salt water, as required, to produce required flavour; tastes butter, and otherwise examines it, at frequent intervals, to ascertain if required flavour and consistency have been obtained.

canmer, fruit, see preserver, fruit.

caramel maker (sugar refining); prepares caramel, i.e. burnt sugar, for medicinal or colouring purposes, by heating crystallised cane sugar in super-heated steam pans to a given temperature; sugar having been poured into pans by labourers, watches gauges and regulates steam pressure to govern heating of sugar; tastes sugar content of caramel by saccharometer and by scrutinising, from knowledge of amount of heat employed, etc., determines colour value of heated sugar; when desired value has been obtained, shuts off steam, tests properties of caramel by placing samples in certain standard solutions and runs off caramel into cooling pans.

canein worker, see miller (dried milk, canein).

charge hand (sugar refinery), centrifugal machine charge hand (sugar); superintends process in centrifugal machine room where sugar crystals are drained and dried, and directs and supervises work of machine chargers (449) g.v.; instructs machine

chargers as to amount of crystal or alkali sugar to be placed in machines and length of treatment in machines, instructions, etc., as necessary; does running repairs to machines, or reports all breakdowns to works taster (216) g.v.

cheese maker (not on farms), mixes "working" milk with water, adds milk and tests acidity of mixture by tasting; pours milk (fresh or sour) from cans into a large steam-jacketed tank; watches temperature of milk in tank, which is kept at an even level; adds rennet by hand, to curdle milk; adds portion of whey, re-regulated into "curd" while liquid portion is separated out as whey; passes a knife methodically through curd, to prevent it forming into large clotted masses, and to keep it plastic, or more, less setting in motion electrically-driven knives, which pass slowly through curd, works curd with his hands, rubbing it between his fingers, or turning it over; when judged by repeated tasting, correct of ripening is complete, opens tap to allow whey to escape; places curd by hand on a perforated board to cool and drain, grinds curd, i.e. reduces it from large pieces, 4 or 5 inches in size, to pieces about 1 or 2 inch in size, by putting it in a machine, fitted with forks, and operated by hand; rubs in salt, wraps curd in a cloth binder, and puts it in a vat of brine which is stirred tighter every day; binder is changed every day; takes curd from vat or mould, and places it in a special blinder, compressing it slightly; cheeses are then taken to a loft or drying room, to dry, and mature; cheesemakers daily in drying room, with a view to eliminating any minor defects, e.g. too much warmth or too much moisture; pricks cheeses with a skewer if they contain too much air, cheese maker, butter maker; a cheese maker g.v. making "bondon" cheese, which requires special care to obtain exact degree of ripeness required.

cheese maker, lactate; introduces rennet and a lactate ferment or "starter," and salt into vat of milk previously strained and pasteurised; when curd has solidified, places it on cheese cloth for whey to drain off; sets in operation.

blending machine, in which curd and hard cheese, usually cheddar, in equal quantities and a proportion of butter are thoroughly mixed between rollers, to form bricé cheese; moulds cheese in power-driven moulding press, wraps it in paper and packs it for sale.

cheese maker, soft, as for cheese maker, lactate.

chocolate maker, see coucheur.

chocolate maker; (i) general term for any skilled worker employed in manufacture of chocolate paste, including chocolate grinder, melanger attendant, refiner, roasting hand, chocolate mixer attendant g.v.; (ii) in small firms, a chocolate maker throughout, i.e. combines duties of chocolate grinder, chocolate mixer attendant, melanger attendant, refiner (chocolate) g.v. but attends fewer machines than when work is sectionalised.

chocolate man, see coucheur.

chocolate mixer attendant; weighs, according to recipe, ingredients for chocolate paste and empties into three or four mixing machines, which, by revolving blades, makes chocolate dough; starts and stops or reverses beaters, turning pulley wheel governing reversible clutch; scoops out mixed paste, when it is of correct consistency, and empties it into bowl of conching machine, which, by a rubbing action, continues mixing and drawing off excess of chocolate; opens door of machine and allows conched chocolate to flow into trays; in small firms, sometimes also

does other work, e.g. attends a chocolate grinding machine (see grinder, chocolate) or does work of chocolate maker *q.v.*

churn attendant (margarine): runs specified quantities of fatty constituents from melter tanks (*cf.* tilters) into stirrer tanks; starts up stirrers by engaging pulley levers; turns on steam to heat fatty constituents for mixing with milk; runs off heated oil, etc., into emulsifier; is responsible for quantities of milk, coloring, etc., flowing into emulsifiers and gives instructions accordingly to churner (449) *q.v.*; in smaller firms, work is usually done by churner, supervisory duties being undertaken by works manager.

churner, churnman (margarine): under direction of churn attendant *q.v.* churns together prepared milk and fat in a steam-jacketed churn or emulsifier; watches process, taking care that milk and fat come together at correct temperature and obtain a certain constituency; opens valve to run in heated fat and also cooled milk, *cf.* milk, into churn; starts up stirrers in emulsifier by pulley levers, handles, etc., and controls heat by means of steam valves; adds cooling matter, if necessary; when using turbo-pump emulsifiers adjusts valves so that liquid flows at correct heat to receiving cooling drum when process is complete, opens outlet valve, allowing margarine to flow to outflow basin attendant (449) *q.v.*; in smaller firms, sometimes also does work of churn attendant *q.v.*

cleanser, fish, see gutter, fish.

cleanser, gut, gut scraper, rug dresser, rug wash, rug scraper, rug put, washes, in open trough, outside of gut; turns gut inside out by turning back the end of gut and running water through "turn-up" continuously so that weight of water pulls gut completely inside out and carries away lower impurities; times the inner surface of gut using a sliver, i.e. a wooden tool, to remove mucous matter and membrane; wads gut in a hand-turned metre wheel, sorts in lots, and packs with salt into casks if scoring gut into widths, places end of gut over tap nozzle, passes water into gut and confines water within a certain length of gut by squeezing gut at a certain distance from nozzle, measures hole of gut against a gauge and washes along a length of gut until a certain gauge is reached, then cuts; (sheep and pig gut) soaks gut until the mucous lining is "on the run," then, spreading gut on an inclined board, works down the gut with a wooden scraper so that mucous matter and membrane runs from the gut; (weasand and bladder) cuts and scrapes flesh, etc., from weasands and bladders and blows up, by hand bellows or with compressed air, to dry.

cleanser, mustard seed, see dresser, mustard.

cleanser, sausage casings; sausage skin cleaner; sausage case stripper, sausage casings dresser, sausage skin dresser, sausage skin maker; a gut cleaner *q.v.* working exclusively on gut casings for sausages.

cleanser, tongue; a kitchen hand (provision factory) *q.v.* who washes and scrapes out tongues in preparation for boiling.

cleanser, trips; trips dresser; (i) soaks trips in hot water; scrapes off outer skin, boils for three hours, and scrapes off inner skin; (ii) operates a belt-driven circular machine brush which cleanses trips in a stream of cold water.

concher (chocolate): chocolate hand, chocolate wiper; pours or ladles charge of chocolate, either powdered or liquid, into a concher machine (so called because originally it contained shell-shaped appliances, or "conches," which dug into chocolate and worked it to keep it plastic;

working is now sometimes done by rollers), sets machine in motion by a lever; watches temperature indicator to ensure that correct temperature is maintained; removes charge, with a ladle or other instrument, when refining process is complete; cleans machine, and looks after it generally.

converter (milk): condensed milk maker; prepares milk under vacuum (condensed milk); runs milk, after heating, into evaporating pans of condenser; watches evaporation and regulates heat of steam coils to prevent milk burning, regulates vacuum pressure to govern evaporation; draws off sample and, when process is complete, strikes vacuum, i.e., shuts off steam, lets in air and runs off milk to cool.

confectioner's assistant; does decorative coloured designs on high-class sweetmeats by hand, with brush; *cf.* confectioner's assistant (449).

converter men; (i) (acid glucose) acting in conjunction with steepers *q.v.*, opens and shuts connecting valves, as necessary, to draw liquor from heating vats and to force it up to neutralizing tanks; (ii) (liquid glucose) attends converter plant in which, by the addition of acid, starch solution is converted into liquid glucose; admits and shuts off steam, as necessary, to operate pump forcing starch solution into converter; regulates valves to run in acid; guided by gauges, regulates steam pressure on to converter; draws off sample of glucose from time to time; tests with standard solutions, and when process is complete, opens valve and forces out liquid glucose; keeps a record showing amount of liquor converted.

cooker, lemon; puts halved lemons in steamed vats, heat of which is regulated by means of valves; judges when process is complete and empties vats.

cooker, orange; puts juice and pulp of oranges, after they have been freed from pipe, etc., by rubber-downs (449) *q.v.*, in steam-heated tank and regulates temperature by means of valves; leaves it in tank for length of time varying according as fruit is to be stored as pulp or is to be used immediately in making marmalade; for storing pulp, fills tank with pulp, bammers in bung, and nails a strip of tin or zinc thereto; weighs cask before and after filling, and chalks up weight.

cook (preserved foods); directs processes for canning preserved goods, etc., on a large scale; examines meat on receipt, supervises cleaning and cutting up, has charge of steam vats, and generally supervises women assistants.

cream maker, clotted; solidated cream maker; prepares raw cream for heating in pans; during heating, skims off clotted cream.

mustard powder maker; weighs ingredients according to formula, and stipples them, by hand, into a chute, situated above a hopper or turning machine; moves shaft, which sets machine in motion, watches machine to see that it is working properly and that ingredients are being correctly mixed.

cutler (Jewish), see slaughterer, Jewish.

cutler, bacon, see butcher (preserved meat and bacon factory).

dairymaid (in creamery); pours cream into pots; wrings and packs up cream cheeses; weighs moulds, assists in making up, weighing, stamping, and moulding pots of butter, cleans pots, pans, etc.; washes shalves and marble slabs, etc.

dairymen (margarine factory); removes cream from milk, by hand, with a ladle or other utensil, and puts cream in a separate can for removal; empties milk, after cream has been removed, into steam-jacketed churns, to pasteurise milk; adds water, by hand, when milk is

at a certain temperature; opens valve by hand, causing pasteurised milk to be pumped to another department; works under supervision of foreman dairymen (451) *q.v.*

dairymen (milk factory); receives milk in churns at factory, and tips milk into reservoirs from which it is pumped to various machines for separating, pasteurising, condensing, etc.; cleanses reservoirs, etc., periodically; is generally responsible for good condition of milk accepted at receiving depots.

dresser, bladder; weasand dresser; removes fat and superfluous tissue from bladder or weasand with a knife, taking care not to cut it; encloses one end of it with a piece of string; places it on nozzle of electric pump, regulated by hand lever, which fills it with air, or blows it up with hand bellows; ties another piece of string round open end to prevent its escaping, ties a number of bladders or weasands together with string, and places them on hooks in roof or ceiling to dry.

dresser, fowl; fowl dresser; poultry dresser, poultry and cleaner, fowl dresser; poultry; removes viscera, washes and shavers poultry, and ties them up for market.

dresser, game, or for dresser, fowl dresser, meat; slays and shaves beasts; removes internal organs with sharp knife; eviscerates (if of an ox) down middle; washes down meat; work usually done by slaughterman *q.v.*

dresser, mustard; weasand dresser, mustard seed maker; (i) mustard seed cleaner, mustard seed dresser, seed dresser (mustard); attends three or four machines for sieving mustard seeds; pours seed into sieve, clears impurities from sieve, and bags dressed seeds; starts and stops machine, as necessary, by loose pulley lever; machine is rarely stopped; (ii) mustard flour dresser; attends three or four mustard flour sifting machines, fed from chutes, controlled by mustard blenders *q.v.*, after passing through heating machines; bags sifted flour; fills and nails up casks or boxes for despatch; clears sleeves of impurities by hand, using brush; occasionally, e.g. to change sieves, stops machines by pulley lever; (iii) receives blended flour in sacks; by fill mortars, starts and stops automatically - driven pestles by inserting or taking out pestle plugs; rubs flour in fingers to test it and to assist breaking up; fills open sleeves by hand scoop and starts machine; cleans sleeves of pailley, clears sleeves and bags flour.

dresser, mustard seed, see dresser, mustard.

dresser, meat's foot; washes feet of carcasses; boils feet for six hours in copper; picks off hair by hand; boils feet again in water, after which they are ready for sale; skims off oil (sold as meat's foot oil) which comes to surface during boiling process.

dresser, offal; removes offal of animals from slaughter house; boils it to extract dirt, blood, etc., and trims intestines, etc., in preparation for making catgut.

dresser, poultry, see dresser, fowl.

dresser, pug, see cleaner, gut.

dresser, sausage casings; sausage skin dresser, see cleanser, sausage casings.

dresser, seed (mustard), see dresser, mustard.

dresser, sheep's trotter, see for dresser, snail's foot.

dresser, trips, see cleanser, trips.

dresser, trotter, see for dresser, snail's foot.

dresser, weasand, see dresser, bladder.

drier, mustard seed, see kiln man, mustard.

evaporator man (liquid glucose); (i) attends simple vacuum pan or an evaporator pan to reduce clarified liquid glucose to required density by evaporating some of the water in

glucose liquor under a vacuum, opens valve to run in liquor, similarly admits steam and water to create vacuum; consults gauges, showing water and steam pressure, to regulate vacuum; draws samples of liquor and tests density with specific gravity tubes, when desired density is obtained, lets in air to break vacuum and runs off liquor; (ii) attends multiple evaporator, i.e., two, three or four evaporators linked in series to economize on steam utilized; operations as above; sometimes specifically designated, e.g., multiple evaporator man.

evaporator, steep water (glucose); as for evaporator man, evaporating steep water (see steeper) to a certain density for use in recovering by-products; involves extra cleaning duties, as maize water is apt to run up and down the down-leg of the multiple evaporators.

filler, pudding (preserved meats); fills skin casings, by hand, through a funnel, with gravely mixed ingredients of blood and spices; tucks them into lengths ready for boiling; or fills by machine, placing end of casing over outlet flange and working machine by hand, foot treadle, etc.; work usually done by black pudding maker q.v.

filler, sausage; places minced sausage meat in a cylinder fitted with a piston, worked by treadle, hand or by hydraulic or pneumatic pressure, which forces minor through a spout into sausage skins fitted on end and spout and regulates supply of mince into casings ready for weigher (sausages) q.v.

filer, fish; removes bones from fish which have previously been gutted and cuts them into strips, in preparation for curing.

filter man (sugar refining); takes charge of process of bag filtering of sugar liquor after it leaves blow-pan, i.e. large iron tank in which raw sugar is melted in order to extract filter press man (449) q.v. as to speeding and retarding flow of liquor, cleaning of filter bags, etc., and receives complaints from him as to state of liquor, etc.; takes samples and so watches state of liquor running through.

foreman (sugar house), see leading hand (sugar house).

fruit pudding maker; mixes, in specified proportions, currants, raisins, sugar, etc., for puddings; fills bags or basins of specified weight or size, with mixture, and bakes until cooked.

gipper, fish gipper, see gutter, fish.

glucose maker; general term covering all workers engaged in making solids or liquid glucose, including evaporator man, liquor man, pan man, steeper, separator man, filter-out (solid glucose) (449) q.v.

golden syrup maker, golden vat-man, golda maker (sugar); (i) makes golden syrup from refined sugar by inversion process; for operations, see inversion man; (ii) measures off standard strength acid and pours or runs it through a valve into centrifugal machine, and allows it to react upon sugar residue in machine, judging when this part of process is complete, and, opening valves, runs off solution through filter presses and clarifiers; finally boils product in a vacuum pan, thus obtaining a refined treacle; operations as for evaporator man.

granulator man (sugar refining), see superintendent of granulators.

grinder, cocoa, see miller (dried milk cocoa).

grinder, chocolate; chocolate powder grinder is engaged entirely on a number of chocolate grinding machines, e.g. ten, which by the action of pair of mill stones, revolving in reverse directions, one being steam heated, reduces winnowed and kibbled beans to chocolate paste (or bulk) of uniform consistency; adjusts, by screw device, a scraper on

edge of bottom millstone so that paste flows into a tray below; blade; removes flint tray once a day, switches on steam for heating millstone and starts up machine by pulley lever; also fills machine hopper when this is not done by nibber q.v.; is smaller firm, work usually done by chocolate maker q.v.

grinder, cocoa; cocoa mill grinder, as for grinder, chocolate.

grinder, mustard; mustard miller, roller man (mustard); attends three or four grinding machines; shoots mustard seed, by hand, from sacks into hoppers of machines; occasionally inspects to ensure that there are no stoppages of machines; but these hoppers are kept supplied; on rare occasions, adjusts grinding rollers by hand, wheel, or other device, or stops machine by disengaging loose pulley (by lever) and clears stoppage by hand.

grinder, starch; empties starch crystals, by hand, into hopper of automatic disintegrator mill, which turns them to powder; watches machine to see that it is working correctly; watches working of rotary sieve into which starch powder runs automatically; cleans sieve periodically; bags and weighs finished product; watches eaters who obtain after leaving rotary sieve, attends two or three machines and reports faulty working to foreman or works manager.

gutter, fish; fish cleaner, fish gipper; removes bones and internal organs of fish and cleans it ready for salting, sometimes also salts fish; cf. cobbeer (437).

haggis maker; mixes oatmeal, minced wet, minced sheep's pluck, onions, and spices; fills sheep's bladders with mixture and boils them in water.

header, fish; knocker, nobber; removes head of fish with a knife, by hand, in preparation for splitting or canning; cf. fish gutter.

inversion man (sugar refinery); brewer's ascorbic acid; runs power into lead-lined steam-heated tanks; directs acid man (449) q.v. who adds standard strength acid; regulates steam valves to control speed and degree of heating, the success of the process depending upon judgment in heating; determines approximately state of sugar from its appearance, i.e. colour, clarity, density; sends samples of liquid to chemist who decides when inversion is complete.

jelly maker (calves' foot), calves' foot jelly maker; weighs ingredients, which he requisitions from store room, and places them, by hand, in a steam-jacketed pan; watches temperature indicator during boiling process, to ensure that correct heat is maintained; decides when ingredients have been sufficiently boiled, and opens a valve or tap to allow them, now in form of liquid jelly, to flow out into receptacles; strains jelly through a bag of fine muslin to clarify it and to exclude any solid ingredients which have not dissolved during boiling.

jelly maker (provision factories); general term covering jelly boiler, jelly pourer-out (449), and jelly cutter (449) q.v.; is most general, sometimes makes jellies throughout, combining work of all these workers. jelly maker (sugar jellies); weighs ingredients (principally sugar), according to a standard formula, or recipe, and empties them by hand down a chute into steam-jacketed pans; adds water, as required; when required, adds, by hand, gelatine, flavouring essences, and colouring matter; watches temperature indicator, or, more thermostat, when heated sufficiently, and have acquired proper consistency, pours them into

a large receptacle and thence transfers them by hand, with a ladle, to moulds; cf. sugar boiler (434).

jelly powder maker; weighs out in exact proportions, according to a recipe, ingredients for jelly powder, and mixes them by hand on a bench, is often employed interchangeably with other work, e.g., as custard powder maker q.v.

killer, see slaughterer.

killer, pig; pig butcher; stuns pig; holds body of pig by chain or rope attached to hind leg; cuts back the throat; allows blood to drain out; may cut pig's throat while carcass is held on ground or in wooden cradle; sometimes also does work of pig scalding and pig singer q.v.

kiln man (grain milling); (i) is in charge of one or more kilns, used for drying oats in preparation for milling and rolling, which are automatically fed with oats from cleaning machine through hoppers, and are heated by required steam; faner sees that hot air from faner is maintained, and, if grain is over-heated or under-heated, reports to boiler fireman (551) q.v., who increases or reduces temperature accordingly; directs kiln labourer (439) q.v., takes samples of grain from time to time and feels and tastes them to ascertain their condition; sometimes also acts in other capacities, e.g. as intake man, sile man, screener man (435) q.v.; (ii) is in charge of flat kiln used for drying damaged or wet grain; in small establishments, also stacks furnace and regulates heat of kiln; cf. boiler fireman (551); with assistance of labourers, spreads grain from his flat with shovels or floor of kiln, and turns it over from time to time during heating process; takes samples from time to time, and feels and tastes them to ascertain condition; when grain is dry, shovels it into bulk and is packed by warehouseman (940) q.v.

kiln man, mustard; seed kiln man (mustard); mustard seed drier; is in charge of kiln in which mustard seed is dried; regulates heat of kiln fire by building fire up or stamping it down, as required; turns seed over, with a long iron rod, so that it may be dried evenly, and none be either burnt or insufficiently heated.

kitchen hand (provision factory); performs one or more of the following operations: bottles liquid soap; dries vegetables, and essences for soup powders, by placing them in stores (usually steam-heated) and regulates temperature by means of valves; weighs ingredients, mixes them (dry), by hand, on a bench; puts them in a compressing machine and operates machine by moving a lever or switch; packs powders by hand, in cartons; also boils co-holds, tongues, etc., as directed, in making brown timps, etc.; cf. boiler or head; works under direction of foreman or chief of kitchen.

knobbar, see header, fish.

lard maker, lard refiner, lard render; melts flint, i.e. pig's fat, in an open steam-jacketed pan; transfers hot liquid into a tin fitted with spouts and taps; runs liquid lard into paper bags, cardboard moulds, bladders, or tins, and sets to cool.

leading hand (sugar house-sugar refining); foreman (sugar house); supervises other char house workers; is responsible for whole process of final clarification of liquid glucose by heating and skimming liquor in open tanks and by charcoal filtering, i.e. maintaining a very low temperature level of liquor in tanks, few of liquor through tanks and char filters, and through the final outlet pipe; also, by inspection, ensures that charcoal covers are evenly and fully working; effectively; regulates steam valves; inlet and outlet valves to tanks, etc.; skins scum from glucose liquor; takes samples in glass ladle and inspects the clarity to determine

rate of flow of liquor through char house; opens and shuts final outlet pipes to pass clarified liquor from char house to evaporator man *q.v.*
lemon cheese maker, lemon curd maker; receives ingredients, in correct proportions, from manager; in some firms, is himself responsible for measuring out ingredients in correct proportions; places them in a large copper steam-heated pan; adds water according to instructions; opens valve to allow steam to enter lower portion of copper pan; boils mixture, taking temperature frequently with a thermometer; stirs mixture with a spoon or other instrument, during boiling process; when mixture has boiled long enough, ladles mixture, by hand, out of pan, and pours it into vats to cool; usually works throughout under instructions of manager.

liquorice hand, liquorice raffia; places prescribed quantity of block liquorice in a steam-jacketed pan, and turns on steam to heat it; sets in motion mechanical stirrer; watches liquorice, judges when correct consistency has been reached and adds measured quantity of flavouring essence; adds oil; boils liquorice into open paste to cool; is usually employed part-time in breaking up and stacking block liquorice, or in trolleying liquorice, etc.

liquor man (glucose); attends a number, e.g. six, of filters and regulates flow of glucose liquor through filter plate, *cf.* filter pan hand (449); regulates main inlet and outlet valves and also the small valves attached to each filter plate (20) or to each filter) and so controls filtering.

liquor man, liquor tank attendant; tank attendant, tank man (sugar re-fering); operates valves controlling flow of liquor from char chisterns; or superintends opening and closing of valves used for filling and emptying liquor tanks attached to sugar boiler (434) *q.v.* draws from tanks in correct rotation; observes colour of liquor as it flows from char chisterns, and tests it for density; controls, by means of valves, supply of water for washing off tartronic chisterns when empty of liquor; checks times of stages in process; notes numbers of chisterns to be drawn and re-charged with charcoal.

macaroni maker; weighs out, in correct proportions, ingredients, which differ according to type or quality of macaroni required; mixes them with water by hand, in a bowl with a spoon or other instrument, or puts them in a mixing machine; to be mixed mechanically; sometimes, after mixing, puts paste on table of grinding machine, which consists of a revolving circular metal table, fitted with two grooved conical rollers fitted with teeth or table to which a revolving table in motion, causing paste to pass repeatedly under rollers and to be worked up to an even consistency; in other cases, adds correct proportion of water, by hand, and works paste up by hand; or, sometimes, by hand in mixing bowl; transfers paste, by hand, to another machine fitted with a press, which forces paste through holes, in bottom of machine, in form of long pipes; breaks off pipes into convenient lengths, puts them on a tray, and carries them to drying chamber; sometimes passes macaroni through a hand roller before drying, which presses it into strips resembling flat ribbon; examines macaroni from time to time in drying chamber, and decides when it is ready for sale; in large factories, is assisted by labourers, who do unskilled parts of operations.

macerator, starch; starch roll man; attends macerating machine, in which rice or other paste, which has been ground by starch grinder *q.v.*, is mixed with water and kept in motion by compressed air or other

means, regulates, by hopper slide, flow of paste into machine, and runs in water to fill machine, starts and stops machine by means of pulley lever; when operation is complete, allows mixture to settle; opens outlet valve and runs off starch liquor; repeats process several times.

mustard hand (mustard); general terms for any worker operating and controlling machines used in mustard manufacture, e.g. mustard blender, mustard dresser, mustard grinder *q.v.*

machine man, butcher's machine man; attends chopping and mixing machines for brawn, black pudding, sausage, etc., making, working from recipe, expatriate provided quantities of fat, beef, bread, flour, etc., according to commodity to be made, into chopping or mixing machine, in correct order; controls machine by hand, decides when operation is complete and scrapes paste from edges; repeats process in "fine" mangleur machine; in smaller firms, work is usually done by chocolate maker *q.v.*

milk sugar maker; as for evaporator man; watches and controls special plant, which extracts sugar from milk, from which casein and cream have already been removed, by evaporation under reduced pressure; draws lactose or milk sugar by hydro-extractor.
mill (cane); cane grinder, cane worker; empties sacks of cane down a chute, which feeds hopper of grinding machine; places sacks in position to receive cane powder as it issues from machine; judges when machine is running but (which would injure product); decides when grinding process is complete, and powder is in a fit condition to be stored.

mill, mustard, see grinder, mustard.
mince-meat maker; weighs out ingredients, i.e. meat, raisins, etc., in exact proportions according to a formula; and either feeds and operates machines, e.g. meat chopping, fruit cleaning, fruit mincing, mixing or directs and superintends labourers who feed and operate these machines.
miner, sausage meat; a machine man *q.v.* who feeds mincing machine, by hand, with meat or pork, less or more, and other ingredients; turns crank of machine, if hand-operated, or sets machine in motion, if power-driven; removes minced and mixed ingredients from bowl into which they issue from machine; sometimes also does work of sausage filler *q.v.*

mince, chocolate, see chocolate maker.
mixer man, magma; mangleur; mixer man; controls, by means of valves, flow of raw sugar, water, or syrup into crystalliser, to obtain correct mixture and density; guided by gauges showing state of working of crystalliser, etc., uses judgment in varying the flow by cutting off or adding sugar, water or syrup.

mixer, mustard flour, see blender, mustard.
mixer (potted meats, fish paste, etc.); weighs ingredients, according to a formula or recipe; puts them, by hand, in a large bowl fitted with wheels; this bowl, with its contents is called a "batch" or "probe" batch upon mixing machine, fitted with blades which cut up and mix ingredients; sets machine in motion; watches to see that ingredients are well mixed; pushes batch aside

to be taken away to filling room, and puts another batch under mixing machine.

mixer, tea, see blender, tea.

mohler, see loader, fish.

opener and dresser, pig; hangs up carcass of pig, after it has been scalded and singed, by hind legs; cuts down centre of underside; removes offal and dresser carcass, which is then removed to hanging room.

paddler, starch paddler; with other paddlers, paddles starch on the starch rate, i.e. walks up and down a number of long, narrow, approximately 100 feet in length, along which starch liquor flows in shallow streams, and by means of a paddle, prevents the light glutinous water settling with the starch on the starch rate; continues paddling until all glutinous liquor runs off and only starch remains on the starch rate; regulates flow of liquor on the starch rate.

pan hand, pan man (sugar refining), see boiler, sugar.

pan man (condensed milk factory), see condenser (milk).

pan man (solid glucose); attends vacuum pan in which glucose liquor is heated under a vacuum and reduced to required density; admits steam to steam coil, and watches gauges, regulates temperature, from time to time drawing off samples of liquor as a guide; shuts off steam and opens valves to run off liquor to filter-out (449) *q.v.* upon completion of process, *cf.* evaporator man (liquid glucose).

pan man, vacuum (cereal foods); attends vacuum pass in which cereals, used in preparation of cereal foods, are crushed; *cf.* pan man (solid glucose), evaporator man.
pan man, vacuum (sugar), see boiler, sugar.

pasteuriser, milk; regulates, by opening or shutting a cock valve, flow of milk through a machine which cleans or clarifies it, into a steam-jacketed pasteurising machine, where it is heated to a given temperature, to destroy bacteria; in some factories, regulating supply of steam to pasteurising machine, by opening or shutting a valve, using a temperature indicator to show when correct temperature has been reached; where temperature is regulated automatically, by regulating, by opening or shutting another cock or valve, supply of hot, pasteurised milk to heating or retarding tanks; when one of these tanks is full, opens a cock or valve which allows milk to flow out of tank over cooler; sees that pasteurising machine is working properly.

pickler, beef; pork (pieces of beef, tongues, or some piece of brawn, sausage, etc.); in strong solution of brine, in tanks, or more usually, in pickling tanks; opens valves to fill tanks with brine and adds pick; inspects tanks from time to time and removes meat when it is sufficiently salted, taking into consideration temperature of meat, whether more brine in given time in hot weather; empties and cleans tanks; may also do other work, e.g. attend retorts, *cf.* retort hand.

pickler, sprat; prepares the pickle, i.e. sugar, sprat, bay leaves, etc., in barrels for sprats and herrings, working from own recipe; often travels round coast to follow "catch."

plunger (meat preserver); fills tin with meat, by hand, places bone or stick at tin, presses down meat; removes board, and fills in crevices with small pieces of meat, by hand.
plunging machine (meat preserver); attends a stuffing machine in a "centre" or "packed" meat factory. (i) (multiple machine) places tin beneath automatically meat-filled bopper and after they have been filled with meat by means of an automatic plunger, removes tin from beneath bopper; (ii) (single machine)

fills hopper with meat, places empty tin beneath hopper and pulls lever to operate plunger; removes filled tin, replacing with an empty one.

preparer, pressed fruit; picks over specially selected fruit in preparation for candying; removes stalks, etc., and rejects any fruit that is defective; cuts open with sharp knife and removes stone.

preserved milk maker, *see* condenser (milk).

preserver, fruit; fruit and vegetable preserver; fruit canner, fruit tanner; picks over fruit, vegetables, etc., discarding any that are defective, removing stalks, seeds, etc., if necessary, skins, peel, etc.; fills bottles, tins, or other vessels with fruit, vegetables, etc., thus prepared, with or without addition of syrup or other preservatives; boils, or partially boils, these vessels with their contents, if boiling is required, and makes vessels air-tight with a seal or cap.

preserver, meat; is in charge of all processes in preserving and sterilizing of meat, knows temperatures and times governing charring and smoking of roasts, superintends filling and sealing of tins; directs particular preserving processes, e.g., for large tins of meat, may decide upon a second heating in retort (after first salting), opening up and resealing of this finally to exclude air; directs spraying of tins with cold water to cool tin after heating and salting. keeps log book of times, temperatures of roasts, and consignments passed through.

preserver, potato, *see* preserver, vegetable.

preserver, sardine; preserves sardines, either by partly frying them before they are packed, or by leaving them in steam retorts after they are packed; also directs and supervises workers engaged in packing sardines, i.e., in putting them in tins, filling tins with oil, and soldering them.

preserver, vegetable; (1) as for preserver, fruit; (2) washes and sorts turnips, onions, cabbages, potatoes, or other vegetables; slices them by machine; dries slices on trays, in a gas-heated drying oven; packs vegetables, when they are dry.

presser, cocoa, *see* pressman, cocoa.

presser, mustard husk oil, *see* for pressman (cattle cake).

pressman (cattle cake); attends, with another pressman, two presses for extracting oil from maize husks, bean, etc., and pressing residual husk into cattle cakes; regulates flow of husk liquor into presses by valves; while one press is filtering, stops flow of liquor through other press, from plate to plate, pulls by hand the calked huck, etc., therefrom; husk falls through hopper to conveyor feeding drying cylinders, cf. driverman (449); changes and washes filter cloths, cf. filter pan hand (glucose) (449).

pressman, cocoa; cocoa presser. Hydraulic press operator (cocoa); attends machine for pressing out cocoa butter from cocoa liquor and for pressing residual cocoa into hard "cheeses" or blocks; pours liquor into steel pots in machine; fastens lids on pots and starts up pump, or opens a hydraulic valve to operate a ram which presses up bottoms of the pots in the compressing of cocoa liquor; removes pressure blocks and pot containing the cocoa butter; exercises great care in starting up machine.

press man, Sweetland; attends a sifter, e.g., those of Sweetland filter presses, in which neutralized liquid glucose passes through cloth bags attached to filter plates, regulates, by valves, flow of liquor through machine; from time to time draws off samples of liquor to determine the state of filter bag; when necessary empties and opens press, unscrews filter bags, washes them and dries

them on hot pipes; sometimes also does work of liquor man or filter pan hand (449) g.v. when liquor flows from Sweetland press through other type of press for additional filtering; press operator, hydraulic (cocoa), *see* pressman, cocoa.

pulper, fruit; puts fruit (other than oranges), after it has been cleaned by fruit picker (449) g.v., in steam-heated tank, and regulates temperature by means of valves; when fruit is reduced to pulp, fills casks with pump, hammers in bung, and nails thereover a strip of zinc or tin; weighs casks before and after filling, *see* choice up weight.

raw sugar man (sugar refining); (i) general term for any man employed in raw sugar department, including blow-up man g.v. and labourers engaged in trucking, etc., raw sugar, or standing belt carrier, cf. mixer boy (sugar refining) (449); (ii) prepares juice, i.e., raw sugar in water, for refiner, adding weighed or measured quantity of lime to juice in defecating pan; mixes with mechanical stirrer to neutralize acidity and to combine with albumen to create flocculent precipitates, which carry away impurities; watches mixing and stops machine when process is complete. refiner, refiner hand, refiner man (chocolate); refining machine attendant; attends from six to ten chocolate refining machines, which by means of finely adjusted cold steel rollers, still further reduce the fineness; starts and stops machines by loose pulley levers, if necessary, adjusts clearance of rollers by hand wheels governing screw device; adjusts magnets (for removing stray pieces of metal in paste) in magnet board of each machine; clears delivery trays with hand scoop; in small firm, work is usually done by chocolate maker g.v.

refiner, meat; receives crude meat from cattle market, cuts away meat, skin, etc., and places in melting tank; machine; adjusts temperature by regulating valves of steam jacket and runs out refined meat fat to cool.

refining machine attendant (chocolate), *see* refiner (chocolate).

rennet maker; steeps, macerates, and cleanses in water, a portion of fourth stomach of calves; free it from outer skin, fat and useless membranes, washes it in brine or rubs with dry salt and finally dries it till it resembles parchment; makes up steeping liquor and immerses wells (dried calves' stomachs) to extract ferment; superintends filtering, bottling and packing of rennet.

reaster, cocoa; cocoa bean reaster; puts cocoa beans in revolving heated iron drums; watches roasting, and removes beans when process is complete; stokes fire beneath cylinder or, more usually, regulates gas valve for control heating; tests beans by breaking in his fingers to ensure by their brittleness that they are thoroughly roasted; opens cylinder door and allows beans to fall into receptacle, where cooled air is drawn through beans by means of a fan; may attend to two or three cylinders; may also roast coffee beans by the same method.

reaster, coffee; *see* for reaster, cocoa; sometimes also reaster, chocolate, *see* reaster, chocolate (449).

reaster, oat; a kiln man g.v. who supervises working of kilns in which oats are dried in preparation for hulling and roasting.

reaster, bacon; sets or ties bacon, which has been previously boned, into rolls by hand, either before or after curing.

roller (chocolate), *see* for concher (chocolate) working at roller machine.

rosterman (mustard), *see* grinder, mustard.

rop man, *see* cleaner, gut.

runkeeper, ruman (cereal frodd); asperries paddlers, shovellers (449) g.v. and other labourers and superintends processes by which grain is steeped in water, ground, and passed through long "runs" where starch is deposited.

sampler, cocoa; visits docks and examines consignments on behalf of cocoa merchants (inspects state of cocoa, takes representative samples from certain sacks, exercising special care to estimate as near as possible percentage damaged, e.g. through dampness).

sawage case maker, *see* cleaner, sawage casing.

sawage maker; general term for any worker engaged in making sawages, including boner, machine man, sawage filer, weigher (sawages) g.v. sawage skin maker, *see* cleaner, sawage casing.

scales, pig; receives carcasses from pig killer g.v.; immerses it, by hand or by overhead gear, in tub of boiling water, removes carcass from water, and scrapes off skin.

scraper, gut; rep scraper, *see* cleaner, gut.

sealer (dressed meat market); a priest or layman, appointed by Jewish Board of Shechets, who ensures that slaughtering has been performed in accordance with Jewish customs; supervises slaughtering and affixes seal to Kosher meat.

seedman, mustard; is in charge of store of mustard seed, directs purchase and labourers in receipt and sowing of consignments of seed, and, from experience is able to judge quality of seed; rejects seed, or reports when seed is not up to sample; according to quality of seed, directs trucking to different floors of mill for banding, sifting, etc.; keeps stock book.

selector, casing; gut selector; determines full size of guts, i.e. intestines removed from carcasses of oxen, sheep or pigs, by filling them with water; cuts gut into lengths suitable for sausage skins, etc.; usually done by gut cleaner g.v.

self-raising flour maker; (i) is in charge of a number of automatic mixing machines, working in series; sets measures of machines, so as to admit correct proportions of each ingredient, i.e. wheat flour, carbonate of soda, cream of tartar, and tartaric acid, sometimes also rice or maize flour; watches raising of machines and from time to time oils and cleans machinery; (ii) in bakeries or small works, powders and sifts ingredients; weighs them out by hand, and puts them, by hand, in mixing machine; starts and stops machine by moving a lever.

separator man; attends four vats which feed eight shakers for separating the husk from the germ of milled maize; regulates, by valves, flow of maize and starch liquor pumped into vats and sees that husk does not sink to the bottom at the back (entrance) of tank by stirring liquor with a shaped rod from time to time; attends and watches shakers (which are of copper) cf. shaker man.

shaker man; attends a number of shaking machines (e.g. twelve) which, by means of oscillating sick, draw, separate husk from fine starch; regulates, by valves, water spray over shakers; twice a day stops husk feed over each machine, removes washers and reds each sieve, throwing off belts to rimp machine.

shechets, *see* slaughterer, Jewish.

sheller, shrimp; removes boiled shrimps from their shells, in preparation for potting.

shocket, *see* slaughterer, Jewish.

sieve man, mustard, *see* dresser, mustard.

siever, cocoa, *see* sifter, chocolate.

sifter, chocolate; chocolate powder sifter, cocoa sifter; cocoa sifter; keeps replenished, the hopper of a machine which sieves cocoa or beverage chocolate powder by means of oscillating silk sieves; sieves sieves with hand brush; sieves sieves powder from delivery tray; starts up and stops machine by pulley lever; cf. cocoa dresser.

sifter, mustard; mustard flour sifter, see dresser, mustard.

singer, pig; receives carcass from pig killer g.v.; attaches it to overhead gear, and passes it into and under a special oven; removes it from oven, rubs off charred hair, and washes and scrapes skin to remove any remaining bristles.

slaughterer (not home); butcher, slaughterer; kills animals for human consumption, usually by post-mortem; kills and by cutting throats of sheep and pigs; sometimes skins animals before killing them; often also performs duties of meat dresser g.v.

slaughterer, Jewish; chicken butcher, cutter, shechter, shochet; slaughters animals, and examines carcasses according to Jewish ritual; is employed by Jewish Board of Health.

slaughterman, see slaughterer.

small goods maker; undertakes any kitchen work in connection with sausage and cooked or preserved meat trade; makes sausages, hams, prepares and cooks tongues, processes bristles of beef; sometimes also tins meat, seals tins and passes them through retorts; cf. machine man, black pudding maker, brown maker.

soup maker, liquid; a highly skilled cook g.v. who prepares liquid soups from meat, vegetables, seasoning, etc., which he mixes in exact proportions.

soup maker (soup powder); a kitchen hand g.v. who weighs out ingredients of soup powders in prescribed proportions according to a recipe, and mixes them (dry) by hand on a bench; drags them off in a store.

splitter, bean, as for splitter, pea.

splitter, fish; splits open fish, after heads have been removed, in preparation for curing.

splitter, haddock, as for splitter, fish.

splitter, pea; feeds hopper of splitting machine with peas from a cask, where this is not done by labourer; sets millions of machines at correct distance apart, by turning a screw device, so that peas are split to required size, and are not ground or smashed; starts and stops machine by moving a lever; bags split peas as they emerge from delivery chute of machine.

starch maker; general term for a worker employed in any process in manufacture of starch, e.g. starch macester, starch gringer, starch stove attendant g.v.

steamer (rolled oats); sets automatic feed measure, governing flow of groats (rolled oats) to heated revolving cylinders; starts and stops machine by means of a lever; takes samples from time to time, to judge progress of steaming process; removes groats when process is complete.

steep, steep man; (i) (solid glucose) empties sacks of starch flour into steeping vats; turns on steam and water and acid, regulating inlet valve, as necessary; acting in conjunction with converter man g.v., opens outlet valves of vats; (ii) (liquid glucose) attends twelve vats in which maize is steeped to soften for grinding; opens and shuts hopper slide and runs in maize; runs water into vats, using marked stick to determine when required quantities have been run in; turns on steam and maintains a given temperature; runs off softened maize and liquor from vats in rotation; regulates speed of filling and emptying and regulates temperature, according to

speed of grinding, under works manager's instructions; keeps vats clean and ensures that they do not overflow.

starcher, milk; places bottle (or other vessel) of milk in a steam-jacketed receptacle; heats milk to required temperature, and watches temperature indicator to ensure that correct heat is maintained; if necessary, regulates heat, by opening or shutting valve which admits steam; hermetically seals bottles when still in steaming cylinder, by hand, by inserting a cardboard disc; removes bottles from copper to cool.

stove attendant, starch; attends stove in which is dried, powdered starch or thick starch to form starch crystals; puts in and takes out, as necessary, block starch or powdered starch on trays; regulates the heat of oven in which starch pulp is heated for evaporation of moisture, by stoking oven fires, opening and shutting hot air doors, turning on and off dry steam valves, etc., according to method of heating oven employed.

superintendent of granulators; granulator man (sugar refining); superintends process, and regulates, by valves, rate of flow of crystals from centrifugal machine through granulators and also temperature of granulators; is guided mainly by chart, or other indicator showing rate of flow, and thermometer.

tank attendant, tank man (sugar refining); see liquor man.

tester (margarine); tastes soy and fat ingredients of margarine to ensure freshness, at various stages of manufacture; usually in control of melting room; in small works, may do work of melter (449) g.v.

tester, milk; in large factories, measures out quantity of milk; adds specified quantity of methyl-alcohol, sulphuric acid, or other heating and colouring agents and pours solution in cylindrical machine; starts cylindrical machine by turning handle, or if power-driven, engages driving belt; after three or four minutes, pours off the separated cream and residue milk in graduated flasks and records fat contained; in small factories, work is usually done by works manager.

tuner, fruit, see preserver, fruit.

trusser, fowl, see dresser, fowl.

vatman, starch, see macester, starch.

449.—OTHER WORKERS.

acid man, acid pot man (sugar refining); pours standard strength sulphuric or phosphoric acid from carboys into open wooden or lead-lined water tank; directs flow of inversion man (448) g.v.

assistant (char house-sugar refining); assists leading hand (char house) (448) g.v.; stands by tanks and skims cream from glucose liquor; takes samples and reports to leading hand as to whether that liquor is badly filtered, etc., and watches to see that liquor in tanks does not overflow; runs water into, and out of cleaning tanks through the char filters for charcoal washing.

soaked oatman; oatman assistant (433) g.v. by plucking and removing heads, cakes, husks, etc., in and from fixed or rotary oven.

blancher, almond; immerses almonds (or other nuts) in hot water until skins are loosened; shakes in wire baskets to detach skins, and runs cold water through contents of baskets until skins are washed away.

blancher, ginger; (i) places ginger in revolving drums; sets drums in motion by moving a lever or switch; ignites sulphur beneath drums to bleach it; removes ginger from drums when process is complete; usually spends part time in other

work, e.g. in filling and emptying, or shifting barrels of ginger; (ii) fills tumbler with ginger; mixes liquid bleacher, according to recipe, and pours over ginger; closes tumbler and turns wheel which, by means of gears, causes tumbler to rotate; after specific interval turns up tumbler, allowing bleacher to drain from ginger, and shovels or tips out ginger, returning it in trays to drying room; then regulates temperature of drying room by steam, hot air, valves, etc.

bleaching tank attendant (margarine);Julier's earth attendant (margarine); attends to bleaching tanks, in which oils intended for manufacture of margarine are treated with fuller's earth to take away any impurity in colour, weighs or measures and adds bleaching agent to oil which flows into tanks from washing tanks; sees washing tank attendant; engages or disengages pulley to start or to stop strainers; runs off the solution to filter presses, see filter press attendant (margarine).

blender (cereal foods and starches), see mixer (cereal foods and starches).

blender, egg, see mixer, egg.

blender (margarine); (i) blender; tips materials into blending machine, by hand unless machine has an automatic feeding apparatus, and sees that machine which kneads salts, etc., into margarine, is working properly; (ii) attends mixing machine which, by means of a number of knives revolving at high speed, blends correct quantity of water, colouring matter, etc. required to produce product.

blender (meat preserving); opens, by hand, tins of meat weighing from 1 to 1 cwt., under supervision of assistant chemist; opens lid of vacuum or steam-heated pan and, with help of another labourer, tips contents of tins into pan; may also, under instruction, open a valve, allowing ingredients when mixed to flow to rate on next floor below for further treatment.

blender's assistant (margarine); assists blender (margarine) g.v. by filling and removing margarine from blending or mixing machine.

blow-up man's assistant; opens and closes valves of blow-up, i.e. sugar melting pan, under direction of blow-up man (448) g.v.; extrudes samples with dipper, for blow-up man to test.

bolter, bread; places split beans in bags, and boils them in a copper until they are soft.

bolter, biscuits; throws paste biscuits, of cracker type, into a cauldron where they are boiled, in preparation for baking; removes biscuits from cauldron with a net when they are cooked.

bolter, fruit (four confectionery); in large establishments, prepares and cleans fruit for tarts, etc., and boils and cooks.

bolter, sauce, see sauce maker.

bolter, spice; puts given quantity of spice into a steam-jacketed pan, in which it is boiled in vinegar; lodges it out, after boiling.

bottler, milk; fills glass bottles with milk, from top of churn, according to quantities ordered, seals, by pressing cardboard disc into mouth of bottle; adds label if required.

bottler, pickle; picks off salt, by means of a spoon, from a filling stick, bottles with salted and cut-up vegetables, etc., adding spiced vinegar, or vegetables which have previously been pickled in brine.

boxer, starch; fills boxes with starch paste intended for mauling into blocks.

box hand, box man (sugar refining); fills manual bogies with maize cufe (dense mass of sugar crystals mixed with mother liquor) from chute mouth, pushes bogies along rail and tips contents down chute hopper to centrifugal machines, where crystals are dried.

breaker, cake (cocoa), receives cakes of cocoa, measuring about 17 or 18 inches in diameter, and 8 to 4 inches in depth, from cocoa pressman (448) q.v. and throws them into hopper at mill, which contains two rollers, usually made of steel and fitted with teeth; moves lever to set mill in motion and opens valve to allow broken cocoa, in pieces about size of an apple, to be ejected mechanically.

breaker, cocoa bean, see nibber.

breaker, egg; in food preparing trades, breaks shells of eggs and empties contents into a vessel for whisking, if required, places white and yolk of eggs in separate vessels. **breaker, starch;** attends a number of breaking machines, e.g. s.s. used both before and after filtering, to break up starch and to mix it with water by means of mechanical stirrers; regulates, by slide, hopper feeds, and starts and stops stirrers by means of pulley levers; regulates valves controlling water flow into tanks and also regulates outlet valves; sometimes tips starch from starch shovellers q.v. (before filtering) into tube, in cases where shovellers are not used; work sometimes done by foreman as an incidental duty.

breaker-up, caramel; takes from cutting machine, sheets of caramel paste marked into cubes, and divides into separate cubes. **briner, peel;** fills vats with orange or lemon peel, which is allowed to steep therein for long periods; goes round continually from vat to vat, examining condition of peel and testing strength of liquor, and noting salt thereto from time to time, if required; judges when process is complete and empties vats.

briner vegetables; removes and examines fresh vegetables on arrival at works; cleans and cuts them up as required, and immerses in brine in tanks; q.v. vegetable preserver (448). **butter roller and printer;** forms rolls or pads of butter of specified weight, by hand, with wooden butter "hands"; imprints on top of pat. firm's characteristic design.

butter rolling and printing attendant, butter rolling machine attendant; operates and controls machine which moulds bulk of butter into rolls, bricks, or fancy shapes of specified weight, imprints or embosses firm's characteristic design thereon, and delivers butter ready for wrapping; duties also for mounting machine attendant (margarine). **butter worker's assistant;** assists butter maker (448) q.v. by filling churns with cream, removing plugs of churn to allow butter milk to escape, etc.; may also clean internally, sweep floor, etc.

candler, egg, see sorter, egg.

strutp maker, or for sauce maker.

choffman (colliery), see primary labourer (colliery).

charcoal house man (sugar refining); char end man, kiln charger (sugar refining), kiln charging man (sugar refining), a labourer who, at the sugar refinery, in the "arrival" charcoal house, wherein spent charcoal is re-charged to restore its power of absorbing colouring matters and other impurities from sugar; empties spent charcoal over kiln heads into charging kiln machines or trays, i.e. over heated pipes through which it passes automatically and emerges re-verified.

char elevator attendant, wet; see char man (sugar refining); (1) pushes hoggies loaded with wet char, i.e. charcoal, which has been used in filters, from filters to elevator; (2) shovels wet charcoal direct into head of elevator.

char end man; (1) see filler, char cistern; (2) see charcoal house man.

charger, centrifugal machine charger, see machine man.

charger, kiln (sugar refining), see charcoal house man.

charging man, centrifugal machine

charging man, see machine man.

charging man, kiln (sugar refining),

see charcoal house man.

char man, wet (sugar refining), see

char elevator attendant, wet.

checker (sweets), see weigher

(sweets).

cheese maker's assistant; stirs milk, if required, to prevent cream from setting on top; cleans and scales grinds and milk cards; works under supervision and instruction of cheesemaker (448) q.v. and assists him generally.

chipper, orange, see cutter, peel.

chop house boy, choppe girl, chop place hand; (Lancs. and N. England terms) a chaff cutter q.v. working in a colliery, cutting hay, etc. for pot houses.

chopper, sugar; sugar cutter; places slices of sugar in machine, which cuts sugar into cubes; starts and stops machine, as necessary, by loose pulley lever; empties or removes filled delivery tray, if endless conveyor is not used to convey out sugar.

churner's assistant, assists churner (448) q.v. by helping to empty churns, solidifying emulsion by spraying with cold water, except when it is cooled in drums, and removing solid margarine in trucks. **cleaner, cocoa bean, see picker** (cocoa and chocolate).

cleaner, currant, or for cleaner, fruit,

cleaner, fruit, fruit picker (in

factory); (1) spreads on a board or

on a tray, dried or fresh fruit to be

used in jam-making or preserving or

in making cakes, etc.; picks it over

by hand, removing damaged fruit or

stones, sticks, leaves, or other foreign

matter; washes fruit, if necessary, by

hand, and lays it in racks to dry.

(2) places fruit on grid or screen in

hopper of a shaking and sifting

or other machine, which removes

stalks, dust, or other foreign matter

by sifting, by motion (with a

mechanical fan) or by other device.

And also, if necessary, washes them;

starts and stops machine by moving

a lever and regulates supply of water

to machine, where process includes

washing; sometimes supplements

machine process by hand picking

and/or hand washing; is often em-

ployed part time on other work, e.g.

as lemon splitter or peel picker q.v.

cleaner, grain; passes sugar grain into

a bin; operates and controls

machinery for conveying grain, in a

revolving conveyor, through a tank

containing water until grain is

thoroughly cleansed. cf. grain

cleaner (432).

cleaner, kernel; washes outside of

kernel with hot alkaline solution,

petrol, or benzol, to remove

traces of palm oil.

cleaner, meat; meat washer; washes

and cleans meat, preparatory to

pickling; frequently done by beef

picker (448) q.v.

cleaner of raw beans (grain milling);

(1) attends machine for pumping

water over beans; regulates valves

controlling supply of water to

machine and regulates valves, slides

or other device controlling auto-

matic flow of beans through machine;

(2) adjusts, according to size, suc-

cess of oscillating sieves, in which

dirt or dust is removed from beans

by dry process; brushes sieves at

intervals to prevent clogging; starts

or stops machine by lever and regu-

lates supply of beans to machine.

cleanser, potato; (1) places potatoes in

rotary drum, whose inside surface is

rough, like a mangle roller; causes

drum to revolve, by hand or power,

in tank of water; (2) puts potatoes

in tank of water and scrubs them, by

hand, with a brush.

cleanser, rice; rice polisher; feeds

beans with rice, which passes there-

consisting of three parts, i.e. separat-

ing, polishing, and brushing, con-

ducted by spouts with worn con-

vexors; regulates working of machine

and aims to spouts, bags, into which

cleaned rice is passed automatically,

cf. rice miller (432).

cleanser, tank (sugar refining); a

labourer who cleans tanks used for

liming or other purposes, and fetches,

carries, and does other unskilled

work, e.g. work of bag dryer q.v.

cleanser, tin (bakery); wipes baking

tins, by hand, with a cloth, to remove

therefrom dust or other foreign

matter; sometimes also greases tin,

see greaser.

cool attendant, wash-off (sugar re-

fining); regulates cocks, or valves, on

charcoal cisterns; directs liquor and

sweet water to separate tanks, and

other water to main drain.

colour boy (sugar refining); squirts

liquid alkaline solution into central

portion of machine, while machine is

in motion, to intensify whiteness of

sugar; or adds colour to white sugar

in making yellow crystals.

confectioner's assistant; assists sugar

boiler (434) q.v. in one or more of

sugar boiling duties, e.g. weighing

or mixing ingredients, placing

"boil" in pans, turning out "boil,"

colouring; does not decide degree of

colouring, etc., necessary, but works

under direction of sugar boiler; cf.

confectioner's assistant (448).

cooler attendant (milk), see cooler,

milk.

cooler, golden syrup; golden cooler

(slang), see cooler man, syrup.

cooler hand, cooler man, vacuum

cooler man (sugar refining), see

cooler man (sugar refining).

cooler man (sugar refining); golden

cooler man (slang); golden syrup cooler,

golden cooler (slang); operates valve

allowing syrup to flow into a cylindri-

cal enclosed vessel having tubes

running through it, through which a

stream of cold water passes contin-

ually to cool syrup quickly; fills barrels

from tap, using a large funnel.

cooler, milk; cooler attendant (milk);

(1) is responsible for seeing that tanks

into which milk flows after pasteuriza-

tion and cooling, do not overflow;

opens tap, by hand, as each tank

becomes full, or allows milk to flow

into can or other receptacle;

closes tap when can or receptacle is

full, and puts empty can in position

under tank; or fills cans or bottles

with milk as it flows direct from

cooler without passing into tank;

keeps milk in tank, as each tank

before distribution to consumer by

placing filled cans on ice, or in

refrigerating apparatus.

corn labourer (grain milling); general

term for any unskilled worker

engaged in shelling corn or lifting

and wheeling sacks in a flour

conveyer, bucket, basket, or

bin; self porter, icing room worker;

(1) spreads jam, cream and cheese paste

on biscuits by hand, using a knife,

and, when required, succeeds small

pieces of icing sugar on biscuits

with a small icing stick.

(2) specially-shaped nozzle; (3) feeds and

controls machine for applying jam or

paste to biscuits; places biscuits, by

hand, in specially constructed grooves

on a travelling band, and regulates

amount of jam or paste passing

through slots to biscuits; when biscuit

and/or jam is finished, also feeds

machine with biscuits for supercool-

ing to form sandwiches.

greenery hand; general term for un-

skilled worker engaged in making,

preparing, packing, and/or selling

products of a creamery; includes

butter rolling and printing atten-

dant, cheese maker's assistant, cooler

attendant, milk cooler, milk receiver,

milk separator, separator minder

q.v.; in Scotland, a worker in a

margarine factory.

crusher, cocoa; cocoa bean crusher,

see nibber.

crystallizer ha-1, crystallizer man,

see heater man (sugar refining).

crystallizer's assistant (sugar confectionery); assists crystallizer (436) g.v. by filling trays with sweets before they are dipped in pans, and by draining and spreading sweets on trays after crystallization.

cutler, extruder (sugar confectionery); (i) puts rolled slab of caramel paste through cutting machine, which by means of a series of disc-shaped knives revolving on a spindle, marks off paste into cubes, starts and stops machine by moving a lever; (ii) cuts nougat into caramels by placing slab of nougat on a travelling band, which carries them under mechanical cutters, takes them off at other end, and places them on another travelling band, set at right angles to first, which carries them under another set of cutters; stacks slab of nougat, which are not cut quite through; starts and stops cutters and travelling bands by moving levers.

cutler, chaff; performs some or all of following operations:—(i) sorts or wheels trays of hay, clover, or straw from store room to chaffer; lifts tonnes on to a raised platform with a boy fork; cuts strings binding hay, etc., picks up with a fork, required quantity of hay, etc., and places in a horizontal chute or slot leading to a grip roller which carries it to chopping knives; feeds sifting machine with chaff which is mixed with other qualities of chaff, according to instructions of foreman; shovels chaff or "dust" into bags to be weighed; clamps bags to foot of chute connected with elevator, takes them off by hand, when full, and weighs them, ties up sacks of chaff and of "dust" after they have been weighed.

cutler, hay (not agricultural), or for cutler, chaff.

cutler, jelly; cuts jelly, received in trays from jelly pourer-out g.v., into cubes either by pushing tray under knife and depressing handle, or by pushing tray under cutters of machine, and operating machine by means of a lever.

cutler (oranges and lemons), lemon cutler, orange cutler, see cutler, peel.

cutler, peel; candied peel cutler; cutler (oranges and lemons), lemon cutler, orange chopper, orange cutler, shredder; cuts orange or lemon peel for use in marmalade making or candied peel, which is in cake making) by putting it in channel of a machine where it is brought in contact with revolving knives and sliced; removes sliced peel from tray at delivery end of machine; is sometimes employed part time as lemon splitter, peel pulper g.v. or as other unskilled work.

cutler, potato; potato slicer; (i) slices potatoes, by hand, by drawing them across a flat plater fitted with sharp cutter; (ii) puts potatoes into machine where they are sliced by revolving knives; starts and stops machine by moving a lever; removes delivery box when filled, and puts another in its place; usually employed part time on other work, e.g. as fruit and vegetable presser g.v.

cutler, sugar, see chopper, sugar.

cutler (novel), sweet cutler; (i) rolls confectionery paste, by hand or by machine, into slabs or sheets; cuts these into cubes or oblongs, by hand, with a knife; (ii) cuts confectionery paste, nougat, etc., into bars, squares, or other shapes, either by moving a lever to raise and lower a knife, or with a power-driven circular saw, or is a cutting machine, which by starts and stops by moving a lever; in small firms, often spends part time in other work, e.g. in work of roller (ball sweets) (435) g.v.

cutler-up, biscuit; breaks up rejected biscuits with a small iron hammer, or cuts them up with a small circular saw for sale as broken pieces: usually combines this duty with work of biscuit sorter g.v.

cutler-up (flour confectionery); (i) cuts up paste mixture, by hand, for tins, small cakes, etc., using shaped metal stamp; fills tins with these shaped pieces of paste mixture, ready for baking; (ii) inserts metal stamps, of required size and shape, in machine; empties dough (paste mixture) into hopper of inchies; starts and stops machine by moving a lever; takes out stamped pieces of dough and helps in filling tins, etc., therewith.

cutler, water (biscuit manufacture); collects sheets of wafers from water machines, and cuts them, by hand, into specified shapes and sizes, or bring them in contact with revolving saw, which is set in motion by moving a lever; is usually employed part time in filling, emptying, or carrying tins, in cleaning moulds, etc.

dairyman's assistant; assists dairyman (448) g.v. in milk factory, margarine factory, or creamery, by washing and scalding churns, separators, etc.

decarboider (sugar refining); attends a number of steam-heated cylinders (usually four) in which animal charcoal is decarbonized after purification in char kiln; fills cylinders, by hand, with charcoal, or more usually, fills elevators, or hoppers supplying elevators with charcoal; regulates steam valves heating cylinders, as necessary; sometimes also trunks, stacks, etc., charcoal.

decolorizing machine, milder (pepper); places pepper, in bulk, in decolorizing machine, which automatically removes bulk; regulates machine by means of a lever; removes decolorized pepper from machine.

drawer-off (sugar confectionery); draws or pulls out by hand, one end of a thick rod of plastic boiled sugar, forming it into long sticks about the dimensions of an inch in diameter; cut sticks into lengths and passes to ball roller (435) g.v.

dresser (cereal foods and starches); feeds hoppers of sieving machines with mixed ingredients for food powders; starts and stops machines, as necessary, with loose pulley lever; cleans silk sieves with a hand brush and shovels sifted powder; work usually done by mixer (cereal foods) g.v.

dresser, cocoa; keeps replenished the hopper which feeds dressing machine; elevator attaches bags to delivery end of dressing machine and removes filled bags from time to time; clears the silk sieves covering revolving cylinders by means of hand brush and changes and washes sieves, as necessary; starts and stops machine, as necessary, by loose pulley lever.

drummer, flour; flour sifter; moves flour sifting dressing machine into series with mixing machine (operated by flour mixer g.v.); flour is then automatically filled by silk sieves, rotating brushes, or other means.

dried milk machinist, dried milk maker; milk dryer; (i) operates and controls milk-drying machine; regulates supply of milk to rollers, and sets knives for removing dried milk from rollers; (ii) milk powder worker; operates, under direction of engineer, the spraying plant by which condensed milk is sprayed into a special chamber and falls as fine powder.

dry chow hand attendant; opens slides to allow dry chaf, i.e. charcoal before use, in filters, to run on to elevator bands for transmission to filters; operates switches to start and stop elevator bands.

dryer, bag (sugar); dries bags, used for filtering sweet liquor, after they have been washed by bag washer g.v.; arranges wet bags on hot pipes; folds and stacks bags when dried when dried in special drying room, regulates heat by steam, hot air valves, etc.; sometimes also washes bags.

dryer (cereal foods and starches); spreads food powders on trays to dry, or more usually, shovels it into steam or gas-heated revolving cylinder; stops cylinder when powder is dry and shovels out dry powder; usually gas heated cylinders are used, lights and regulates gas jets, as required; work usually done by mixer (cereal foods).

dryer-man (cattle cake); attends a number of steam-heated drying cylinders through which the cakes hawk automatically passes, regulates amount of husk feed through hoppers, by slides, and watches to see that feeds do not become choked, in which case clears chokes, sets machines; clears run between and around the machines; reports defective running to foreman.

dryer, milk, see dried milk machinist.

drying man (sugar refining); pushes bogies containing cane slabs to drying stores, where they are mechanically propelled through stores; pushes bogies, as they are mechanically ejected from stores, to cube-cutting machine.

drying room band (sugar confectionery); receives wooden trays filled with lozenges or other sweets; places trays in racks in a store room, heated with steam pipes, until lozenges, or other sweets, are dry and hard; elevator man (flour milling); attends elevator in flour mill, wheeling sacks of corn and flour to and from elevator, etc.

evaporator man (vacuum dryer), Eddie evaporator man; opens door of evaporator; places article to be evaporated, i.e. milk, milk chocolate, etc., on shelves; closes door, and sets machine in motion to draw air out of compartment in which article is placed.

filler, cask; (i) runs off vinegar from vats into casks and seals for despatch to warehouse; (ii) fills casks with pickles, spices, condiments, etc., and seals ready for export.

filter, char, distern; charcoal distern filter; (i) carries filled char down, places filter sheets at bottom of char distern; opens a chute, fed from a hopper which is kept supplied with charcoal by a conveyor band, and moves it about, as required, so as to distribute charcoal freely as it runs into distern, water inside distern, packing charcoal down level and preventing larger grains from accumulating at side of distern; when charcoal is spent, opens door at bottom of distern, a strong charcoal to run out; scrapes out small quantity that does not run out and removes filter sheet.

filter, jam filler; fills bottles, jars, etc., with boiling jam from receptacles; stacks filled bottles, etc., on racks to cool.

filter (liquid glucose); filter-out (liquid glucose); fills casks with liquid glucose, places vats in liquid glucose, places vats in liquid glucose, and pulls slide to open valves and run liquor in casks.

filter (meat preserving); packer (meat preserving); fills tins, jars or bottles with meat extract, potted meat or tongue.

filter, mince-meat; fills pots, jars, etc., with mince-meat.

filter, mustard; places empty tin, by hand, on automatic weighing scale attached to filling machine; releases tap of filling machine to allow mustard powder to flow into tin; closes tap when correct weight is registered, and removes tin from weighing scale.

filter-out; (i) (solid glucose) throws over loose pulley lever, as required, to start and stop stirring apparatus fitted to vats containing glucose liquor run from vacuum pan, of pan mass (solid glucose) (445); stirrers complete the thickening process; when stirring is complete, opens outlet valve to allow glucose to flow into shallow trays. (ii) (liquid glucose), see filter (liquid glucose).

filter, pickle, see bottler, pickle.

filter, starch; pours liquid starch into small square tin lined with rubber-like substance, in which starch is evaporated into blocks by hot-air suction.

fill house man, see machine man.

filter man, charcoal; in conjunction with other workers, operates hopper slides to run burnt, reactivated charcoal from endless conveyor into top of char filter canister, or "jerry"; takes out spent charcoal and opens hopper slides beneath "jerry" so that char falls into pipes and passes from top to bottom of charcoal reactivation machine, of kiln man (char house); regulates (at bottom of char house) the speed of band conveying reactivated charcoal to the top of char house for charging "jerry".

filter man (glucose); attends to cylinder filter machines fed with starch solution (or thin paste), pumped from storage tubs (see starch breaker) and sucked on to the revolving filter cylinders by means of vacuum; thus drawing off water containing glucose, etc., impurities not removed by paddle (448) g.v., while residual caked starch is scraped from the cylinders and falls into hoppers feeding further break machines; removes and washes filter cloths, prints cloths (by slipping under the cylinder wires and tacking), and scraper bars periodically; watches filtered starch and reports defects in passing of machines to work manager.

filter pan hand; attaches filter cloths to filter plates used in filter presses and screws plates into position in presses; removes cloths for cleaning, as necessary; or fills revolving cylinder with filter cloths for washing; starts and stops cylinder by loose pulley lever; regulates water flow in machine; removes and stacks washed cloths.

filter press attendant (margarine); attends to filter presses in which oils intended for manufacture of margarine are filtered, after passing through washing and bleaching tanks; regulates valves of bleaching plate to control flow of bleached oil from filter plates; periodically stops flow of oil, opens press and pulls caked "bleacher" from the filter plates.

fisher, longage, see picker, longage.
fish worker; general team for workers, mainly semi-skilled, engaged in preparation of fish for canning, etc.; includes fish gutter (448), hanger, fish tender, bobber, g.v.

floor hand (sugar refining); cleans floor of sugar refinery by sweeping up spilt crystals, shovelling up crystals and molten liquor, or washing floor with hose.

floor room hand (floor confectionery); acts as floor mixer g.v., shifts and stacks sacks of flour, starch and starch empty sacks, or cleans away other labouring work in floor room under direction of foreman (438) g.v. or of skilled floor blender (448) g.v. or fodder man (colliery), see granary labourer (colliery).

fuller's earth attendant (margarine); or bleaching tank attendant.

gatherer, starch; takes charge of setting frames, into which liquor taken from macerator has previously been poured; governs rate of flow of starch liquor over frames by regulating slides; scoops or shovels starch from frames when deposited; periodically, e.g. twice a day, stops feed of starch to frame, removes frames from their setting and washes them; assists golden syrup maker (445) g.v. by fetching and carrying, opening and shutting valves under his direction.

grainman, vinegar; empties, by hand, sacks of barley into tanks or cisterns of water, to steep. It removes grain after steeping from tanks or cisterns by hand, with a wooden shovel, and steers it on ground, where it remains for about three weeks; during this

time turns grain over with a wooden shovel, to allow air to get to it, then fills baskets with grain, and sends it to kilns.

granary labourer, granary man (colliery); chafhouse, fodder man; a surface man who has charge of passenger (see chaf cabin), and distributes provender required for horses and ponies.

granary labourer, granary man (grain milling); loads and unloads grain, etc., and does other unskilled work in granary.
granary woman; cleans offices, sweeps floors of granary; cleans bins or vans; sometimes also pushes hand trucks and makes up empty sacks into bundles.

greaser (floor confectionery); brushes or sprays liquid grease on tops of loaves before they are placed in oven, to give loaves a polished brown surface.

greaser, tin (bakery); smears grease, or applies liquid grease with a brush, on inside of bread, cake or pastry tin, in readiness for their being filled with dough, etc.; sometimes done by tin cleaner g.v.

grinder, almond; pours bleached almonds for making almond paste into hopper of grinding mill, controlled by means of a lever; removes ground almonds from delivery trough from time to time.

grinder (cereal foods and starches); pours mixed food powders into a disintegrating machine which reduces ingredients to a finer powder by means of revolving blades; or pours powder into bowl (chase) of edge-runner mill, commences grinding until he judges powder to be sufficiently fine; "bags" ground powder; where a sifting attachment is fitted to machine, periodically brushes sieve; work sometimes done by mixer (cereal foods) g.v.; cf. sifter (cereal foods and starches).

grinder, ginger; shovels ginger into large mill equipped with grinding stones; watches progress of grinding, and shovels out ginger when process is complete; often works part time as pepper grinder or as spice grinder g.v.

grinder, pepper; as for grinder, ginger; often employed interchangeably as ginger grinder or as spice grinder g.v.

grinder (solid glucose); with iron bar or edger, knocks slabs of set glucose from the setting trays, stacks on trucks, wheels to grinding machine, breaks up slabs and throws into hopper of grinding machine; occasionally stops machine to clear chokes; ground glucose is carried away by delivery conveyor.

grinder, spice; as for grinder, ginger; often employed interchangeably as ginger grinder or as pepper grinder g.v.

grinder, sugar; sugar mill attendant, sugar mill worker; keeps replenished, hopper of mill for grinding sugar crystals to an even grain, or when endless conveyor is used, watches to that constant feed is maintained and that delivery band collects the ground sugar effectively; starts or stops mill, as necessary, by loose pulley lever; reports fault running to engineer or foreman; sometimes employed part time on other work, e.g. packing bags, trucking.

grinding machine blender (cocoa); assists cocoa grinder (445) g.v. by tipping cocoa nibs into hopper of grinding machine, when not done by filler g.v.
handyman (sugar refinery); cleans up floors and yards; assists in loading and unloading sugar and charcoal, and does other similar unskilled jobs.

hanger (fish curing); cures; places spits, or rods, on which spilt fish are hung, in smoke house, under direction of smoker (437) g.v.
hafter man (condensed milk); works in pasteurising room, in which temperature is high; keeps correct temperature of heat in pasteurisers, by

regulating steam valves, and maintains supply of milk in pans by governing flow of milk into pans and of heated milk from pans, by means of inlet and outlet valves.

hafter man (sugar refining); cooler hand, cooler man, crystalliser hand, crystalliser man, vacuum cooler man; adds water to heaters, receivers, coolers or crystallisers, i.e. open tanks placed under vacuum pans into which cooled sugar (masse cuit) passes after treatment in vacuum pans; scrapes sides to prevent clogging; starts and stops agitator gear, e.g. mechanical stirrer; watches progress of crystallisation and reports periodically to engineer or foreman.
hoist and stove girl (sugar confectionery-laboratory); in small liquorice factory, carries drying boards to and from stove, and also operates hoists or lifts.

holder, bag (grain milling); assists flour porter g.v. to lift loaded bucket of grain on to hook of weighing scale; holds mouth of sack open during process of filling.

hopper attendant (margarine); in charge of lifting gear by which trays of margarine are lifted and contents tipped into hoppers supplying multiplexes, i.e. kneading machines; shovels margarine into the conveyors feeding hoppers; starts and stops conveyors, as necessary, by pulling lever; in large factory, multiplexes, cf. multiplex attendant.

hopper man (grain milling); shoots grain, beans, etc., from sacks into hoppers, whence grain, etc., is automatically conveyed through aprons or by cap elevators to machines.

icing room worker, see coverer, blent.

intake man, grain intake man (grain milling); at a signal from men on ship, barges, etc. alongside, wharf that section pipe is inserted in grain, starts air pump, which draws up grain through pipe by suction; grain is automatically weighed as it enters mill, and passes direct to the cleaning machine; stops pump if section pipe becomes choked; tests weighing apparatus from time to time with standard weights.

jelly pourer-add; pours jelly mixture from large stirring pan into buckets it has been loaded with jelly boiler (448) g.v., into smaller shallow trays, where jelly is allowed to solidify; takes trays of set jelly to jelly cutter g.v.

keeper-up (sugar confectionery); takes off or collects finished balling machines, two weeks made by ball roller (435) g.v.

keeper-up (sugar confectionery); as for sauce maker.

kibbler (cocoa); (i) see nibber; (ii) where work is seasonalised, fills hopper with beans; controls by means of lever or switch, rubbing machine which crushes beans and grinds into different degrees of fineness; cleans sieve; attaches bags for receipt of graded crushed nibs, etc.; attends a number of such machines; sometimes does work of "finger" nibbler.
kibbler, roller; sits spits in hopper of grinding machine (resembling a coffee grinder), and turns crank, by hand.

kiln drawer (sugar refining); removes charcoal, either newly made or recharged, from foot of kilns when ready for use in char house.

kiln fireman (grain milling); stokes furnace supplying hot air for drying kiln; when required temperature has been reached, starts fan, to drive hot air from furnace through drying kiln.

kiln fireman (sugar refining); lights, replenishes and stokes fire under kiln, or works oil feed coils in case of oil engine or oil-fired engine.

kiln man; supervises drying of washed peas, beans, lentils, etc., over a coke fire by steam apparatus.

kiln man (char house-sugar refining); has charge of a number of charcoal reactivation kilns, e.g. sixteen, regulates by screw valves, heat gas return, opening furnace doors from

time to time to inspect state of furnaces; working in conjunction with charcoal filter man *q.v.*, watches to see that there is no choked charcoal in kiln pipes, by ensuring that there is a steady feed to the charcoal conveyor under the kiln; if there is a choke, signals for stopping; if there is a choke, signals for stopping; shuts off furnace and clears stoppage.

kiln man (sugar refining); general term for any worker at kiln, including kiln charger, kiln drawer, kiln fireman *q.v.*

kiln minder (grain milling); conveys sacks of grain from store and shoots grain into kiln; regulates supply of steam to kiln; removes grain, when dry, into sacks.

kiln trimmer (sugar refining); levels with a shovel, charcoal in bunkers over kilns in which charcoal is re-burnt after being used in sugar refining process.

kneader (margarine), *see* blender (margarine).

kneading table (margarine); (i) with another worker, either attends to kneading table or on salt is kneaded into margarine on a circular chase by means of rollers, i.e. feeds rollers with salted margarine or gathers margarine on the "chase" and works it into large balls for conveying to the multiplex, *cf.* multiplex attendant; controls knoeading machine by means of pulley lever; (ii) is engaged on a kneading table whereon margarine from multiplex is kneaded by a fitted one roller working over a circular chase; throws margarine on to chase; cuts margarine on chase and when he considers that margarine has reached consistency, sufficient water having been expelled, stops machine by pulley lever and assists in removing margarine; refills chase with fresh margarine or presses margarine just emptied from the kneading machine into a second machine for final kneading by means of revolving knives, tips kneaded material into trucks for conveying to moulding machine attendant *q.v.*

labourer, fruit (canning); carries heavy trays of fruit, removes this after filling and does other unskilled work in fruit canning factory.

labourer, kiln (miller's); under direction of kilnman, kiln minder or roaster (448) *q.v.* or other relatively skilled worker, cleans machines, sweeps floors, bags waste products, etc., separated from grain, and assists in turning over grain in kiln with hand shovel or rake; fetches and carries for kilnman, etc. *q.v.* and assists him generally; sometimes specifically designated, *e.g.*, cut kiln labourer.

labourer, sugar house; shovels sugar into and out of machines and tanks, and does other unskilled work in sugar house, *e.g.* trucking, spreading, etc.

leveller (sugar refining); (i) levels charcoal in char cisterns as it is shot in by char cistern filler *q.v.*; (ii) a labourer spreading charcoal on the char end.

lime tank attendant (sugar refining); regulates supply of lime and water to tanks by operating valves; stirs mixture, until it attains consistency of milk of lime; opens valve, and allows milk of lime to run off into hoggies; pushes hoggies about, wherever required.

liner, tin; tin popper; in large bakeries, lines inside of cake tins with thin greased paper, in readiness for their being filled with cake mixture.

linker, sausage; punches and twists a weighed length of filled sausage casing to form short lengths or sausages; folds and bundles up, with strip of paper, sausages ready for despatch.

liquor man's assistant, liquor man's mate; assists liquor man (sugar) (448) *q.v.* generally, *e.g.* opens and closes valves under instructions, flushes empty charcoal cisterns.

flooder (sugar confectionery); conveys bread, etc., from store room and loads it into vans; usually done by store hand *q.v.*

flooder (grain milling); loads bags, boxes, barrels, etc., of flour, oatmeal, etc., on to lorries, trucks, carts, etc.

loftman (grain milling); (i) stands at top of mill and manipulates hoisting tackle for raising empty bags, etc.; (ii) in Scotland, general term for any man employed in a granary (i.e. left) as a warehouseman, in loading and unloading, storing, etc.

machine assistant (scraps); assists, with other minder workers, biscuit machine minder (433) *q.v.* and performs one of following operations—feeds rollers with dough; watches separation of cut biscuits from scrap dough, and picks off loose pieces of scrap; watches automatic placing of cut biscuits on baking time and picks off scrap dough; feeds machine with baking time; lifts (ins of cut biscuit dough from end of machine and places them on racks for transit to ovens.

machine man, centrifugal machine man; charger, churning man, centrifugal machine charger; centrifugal machine charging man, all these men, except (centrifugal machine); shovels wet sugar with wooden scoop into sugar container, or opens valve and allows sugar crystals in mother liquor to flow from worm trough into centrifugal machine; operates and controls, by means of loose pulley or switch, centrifugal machine which drives off syrup and so dries sugar crystals; if necessary turns on high pressure spray of water to wash sugar; discharges sugar, which is now dry, using a screw conveyor; unless machine is equipped with mechanical discharging apparatus; syrup is conducted to pans to await treatment in vacuum pans.

machine minder's assistant (grain milling); assists machine minder (432) *q.v.* in labouring work, *e.g.* moving sacks, stoking furnace, cleaning machines, sweeping floor; *cf.* cleaner (grain mill) (370).

malt man, vinegar; a labourer in malt room of a vinegar factory; duties similar to those of malt room man (brewery) (459) *q.v.*

maltster (vinegar), *see* mash house man.

margarine maker, margarine worker, also-margarine maker; general terms for any person employed in manufacture of margarine, including bleaching tank attendant, blender (margarine), blender's assistant, margarine charger (448) *q.v.*

mash house man (vinegar); maltster (vinegar), vatman (vinegar); empties sacks of grain, by hand, into hopper of grinding machine which is on next floor below; opens a valve, by hand, and allows grain to flow from hopper into grinding machine; sets machine in motion; grain, now reduced to powder, is transmitted mechanically to hopper of vat, a cylindrical iron vessel about nine feet deep, in which it is mashed by application of hot water; opens valve, and allows hot water to flow into vat; ensures that correct temperature is maintained, either by opening, by hand, lid of vat and allowing steam to escape, or by adjusting hot water valve; when process is complete, removes metal plate from bottom of vat, and pushes mash through this opening into pipe of conveyor with a long wooden rod, watches to see that grinding machine is running smoothly and cleans vat with a brush or broom when necessary.

mealman (grain milling); in small mills, places grain in stone mill for crushing into meal; draws meal off into bins; sometimes done by stone-man (432) *q.v.*

melter, fat (margarine); margarine melter, melter control man, melter man (margarine); runs known quantity of oil from storage tanks into steam-jacketed melting tanks, and tips in, by hand, measured quantities of constituents fats from barrels to liquify them; controls temperature of tanks by steam cocks and regulates mechanical stirrers, when tested by taster (448) *q.v.*, opens a valve which puts a steam pump in action, causing liquefied fats to flow through pipes, either to refining room for further treatment, or to churns.

melter (sugar refining), melter man (sugar refining); watches process and regulates, by means of valves, quantity, temperature and specific gravity of liquor leaving melter, i.e. a longitudinal vessel provided with a spiral conveyor, used instead of a blow-up plant.

milk room man; in margarine factories, opens valves to run skimmed milk into hot water-jacketed tank and pours in scouring solution; allows milk to cool and, according to weather, turns on steam to heat water to take the lactic acid up to temperature required to sour the milk; runs soured milk through steriliser and then pumps into cookers, watching temperature of milk by using thermometer and meter regulates flow and working of pump by pulley lever, valves, etc.

milk powder worker, *see* dried milk machinist.

mill attendant, starch, *see* mill man, starch.

mill attendant, sugar, *see* grinder, sugar.

miller (maize); attends six mills for grinding maize used in making starch or liquid glucose manufacture; regulates, by slides, quantity of steeped maize passing through channels to mills; occasionally takes a sample of milled grain flowing from mills and if he considers that machines need adjusting, stops machines, by throwing over gear lever, and reports to works manager.

mill hand (horse feed); operates and controls two or three machines for mixing ingredients used in the manufacture of oil cake, etc., for horses; feeds hoppers, by hand, from sacks, or more usually, regulates continuous feed by slides; watches to see that there are no "chokes," and clears such when they occur; starts and stops machine, as necessary, by pulley lever; bags mixed ingredients as they are delivered from machines through chutes.

mill hand (mustard); feeds mustard grinder *q.v.* by bagging ground mustard seed, i.e. mustard flour, and trucking bags of flour to mustard blender (448) *q.v.*

mill man, starch; starch mill attendant; empties rice from sacks into hopper on floor above mills in which it is to be ground, and does any other labouring work in starch mill.

mill worker, sugar, *see* grinder, sugar.

mixer boy (sugar refining); (i) regulates, by loose pulley lever, belt carrier which conveys raw or imperfectly refined sugar to first vacuum floor, to be mixed with other sugar in preparation for refining; sometimes assists in filling hoppers supplying belt; (ii) attends blow-up instead of adult blow-up man's assistant *q.v.*, or attends tanks in which sugar liquor is treated with sulphurous acid, turning valves on or off and doing odd jobs for workman in charge, *e.g.* inversion man.

mixer (cereal foods and starches); **blender** (cereal foods and starches); under foreman's instructions, weighs ingredients for food powders and pours into rotary mixing machine; controls machine by loose pulley lever and shovels out mixture after specific interval, adds colouring and flavouring when not done by foreman; usually also does work of dresser and dryer (cereal foods) and sometimes work of grinder (cereal foods) *q.v.*

mixer, egg; egg blender; stirs and mixes ingredients for liquid egg mixture, under direction of chemist, in small establishments, also tests mixture.

mixer, flour (flour confectionery); empties by hand, quantities of different kinds of flour, in proportions decided by flour blender (445) *q.v.*, into machine which, by means of a rotating cylinder, mixes flour with sugar, assists in weighing flour, trucking from store, etc.; often also assists in bakehouse, *e.g.* greasing tins, etc.

mixer, fruit; (i) weighs out correct proportions of fresh fruit and sugar, according to recipe, mixes and places them in large tubs to stand until required for jam boiling; (ii) weighs out correct proportions of ingredients of mince-meat, according to recipe, chopping or mincing them (if necessary), either by hand with a knife, or by putting them in hopper of a machine which is set in motion by moving a lever; mixes ingredients, which may be done in various ways in different establishments, and stirs them together.

mixer, sugar (condensed milk); cleanses sugar syrup and prepares solution for mixing with milk before condensing process is started; boils syrup in steam-heated tanks, regulating steam valves as necessary; skims scum from syrup, adds preservatives, colouring, flavouring agents, etc., as necessary, and runs off the mixed solution.

mixing room worker (biscuit making); weighs (biscuit making); weighs out specified quantities of ingredients for the manufacture of biscuits under direction of mixer (438) *q.v.*

montajuela attendant, montajuela boy; stands by valves of montajuela apparatus by which level of a liquid in a tank is raised by steam or air pressure.

moulding machine attendant (margarine manufacture); with another worker, either (i) presses margarine into contact with worms which convey it through rollers and press it through moulds, delivering it in cylindrical form, or (ii) raises and lowers a frame containing knives or wires which cut margarine into 1 lb., 1 lb. etc. lots as margarine emerges from moulds; works treadle to engage or disengage pulley lever, lowers moulds and sets cutting knives in frame as necessary.

multiplex attendant (margarine); with other workers, is stationed either at feed end or delivery end of multiplexes, *i.e.* kneading machines in which margarine, after kneading and sometimes after first cooling (*cf.* kneading table attendant) is pressed into a solid mass and salt added; shovels margarine into feed hoppers, or, when stationed at delivery end, cuts, with hand knife, blocks of margarine as it emerges from machine.

neutraliser, neutralising man (solid glucose); mixes whitening, lime, etc. to neutralise and clean acidified starch liquor; operates as for neutralising man (sugar refining).

neutralising man (liquid glucose, *as for neutraliser* (solid glucose); weighs and mixes soda with water; boils and adds to vats.

neutralising man (sugar refining); weighs, measures and mixes lime and other ingredients to neutralise acidity of sugar liquor, and to assist clarification, etc.; pours mixture into open lead-lined vats containing sugar liquor from time to time as directed by chemist or by inversion man (448) *q.v.*; takes samples to laboratory in time to time, as required; carries trucks, etc., as required; sometimes also does other unskilled work, *e.g.* that of tank cleaner *q.v.* **ribber**; *cocoa bean breaker*, *cocoa bean crusher*, *blipper*, *winnowmer*, *winnowing machine* *runner*; operates and controls machine which crushes roasted cocoa beans by means of rollers, draws off husk and impurities by means of an air blast and which sifts crushed cocoa into degrees of fineness and delivers them into bags via grading chutes; fills hopper with cocoa beans; starts up machine and adjusts hopper feed by regulating hopper slide; watches process through glass doors in machine and regulates intensity of air blast; if necessary, adjusts setting of crushing rollers; cleans sleeves with hand brush; clamps bags beneath the grading chutes and, on the reverse side of machine, clamps bags for receipt of winnowed husks, keeps hopper full of beans, or empties bags, as necessary; in works where chocolate grinding machine is placed on floor below, fills hopper of this machine, *cf.* chocolate grinder (445).

nut room worker (sugar confectionery); general term for any worker preparing nuts for sweet making, including nut blancher, sheller, *ester* *q.v.* **outflow basin attendant** (margarine); attends to crystallising vats in which ingredients of margarine, after mixing and obtaining to consistency of cream, are crystallised by flow of ice-cold water; under direction of channer (448) *q.v.*, regulates flow of water on to water in a hole, covered and kneads water and margarine with special wooden tool, water flowing from vat as waste; crystallised margarine falls into a large wooden vat, at bottom of which is a hole, covered by a trap-door, opens trap-door when vat is full, letting margarine fall into truck beneath.

oven assistant, oven feeder, see assistant ovenman.

packer, flour packer (grain milling); **packer** (grain milling); feeds a sack by hand, by a clamping arrangement to end of large circular chute, through which flour runs automatically from drawing machine; pull lever which allows flour to drain to floor into sack; flow stops automatically when required quantity has entered sack; packs flour more closely into sack with a punch, or tamping machine, operated by foot lever; lifts sack by hand, from automatic weighing machine on which it has been standing, and checks weight it on an ordinary weighing machine; sews up open end of sack or ties it up with string, since which it is away or puts chain round it, ready to be hoisted and removed; *cf.* packer (grain milling) (249).

picker (meat preserving), see filler (meat preserving).

picker, tin, see liner, tin.

picker, biscuit, see cooperer, biscuit; **picker, onion**; peels onions for pickling; see picker (pickles), and cuts away any defective parts.

picker, orange (jam making); peels orange by hand, for marmalade making; usually done by machinery, see pulper, orange.

pepper maker; decorates pepper, see decorating machine minder; grinds pepper, as for grinder, pepper, also as pepper by hand, into grades according to colour. **picker, almond**; sorts blanching almonds, rejecting those that are faulty or discoloured.

picker, bone (preserved meat); removes bone, removed by butcher from carcasses and joints, and cuts off, for preserving meat, still adhering. **picker** (cocoa and chocolate), *cocoa bean picker*; *cocoa bean cleaner*, *cocoa bean sorter*; picks out inferior cocoa beans by hand, and removes other large impurities; *cf.* cocoa bean winnower.

picker, confectionery (sugar confectionery); (i) examines trays of finished sweets before they are checked for hardening, picks out broken sweets, etc.; (ii) separates gums, fondants, creams, etc. from fruits, etc., after crystallisation.

picker, fruit (in factory), see cleaner, fruit.

picker, lozenge; lozenge finisher; a confectionery picker *q.v.* engaged in picking out broken lozenges.

picker, milt; milt picker; in fish curing, picks over cod, removes from herrings before pickling, to collect herring roes.

picker, pea (grain milling); sorts peas before splitting or grinding; rejects broken peas and grades remainder according to size.

picker-out (condensed peel); under supervision of peel candler (436), picks out candied peel from boiling syrup; sorts out, fills with thick syrup; places peel on trays and packs at a gentle heat; works sometimes done by peel candler (436) *q.v.*

picker, egg; prepares a pickling solution and places eggs therein; in some establishments, assists in packing the pickled eggs.

pickler (fish curing); soaks up liquor and places in brine, herrings prepared for pickling, before they are hung on rods for curing; removes from vats when sufficiently pickled, usually done by fish curer, *runner* *q.v.* (437) *q.v.*

pickler (pickles); puts raw vegetables into tub of brine; runs off liquor when vegetables are tenderised; transfers vegetables, which are then bottled, to bottler, *picker*; may also make mustard pickles, with tumeric and blackening spiced sauces.

plier (jam making); *pot stocker*, *stocker*; fills or stocks filled jars in vat in warehouse, to await finishing operations.

plodder attendant (margarine); attends to plodder, *i.e.* a machine which presses margarine into square-shaped blocks, in preparation for bulk packing; presses margarine into hoppers and removes blocks of margarine from delivery end of machine; controls machine by means of pulley lever; work is sometimes done at delivery end of multiplex machine, *cf.* multiplex attendant.

polisher, rice, see channer, rice.

preparer, pot (jams, pickles, etc.); sets out jars or fills appropriate size in readiness for jam making.

presser, fruit and vegetable; fruit presser, vegetable presser; (i) feeds hopper of hand compressing machine with preserved dried fruit or vegetable; places tin in position under machine; sets screw down, which sets machine in motion and fills tin with compressed fruit or vegetable; (ii) (*flex* usually) puts tin in position under power-driven and automatically compressing machines, and removes tin from delivery conveyor, when filled; is usually engaged part time on other work, *e.g.* compressing meat, fish paste, and other comestibles, pressing potatoes, etc.

press hand (sugar refining); presses (sugar refining); operates and controls hydraulic press for extracting juice from dried pulp of beet-root; fills press with bags of pulp; operates press by hand lever; removes bag of residual pulp.

press man, filter (sugar refining); controls flow of liquor, after it has left hydraulic press, through filter to receiving tanks and thence to chr. citrux, by opening or closing valves to pass liquor through particular filter bags desired, under direction of filter

man (448) g.v.; screws bag filters into position in vats and removes and washes, as necessary, when this is not done by bag washer g.v.

press man (maize meal); attends to large cylinders into which maize meal, after being heated, is automatically discharged by means of spiral coils; inserts aluminum plates at specified levels in cylinders, which, when full, are put under hydraulic pressure, for extraction of oil from maize meal.

pressman (sugar refining); see press hand.

pricker-on; see tenter.

pulper, orange; presses oranges, which have been cut in half by orange splitter g.v., against revolving, serrated steel head, which grinds out the pulp.

pulper, peel (lemons); for clear squash, receives cooled lemon halves from lemon capper (449) g.v. and removes pulp therefrom with his thumb; (u) for cloudy squash, presses halved lemons (uncooked) against revolving serrated steel head, which grinds out pulp, starts and stops machinery by moving a lever; is sometimes employed part time as peel cutter, lemon splitter g.v. or other unskilled work.

pulverizer (cereal foods); attends to number of pulverizing machines, e.g. six, watches process, taking samples of flour from time to time and regulating, by hopper slides, the feeds to machines; stops machines occasionally (by pulley lever, etc.), to clear chokes; cleans brushes and washes, as necessary.

pulverizer (coconuts); feeds pulverizer or "covered-in" mangle, with pieces of coconuts, as recovered from coconut breaker g.v., either by hand or by means of a chute; machine crushes them between two rollers, usually made of granite, and valves and slides coconuts, now reduced to powder, to flow into a bin or other receptacle; repeats process, if powder is not fine enough.

pumper, vinegar; vinegar pumpman; racker (vinegar); sets pump in motion, or opens by hand, valve allowing or forcing fermented but unclarified vinegar to flow through pipe into filtration vat, or clarification vat, i.e. wooden vessels 18 feet deep, sometimes containing wood pulp or other clarifying agent; removes wood pulp, etc., from time to time, to be washed and cleared for further use; watches glass indicator, and stops flow of vinegar, when filtration vat is full, cleans filtration vat by hand with a broom, when necessary.

racker (vinegar); see pumper, vinegar.

receiver, milk (pasteurizing, etc.); compares milk invoices with quantity actually received, records quantity received, and source of supply; may be employed at railway station where milk is received, or at central depot of firm.

returned sugar hand; pushes truck containing sugar returned from deposit room (Customs and Excise) to melting pans.

roaster, chocolate; (i) roasts chocolate in coke-heated cylinder, "nibs" it, i.e. breaks into small pieces, and grinds in hand or power-driven machine; (ii) "nibs" and grinds chocolate; roasts on gas-heated open tray; usually done by coffee roaster (446) g.v.

rubber-down (fruit); empties fruit or pulp (usually orange pulp) into hopper of machine which separates pulp, etc., from pulp, by means of rollers and sieves; controls machine by means of a lever, brushes pulp from sieve and rollers, and collects them; removes vat filled with pure pulp, which has run out of machine, from beneath machine, and replaces it with empty vat; sometimes treats other fruit, e.g. straw berries, plums, currants, in same way, changing sieves as required.

runner (flour confectionery); runs sacks of flour from floor room to mixing machine, using hand barrow or run-ways; or bread, biscuits, cakes, etc., to and from oven; sometimes specifically designated, e.g. flour runner.

sample boy; sampler (sugar refining); wash-up boy; carries samples of sugar syrup, etc., from one place to another, as directed; washes sample bottles; takes messages.

sampler (sugar refining); (i) see sample boy; (ii) insecta brier, i.e. an instrument resembling a cheese taster, into a certain proportion of bags of sugar as they are unloaded; puts sample contained in brier, together with others taken from same lot of bags, in a bucket, and takes them to chemist; also takes samples of refined sugar to Customs and Excise Officer, to assess duty.

sauce maker; sauce boiler; receives ingredients, which are mixed in exact proportions according to a standard recipe or formula, from store room or works laboratory; puts them, by hand, in a steam-jacketed "kettle", sometimes a large bag allowing sugar and other liquid ingredients to run into kettle; tests temperature of contents of kettle with a thermometer; stirs ingredients frequently with a long wooden paddle; judges when ingredients have been boiled sufficiently, or works in accordance with instructions given by chemist; ladles out small quantities, and passes them to another worker to sift for convenience of examination by chemist.

scalesman (bakery); see weigher (bakery).

scoper (centrifugal machine); see machine man.

scraper, skin; (i) scraper, with knife, loose skin from inner side of sides of pigs' carcasses in preparation for skin curing; (ii) skin scraper, house worker who washes and scrapes stomachs of cattle (trips) in a stream of water.

scraper, starch; scrapes blocks of starch prior to wrapping to remove dirt or marks from faces of blocks.

scum mixer attendant (sugar refining); (i) attends open tanks or cisterns in which bags, sugar bags and sheaths are washed, thereby recovering sugar, e.g. scum, adhering thereto; (ii) bag mixer; (iii) attends tanks in which scum is treated by injecting steam to extract and save any sugar juice that may remain; regulates amount of scum water and steam entering tank; directs off liquor, and discards remaining scum.

separator, milk; separator mindar; operates and controls machine for separating cream from milk; pours milk from pails or churns into receiver, turns separator wheel by hand or, more usually, switches on power; watches indicator to maintain required revolutions per minute; sets pails or churns to catch flow of milk and cream from separator; sometimes also takes separator to pieces and washes parts.

sheller, nut; holds nut in one hand, and cracks shell by striking end with a wooden mallet held in other hand; removes shell from kernel.

sheller, pea; (i) removes peas from pods, by hand, for preserving in bottles, etc.; (ii) shells peas in vegetable market for sale wholesale or to hotels, etc.

shooter, wheat (grain milling); unfastens mouth of sack of wheat and shoots grain into bin, hopper or other receptacle.

shoot lad (food or starch factory); stands by chutes and maintains regular flow down chute by clearing away any blocks or obstructions.

shoveller, starch shoveller; in conjunction with other workers, shoves starch of starch runs into trucks (after padding by starch paddler (428) g.v.) ready for starch breaking; when a starch breaker g.v. is not employed, pours the starch into stirring tubs or into hoppers feeding tubs.

shoveller (sugar); sugar trimmer; (i) a box man, i.e. using a shovel to fill chutes hopper feeding centrifugal machine; (ii) uses a shovel to move or turn over sugar at any stage of manufacture, e.g. to turn it over for cooling purposes.

shredder, see cutter, peel.

siever, after (cereal foods and starches); empties sacks of cereals; spreads cereals on trays for examination; in powdered starch manufacture, feeds hopper of a sifting machine with starch, and, where machine is not operated continuously from shading, etc., starts and stops machine by means of levers; sifting is often done on grinding machine, see grinder (cereal foods and starches).

siever, egg; passes liquid egg through a wire sieve previous to bottling; after, flour, see dresser, flour.

sifter, lozenge; removes sugar dust, etc., from finished lozenges in a sieve in readiness for packing.

slicer, potato, see cutter, potato.

sorter, biscuit; sorts baked biscuits and rejects those that are badly baked or mis-shapen; usually combines this duty with work of biscuit cutter-up g.v.

sorter, cake (flour confectionery); in large bakery, sorts cakes according to sizes and varieties, rejects mis-shapen or badly-baked cakes, before packing or selling.

arter, cocoa bean, see picker (cocoa and chocolate).

sorter, egg; egg candler; holds egg against powerful electric light and, by appearance, judges age and condition of egg; sorts accordingly; also sorts according to size, preparatory to picking or use in food manufacture.

sorter, fruit (jam making and fruit preserving); sorts fresh fruit by hand and rejects faulty or decayed fruit.

sorter, nut (flour confectionery); sorts nuts received from nut blancher g.v.; removes loose skins and rejects faulty nuts.

splitter, lemon, as for splitter, orange.

splitter, orange; (i) throws oranges into inclined feed trough of machine, from which they fall into a revolving cylinder, where they are brought into contact with knives and are cut into halves, falling into delivery boxes; starts and stops machine by moving a lever; removes filled boxes, and replaces with empty boxes; (ii) puts oranges in position on a grid, and presses a knife down, cutting them in halves; is sometimes employed part time in other work, e.g. as peel cutter or peel pulper g.v. or in other unskilled work.

sputman (grain milling); attends spouts for conveying stock in flour mill from one point to another by gravity; starts and stops machine by moving spout valves, slides, etc., are in proper position, and for maintaining uninterrupted flow of flour through spouts.

sprayer; sprays flavouring essences over mechanically-mixed baking powders.

spreader, lozenge; spreads newly-cut lozenges flat on wooden tray; passes tray to lozenge picker g.v.

stacker (jam making), pot stacker, see picker.

stageman (grain milling); receives sacks of wheat or other grain into mill, at landing stages, and shoots it into bins.

starch hand (female); assists male starch hand (434) g.v. prepares trays or moulds by cleaning them, and lining them with starch, to prevent adhesion thereto of "bed" or "gum"; keeps male starch hand supplied with trays, and carries them when full to shoving room to dry starch workers; generally serves for any person engaged on any process in manufacture of starch, including grain cleaner, starch sifter, grinder (cereal foods and starches), starch hand g.v.

stirrer man (sugar refining); receives sugar from vacuum pans into mechanical stirrer; regulates stirrer by loose pulley lever; decides when operation is complete, stops stirrer and operates valve to run off liquor into either cooking trays; cf. filter-out (solid glucose).

stoner, rinsin stoner; pons raisins (or similar fruit) into hopper of raisin stoning machine; is usually employed part time in carrying trays, trucking, cleaning fruit, etc.

store hand (bakery): stacks loaves of bread, cakes, pastries, etc., as received from oven, on shelves fixed in racks mounted on wheels; runs racks to and from cooking room and store room; usually also does work of loader g.v.

stripper (liquorice), all sorts stripper, corks stripper, liquorice stripper; removes liquorice from drying boards by hand, in readiness for roller-out (438) g.v.

takar-off (sugar confectionery); collects cut lozenges from cutting machines in wooden trays and carries them to benches.

tank man, hag (sugar), see washer, hag.

taskman (margarine); weighs drums containing oils and records weight; inserts flexible tube connected with cylindrical pump in casks and starts up pump to pump oil into storage tanks to await drawing of oil by meter, cf. taster (433) g.v.

taster, fish taster, g.v.; takes on; hangs fish on tenter hooks fixed in wooden bars to be hung in smoke house; fish is usually dried, cf. river (437).

taster, tin (preserved provisions); judges whether sealed cans of fish, meat and other provisions are airtight, by striking the side of tin and listening to sound thus produced.

tinner, egg (food preserving); pours liquid egg mixture into screw-topped tins; usually also labels tin after filling.

tower, see hanger (fish curing).

traveller boy; stands by traveller or conveyor and assures proper working; removes obstructions or sets rollers straight on conveyor.

trimmer, hay (not on farm); trims sides of crates or bales of hay with a special knife; does other labouring work at corn merchant's or grain dealer's wharf, warehouse, etc., e.g., cleaning.

trimmer, sugar, see shoveller.

truck pusher (margarine); pushes trucks containing margarine, after mixing and churning, into maturing room.

trusser, hay (hay dealing), or for hay trusser (554).

vacuum boiler attendant (margarine); attends to a vacuum boiler, or steamer, in which oils intended for manufacture of margarine are de-aerated, after passing through washing tanks, bleaching tanks, and filter presses, by means of high-pressure steam under vacuum; guarded by gauge, keeps steam at desired pressure by regulating steam valve.

valves, stokes boiler; sometimes has other duties, e.g. to watch and keep running plant, such as margarine refrigerator, controlling valves to regulate water flow, and starting and stopping plant by pulley lever; reports any defects to stoker.

vatman (vinegar), see mash house man (vinegar).

washer, bacon; washes parts of cured or smoked bacon in water, before packing.

washer, bag (sugar refineries); bag task man, wash-house man; places bags in centrifugal washing machine; starts machine; injects hot water twice, i.e. makes two hot water washings, injects cold water, stops machine; removes bags; opens valves to run off sweet water, to recover sugar therefrom; cf. seam mixer attendant.

washer, filter cloth, as for washer, bag.

washer (fish curing); washes herrings after splitting, either by shaking them in baskets under a stream of water, or by passing them through a washing machine, sometimes done by fish gatter (448) but usually by river (437) g.v.; for machine washing, puts herrings into mouth of a cylinder through which fish passes, being cleaned by action of water and revolving brushes and falling into delivery troughs or baskets; starts or stops machines, as necessary, by pulley lever, and regulates flow of water; washes fruit (see making and fruit preserving); (i) washes apples, plums, etc., by hand; (ii) washes gooseberries in a "topping and tailing" machine; cf. fruit picker.

washer, meat, re-cleaner, meat.

washer, oranges; throws oranges into machine in which they are automatically washed with running water, and brushed by a revolving brush as they fall one by one down a spiral, into a delivery box; controls machine by moving a lever; removes filled delivery boxes and replaces empty ones.

washer, press cloth (sugar refining); washes by hand, in open vats or in revolving cylinder, operated by loose pulley lever, coarse dannel cloths in which dried pulp of beetroot is trapped, when being squeezed by hydraulic press; does other unskilled jobs, as required.

washer and chiller, fat (fat extracting and refining); washes by hand, in open vats, flesh, etc., from which edible fat is to be extracted, to cool it and to remove blood, etc., examines fat and cuts out blood tissues when found; lays out fat to dry.

washer's attendant (sugar refining); places bags in washing machine, and takes them out when washed; stacks wet bags and places wet filter cloths in baskets, under supervision of washhouse man or bag washer g.v. washer-out (sugar refining); treats certain kinds of sugar, after it has left centrifugal machine, by exposing to spray of air and water until sugar is completely conditioned; regulates force of spray by valve; above sugar beneath spray or pushes trays of sugar thereunder; or regulates speed of endless band conveying sugar.

wash-house man (sugar refining), see washer, bag.

washing tank attendant (margarine); runs hot water, soda and margarine oils into tank; allows mixture to settle and runs off the oil for margarine from top of the mixture; runs off, as waste, the water solution containing soaps and fatty acids removed from the margarine oil.

wash-up boy, see sample boy.

water boy (sugar refining); keeps water in liquor cooking tank at constant level by watching gauge and adjusting water cock.

weigher (bakery); (i) (hand) scaleman (bakery); cuts off and weighs pieces of dough according to size and weight of loaf required; roughly shapes pieces of dough and passes to moulder (433) g.v.; (ii) (machine) cuts piece of dough, and throws it into hopper of machine, which cuts it to required size for loaves; picks dough, thus cut, from delivery van of machine and passes it to table hands (439) g.v. for moulding; weighs samples from time to time and adjusts output of machine, if necessary, by means of a screw device, work is sometimes divided between two operatives.

weigher (biscuit making); (i) see mixing room worker; (ii) checks weight of filled tins of biscuits after packing; records weight on a label or slip, initials it, and passes on tin; returns tins to the operatives, over which he is to operate filling tin.

weigher (grain milling), see packer (grain milling).

weigher (sausage); receives filled casings from sausage filler (442) g.v.

and cuts them into 1 lb. lengths; checks weight on scale and breaks off "overweight" lengths.

weigher, starch; weighs out quantities of finished starch before packing into boxes or packets; is often done by starch box hand (340) g.v.

weigher (sweets); checker (sweets); (i) checks and weighs quantities of sweets made by piece workers; (ii) keeps a record of number and weight of boxes packed.

winner, cocoa bean; winnowing machine; winds cocoa (43) see sifter; (ii) feeds hopper of winnowing machine (which separates husk from crushed bean) with kibbled cocoa beans (see kibbler); regulates air blast attaches bags for winnowed nibs and also for receipt of husk; attends a number of such machines; sometimes does work of kibbler g.v.

winner, mustard; feeds by hand, with a shovel, hoppers of three or four winnowing machines, to remove husks from seeds; occasionally inspects to see that machines, which are power-driven, do not become choked, and are not brought to a stoppage; bags seeds and waste; on rare occasions, adjusts grinding rollers by hand, wheel, or other device, or stops machine by pulley lever and clears stoppage by hand.

winner, cocoa bean, see winner, cocoa bean.

wrapper, stick; wraps in paper, small technical blocks, partly evaporated starch preparatory to placing in hot-air stoves for further evaporation and crystallisation.

Sub-Order 2.—Makers of Drinks.

461.—FOREMAN AND OVER-LOOKERS.

foreman (cider making); supervises men engaged in cider making, see cider worker (458); starts and stops hydraulic press, in which pulp ("pomace") is crushed, by moving a lever; directs men engaged in loading and unloading press.

foreman maltster, head maltster; supervises work in malt house (452), floor-men (452), and maltsters (452) g.v.; allocates work in malt house, gives directions as to length of time barley is to be steeped, and malt is to be on floors or in kiln; is generally responsible (subject to general counsel of manager) for any defect in malt in malt house; sometimes also does work of kiln foreman g.v.

kiln foreman; under instructions from foreman maltster g.v., directs loading and unloading of kilns, and opens or shuts doors, windows, etc., to regulate heat of kiln; gives instructions to firemen (462) and kiln men (462) g.v. as to temperature to be maintained in kiln; under instructions from brewer (453) g.v., directs ton room men (459) g.v. as to control of temperature generated by fermentation in fermentation vessels, or regulates temperature by controlling flow of water into cooling vessels; prepares yeast for use or for storage for draining, etc., and is responsible for its condition.

vatting foreman; under instructions from brewer (453) g.v., directs (absent a rate of measures) the different kinds of beer to be run from different vats in mixing; is responsible for cleaning of vats.

462.—MALTSTERS.

fireman (malt kiln), fire (malt kiln); washes coxches (pieces above kiln) steeped in water; fires furnace of kiln, regulates draughts and temperatures, and is responsible for keeping fire regulated as directed by kiln foreman (461) g.v.; sometimes specifically designated, e.g. night fireman (see night shift).

floor and kiln man; combines duties of floorman *q.v.* and brewman *q.v.* **Floorman;** is in charge of a gang of labourers, who steep grain in a pit under his direction; supervises hoisting of steeped grain (after water is run off) on to granulating floor, where grain is spread evenly on floor and turned over constantly under his direction by same or another gang of labourers; decides when grain has reached required state of germination.

Kiln man; (i) (brewery or malt kiln), *see* brewman (malt kiln); (ii) (distillery) turns grain on a kiln above a kiln constantly, with a shovel, to ensure that it is all dried equally; usually also carries malt in sacks to kiln, empties it on floor above kiln, and replaces it after drying; sometimes also stacks dries of kiln.

Malt dryer; is in charge of a gang of labourers who sweep grain off germinating floor into drying room, placed immediately over a coal-fired kiln, where grain is turned over constantly, to allow heat from furnace to dry whole equally; supervises gang stacking furnace, turning grain and shovelling dried grain into sacks or travelling chute.

Malt maker; (i) *see* maltster; (ii) *see* malt man.

Malt man; malt maker; (i) general term for any worker in malt house, *e.g.* floorman, maltster, (ii) (distillery) is responsible for malting of barley for distillation of potable spirits; steeps barley in cistern; levels or combs grain on germinating floor; breaks down couch after barley has begun to grow, according to temperature and rate of growth, aerates and cools malt by turning with shovels or by ploughing with hand plough; sprinkles with water to assist growth when necessary.

Malt roaster; is in charge of a gang of labourers who empty malt from sacks, into gas-heated cylinders; moves a lever which causes cylinder to revolve slowly over gas jets; stops machinery, and turns out gas, when malt is considered to be roasted to correct degree, *e.g.* black, brown, crystal or amber, according to degree of roasting, as determined by foreman; supervises work of labourers who remove malt with wooden rakes, and load it, when it is cool, into sacks.

Maltster; malt maker; loads malt into kiln; spreads it out, to required depth, on asbestos floor of kiln, and turns it over from time to time to prevent "growing"; also stacks bags of barley into malt house, and stacks them.

Underhand maltster; assists maltster *q.v.* in loading and unloading of kiln, in spreading it out on floor of kiln, and in turning it over from time to time.

463.—BREWERS OF ALE, STOUT AND PORTER.

Assistant brewer; under direction of brewer *q.v.* and in consultation with foreman (451) *q.v.*, is responsible for brewing operations being properly carried on; undertakes gravity tests; sometimes keeps stock books, and works out costings of raw materials for various purposes.

Brewer; is in supreme control of entire series of brewing operations, assisted by assistant brewer *q.v.* and by chemist, bottling foreman, cooper (477) *q.v.*; supervises and directs assistant brewer; tastes beer, and either passes it or gives directions as to alteration of malt content, etc.; sometimes buys raw materials.

Fermenter (brewery); opens and closes cocks regulating flow of liquor from mash tins to a succession of fermenting tanks or tuns, in which brew is gradually changed by action of growing yeast; adds yeast, by hand, to liquor; takes frequent temperature readings during process of fermentation, and reports them to brewer *q.v.*; *cf.* fermenter (distillery) (458).

454.—DISTILLERS AND STILLMEN.

Ball man; *see* pot still man.

Patent still man; charges still with wash (fermented wort), which runs in through a series of pipes, controlled by valves, at outlet of distilling operations, after which it is automatically replenished; watches ingredients of still, *i.e.* wash, which are liable to overflow, owing to frothiness of overcharged wash; class tube indicator or safe to ensure that automatic replenishing apparatus is functioning properly; observes pressure of steam and regulates heat of still by opening and closing valve to admit or shut off steam; tests strength of spirits in sample safe, in presence of Excise Officer who seals safe; when distilling is not in progress, does cleaning and repair work.

Pot still man; ball man; charges pot still, which is heated by steam or by furnace, in presence of Excise Officer, either by gravitation or with hand pump; watches ingredients of still (wash), which are liable to overflow, owing to frothiness if overcharged, and regulates heat of still; judges state of wash by sound, by swinging a suspended ball against neck of still or by tapping with a wooden hammer; watches water beads in glass tube indicator or safe, to see whether all spirit has run off; occasionally turns tap to test accuracy of tube indicator (safe); when distilling is not in progress, does cleaning or repair work.

Still man; general term covering patent still man and pot still man *q.v.*; is sometimes able to attend both types of still.

465.—CELLARMEN.

Bottler; (i) (wine); wine cooper: fills wine bottles directly from cask by means of a cran (measure) tap inserted in it, or from syphon pipes fitted to a small trough into which wine is run, or by means of a rotary power-driven syphon machine; passes filled bottles to rotary table of corking machine; (ii) (spirits) fills bottles with spirits or liquors by means of the rotary machine, and passes filled bottles to corking machine.

Cellarman, cellarer; (i) looks after stock, bottles, casks, seals, etc., and fills, labels, and seals casks; keeps cellars within certain limits of temperature by heating and ventilating as necessary and keeps cellars and racks clean and free from damp, sees that wine receives careful handling and is in general ensures that wine is not spoiled in maturing; may also do work of reeving (469) and topman (456) *q.v.*; (ii) (in hotels, clubs, etc.) receives stores and tugs barrels of beer, etc.; stores and jasses wine and spirits, etc.; attends to beer engines, connecting engine to cask by pipes, as required.

Wine blender and taster; wine maker; blends wines, taking care not to mix those of widely differing chemical properties, or whose flavours will not harmonize; in small cellars, is sometimes employed part time in bottling, in packing, and in other duties of cellarman.

Wine cooper, see bottler; *cf.* cooper (477).

Wine mixer, see wine blender and taster.

466.—OTHER SKILLED WORKERS.

Als taster; tastes beer to sample it for quality, etc., before it leaves brewery, or if it is returned as unsatisfactory; usually done by brewer or assistant brewer (453) *q.v.*, or by a storekeeper (341).

Back room man (distillery), see fermenter (distillery).

Blender (mineral waters), see syrup maker.

Blender, spirits; mixes spirits according to quality, maturity, and strength, in order to produce required blend, by pouring or running prescribed quantities into vat; adds colouring liquid to must; adds it to mash vat by air-blast; runs out into cask.

Brewer (distillery); is in charge, under manager, of all operations incidental to making of crude spirit; is responsible for preliminary grinding and mixing, boiling and fermenting, *i.e.* the preparation of the distiller's wash; controls work of mash men, malt men, labourers, etc., in a distillery; sometimes also attends pot still, *see* pot still man (454); duties up to point of boiling in mash tank, or for brewer (brewery) (458).

Brewer, ginger beer, or for brewer, non-alcoholic.

Brewer, hop ale, or for brewer, non-alcoholic.

Brewer, non-alcoholic; a skilled expert, in charge of all brewing operations in caskery, including ginger beer, hop ale, British wines, fruit wines, or other non-alcoholic beverages as manufactured; superintends boiling of water, filling of vats with ingredients, *e.g.* ginger, hops, fruit juice, sugar, malt, spirit, colouring matter, as required, and running of water into vats; directs control of passage of mixture, after fermentation into a succession of tanks or vats.

Cider maker, cider worker; general terms for any worker engaged in one or more of the following operations: washing apples in a tank or bath; running in water and stirring apples in bath with a rod; starting and stopping dredger which picks up apples from bath and conveys them to cylinder, where they are reduced to pulp (pomace) by revolving steel knives in a pump; or starting a machine through which pomace falls on to table below; wrapping pomace in muslin cloths into rectangular slabs (cheeses); piling a number of cheeses on a table or truck up to desired height; at a signal from foreman (451) *q.v.*, in conjunction with another worker, pushing table or truck on to hydraulic press which is then set in motion by foreman and after juice has been extracted, pulling cheeses from hydraulic press and stacking them; washing, pre-malting, adding fining (clarifying agents) to cider in vats in quantities decided by manager; drawing off cider from one vat and running it through connecting pipe into another vat, leaving sediment in first, sometimes passing it through a filter of sieved cotton pulp or asbestos before it runs into second vat; keeping cider stores clean and at an even temperature, reporting to manager in event of any variation of temperature.

Composander, see syrup maker.

Composander of wines; is in charge of labourers who do certain work used for making British wines, by hand, to vats; supervises blending of wine, as required, and connection of casks to vats when wine is run off; supervises sealing out of vats and casks with hoppers and brods; *see* cooper (477).

Dried grange man; is in charge of a gang of labourers in a distillery who carry wet grain into room heated by steam (unless this is done by automatic conveying machinery); turns on cut of valve cocks admitting steam, and thereby regulates temperature of hot room, testing by thermometer; superintends labourers who shovel grain into sacks or carts after drying, for removal.

Engineer (erected water factory); person (erected or general water); is responsible for running of gas making plant consisting of (i) a generator in which carbonic acid gas is generated by action of sulphuric acid on

sodium bicarbonate or on calcium carbonate, (ii) a gas holder or cylinder, into which gas so generated passes automatically, and where pressure is automatically applied; (iii) a saturator, fitted with an agitator, or mixer, in which water is impregnated with carbonic acid gas; tips specified quantity of sodium bicarbonate into receiver of generating plant with a scoop; switches on or off power-drive of machinery, operates cocks, valves, and levers regulating supply of sulphuric acid, gas, and water, is also responsible for proper running of bottling plant.

fermenter (cider, ginger beer, etc.); controls fermentation of brew for ginger beer, etc., or fruit juices for cider, using a thermometer to test temperature, adds yeast and any colouring matter that may be required; (in case of ginger beer, etc.) is usually done by non-alcoholic brewer *q.v.*

fermenter, fermenting man, *distillery*; *back room man*, *tun man*, *dun room man*, *washer* (*distillery*); works at mash tuns and "wash backs" at distillery; operates, as directed by brewer (453) *q.v.*, apparatus for mashing grain, for mashing wort from successive mashings, for souring wort and "pitching" with yeast, for adjusting temperatures of liquors in vats, and for mixing wash from various backs in chaper; generally assists brewer in preparing wash for distillation of potable spirits, also in cleaning and discharging of apparatus; *cf.* fermenter (*brewery*) (453).

finings man, *see top man*.

fruit essence maker; a qualified chemist who, with aid of unskilled labour, makes fruit essences by adding concentrates of fresh fruits (obtained by expression) to alcohol, by fractional distillation of essential oils, or by extracting oil from lemon and orange rind by percolation process; for artificial essences, works by synthetic processes.

fruit juice and syrup maker; *syrup maker*; (i) (not for fruit) makes juice expressed from fruit with sugar, or marmalade, etc., with sugar to extract their juice and sweeten it; (ii) (hot process) pours a syrup, made scalding hot, over fruit in bottles and corks them immediately; in either process adds acetic or citric acid to prevent caking, and sulphate of potassium or lime to prevent fermentation.

gasmann (aerated or mineral waters); *see engineer* (aerated water factory); *cf.* *gasmann* (459).

grinder, malt grinder, *see miller*.

herb beer maker, *herbal extract maker*, *hop extract maker*, *as for brewer*, non-alcoholic maker; a non-alcoholic brewer *q.v.* or a *syrup maker* *q.v.* engaged in manufacture of lime juice cordial; instructs assistants as to boiling of sugar, addition of lime or lemon juice and preservatives, and addition of flavouring and colouring matter.

malt crusher, *see miller*.

meashman, *mash house man*, *mash room man*, *mash tun man* (*brewery*); controls, by means of levers, in co-operation with miller *q.v.*, flow of malt from milling machine into mashing machine, a contrivance fitted to end of grain-mill spout, turns on supply of water, which is churned up and mixed with malt in mashing machine, the mixture then running into mash tun or tuns in a "mash"; of the consistency of thick soup; decides when brewing process, i.e. a natural process which goes on in mash tuns, is complete; then opens, by means of levers and cocks, in co-operation with side man *q.v.*, sluices which conduct liquor, now called wort, to boiling copper; in small breweries, sometimes also does work of side man *q.v.*

millier, malt miller, malt millman; *grinder*, malt crusher, malt grinder; in *brewery* or *malster's factory*, (i) is in charge of a large mill, into which malt runs automatically through a hopper, from a store room at top of building; controls amount of malt entering mill by mechanically-operated gauges; (ii) (in small establishments) feeds machine with a shovel; in all establishments, malt then passes through a succession of rollers and screens, which reduce it to required degree of fineness; examines malt at intervals to ascertain whether rollers are functioning correctly, and adjusts rollers, by levers, to obtain requisite fineness; also manipulates slides, which control flow of ground malt to various chutes or channels, as required; in *breweries*, malt eventually runs into mashing machine, connected with mashing tun or tuns on ground floor of building.

pertryman, *as for cider worker*.

pop maker; slang term for any person employed in manufacture of ginger beer, including non-alcoholic brewer, and unskilled assistants who clean tanks, bottle and label beverage.

rack maker; "racks" or runs *beer* from main lube bottling machine, connects up pipes and works pump, if necessary.

sarsaparilla maker; extracts, by crushing and steeping, syrup from roots of *sarsaparilla*, used as a medicinal drink; usually done by non-alcoholic brewer *q.v.*

side man, *copper side man*; receives beer from hop room man (459) *q.v.* and shovels them into boiling copper; in co-operation with mash man *q.v.*, controls, by means of cocks and valves, sluices which allow wort to run from mash tun into copper; sees that mixture is boiled properly in copper in small breweries, sometimes also does work of hop room man (459), *mash man*, or *hearth man* (459) *q.v.* or combines several of these occupations.

smeller, *cask smeller*; smells returned and cleaned casks to make certain that they are sweet before hoops are finally driven on.

syrup maker; *blender* (*mineral waters*), *compounder*; (i) dissolves sugar in water to certain specific gravity, and adds essence and other ingredients according to a fixed formula; filters syrup through a bag (into enamel pan, from which it passes by glass pipes to syringing machine); (ii) (more usually) superheats boiling of sugar in steam-heated boilers; directs assistants as to addition of lime or lemon juice, preservatives, flavouring and colouring matter, or other ingredients; decides when boiling process is complete, and directs running of mixture into storage tanks; (iii) *see fruit juice and syrup maker*.

topman, *topper-up*; *finings man*, *treater*; mixes "finings" (inglams, etc. used to clarify beer by precipitating impurities) according to formula, as required; goes round from cask to cask, and pours into each a specific quantity of "finings" mixture.

treater, *see topman*.

tun man (*distillery*), *see fermenter* (*distillery*).

tunner; opens, by hand, cocks or valves which allow liquor to run from one set of vessels to another, *e.g.* from fermenting vessels to unions or denning vessels; takes temperature readings from time to time, and reports readings to brewer (453) *q.v.*; sometimes also washes out tuns.

tun room man (*distillery*), *see fermenter* (*distillery*).

washer (*distillery*), *see fermenter* (*distillery*).

wine blender (*medicated wines*); directs cellarman (455) *q.v.* in filling and racking wine, also in mixing (by hand, in a vessel) and adding to wine,

substance which medicates wine without reacting adversely upon meat extract, malt, etc., when these are added; directs cellarman engaged in working pumps and filters, etc., for addition of meat extract, malt, or other substance.

456.—OTHER WORKERS.

allowance man (*brewery*); *cellarman* man; keeps free allowance of beer to dry men, travellers, etc., on production of chit; at certain times of dry fills buckets for regular brewery workers' allowance; keeps canteen clean.

barley carrier; carries barley in sacks or in barrows from grain storehouse to malt-house, or to vehicles for transit.

barley room man; unloads barley, screens it, and places it in cistern for steeping; may do any labouring work connected with handling of barley.

bottle examiner; *nighter*; (i) ascertainment that empty bottles are free from cracks by gently knocking them together, and that they are clean by holding them to the light and by smelling them; extracts pieces of cork, etc., with steel hook; (ii) examines filled bottles of spirits, mineral waters, etc., after labelling, capsuling, and polishing, by holding them up to the light; rejects those which show defects, *bottle soiler*; (i) *see capper*; (ii) *see wiper*.

bottler, *bottle filler*; (i) (without pressure) runs beer from barrel into a small trough fitted with a series of syphon pipes, from which he fills bottles; (ii) (under pressure) uses power-driven machine which forces beer into bottles; connects bottling machine with harrel by rubber hose; places clean empty bottles on revolving table of machine, and removes filled bottles; sometimes specifically designated, *e.g.* *beer bottler*, *cider bottler*, *cf.* *bottler* (*aerated or mineral waters*).

bottler (*aerated or mineral waters*); puts empty bottles or syphons, or bottles or syphons containing a little syrup, on rotating machine, which carries them behind a screen or card, where carbonic acid gas and water are forced into them under pressure; removes bottles or syphons when filled, and puts them on a rack, ready for corker or crown corker *q.v.* *bottle ringer*; *stopper ringer*; *amine*; rubber ring or bobbin stoppers, and replaces them when they are broken or worn; is sometimes employed part-time in bottle filling or other duties.

brander; brands barrels with name of firm, destination, etc., by inserting name-plate in head press, heated over (which he stokes) and placing lid of harrel in contact with heated plate and subjecting it to pressure; also "bushes" barrels, i.e. drills holes in barrels, and beats metal ring for hang-hole; sometimes also weighs new or repaired barrels, hush empty and filled, and records their capacity.

breaker-down; a *tun house man* *q.v.* who adds cold (beiled) water to beer, with a hose, to bring it to required gravity, if after brewing it is found to be over fermented strength.

brewer's assistant (*non-alcoholic*); receives instructions from non-alcoholic brewer (459) *q.v.* as to amount of each ingredient, *e.g.* sugar, ginger, hops, malt, colouring matter, etc., to be used; fetches ingredients from store, and supplies them into vats, boiling copper, or other vessels; opens sluice valves and cocks allowing mixture to pass from one vat or other vessel to another; cleans out vats and coppers when empty; skims off froth from surface of mixture with a skimmer; "dunks" mixture after fermentation, if required, i.e. adds water thereto.

brusher-out, *cask brusher-out*, *see washer*, *barrel*.

teenster man, *see allowance man*.

capper, bottle; *capsuler, bottle*
feiler; fixes a small paper, tin, or
 lead foil cover over corks of bottles
 filled with aerated water, wine, etc.,
 by hand or by power-driven auto-
 matic or treadle-operated machine.
carbonator; *purson (breweries)*; is in
 charge of closed tanks into which beer
 is run in preparation for bottling;
 runs a specified quantity of carbonic
 acid gas, in solution, into beer; keeps
 tanks clean; in small breweries, some-
 times directs bottlers *g.v.*, or does
 bottling.

cask measurer; measures capacity of
 barrels, either by filling them with
 liquor from graduated vessels, or by
 weighing them, both empty and filled,
 and calculating volume from net
 weight; so ascertained, sometimes, at
 busy times, employed on cask washing;
 work usually done by *brander g.v.*
toak roller, see washer, barrel.

cask roller, cask stacker, see runner-in.

teak stacker, see washer, barrel.

cellarwoman; does lighter work in
 cellar, such as labelling, capping,
 and wrapping of bottles.

cleaner, barley, see screener.

cleaner, cask; cleans deposit from
 sides and bottoms of casks by scoring
 them, by hand, with brushes, or in a
 revolving frame, which rotates
 them one way while a rope chain
 rotates the reverse way inside them;
 (for *small casks*) after scouring, puts
 a small quantity of sulphur in casks
 to sterilize them, and to check exces-
 sive fermentation when they are
 refilled.

cleaner, syphon; cleans and polishes
 metal parts of syphons by hand or with
 a buffing machine; is sometimes em-
 ployed part-time on other work, *e.g.*
 washing bottles.

clipper; small clips to wine casks for
 holding corks; is usually employed part
 time in other work.

corker; cork filler; drives corks into
 bottles filled with beer, mineral
 waters, etc., by hand, or by machine
 which is loaded with cork and operates
 by treadle, or, in bottling spirits, by
 an automatic rotary machine; is
 usually employed part time in bottling,
 in washing bottles, etc.

corker, crown; puts bottles in place
 in power-driven machine, *i.e.* a section
 of bottling machine, fitted with
 automatic plunger, moves lever
 causing plunger to come down and
 press tin caps, lined with cork, on to
 mouths of bottles, and close them over
 cuna, thereby clamping them on; re-
 moves closed bottle to rack, ready for
 labeller (349) *g.v.*

cork fitter, see corker.

draff man, see grainman.

drainer, cask drainer; a cask washer
g.v. who drains out returned casks
 after they have been cleaned with hot
 water; stacks them in readiness for re-
 filling.

draw-off; racker; pumps, or draws
 off, beer, spirits, cider, etc., from fer-
 menting vessels, blending vats,
 usually by treading, tap which allows
 liquor to flow through pipes; in
 breweries, draws a few dry hops into
 cask after it is full.

filler, bottles, see bottler.

filler, syphon, at for bottler.

gasman (breweries), see carbonator;
cf. gasman (brewed or mineral waters)
 (458).

grainman, grainier, grainman;
*draffman, thrasher (brewery or distil-
 lery)* removes used malt, or grains,
 from mash tun, shovelling it into
 carts for taking away for cattle feed-
 ing; *cf. grainman* (775).

hearth man; stacks furnace at base
 of brewery chimneys containing water,
 hops, and "wort" (product of mash
 tun); sometimes also takes note of
 gauges whereby supply of water to
 coppers for used brew is measured.

hopper; pours dried hops through a
 funnel into casks for storage; is
 usually employed part time on other
 duties.

hop room man, hop room hand; is
 in charge of a room where hops are
 stored; weighs out amount of hops
 required, which varies according to
 particular brew desired, and hands
 them out in sacks to copper side man
 (458) *g.v.*

labourer; loads and unloads raw
 materials, or manufactured or semi-
 manufactured products; assists
 skilled men in unskilled part of manu-
 facturing processes; washes casks,
 vats, tuns, or other receptacles, or
 apparatus; sweeps yard, cleans floors,
 and does any other unskilled work in
 brewery, distillery, malthouse,
 mineral water factory, etc.; often
 specifically designated according to
 department, *e.g.* the stores labourer,
 brewer's labourer, laboratory labourer,
 lager cask labourer, labourer on load-
 ing stage, etc.

loader; loads barley or other materials
 into silos; loads raw materials or
 manufactured products into carts,
 drays, railway wagons, etc.; often
 specifically designated according to
 article loaded, *e.g.* ale loader.
malt room man; weighs in vats,
 recording quantities admitted to malt
 mill; transfers malt to grinding mill;
 sometimes also acts as miller (455)
g.v.

marker, cask marker; paints letters
 or other marks indicating contents on
 head of casks, with stencil plates and
 paints; is often engaged part time in
 other duties, *e.g.* cleaning casks,
 running errands, or as a runner *g.v.*
presser, harm; peat presser; screws
 up receptacles into which yeast or
 harm, run or skimmed off surface of
 fermenting vats or tuns, has flowed,
 is then manipulated wheel or
 screw, thus squeezing "harm" out
 from yeast, scum up yeast, when
 process is complete, and loads it into
 casks for removal.

presser, hop; shovels hops into press,
 and moves levers which bring press
 into action and squeeze remaining
 liquid out of hops after they have been
 boiled; liquor runs through pipes into
 containers.

presser, yeast, see presser, harm.

racker, see draw-off.

receiver, barley; trucks sacks of
 barley into barley store, and trucks
 them from store to malthouse as re-
 quired.

receiver, malt; receives, in brewery,
 malt from malt house, or from
 separate establishment, in sacks,
 which are hoisted to upper part of
 building; empties sacks on to floor of
 malt room, and shovels it, as required,
 into hoppers which convey it to tuns
 or vats below.

reiner; pours resin from a ladle on to
 bung of barrels to seal them; is
 usually employed part time on other
 duties in cellars, *e.g.* cleaning, etc.

runner-in; coal roller, cask stacker,
stacker; rolls barrels to and from
 cellars; stacks barrels, removed from
 drays, until required for further use,
 takes barrels from stack to be washed.

screener, barley screener; barley
cleaner; (i) shovels barley or malt into
 hopper or chute of machine which
 passes it through screen or sieve, to
 remove unduly large grains, small corn,
 dust, or other foreign matter; (ii) is
 in charge of automatic machine which
 sifts barley or malt, as described
 properly, and operates, if necessary,
 slide bars or shutters which direct
 screened barley or malt from one
 channel to another.

screener, malt, see for screener.

screwier; puts screw stoppers in
 bottles, etc., after they have been
 filled, by hand or machine; is usually
 employed part time in bottling, in
 washing bottles, etc.

sighter, see bottle examiner.

snow remover; removes deposits of
 frost or moisture from pipes, etc., of
 cold storage plant; is usually em-
 ployed part of his time on other work.

sput man (distillery); backs sacks
 on to spout or chute down which dried
 grain pours, and removes sacks when
 full.

square room hand, see tun house

man; stacker; wheeler and stacker; (i)
 trucks and stacks cases of bottled
 beer, etc., ready for dispatch; assists
 in loading and unloading of vans; (ii)
see runner-in.

still house man, still room man;
 under direction of distiller (454) *g.v.*,
 attends to cocks regulating flow of
 wash to still, circulation of "low"
 wine (first distillation), and drawing-
 off of fractions of distillate.

stopper picker; stopper sorter; un-
 screws stoppers from empty bottles
 returned to bottling firms; examines
 them, and rejects those that are de-
 fective; often also acts as bottle
 ringer *g.v.*

stopper ringer, see bottle ringer.

stopper sorter, see stopper picker.

stower; an ale stores labourer *g.v.*

syrupier; pushes neck of bottle on to
 a nozzle connected with a tank con-
 taining flavouring syrup; raises
 nozzle, causing a specific quantity of
 syrup to run into bottle, and puts
 bottle on a rack for bottler
 (soured or mineral waters) *g.v.*

thrower, see grainman.

tierman; a stower g.v. who arranges
 casks in tiers.

tun house man, tun room man, tun
room hand; stores room hand, union
 room hand, various, *valder*; is en-
 gaged in room wherein brew is passed
 through a series of tuns, or vats, con-
 nected by unions or large pipes;
 assists fermenter (brewery) (453) *g.v.*
 in adding yeast to worts, checking
 temperature, and watching fermenta-
 tion of brew; also cleans out empty
 tuns with water and brushes; some-
 times also skins growing yeast from
 surface of brew with a wooden float;
 sometimes throws out spent grain
 from bottom of mash tuns, with
 shovels; does other work in other
 parts of brewery.

union room hand, vatman, vatter,

see tun house man.

washer, barrel; cask washer, cask
feiler; (i) *cask washer;* rolls barrels
 to feed end of washing machine; in-
 serts a roller spray into bung hole;
 stands by to guide barrel, if ne-
 cessary, as they pass through machine;
 starts and stops machine by moving
 a lever; turns water and steam on or
 off, as required; (ii) *cleans barrels* by
 pouring water and slops into them,
 clamping them to revolving platform,
 and switching on power, barrels
 rotate, and are cleansed by water and
 slops tumbling about inside them;
 (iii) *brushes-out, cask brusher-out;*
 (partly) removes tops of barrels, and
 scrubs inside surfaces by hand; (iv)
wheeler and stacker, see stacker.

wirer, cork wirer; bottle feiler;
 wires corks of bottled beer, wines,
 mineral waters, etc., often also wraps
 metal foil round top of bottles.

yeast man, yeast house man;
 handles yeast in yeast bins room;
 in preparation for use; drains it, and
 sometimes squeezes it in press to
 expel moisture.

Sub-Order 3.—Makers of Tobacco, Cigars, Cigarettes, Snuff.

468.—SKILLED WORKERS.

heater-up, tobacco heater-up, see
moulder, tobacco (hand); cf. tobacco
heater-up (469).

blender, leaf; unpacks tobacco leaf
 from bales in which it was imported,
 and examines contents, to ensure that
 contents are of type of quality speci-
 fied; sometimes steams leaf, to restore
 it after pressure of packing, by plac-
 ing it in steam cupboard, turning on
 steam, and removing it after specified
 time; spreads leaf on trays, and picks
 out any leaves that are defective or

unsuitable for desired blend; weighs out exact quantities of each kind of leaf, according to the formula, mixes them together with his hands, and puts blend in baskets; sprinkles water containing acetic acid (as a preservative) on tobacco, in blending, with a rose spray attached to a hose, or with a brush or switch.

bunch maker, cheroot; a bunch maker (cigar) *q.v.* employed in manufacture of cigars open at both ends. **bunch maker (cigar);** forms core, or bunch, of cigars, places in hand pieces of filler tobacco (broken or inferior leaf), so arranged as to produce, roughly, desired shape and size of cigar, and puts this tobacco on a bunch or bunch wrapper of better and stronger leaf and rolls up the filler into a bunch and passes to roller *q.v.*; frequently uses a small machine, see cigar machinist.

bundler; cigar packer, cigar sorter, *sorter*; grades finished cigars, picking out those of similar colour, and lays them in boxes, either loose, or tied in bundles; sometimes also places them in a drying room of even temperature to condition them before sale.

cake and plug maker; plug maker, tobacco press filler; makes plug, bar, cake and other hard tobacco, or stemming, and partially drying, loose leaf to conditions in treating it with flavouring agents if required, moulding in metal frames, and pressing it in hydraulic or screw presses, first wrapping it in an outer cover of whole leaf when making certain kinds of plug.

cayendish maker; soatters tobacco leaf on floor of bench; makes up a solution of sugar, of prescribed strength, and sprays leaf therewith, leaving leaf in bed until it has reached required condition; then puts it in a box, sometimes first pressing it in a hydraulic press.

cheroot maker; makes cheroots, *i.e.* cigars open at both ends; bunches inside leaf, and sometimes with wrapper leaf; operations *q.v.* for cigar maker with exception of shaping.

cigarette machine attendant, cigarette machine operator; cigarette maker (machine); keeps bopper of cigarette machine replenished with tobacco; places bobbin of cigarette paper, and also another of cork (for cork tips), if necessary, in machine; fills gum receptacle; engages pulley to start machine, which automatically draws tobacco through machine and wraps it in paper in continuous "tube" form, one, or a few, tips being stuck on at intervals; tube of wrapped tobacco is cut at intervals by machine; pulls away cigarettes in event of machine becoming jammed; sometimes also sharpens blade of cutting apparatus by running a bone along it from time to time.

cigarette maker; (i) (hand push worker) push worker; rolls tobacco in small pieces of parchment, inserts end of parchment in end of paper sheath or "sill," and then pulls tobacco from tube to the other with a pencil-shaped stick; cuts off tobacco, protruding at each end, with scissors; tips cigarette with cork or gold, if necessary; **(ii)** (hand, roller) places cigarette paper on small piece of parchment, arranges tobacco on paper, rolls cigarette and gums down edge of paper; **(iii)** (machine), see cigarette machine attendant.

cigar examiner, see cigar passer.

cigar finisher, see roller.

cigar machinist; a bunch maker (cigar) *q.v.* using a small machine.

cigar maker (hand); makes cigars throughout; rolls a core, or bunch, of filler, *i.e.* broken leaf, to form required size and shape of cigar; arranges core in an inner cover, *i.e.* binder, or bunch wrapper, and an outer cover *i.e.* wrapper, made of best leaf; wraps and sticks down outer cover round bunch spirally from thick end to point, with gum tragacanth and passes to bundler *q.v.*

cigar maker (moulded); or for cigar maker (hand) except that he also shapes cigar in a mould, see moulder, cigar.

cigar packer, see bundler.

cigar passer; cigar examiner; examines finished cigars, rejecting faulty ones, weighs samples to ascertain that right amount of leaf is used for one cigar.

corder, roll; cake corder, see spinner (roll and cake).

cutter, tobacco; flake cutter; sets guillotine knife of cutting machine to cut leaf coarse or fine, as desired; replunged by sharp knife every few minutes; arranges tobacco leaf lengthwise, and places a quantity in cutting machine, where it is gripped and passed under guillotine, engages driving pulley to start machine; sometimes works part-time as stover *q.v.*

feeder, dryer's; drying machine, feeder, storing machine feeder; feeds drying or storing machine with leaf which has been cut by tobacco cutter *q.v.* starts machine by moving a switch or lever; regulates steam or gas heating, and regulates special devices on machine, *e.g.* valve governing fine spray (fog) which restores moisture to tobacco, if rendered too dry in heating. **flattener, cigarette flat worker;** a cigarette maker (hand push worker) *q.v.* or a cigarette maker (hand roller) *q.v.* who makes oral cigarettes.

leaf damper, see liquorer, tobacco.

leaf opener; removes tobacco from bales, and prepares leaves for stamping by wetting leaf which is bound round each hand or bundle of leaves, and opening out or separating the leaves in the bundle. **leaf watter, see liquorer, tobacco.**

liquorer, tobacco; leaf damper, leaf watter; (i) takes leaves from bales in which they are imported; sprays them out; sprays them with water from a hand syringe, or places them in liquoring machine, turns on spray, and removes them when liquoring process is complete; stands them in trays to become supple enough for handling; (ii) receives leaves from leaf blender *q.v.* and sprays them with hand syringe, or immerses them in a tank to make them pliable for stripping; sometimes also does work of stripper *q.v.* in smaller workshops, where it is usually done by leaf blender *q.v.* **moulder, elger;** makes moulded cigars by gathering leaves to form a bunch, see bunch maker, and placing it in shaped recesses in press blocks; puts in hand press, until set, removing arrangement in press blocks to avoid ridges; then covers with wrapper leaves, see roller.

moulder, tobacco (hand); beater-up, tobacco beater-up; places mould of desired shape in hand press, or in pulley or treading, to prepare it for being put up in small packages; usually completes moulding process in a hydraulic press, *cf.* press hand.

panner, tobacco panner, see stover.

plug maker, see cake and plug maker. **press hand;** attends a number of hydraulic or (rarely) hand press; receives rolls of plug from stover and plug maker *q.v.* and parks them in layers between metal plates of presses; then switches on hydraulic power, or applies pressure by turning hand screw; removes from press when tobacco reaches certain colour; scoops nicotine, *sic*, pressed from tobacco, from receptacle at bottom of press.

push worker; (i) see cigarette maker (hand, push worker); **(ii)** (less usual) works at certain simple types of work by pulley or treading, pushing in tobacco, which is met by paper and rolled with it into cigarettes; *cf.* cigarette machine operator.

roller, cigar roller; rigar finisher, cusa wrapper of cigar from leaves, rolls it round bunch, made by bunch maker *q.v.*, and finishes point by sticking with gum tragacanth.

roll maker-off, roll, turner-off, tobacco turner-off; former-off, tobacco leaf, and twists it, by hand, into a rough rope of sufficient thickness to yield roll of desired size after passing through machine; switches on power-drive of roll-making machine, and passes rough rope of tobacco into it; is assisted by an apprentice or other worker, who feeds machine with wrapper leaf, with which roll is covered as it passes through machine, often also does work of spinner (roll or cake) *q.v.*

snuff grinder; grind up, in a disintegrating machine, fermented leaves, stalks and "small" of tobacco plant, to make snuff; sifts and re-grinds; passes back to snuff maker *q.v.* for further fermentation; sometimes fixes or treats material on gas-heated table before grinding.

snuff finisher; finishes leaves, stalks and "small" of tobacco in wooden bin; adds water and salt solution, amount being limited by law; watches fermentation (which lasts for several weeks), turning mass occasionally, until temperature exceeds 130° F. then passes tobacco on to snuff grinder *q.v.*

sorter, cigar sorter, see bundler.

sorter, leaf; (in cigar making) sorts tobacco leaf according to colour, and (for cigar wrapper leaf) according to size.

spinner (roll and cake); cake corder, roll, corder; operates spinning machine used for making tobacco into a larger and more compressed roll, *e.g.* for Irish plug; winds rolls made by roll maker-off *q.v.*, on to a spool, and passes ends between rollers of spinning machine; also feeds rollers with a heap of cord from a bobbin on machine as machine winds or coils heap cord round roll of tobacco, inserts leather plugs into coil to compress mass and make it harder; leaves cord round coil until tobacco becomes sufficiently dark; starts and stops machine by pulling a lever; often also does work of maker-off *q.v.*

spinner's assistant; prepares leaves for spinning *q.v.* by cutting and bunching, and hands them to him for use.

stover, tobacco stover; panner, tobacco dryer, tobacco panner; places machine-cut, stripped leaf upon a gas-heated pan, to separate cut fibres, and aids separation and conditioning by teasing out tobacco; when operation is complete, places leaf on canvas beneath which current of air passes to cool it; sifts dust, etc., from tobacco after cooling.

stripper, tobacco; tobacco leaf, after liquoring, makes an incision and removes mid rib or stalk from tobacco leaf without abrasion of surface, usually by hand, but sometimes by placing leaves in position and setting slots of a machine, and setting machine in motion by pressing a treadle or engaging a driving pulley; often also does work of tobacco liquorer *q.v.*

table worker; general term covering any person who works on tobacco or cigars; includes cigarette, working shapes cigar, and working shapes as a habit, including bunch maker, bundler, cigar maker, cigar finisher, cigar roller, cigarette maker, cutter-off *q.v.*

tobacco dryer, see stover.

tobacco press filler, see cake and plug maker.

turner-off, roll turner-off, tobacco turner-off, see roller, tobacco turner-off; (i) makes small cheroots or "whiffs" operations as for cheroot maker except that work is less exact; **(ii)** as for cigarette maker (hand, roller) except that leaf is substituted for paper for outer cover.

469.—OTHER WORKERS.

hander (cigars): cigar blander, cigar ringer, ringer (cigar); wraps round centre of cigar a paper ring or band, bearing identification marks of brand; fastens band with gum.

bulker: stacks leaf tobacco, when moistened by tobacco liquor (469) g.v. on special floor for maturing.

catcher, cigarette catcher: cigarette machine receiver; gathers finished cigarettes from cigarette machine; weighs a given quantity from time to time to see that machine is maintaining standard weight; stacks cigarettes on racks ready for packing; throws out imperfect ones.

cigarette machine feeder: lays tobacco on travelling band of cigarette making machine, or in hopper which feeds machine automatically.

cigarette machine packer, see catcher.

coach boy: wheels trucks of cigarettes from machines to storage racks.

cut-off, cigarette cut-off: cuts off, with scissors, loose ends of tobacco from hand-made cigarettes.

hoghead opener, see leaf room man.

labeller, cigar, see bander (cigar).

leaf room man: *hoghead opener*; opens hogheads of tobacco and checks weight of contents.

picker-up: removes matured tobacco leaf from stacks made by bulker g.v., using a three-pronged fork to patch the leaves into barrows for transport to cutting machines.

ringer (cigar): cigar ringer, see bander (cigar).

scaleman, see weigher.

tobacco beater-up, see tobacco machine packer; cf. tobacco beater-up (468).

tobacco cutting machine feeder: *tobacco filler-up*; assists tobacco cutter (466) g.v. by feeding leaf into cutting machine.

tobacco feeder-up, see tobacco machine weigher.

tobacco filler-up, see tobacco cutting machine feeder.

tobacco layer-out: *tobacco spreader*, assists stower (468) g.v. in spreading dried tobacco thinly on canvas trays to cool.

tobacco machine packer: tobacco beater-up; places packing paper on travelling band of packing machine, to meet tobacco travelling from tobacco machine weigher g.v.

tobacco machine weigher: tobacco feeder-up; weighs tobacco, and places it on travelling band of packing machine for packing.

tobacco spreader, see tobacco layer-out.

weigher: *scaleman*; weighs out tobacco in a bonded warehouse, in the presence of a revenue officer, before distribution to various departments.

ORDER XV.—WORKERS IN WOOD AND FURNITURE.

Sub-Order 1.—Workers in Wood.

471.—FOREMAN AND OVER-LOOKERS.

carpenter charge band, foreman carpenter: supervises carpenters (474) g.v. engaged on a job, or on how to work it to be carried out, and is responsible to general foreman of the works or building in progress for efficient performance of work; sets out dimensions of wood work by measurement from plans or working drawings; indicates position of roof timbering, joists, door or window openings, skirting and similar work.

foreman cooper: (i) see master cooper; (ii) see shop foreman (cooperage).

foreman joiner: is in charge of a number of joiners (474) g.v. engaged on a job or in a joinery workshop; gives measurements and dimensions, or makes drawings from which joiners

work; if working in machine shop, supervises progress of machined work through to joiners for final handling. ascertains quantities of materials required and places orders through employees.

forewoman: supervises women and girls in making or finishing joiners' show cases and other small wooden articles in a shop fitting workshop; responsible for efficient performance of work.

head trimmer (cooperage): works with trimmers (477) g.v. and is responsible to master cooper or shop foreman g.v. for their work.

master cooper: foreman cooper; takes general charge of coopers (477) g.v. working in a cooperage, brewery, distillery, etc., and is responsible for efficient performance of work, both new and repair; estimates for and orders materials, machines, etc.; recommends or engages and discharges coopers; directs shop foreman and head trimmer g.v. or trimmers (477) g.v.; may also direct yard labourers in unloading, stacking and washing of barrels.

pattern shop foreman: is in charge of shop in which patterns, for use of moulders (480) g.v., are made; studies office drawings; gives instructions as to how patterns are to be made, and supervises work of pattern shop generally.

setter-out: prepares from plans, working drawings and instructions for guidance of wood machinists (486) g.v. at bench hand marks out drawings on boards or on paper, and transfers them to material, so that machinists can follow lines marked out.

shop foreman (cooperage): foreman cooper; supervises work of coopers (477) g.v. employed in making or repairing casks, barrels, etc., under instructions from master cooper g.v.

timber inspector (not a railway servant): supervises timber selector (488) g.v. and checks his work.

yard foreman: is responsible for movement of timber in and out of saw mill, for loading and unloading of timber trolleys and for stacking of timber in yard, drying sheds, etc.; supervises labourers engaged on this work.

472.—BASKET MAKERS.

basket chair maker, as for wicker furniture maker.

basket handle maker: a basket maker g.v. who makes handles for baskets, by weaving split cane or willow round a stake or willow rod.

basket maker: (i) makes baskets, hampers, wicker furniture, and other basket ware, by hand, throughout; builds framework of willow rods, and weaves cane, osier, twigs, etc., thereupon; uses hand knife for trimming, commander, i.e. an iron tool with ring or hook at end for straightening cane, small splitting tool called "sheave" and "upright" for cutting strips from cane, a cleaver, i.e. a tool having cross cutting knives for cutting or clearing cane into four sections; hammer and mallet and humpen barber for heating cane, to facilitate its bending or shaping; cools cane by plunging it into water; (ii) general term for any worker engaged in any process of making baskets, wicker furniture, or other basket ware, where work is sectionalised.

basket picker, basket trimmer; trimmer: cuts off pointed ends and pieces with a knife, and trims basket generally.

basinette body maker, basinette maker, bath chair maker (wicker), as for wicker furniture maker.

basinette maker (straw): line maker (straw) *straw maker*; weaves straw plait through a conical structure of osier rods to make bassinets.

blind maker, cane blind maker: weaves cane together by hand, using band tools, to make blinds;

beats cane in bannan burner for bending purposes, if required, binds parts together with cane strip; varnishes by hand with a brush.

body maker, cane; wicker body maker: *straw maker*, *perambulator*, *toy*, etc.), as for wicker furniture maker.

bottomer, chair bottomer, seat bottomer (cane): *chair corner*, *chair under*; weaves split cane (sided or upright), by hand, into seats or backs of wooden framed chairs, uses Bradawl for clearing holes in wood-work and knife for pulling cane through mesh and cutting off loose ends; burns splitters, etc. from under side of work with bannan burner.

braider: *plait*, *twist*, and knots an ornamental braid of grass, reed, rush, straw, or twigs for decoration of basket ware by hand; sometimes also makes up these braids, see plaiter; sometimes specifically designated, e.g. reed braider, rush braider, sedge braider.

cane worker, cane weaver, cane; a weaver g.v. working in cane.

chair caner, see bottomer.

chair filler-up (cane): *filler*, *filler-in*, (cane); a cane worker g.v. who fills up, by hand, spaces in cane furniture left by basket maker or wicker furniture maker g.v.; threads strips of split cane or willow rods or rushes into framework of furniture, using a knife and Bradawl; cf. weaver.

chair maker (cane), a cane worker g.v. who makes cane chairs throughout by hand; uses bannan burner for heating and bending cane, commander, i.e. iron hook, for straightening cane, bodkins of various sizes for use in weaving, hammer, mallet and small cutting or stripping tools, for cutting lengths and sections as required.

chair mender: *chair ruler*, *chair seater*; weaves rushes, by hand, into chair seats or frames using a wooden block for knocking or smoothing work during and after weaving process.

chair mender (cane); a cane worker g.v., often itinerant, who repairs and removes seats and backs of cane chairs, or broken filling and supports, by re-weaving and substituting new rods, where necessary.

chair ruler, see chair mender.

chair seater: (i) (cane) see bottomer;

(ii) (rush) see chair mender.

chair willower, as for chair filler-up (cane).

chisel basket maker, punnet maker: plait twigs, by hand, in wooden mould or block, narrow strips of shavings of thin wood to make punnets or chip baskets; places strips of material, in star pattern, on base of block, bending material at right angles to form sides of article; inter-weaves narrower strips of material into sides so formed; fixes rims and sometimes handles, to punnets or baskets, using same material, *lass sewing* or *web* wire stitching machine.

collar maker, as for basket maker.

collar maker (rush or sedge): (i) plait or weaves rush or sedge, by hand, into horse collars; (ii) attaches rush work to outside of horse collars by sewing or lacing.

corve maker, as for basket maker.

cradle maker (wicker), as for wicker furniture maker.

cradle maker, as for basket maker.

fancy basket maker, fancy caner: a basket maker g.v. who weaves fancy patterns, by hand, with finely split cane, osier, or rushes, upon fancy baskets, with band tools.

filler (cane or rush), filler-in, see chair filler-up.

flat maker, frail maker, as for basket maker.

frame maker: bends and shapes stout willow-rod to make frames of baskets, basket chairs, wicker furniture, etc.;

softens rods for bending by holding in gas flame or steam jet, saws, or cuts to length and fastens with nails or by binding with cord.

hamper finisher; a basket picker *q.v.* who also sews lining of cloth or cowhide into hamper, etc.; sews protecting pieces of cowhide on corners, with needle and hump thread or leather lace; binds bottom of hamper with wheels on to bottoms of hampers, etc.; if required; attaches metal hinges, locks and other fittings, by hand; sometimes also varnishes hamper or basket; also paints outer's same colour, by hand, with a brush. **hamper maker**, or for basket maker. **hamper slider**; a basket maker *q.v.* who weaves hamper sides and bottoms separately, where work of basket making is sectionalized; or makes parts of collapsible baskets, by hand, with basket maker's tools and by same method.

hive maker (straw), see beehive maker.

mandrill maker, see for basket maker.

osier worker, see weaver.

paid maker, see for basket maker.

plaiter; plaiter beads of grass, reed, rush, sedge, etc., to form a plait for making basket ware or for decorative work on baskets, etc., sometimes also makes plaits into soft rush baskets, etc., by hand with knife or scissors and trim plaits or braids; sometimes specially designated, e.g., grass plaiter, reed plaiter, rush plaiter.

gunnet maker, see chip basket maker.

rack maker (wicker), see for wicker furniture maker.

ruffia worker; decorates rush mats, baskets, women's straw hats, etc., by hand with coloured raffia, i.e., soft dried grass, threaded through a needle; works either from design supplied or own invention.

randary; a basket maker *q.v.* using single rods and osiers, instead of skews (three rods woven together) or plaits.

rattan worker (case furniture); weaves furniture of rattan (a tough and durable species of cane), as for case workers.

rod worker; a braider, a plaiter, or a weaver *q.v.* using willow rods or osiers.

rush worker; a braider, a plaiter, or a weaver *q.v.* using rushes.

sala worker, sala weaver; a basket maker *q.v.* using sala (a species of willow).

screen maker (wicker); a basket maker *q.v.* who makes screens of willow rods or of bamboo.

sedge worker, sedge plaiter, see for rush worker.

sieve maker; (Kess) a basket maker *q.v.* who makes fruit baskets called "sieves"; cf. sieve maker (426).

skip (skip) maker; (i) or for basket maker; (ii) see beehive maker.

sorter, rod sorter; sorts willow rods according to their length, thickness, and kind.

split maker (fruit baskets), see for chip basket maker.

staker; a basket maker *q.v.* who inserts side stakes, upon which sides are to be woven, into bottom of basket.

stick worker; nails together wooden sticks to make chairs, tables, etc., and covers them partly by winding and nailing on braids or plaits of twigs, rushes, etc.

straw worker; a braider, a plaiter, or a weaver *q.v.* working in straw.

swill maker, see for basket maker.

trimmer, see basket picker.

varnish; paints, varnishes, and decorates baskets and basket ware, case or wicker furniture, etc.

weaver (case, osier, rod, sale, twig, willow, withy); weaver, cane worker.

osier worker, wicker worker, willow worker; fills in framework of baskets, wicker furniture, and other basket ware by interlacing cane, osier or willow rods, twigs, etc.; or weaves osiers or willow rods into plain basket work, or prepares

skews (two or three rods plain or plaited) for filling framed articles; cf. basket maker.

wicker (wicker) maker; a basket maker *q.v.* who makes straw provender baskets, called "wickerets," by weaving and plaiting straw and twigs.

wicker coffin maker; a basket maker *q.v.* who makes coffin frame of thick cane, and fills in by weaving.

wicker stool maker; a basket maker *q.v.* who makes stool of willow rods, by hand throughout.

wicker stool ending maker; weaves and plaits, by hand, wicker stools, i.e., thin strips of cane, into casing for flask, bottles, etc., using hand knife for manipulating and trimming wicker.

wicker furniture maker; a basket maker *q.v.* who specializes in making, by hand, case or wicker chairs, tables, banquette, cart, perambulator, or bath chair bodies, or other similar articles of wicker work, having a framework of willow rods, and a filling of various rods and osiers interwoven therewith.

wicker stool maker, wicker tray maker, see for wicker furniture maker.

wicker truck maker; a basket maker *q.v.* who weaves rough square baskets of twigs or osiers, to be mounted on wheels or runners for use in factories, etc.

wicker worker, see weaver.

willow box maker; a weaver *q.v.* who makes boxes of willow rods.

willow worker, see weaver.

473.—CABINET MAKERS.

adzer; roughly cuts out solid seats of chairs by hand with an adze, i.e., a kind of axe with blade set at right angles to handle.

back maker (chairs) (i) makes chair backs entirely by hand, with wood-working tools; (ii) assembles, by hand, parts of chair backs which have been prepared by woodworking machinist (456) *q.v.*

bedstead maker (wood), bed maker, bed frame maker; makes bedsteads or cots of oak, mahogany, or other hardwoods by hand, using mortising and tenoning tools, saws, planes, chisels and other tools, also glue, sandpaper, etc.; work usually done either by a cabinet maker *q.v.* or joiner (474) *q.v.*

book-case maker, buffet maker, see for cabinet maker.

bull cutter, bull worker; cuts out, by hand, in gold, silver, brass, or other sheet metal, or in wood or other material, with a fine saw and sometimes also curves, by hand, using fine tools, a design to be laid in table, clockcases, etc., or in articles of ebony, ivory, tortoiseshell, etc., to give effect known as "bull" work.

cabinet case fitter; cuts out wood fittings for cabinet cases and passes to cabinet case layer (553) *q.v.* to fit cases; cf. cabinet fitter.

cabinet case maker; a cabinet maker *q.v.* or a specialized worker, who makes polished hardwood cases for cutlery, for surgical instruments, etc., by hand, using saw, plane, chisel and other hand tools; runs out wood joints of cabinet cases, and dovetail or mates them together; if working in hardwood, also makes hole for shield or eucalyptus, and for flush handle, with chisel and makes surface smooth with sandpaper, etc.; sometimes also inlays cases; cases are then ready for French polisher (478) *q.v.* or, if soft wood, for overcoat (553) *q.v.*; sometimes may receive some parts ready machined, see cabinet fitter.

cabinet fitter; a cabinet maker *q.v.* who specializes in fitting together, by hand, with woodworking tools, machined parts of cabinet and

furniture carcasses, heading, moulds, hinges, etc.; fixes hinges, locks, etc., by hand.

cabinet inlayer, see marquetry inlayer.

cabinet maker, cabinet worker; fits furniture and constructs all kinds of furniture and other woodwork that is not glued, using various hard or soft woods; sometimes makes finest class of woodwork, entirely by hand, from rough boards to finished article by sawing wood to required dimensions, planing, shaping, jointing, gluing and smoothing with sandpaper; but (if working in a furniture factory) is more usually engaged in fitting and joining together pieces of wood, which have been cut, planed, shaped, moulded, jointed, and sand-papered by machinery, by other workers; sometimes specifically designated, e.g., buffet maker, camera cabinet maker (camera cases), chest of drawers maker, case bed maker, desk maker, dining table maker, hat and umbrella stand maker, jewel stand maker, music stool maker, photographic cabinet maker (camera cases, slides, etc.), show case maker, sideboard maker, sewing machine case maker, horse maker, wardrobe maker, washstand maker, writing desk maker.

cabinet maker's fitter, see furniture fitter.

camera back maker (not metal); photographic back maker, dark slide maker (not metal); a photographic cabinet maker *q.v.* who specializes in making dark slides with accurately fitting movable partitions, glass screens, etc., of hardwood.

case band (piano), organ, etc., case worker, see fitter-up (pianoforte cases).

case maker; (i) (piano) saws wood to required sizes; planes and cloths it with glass paper and scraper; glues together pieces of wood thus prepared to make back frame, ends, top, falls, back-boards, panels, cheeks and rough bottoms; fits parts of case together, with glue and screws; (ii) (pipe organ) assembles, by hand, work of exterior of organ, and framing or supports; also makes swell boxes; (iii) (reed organ) receives sawn and planed wood from wood working machinist (456) *q.v.* and constructs case, or exterior, therefrom.

case maker (brush, jewel, pipe, etc., cases); general term for any worker engaged in process of making woodwork for brush, jewel, pipe, etc., cases, using circular saw, jig and band saw, sandpapering machines, and band tools and also for those covering and lining cases; sometimes specifically designated, e.g., brush case maker, jewel case maker, pipe case maker.

case maker (clocks); a cabinet maker *q.v.* who specializes in making clock or chronometer cases of polished hardwood.

chair cross framer; boro holes in legs of chair, with auger or brace and bit; inserts rails, i.e. braces, in holes, to strengthen chair, fastening them in with woodworking tools and glue.

chair frame maker, chair framer; chair maker, framer, frame maker; assembles parts of chair frame, prepared by woodworking machinist (496) *q.v.*, by hand, using glue, dovetails, i.e. pegs, screws and wood-papers exposed parts of frame, ready for polisher (478) *q.v.*

chair maker; (i) see chair frame maker; (ii) may also make upholstered chairs throughout, usually by assembling and fitting machine-made parts.

checker (piano), checker and planer, see planer.

chronometer box maker, chronometer case maker, see for case maker (clocks).

cot maker (wood), see for bedstead maker (wood).

couch maker; sofa maker; a furniture maker *g.v.* who specialises in making woodwork of couches, sofas, etc.

curtain frame maker; makes, by hand, using woodworking tools, wooden frames on which to dry lace curtains (see curtain lace, in course of manufacture), after washing up as to prevent distortion of designs worked thereon.

dark slide maker, *see* camera back maker.

deal cabinet maker, deal hand; donkey maker, whitened maker; a cabinet maker *g.v.* working in deal, fir, and other soft woods.

display cabinet maker, *see* shop fitter's cabinet maker.

donkey maker, *see* deal cabinet maker drawers maker; a cabinet maker *g.v.* who makes and fits drawers for cabinets, wardrobes, chests of drawers, etc.

embellisher of wood, *see* marquetry inlayer.

fall maker (piano); a part maker *g.v.* who specialises in making falls (hides covering keys when piano is shut).

fancy cabinet maker; a cabinet maker *g.v.* who specialises in making work-boxes, tea caddies, and other small cabinets; cuts with hand saw and file wooden parts, and joins them by gluing, dove-tailing, or other means; smooths and varnishes outer surface and sometimes also roughly polishes it; constructs wooden trays or compartments for insertion in box; sometimes specially designated, *e.g.* work box maker.

fitter-up (chairs); receives parts of chairs, couches, etc., which have been prepared by woodworking machinist (480) *g.v.*, assembles them by hand, using glue, dowels, i.e., pegs, screws and woodworking tools.

fitter-up (pianoforte, etc., cases); case hand, case worker, fronter, stopper-off; a specialised cabinet maker *g.v.* who receives case of piano, reed organ, or harmonium, as it leaves plinth and checker *g.v.* and proceeds assembling it case by small cherries, by hand, top and bottom doors, fall, hollow, lock front, and back and front tops, making necessary adjustments in these parts (which are commonly made in stock or standard sizes) to make them fit; also affixes decorative mouldings to above-mentioned parts; often (especially in smaller establishments) combines this with work of plinth-and-checker *g.v.* and of cleaner-up (480) *g.v.*

fly finisher (pianos); part finisher (pianos); fits together piano parts, *e.g.* moulding, embellishments, panels, reading desk for music, by cutting joints to fit, gluing, screwing up, etc.; puts in hinges and candle brackets; attaches backing, if required, and generally sets piano in condition ready for sale.

framer (chairs), frame maker, *see* chair frame maker.

framework hand, framework maker (billiard table); receives timber in rough shape; saws, planes and chisels it to make framework, sides and supports for the top of billiard table; makes square legs for tables; is usually a specialised cabinet maker *g.v.* engaged on heavier work than small worker (billiard table) *g.v.*

fronter (piano), *see* fitter-up (pianoforte case).

furniture fitter; cabinet maker's fitter; fixes handles, locks, hinges, etc., to pieces of furniture, after they have been French polished.

furniture maker, antique; art furniture maker; a cabinet maker *g.v.* who specialises in making imitations of Sheraton, Chippendale, or other period furniture.

furniture maker, bentwood; puts wood in steam chamber for a specified time to make it soft and pliable; then puts it into a bending machine, securing it to desired position with

screws and levers; cuts wood to required lengths and assembles parts by hand, using bolts, screws, dowels, *a.c.* pegs, and woodworking tools.

furniture repairer; does all kinds of repairing work, *e.g.* joinery, upholstery, fitting, as well as cabinet maker's work proper, on worn or damaged furniture.

grand piano maker; a fitter-up (pianoforte cases) *g.v.* who specialises in assembling and fitting together cases of grand pianos; also does work of plinth-and-checker *g.v.* as well as that done by fitter-up in case of upright pianos.

inlayer of wood, inlayer of fancy wood, *see* marquetry inlayer.

instrument case maker; surgical instrument case maker; (i) a cabinet case maker *g.v.*, who makes instrument cases throughout, using hammers, chisels, saws, etc.; constructs shells of cases and internal woodwork, *e.g.* larynxes, partitions, etc.; screws brackets and partitions into position; prepares case with gonges and other tools to receive brass supports, plates, hinges and locks; screws metal fittings into position; (ii) assembles and fits together parts of instrument cases supplied by other workers; attends dovetailing machine; fits in internal fittings and adds brass supports, plates, etc.

invalid chair maker; usually makes parts of invalid chairs but may receive complete requirements from woodblock machinist (480) *g.v.*; cuts panels, bolts, dowels, and assembles parts, by hand, using woodworking tools, and, if necessary, glue; *cf.* invalid chair maker (475/5).

jewel case maker, jewel and plate case maker; designs, shapes, fits out and finishes wooden jewel cases throughout, using usual woodworking tools; does not line or cover cases; prepares inside supports and glues them into position, cuts to shape, planes, sandpapers and glues into place strips of wood, gluing them into position in cases; contrives and shapes parts to display jewels, makes domed lid of box, using gonging and smoothing tools, work sometimes done by cabinet case maker *g.v.*

joiner (cabinet work); joins together, by hand, sections of parts of furniture and other wooden articles, prepared by cabinet maker *g.v.*; work requires finer finish than that of ordinary joiner (474) *g.v.* and is done by special woodworking tools, by dove-tailing, morticing, tenoning, dovelling, gluing, etc.

key block maker (pianos); prepares, by gluing and veneering, wooden blocks inserted between keyboard and ends of piano at each end of keyboard; does not fix keyboards in position on keyboard; usually done by part maker *g.v.*

looking glass frame maker; mirror frame maker; a cabinet maker *g.v.* who specialises in making, throughout, mirror or looking glass frames.

lyre maker; a part maker *g.v.* who specialises in making lyre pedal attachments for grand pianos.

marquetry cutter; from prepared designs, cuts, with hand saw or knife, a number of pieces of veneer, either separately or in a series of thicknesses of one another; also cuts surrounds to receive inlays, glues design in its surround on paper or to plywood; places whole in hand-manipulated screw press, together with plates of heated iron, to keep glue soft whilst pressure is being applied; removes work when set, and finally scrapes surface smooth, by hand, with steel scraper tool; work sometimes done by buhl cutter *g.v.*

marquetry engraver; receives sad of veneer, prepared by marquetry cutter *g.v.*, and rubs and scratches surface of pad with delicate graving tools to produce ornamental effects, *e.g.* veining of leaves, etc.; cuts are then filled in with black wax.

marquetry inlayer; cabinet inlayer, embellisher of wood, inlayer of wood, inlayer of fancy wood; traces upon coloured woods, shells, sheet metal, etc., outlines of shapes to be inlaid; cuts out shapes, *see* marquetry cutter; inserts them with adhesives into skirtings made by marquetry engraver *g.v.*, and, when they are set, smooths them off by planing, sand-papering, etc.

mirror frame maker (not gilt), *see* looking glass frame maker.

music stool maker, *see* piano stool maker.

oval frame maker (not gilt); (i) a looking glass frame maker *g.v.*, who receives sections of oval frames, which have been cut by fret sawyer (481) *g.v.*, and moulded by moulding machinist (480) *g.v.*, drills holes in sections and inserts wooden dowels, assembles sections, by hand, using woodworking tools, and, if necessary, glue; finishes by smoothing assembled glass, frames with sandpaper (476) *g.v.*, moulds, dowels and assembles parts of oval frames, entirely by hand, using woodworking tools.

overmoulded fitter; constructs or fits together by hand, using woodworking tools, glue and nails, overmoulded iron previously prepared moulding, paneling, etc.; also fits plate glass narrow where required.

parquetry cutter; marks out shapes of intricate design, using templates, on thin strips of various coloured woods; cuts these with hand or machine saw; finishes off edges and surface of each piece with hand tools and sandpaper, ready for parquetry inlayer *g.v.*

parquetry engraver, *see* for marquetry engraver.

parquetry inlayer; glues together thin strips of variously coloured woods, previously cut to shape by parquetry cutter *g.v.*, fixes them in a cowl, i.e., a hand-manipulated wooden device used for holding work in rigid position and at same time distributing pressure evenly; sometimes also finishes work with hand plane, scraper and fine saw.

part finisher (pianos), *see* fly finisher (pianos).

part maker (pinno); prepares parts of piano case, as received from saw mill, for veneering, by flattening surfaces, and then scraping them with a tool, *s.e.* a small-toothed plane used for giving a rough surface to wood then glue on veneer; sometimes also does work of veneer matcher *g.v.*; sometimes also makes falls (hides to cover keys) and doors, as well as flat parts.

photographic back maker, *see* camera back maker.

piano stool maker; music stool maker; makes piano or music stools throughout, by hand, with various woodworking tools, or by fitting together parts prepared by woodworking machinist (480) *g.v.*; dove-tails legs into base; if using revolving-screw stools, winds and screws in axle, on hinges and clasp; for companion cases, hollows out cavities for two or more pipes.

pipe case maker; lays pipe on plank and traces outline with pencil, allowing for thickness of lining to be inserted; reverses pipe and traces outline on another part of plank, giving shape of other half of case; chisels and gouges out wood almost to depth of pipe; saws off these two lengths from plank, and saws, chisels, raps, files, gouges and sandpapers to produce final shape; cuts away superfluous wood and screws in axle, on hinges and clasp; for companion cases, hollows out cavities for two or more pipes.

plinth, plinth-and-checker, checker (pianos), checker and plinth hand; fits ends, checks or sides of plinth back of upright piano, by hand, with glue and screws, sometimes also screws castors on to bottom of piano; work sometimes done by fitter *g.v.*

elevator assembler (aeroplane); see *aeroplane assembler*.
exhibition stand fitter; does rough carpentering, lays linoleum, tacks cloth, and does other similar work incidental to erection of exhibition stands.

fence (wood), fence erector; receives timber ready cut to dimensions required, and nails upright pieces to horizontal bars; also posts and erects fence in position, usually also fixes gates in position, and repairs fence.

fencing maker; binds together palings of cleft chestnut or other wood with wire, using a hand machine, to make chestnut fencing.

fixer, see carpenter, house.

floor dresser; planes with hand planes, or scrapes with steel scraper tool; wooden floors, after being laid by carpenter *q.v.*; work usually done by carpenter *q.v.*; sometimes dresses by use of portable electric planing machine.

floor layer; a carpenter *q.v.* who lays down and clings floor-boards, sole by side and nails them to floor joists to form floors, then planing away with hand plane, any unevenness.

form maker, see bench maker.

frame maker (agricultural machine); machine erector, machine frame maker, machine maker; a carpenter *q.v.* who builds framework and undercarriage of threshing machines, elevators, and other agricultural machines, and fits parts together.

frame maker, garden; horticultural frame maker, a carpenter *q.v.* who makes garden frames, such as

frame shooter (silk factories); a mill joiner *q.v.* who levels up woodwork of silk dressing frames.

fuelage erector, see body erector (aeroplane).

garden seat and furniture maker, see joiner (garden furniture).

gate maker; saws, shapes, and mortises pieces of timber and fits and nails them together to form gates.

greenhouse maker; horticultural house maker, a carpenter *q.v.* who makes wooden framework of greenhouse, etc., either by hand, cutting, shaping and joining pieces of wood with woodworking tools; or more usually by fitting together pieces of wood prepared by machinist (456) *q.v.*; may also erect framework, usually on brick base, afterwards to be glazed by glazier (509) *q.v.*

handrail maker; a joiner *q.v.* who makes working drawings of wooden handrail, cut seating, etc., and makes by hand, with woodworking tools, various templates or moulds for use in cutting twists or turns in rail; cuts twists or turns from square blocks of wood on hand saw, or directs hand sawyer (451) *q.v.*; cuts ornamental moulding of twists and turns with hand tools, but usually receives long straight pieces ready moulded by moulding machinist (456) *q.v.*; does completed handrail into position, by hand.

boarding erector, boarding maker; a rough carpenter *q.v.* who fixes timber on rough standards, to make surface for advertisements, or as screen.

horticultural house maker, see greenhouse maker.

hutch maker; a rough carpenter *q.v.* who makes rabbit hutches, colliery hutches (wheeled boxes for transporting coal in a mine), or bakers' kneading troughs.

joiner; makes various kinds of woodwork in a workshop (is distinguished from carpenter, who usually works outside workshop); fits together pieces of prepared wood (mainly deal, pine, oak, mahogany, teak and walnut) by gluing, dovetailing, screwing, tonguing, and grooving, to make doors, windows, staircases, cupboards, panelling, etc., for houses, counters, show cases, etc., for shops, woodwork of railway carriages, tramcars, etc., lighter parts of ships' timbering and

ships' fittings, etc.; sometimes also a carpenter *q.v.*; sometimes works in conjunction with cabinet maker (475) *q.v.* where work is to be decorated with veneers or with inlays.

joiner, cabin; cabin maker, ship joiner, a joiner *q.v.* who constructs ships' cabins, including bunks, bunks, racks, washing stands, etc.

joiner, carriage (textile machinery); a joiner *q.v.* who makes wooden parts of carriages for male spinning machines.

joiner, case (organ); a joiner *q.v.* who makes external woodwork, e.g. panels, moulding, bands, impots, paws, rails, pilasters, decorative work, canopy, of pipe organs, by hand and/or by machine.

joiner, case (piano); a joiner *q.v.* who saws up parts of piano case, makes joints and fits parts together; cf. case maker (piano) (473).

joiner, coach; assembles pieces of wood, prepared by woodworking machinist (456) *q.v.*; assembles them to form frames, doors and other finer sections of coach woodwork, cutting and shaping if necessary, with saw, chisel, etc., to facilitate fitting, and fastening parts together with nails, screws or bolts.

joiner (colliery); (i) see carpenter, pit; (ii) in Cumberland and Cleveland, a carpenter *q.v.* who erects timber for support of roof and sides of colliery roads, and hetties for ventilation in colliery places.

joiner (garden furniture); garden seat and furniture maker; a joiner *q.v.* who cuts and joins together timber, either sawn and planed or rustic, i.e. in natural irregular form, to form garden furniture.

joiner, loom; a joiner *q.v.* who cuts and fits together wooden parts of weaving looms.

joiner (maintenance), mill joiner, see carpenter (maintenance).

joiner, printer's; a joiner *q.v.* who makes printer's type cases and other equipment for printers' offices, by fitting together pieces of wood, which he usually receives cut, grooved, and tenoned by other workers.

joiner, ship, see joiner, cabin.

joiner, shop fitter's; a joiner *q.v.* who constructs shelves, counters, drawers, cupboards, etc., for equipment of shops, usually of less intricate construction, than commercial wood, or of less high finish than those made by shop fitter's cabinet maker (473) *q.v.*

ladder maker; a rough carpenter *q.v.* who makes and drills uprights of ladders, and makes and constructs leading fence (railways); is in charge of a gang of men erecting or repairing fences along a railway, see fence, machine erector, machine maker, machine frame maker, see frame maker (agricultural machine), machine maker (wood), see chimney piece maker.

master carpenter (theatre); in large theatres is responsible for making and repairing wood-work required on stage, and often for all carpentry work in theatre, in small theatre is usually a working stage carpenter *q.v.*

mattress frame maker (wood), wire mattress frame maker; bed frame maker, joiner *q.v.* who assembles pieces of wood to make a frame to which wire mattress is attached or from which box mattress is made.

mineral water box maker, or for divison case maker.

stone maker (artificial stone); a rough carpenter *q.v.* making wooden moulds in which artificial flags, blocks, or stones are cast.

pitwright, see carpenter, pit.

plane assembler (aeroplane); builds up parts of planes, i.e. wings of aeroplanes, prepared by sawyers (481) and machinists (456) *q.v.* on a jig or mould, into complete planes, by hand, with woodworking tools.

plane erector (aeroplane); attaches elevators, i.e. ailerons, to aeroplanes or wings of aeroplanes; erects plane

or wings on fuselage, i.e. body of aeroplane; also erects or builds up fuselage; assembles rudder, and attaches to fuselage.

platform band (tramcar); assists erector (216) *q.v.* in fitting up conditions on driving platform; assists body builder (476) *q.v.* in fitting of shields, guards, stairs, etc.

poultry appliances maker; a rough carpenter *q.v.* who puts together pieces of wood ready cut to measure to form wooden fowl houses, chicken runs, chicken bathtubs, egg boxes, incubators, etc.

roof fixer, roof band; roof truss maker; a carpenter *q.v.* who cuts prepared pieces of timber to required angles, lengths, and joints to form frame of roof, and fastens them together with iron straps and bolts, or with nails.

roof repainer (rolling stock); renews timber, steel, cast-iron, used as roofing materials on railway or tramway rolling stock.

roof truss maker, see roof fixer.

saw maker (wood), meat saw maker; cuts pieces of wood to required size and shape, and fits them together to make wooden saws and fixes wire gauge in door frames and/or sides for storing meat.

see chest maker; a joiner *q.v.* who assembles pieces of wood, which he receives ready cut and machined, and screws or nails them together to form see chests; adds strengthening strips, metal angle pieces, hinges, locks and handles.

seat maker (tramcars); a joiner *q.v.* who cuts, joins and fits together pieces of wood to form seats of tramcars.

sheep cage maker; a rough carpenter *q.v.* who makes cages for the conveyance of sheep and lambs from field to fold or to market.

shutter maker (wood); (i) a joiner *q.v.* who makes flat wooden window shutters, (ii) a woodworker (456) fastens together lathes of special section with hinged chain, which is screwed to back, the whole being attached to a spring roller, so that shutter can be drawn up or down.

sign maker; a carpenter *q.v.* who joins and glues together boards, strengthened by battens screwed on back, dresses front to fair surface by planing, in readiness for advertisement to be painted on it; generally also fixes sign.

skylight maker; a joiner *q.v.* who fits together pieces of prepared wood to form a skylight, and fastens them together by tenoning and morticing, by gluing (or painting) tenons and mortices, and by driving in wooden wedges; then cleans off joints to fair surface with plane.

sliding partition maker; a joiner *q.v.* who makes pieces of framing, which may be fitted with (i) centre pivot at top and at bottom on which framing revolves when partition is folded, or (ii) wheels to enable it to slide at top and at bottom of framing; also fits pieces of framing together to make complete partition.

spout maker (cement); a rough carpenter *q.v.* who makes, by hand, and repairs spouts of wood for conveying cement into bins in warehouses; cf. spout maker (metal) (263).

staircase builder; a joiner *q.v.* who takes side pieces of staircase, ready cut to required dimensions, and cuts grooves therein for insertion of steps; inserts steps, consisting of pieces of wood glued together, and fastens them in with wedges.

step maker; a carpenter or joiner *q.v.* who cuts, by hand, pieces of wood to required dimensions, and planes them for step ladders; cuts grooves in side pieces for insertion of steps; fits steps into grooves, and nails whole together; makes supporting stay, in same way, attaches stay to step portion by hinges; sometimes also makes treads and similar articles.

tank maker (wood), *see* cistern and tank maker.

target maker (floating), floating target maker; a carpenter or ship carpenter *q.v.* who constructs a foundation of timber and erects vertical supports for attachment of lattice work, for use as targets for gun practice; may also cover lattice with canvas, fastening it with battens and nails.

tool chest maker; a joiner *q.v.* who takes pieces of wood, ready cut and machined by other workers, and fits them together, by hand, to form tool chest; adds metal or rope handles, and fits in trays and compartments.

top deck hand (tramcar); fits trolley poles, axles, rails, and other fittings of top decks of double-decked tramcars, and is responsible generally for wood work on top decks.

travelling box maker, *see* trunk maker.

trawler maker, *as for* step maker.

trough maker (wood); a rough carpenter *q.v.* who makes wooden troughs for agricultural and other purposes.

trunk maker (wood), Saratoga trunk maker; travelling box maker (*wood*); assembles and nails together, by hand, pieces of wood, cut and shaped by other workers; glues outside of trunk, and covers it with cloth or leather; attaches metal edges and corners, hinges, handles and locks, also wooden buttons or staves.

wainscot maker; saws, by hand, and fits from planed or moulded wood, wainscots for rooms, staircases, etc.; nails or otherwise secures to wall and flooring.

wheelbarrow builder, wheelbarrow maker; a carpenter *q.v.* who builds, fits, and joins together pieces of wood to make wheelbarrows.

wheelbarrow repairer; a carpenter *q.v.* who specialises in repairs to wheelbarrows.

window sash maker; a joiner *q.v.* who receives sections of wooden frames for sash windows, prepared by woodworking machinist (485) *q.v.*; fastens them together with screws or nails, by clamping in hand-manipulated machine, or with glue; makes joints fast with wooden wedges driven into mortises.

wing erecter (aeroplane); a plane erecter *q.v.* who specialises in erecting aeroplane wings and fitting to fuselages.

475-6.—COACH AND CARRIAGE (INCLUDING RAILWAY CARRIAGE AND TRAMCAR) BUILDERS; BODY BUILDERS; WHEELWRIGHTS; B. B. T. WRIGHTS, WAGONWRIGHTS.

ambulance builder, ambulance maker, *as for* coach builder (private carriages).

barrow builder, barrow maker, *as for* cart builder; *cf.* wheelbarrow builder (474).

Bath chair maker; invalid chair maker, invalid carriage maker, wheel chair maker; (i) assembles wooden parts of body of Bath chair, invalid chair or carriage, etc., which have been prepared by machinist (486) *q.v.*; but does not mount chair on spring and wheels, or add hood and other fittings, for which *see* fitter or mounter, (ii) makes body of Bath chair, etc., throughout, i.e. prepares wooden parts, by hand, with woodworking tools, and finishes them.

body builder, body maker (not case or vicker), wood body maker; car builder, coach builder (tramcars), coach maker; receives wood, prepared by woodworking machinist (486) *q.v.*, and builds up, by hand, with woodworking tools, according to design supplied, into framework, lining,

floors, and other wooden parts of bodies of coaches, carriages, motor cars, railway carriages, tramcars, perambulators, etc.; cuts or chisels each part, if necessary, with saws, rasps, etc., to make it fit more perfectly; fits them together with bolts, screws, etc., and fits in wood panels and moulding on metal parts; sometimes specifically designated, e.g. basinet body maker, coach body maker, motor body maker, perambulator body maker.

body finisher; car finisher, carriage finisher, coach finisher, finisher, motor finisher; smooths surface of car or carriage body, after it has been built by body builder *q.v.*, with glass paper or with pumice stone or pumice, or by filing or planing; prepares surface for polisher (478) or painter (390) *q.v.*; in repair work cleans off old polish, and prepares surface for re-polishing; *cf.* mounter.

body fitter, *see* mounter.

car builder (tramcars), *see* body builder.

car finisher, *see* body finisher.

carriage builder, carriage maker, *see* coach builder (private carriages).

carriage finisher, *see* body finisher.

carriage fitter (railways); fits brake-work, axle-boxes, and other metal parts on under-frames of railway carriages.

cart builder, cart maker, cartwright; builds body of cart, *see* body builder, and adds axles, wheels, shafts, etc., thereto; work often done by wheelwright *q.v.*

coach builder (private carriages, motor cars, etc.); carriage builder, carriage maker; general term for workers engaged in building or making carriages or coaches, including body builder, body fitter, mounter, coach body mounter *q.v.*, and also coach trimmer, coach upholsterer (394) *q.v.*

coach builder (tramcars), *see* body builder.

coach finisher (railway carriages), *see* body finisher.

coach fitter (railway carriages); fits and bolts wooden body on to chassis frame, and fits parking and timber bolsters into bogies; also fits brakes and general details on to carriages.

coach maker (railway carriages and tramcars), *see* body builder.

coach wheeler, *see* wheel builder.

dray maker, *as for* cart builder.

felloe bender, *see* rim bender.

felloe cleaver, felloe hewer, felloe render; cuts out felloe (segment of rim of wooden wheel) direct from rough timber with hand tools; obsolescent.

felloe cutter, felloe maker; marks out shape of felloe (segment of rim of wooden wheel) on plank of wood and cuts out with hand frame saw; sometimes done by hand sawyer (481) *q.v.*

finisher, *see* body finisher.

finisher (rolling stock); fits handle fittings, number plates, etc., on vehicle after it has been painted, working by hand with hand tools; *cf.* body finisher (393).

fitter, fittings and furniture fitter; fixes in position, fittings and attachments of axles, carriages, or other vehicles.

float builder, float maker, tradesman's float builder, tradesman's float maker; a cart builder *q.v.* who specialises in making milk floats, and other tradesmen's floats or light cars.

hand cart maker, *as for* cart builder.

hanger (motor cars); a body builder *q.v.* principally engaged in fitting spind boards, foot steps, tool boxes, brackets, and other accessories to motor cars.

horse box builder, horse box maker; builds up, from prepared parts, rolling stock used for conveying horses on railways, and repairs such vehicles as required; work usually done by body builder *q.v.*

horse box repairer; repairs woodwork of horse boxes, and fits new or repaired ironwork thereto, as required.

invalid carriage maker, invalid chair maker, *see* Bath chair maker; *cf.* invalid chair maker (475).

milk cart builder, milk cart maker, milk float builder, milk float maker, *as for* float builder.

motor finisher, *see* body finisher.

mounter, body mounter, coach mounter, coach body mounter; body fitter; fixes body of carriage, cart, motor, or other vehicle to its chassis, or undercarriage, by hand, using hand tools, screws and bolts; also fits mudguards, etc., before painting.

repairer (cart, dray, float,rolley, trolley, van, etc.); a cart builder or dray builder *q.v.* principally engaged in carrying out repairs, by hand, to carts, drays, floats, etc.

rim bender, rim maker; felloe bender; places strips of wood (ash or elm) in steam chest and withdraws them when sufficiently softened; places them in clamps and, by bending and screwing up tightly, shapes them into bell circle on block; removes from clamp when dry.

rolley builder, roley maker, *as for* cart builder.

side ear builder, *as for* coach builder (private carriages).

spoke bender; softens wooden spokes in steam chamber and bends them to shape; after they have been bent or cloven from hulk; obsolescent.

spoke cleaver, spoke hewer, spoke render; cuts wooden spokes out direct from rough timber, with hand tools, splitting the wood the way of the grain.

spoke cutter, spoke maker; shapes spoke, by hand, from square block of wood by cutting away edges with small sideaxe; finishes by trimming surface with spokeshave or draw knife; mortises end of spoke for fixing into hub and felloe; sometimes done by machine by wood turner (480) *q.v.*

timber carriage builder, timber carriage maker, timber wagon builder, timber wagon maker; a cart builder *q.v.* who specialises in making timber carriages, i.e. wagons used for carrying tree trunks, baulks, and other large pieces of timber.

trolley maker, truck builder, truck maker, van builder, van maker, wagon builder, wagon maker, wagon wright, wood's wagon maker, *as for* cart builder.

wheel blocker; horse hub of cart wheel on a wood lathe to receive axle, and attaches metal bushes thereto.

wheel builder, wheel maker, wheeler; coach wheeler; receives hulk (stock), spokes and felloes ready made; mortises hub by hand or machine; fits spokes into holes thus made; finishes; also takes either end of spokes and fits felloes to spokes; drives wooden or steel wedges into mortised holes to fix spokes firmly; smooths over work with plane, rasp, and sandpaper in readiness for iron-smith; in some cases may also make spokes, hubs and felloes; *cf.* felloe cutter, spoke cutter, and stock maker (wheels) (486).

wheel chair maker, *see* Bath chair maker.

wheel glazier; mortises hub and fixes spokes of cart wheels into wheel centres; obsolescent; usually done by wheel builder *q.v.*

wheel maker (railway coach, etc.); cuts out wooden or paper maché

blocks to fill spaces between tyre rim and boss, and fits together parts of railway carriage wheel.

whielwright; assembles wooden parts of carriages, vans, etc., prepared by sawyer (481) or by woodworking machinist (488) *q.v.*, and fits these parts together by hand, with hand tools, to make complete vehicles; often also does work of a wheel builder *q.v.*

477.—COOPERS, HOOP MAKERS AND BENDERS.

back maker, *see vat maker*.

barrel and cask maker, *see cooper*.

buckett maker, churn maker, as for cooper, *white*.

cooper; barrel and cask maker; tubber, tubbie, tub thumper (*slang*); (1) makes barrels or casks by hand, using cooper's hammer, adze, etc.; takes staves, prepared by hand sawyer (481) *q.v.*, and helves them on one side, with a two-handled bedding knife; rounds or bucks with backing knife; joints, *i.e.* bevels edges, by pushing steel-jointed blade of jointer tool; assembles a number of staves in a circular forming frame, passes a temporary wooden hoop over them, and hammers, forcing staves close together; repeats process with smaller hoops until a half-completed cask over the barrel to make wood warm and pliable; finally hammers on permanent hoops; scrapes surfaces of cask, inside and outside, smooth with steel scraper; takes component parts of heads, *i.e.* ends of cask, prepared by head cutter (481) *q.v.*, outlines circular shapes thereon with dividers, and cuts to shape with a cooper's adze; cuts a groove, *i.e.* groove, near top of staves inside, to receive head, with a crowing tool, *i.e.* a kind of plane; chisels staves, *i.e.* helves, inner edge, at top, with a spokeshave; hammers on final hoop round top; often employed in repairing casks or barrels, *e.g.* taking out defective staves, heads, etc., and replacing with new; (2) assembles staves, which have been hallowed, backed and jointed by cooper's machinist (488) *q.v.*; passes hoops over assembled staves, and inserts and hammers in heads, but leaves hoops to be hammered slightly by machine barrel driver (469) *q.v.*

cooper, head, *see cooper, dock*.

cooper, dairy, as for cooper, *white*.

cooper, dock; bond cooper, a cooper *q.v.* who is employed in bonded warehouse at docks in unship, repair, and storage of full casks.

cooper, dry, a cooper *q.v.* who makes casks or barrels for cement, groceries, and other non-liquid goods.

cooper (repairing); barrel repairer, cask repairer, tub repairer; a cooper (wet or dry) *q.v.* employed in a coopers' shop, or at a manufacturing establishment or warehouse in any industry where casks or barrels are used, and is wholly or principally engaged in repairs.

cooper, runlet; a wet cooper *q.v.* who specialises in making runlets, *i.e.* small casks or barrels for milk, wine, vinegar, etc.

cooper, wet; tight cooper; a cooper *q.v.* who makes casks or barrels for holding liquids.

cooper, white; makes buckets, churns, wooden pails, and other *fasty* goods of the coopers' craft, using tools and methods similar to those of cooper *q.v.*

dolly tub maker; a white cooper *q.v.* who makes washing tubs.

header-up (Guelph kegs); hammers head, *i.e.* four sections of shagged wooden board, into end of cask, resting upon hoop which has been inserted by liner-in *q.v.*; sometimes also fits in an additional board made of cardboard, before wooden head, to make keg dust proof.

hoop bender, wood hoop bender; hooper (Westmorland); receives split saplings that have been soaked in hot water or steamed in steam chamber; passes them through roller machine, which he turns by hand, to give a slight inward curve, then bends them, by hand, on a frame of whatever size hoop is to be; binds ends of hoop with peg.

hooper; (1) completes cask or barrel by putting on permanent iron or wooden hoops, by hand or by machine; (2) in Westmorland, *see* hoop maker, and hoop bender.

hoop maker, wood hoop maker; Hooper (Westmorland), hoop shaver, splitter; splits saplings of hazel, chestnut or ash and makes them into wood hoops for coopers; *see* hoop bender.

hoop shaver, *see* hoop maker.

hoop stick bender; bends sticks to shape, by steaming, for use in making rails of railway carriages, and the like.

keg maker; a cooper *q.v.* making kegs, or small barrels.

keg maker, Guelph; general term for any workmen engaged in making Guelph kegs, *i.e.* cylindrical wooden vessels made of two or three layers of veneer, including machinist (Guelph kegs), liner-in (Guelph kegs), header-up (Guelph kegs), and liner-off (Guelph kegs) *q.v.*

liner-in (Guelph kegs); receives unfinished Guelph keg from machinist *q.v.* and puts it in trough of specially constructed hollow bench; nails wooden hoop with hammer and nails, at a specified distance inside edge or lining of keg, which is then ready for header-up *q.v.*

liner-off (Guelph kegs); nails a final wooden hoop upon head of keg, with hammer and nails, to keep head in position.

machinist (Guelph kegs); lays two or three layers of narrow boards of veneer, horizontally, to form base on cylinder of keg-forming machine, rotating cylinder slowly, segment by segment, by means of iron clamps; clamps boards down with adjustable iron clamps; lays narrower strips of veneer vertically at right angles to horizontal pieces, slips iron hoops over this second set of strips to hold them in position, and clamps them down with adjustable iron clamps; punches holes in iron hoops with hammer and punch, to receive nails, and nails binding strips to hose; trims off edges by bringing two small power-driven circular saws, one at each end, into contact with them, by moving hand lever or treadle; removes iron clamps, and takes keg from cylinder on which it has been built up.

pail maker (wood), as for cooper, *white*.

repairer, barrel, cask, tub, *see* cooper (repairing).

scraper, shaver; scrapes or shaves inner and outer surfaces of casks, by hand, with a two-handled shave knife or with a steel scraper tool; work usually done by cooper *q.v.*; cf. finisher (coopering) (486).

splitter, *see* hoop maker.

trimmer; examines used casks or barrels, on return to brewery, distillery, etc.; taps staves with a hammer to discover if they are sound, and marks, with chalk, staves, or chops pieces out of defective staves, etc., to call attention to defects; examines them again when returned from repair shop, and sends back for further attention if still defective.

trusser (casks); slips a temporary wooden hoop over staves of uncompleted cask or barrel, and hammers it down with hammer and driving iron, to force staves close together,

cask is then ready for permanent iron hoops to be put on in same way.

tubber, tubbie, tub thumper (*slang*), *see* cooper.

tub maker, *see* vat maker.

unheader (casks); takes out heads of casks for cleaning purposes, for repair or for removal of contents; usually done by cooper (477) *q.v.*

vat builder, vat erector; a vat maker *q.v.* who erects, in brewery, large vat or back which has been made in coopers' shop, and takes in pieces for convenience of transport.

vat maker; lark maker, tub maker; a wet cooper *q.v.* who makes large wooden tubs or tanks, for brewing and the like, called vats or backs.

478.—FRENCH POLISHERS.

bodyer, bodier (pianos and organs); takes roughly polished parts from filler *q.v.* and fills on more polish to give body or increased depth of colour.

filler, filler-in, polisher's filler-in; polishing boy; fills up with soft, porous graft of white wood, used in piano and organ making, with a patent filling composition (composed largely of plaster of Paris), which he applies by hand, with a piece of sacking, rubs whole with sandpaper; then applies rough first coat of polish by hand, with a cotton-wad.

polisher, French polisher, wood polisher; covers surface of woodwork (usually hardwood) with a coating of spirit varnish, *i.e.* gum shellac dissolved in spirit, and rubs it over with a hand pad containing cotton wool saturated with varnish until spirit has entirely evaporated; for inferior work occasionally applies varnish with a mechanical spray; sometimes uses wax and other materials for polishing in addition to, or instead of, spirit varnish; sometimes stains and fills wood surfaces, in addition to polishing them, *see* filler.

polisher (pianos, harmoniums, organs); a polisher *q.v.* engaged in polishing cases of pianos, organs, harmoniums, etc.; can sometimes "colour up" case to any desired colour; sometimes finishes polishing with mottled spirit, or by rubbing in vitrol and chalk.

tpolishing boy, *see* filler.

479.—PACKING CASE AND WOODEN BOX MAKERS.

botcher, *see* repairer.

box cooper, *see* repairer.

box maker, wooden box maker; general terms for any worker who performs any or all of the following processes, *e.g.*, assembles pieces of timber, previously cut to required dimensions by sawyer (481) *q.v.*; nails or screws them together, either by hand or by automatic nailing machine; trims edges with spoke shave; adds handles, fittings, hinges, etc.; sometimes also sandpapers and varnishes boxes, and puts in trays or compartments (if any).

box re-maker, *see* repairer.

case maker; packing case maker; assembles boards, previously cut to required dimensions by sawyer (481) *q.v.*, and nails them together to form packing cases; trims edges of boards with saw, and adds fittings, hoop iron binding, lids, metal corners, rope handles, hinges, etc., as required, using jointer's tools.

crate maker; assembles and nails together, by hand, planks or battens, previously cut to required dimensions by sawyer (481) *q.v.*, to make crate; adds hoop iron and handles, if required.

packer (printer's rollers); a case maker *q.v.* who makes a specially shaped and fitted wooden case for the transport of printer's rollers; inserts roller in case and secures it.

packing case maker, *see* case maker.

repairer, box repairer, case repairer; botcher, box cooper, bar re-maker, tea chest cooper, tea cooper; removes old or damaged parts of boxes, cases, crates, tea chests, etc., and replaces with new timber; renews iron hoops, handles and other fittings; re-nails box or case and re-varnishes if necessary.

tea chest cooper, tea cooper, *see* repairer.

ten chest maker; nails together, by hand, parts of tea chests, previously cut to required dimensions by other workers; adds hoop iron or metal corner strips or tin foil lining.

480.—PATTERN MAKERS (WOOD OR UNDEFINED).

core box maker, *see* pattern maker.

model maker; Yorkshire term, *see* pattern maker.

mail model maker, nail pattern maker; a pattern maker *q.v.* engaged in making patterns for use in manufacture of cast nails.

pattern maker; model maker (Yorkshire); makes models of patterns (usually of wood), core boxes, striking boards, templates, etc., used by moulders in a foundry to form sand moulds from which castings are made; receives, from drawing office, drawing of part to be cast (or sometimes in provided with specimen of part itself) and makes rough working drawing therefrom; thence makes pattern in two or more parts, to facilitate removal from sand, using hand tools, wood-boring machines, tools, and a few special tools and devices; sometimes specifically designated, *cf.* engineer's pattern maker; *cf.* pattern maker (278).

481.—SAWYERS.

aeroplane rib, spar or strut maker; a sawyer *q.v.* who cuts longitudinal spars and transverse ribs for aeroplanes on circular or band saws, to pattern provided.

back sawyer, *see* rack sawyer.

bamboo machinist; cuts part of bamboo furniture, etc. on circular saw, ready for bamboo furniture maker (496) *q.v.*

band sawyer, band mill sawyer, bandman; adjusts or inserts a gauge, mould, or mark in power-driven band or ribbon saw to guide wood as it passes through machine; sets machine in motion by moving a lever or otherwise; passes wood into machine, and holds it as it passes through machine, guiding it if necessary; if a skilled sawyer, sets his own saw, i.e. sharpens teeth by hand filing and with punch and hammer.

bowl cutter (tobacco pipes); cuts brier root or other wood roughly to shape of bowl and stems of tobacco pipe, with a machine saw.

box and slide machine attendant; (i) adjusts gauge of power-driven band saw or circular saw to width required; sets saw in motion by moving a lever or otherwise; passes wood over metal table of machine into contact with saw; sharpens saw, by hand, if required; (ii) stands at back of machine, and receives cut wood as it leaves saw, guiding it towards him over metal table of machine.

box-maker's cutter, cutter-out; cuts out sides, bottoms, and tops of boxes to measurements, on circular saw; *cf.* box-maker's cutter (and sawyer) (480).

blocker, *see* wood block sawyer.

blocker (wood heels), bell blocker; a sawyer *q.v.* who cuts up lengths of timber into blocks for breaster (486) *q.v.*

chair stuff maker; a band sawyer *q.v.* who specialises in cutting sections of chairs; *cf.* chair stuff maker (486).

circular sawyer; adjusts or inserts a gauge in power-driven circular saw, regulating length and width to which timber is to be sawn; sets in motion saw, which protrudes through a slot in metal table of machine, by moving a lever or otherwise, and passes timber along surface of table, against revolving circular saw, if a skilled sawyer, sharpens teeth of saw, by hand, with a file, punch and hammer, and fixes saw, after sharpening, back in position in machine.

colliery sawyer; saws timber, usually of large bulk, for use in and about mines; usually operates circular saw.

converting mill worker; general term for any person working in a mill where trees trunks or roughly hewn blocks of timber are converted into joists, planks, or other marketable shapes and sizes of timber.

cooper's sawyer; sawyer (cooperage); a circular sawyer *q.v.* who saws timber into cask staves on circular saw bench.

cross cut sawyer; cuts wood by pushing, by hand, moveable bed carrying material backwards and forwards past circular edge of circular saw (specially sharpened to cut across grain of wood) so that wood is not splintered at edges.

ebony cutter; holds ebony wood against power-driven circular saw or hand saw, thus cutting it to required dimensions and to best advantage, taking into consideration "shake" and medullary rays; great care required as ebony is very valuable.

frame sawyer; operates machine containing a number of thin flat saws, moving up and down vertically or, more rarely, horizontally, and cutting several boards at once; set saw, i.e. sharpens them by hand, using hammer, punch, and file; sets saws in position in machine, adjusting them by hand with help of gauges according to width of timber to be cut; places or supervises the placing of timber in position to be cut and manipulates power controlling levers.

frist cutter, frist saw worker, frist sawyer; pig sawyer; pastes design or holds template on piece of prepared wood, and follows outlines of design or template with power-driven frist saw.

handle alliter (saws); cuts, with circular saw, slit in saw handle which receives saw blade.

head cutter (cooperage); layer out of bands; a sawyer *q.v.* who cuts lengths of well seasoned wood on a circular saw, and lays them out in stacks, ready for cooper (477) *q.v.*, in making heads, i.e., and pieces, of casks or barrels.

horizontal sawyer; a frame sawyer *q.v.* operating a frame saw moving horizontally instead of vertically.

fig sawyer, *see* frist cutter.

key cutter (pianos); cuts out individual keys from keyboard (on which ivory or other thin pieces have already been glued) with a hand or power-driven saw.

layer out of heads, *see* head cutter (cooperage).

log band sawyer; a band sawyer *q.v.* working with a heavy type of band saw used for cutting logs and heavy banks of timber.

panel cutter, panel maker; a sawyer *q.v.* cutting wood into specially thin boards for panels of carriages, coaches, etc.

parquet block cutter, parquet flooring cutter, *see* wood block sawyer.

pit prop sharpener; sharpens ends of pit props by sawing to a taper by hand or on machine saw.

pit sawyer; one of two men who cut up timber by hand, with a long saw having two handles; one man stands above, holding one handle, another below, in a pit.

punk bench sawyer; a sawyer *q.v.* who cut timber by pushing it, by hand, against a revolving saw, on a saw bench which has no mechanical feeding equipment.

rack sawyer; rack sawyer; operates a saw bench (for cutting heavy timber) which is moved towards saw by a geared apparatus called a "rack."

sawyer, mill sawyer, wood sawyer; cuts up timber, usually into standard shapes and sizes, with a hand saw or, more usually, by passing timber into a power-driven circular, hand, frame or other machine saw; sets machine in motion by moving a lever or otherwise; sometimes adjusts or inserts gauge, mould or mark in machine to regulate length or width of pieces of timber to be sawn or to guide timber as it passes through machine; if a skilled sawyer, also sets saw, i.e. sharpens teeth with file, hammer and punch; sometimes specifically designated, *cf.* breast sawyer, packcase case sawyer, pit prop sawyer, railway sleeper sawyer.

sawyer (cooperage), *see* cooper's sawyer.

sawyer (pencil factory); a circular sawyer *q.v.* who saws up logs of cedar wood into blocks and thence into "slats," or rods of the length of six pencils; cuts up slats into pencil lengths, using a circular saw.

stick sawyer; marks pattern of stick required on a block of wood, and cuts shape out with hand saw.

swing cross cut sawyer; a cross cut sawyer *q.v.* using a cross cut saw suspended and driven from above, which is forced to and fro across material to be cut.

timber squarer; a sawyer *q.v.* who squares off timber with a swing saw; *cf.* timber squarer (496).

vertical frame sawyer; a frame sawyer *q.v.* operating usual type of vertical frame saw; *cf.* horizontal sawyer.

whip sawyer; cuts wood down grain, using a very narrow tapering rip saw with hook teeth, worked by one or two men.

wood block sawyer, wood block flooring maker, wood paving block sawyer; botcher, curved block cutter, parquet flooring cutter; a circular sawyer or a frame sawyer *q.v.* who cuts planks into blocks for use in flooring, with a circular or frame saw.

wood pulp sawyer; a circular sawyer *q.v.* who cuts logs to prescribed lengths, convenient for manufacture of wood pulp (for paper making) by means of a large power-driven circular saw suspended above logs in a cedar-barked area; pull down saw, by a handle, into contact with log, which rests on a bed or over a pit, and switches on power-drive.

482.—SHIPWRIGHTS AND BOAT AND BARGE BUILDERS (WOOD).

barge builder; (i) general term for any man engaged in constructing wooden barges, e.g. making framework, riveting on sides, caulking; (ii) a man capable of building barge through-out, with assistance of unskilled labour.

boat builder, boatwright; a shipwright *q.v.* who builds a boat throughout, i.e. cuts, shapes and bends, in steam press or with clamps, keel and main timbers of boat; constructs framework of boat and rivets to it with metal rivets, thin overlapping strips of wood; constructs rudder, masts and fore and aft, stretchers, etc.; works entirely by hand, using hand tools.

carpenter; term is used in Scotland, in sense of shipwright *q.v.*; *cf.* ship joiner (474).

caulker, wood caulker; a shipwright (carpenter in Scotland) g.v. who opens seams of planks, bunks, or timbers with a hammer and chisel, and fills them with oakum, which he drives in with a hammer and chisel; pours marine glue into seams, after caulking, to make them watertight; in caulking boat seams, fills with cotton instead of oakum, and fills in with putty, instead of marine glue, the whole being then painted over, ship carpenter (North of England); see shipwright.

shipwright (wood); ship carpenter (North of England); fits together prepared pieces of timber, according to drawings or plans provided, to form framework, or structural part of ships and boats, by hand, with hand tools; puts side planks and deck timbers on framework, and secures them by hammering in copper rivets, with bolts and trenails, i.e. wooden nails, with a hand hammer, having first bored holes, if necessary, to receive rivets, bolts or trenails with an auger; cauls seams in sides and in deck; shores up ship in dry dock or on slipway (or superintends its shoring up by labourers); superintends hauling of ship on to slipway.

483.—SHOP FITTERS.

bank fitter, bar fitter, beer machine case fitter, office fitter, as for shop fitter.

shop fitter; receives wooden parts or sections of counters, desks, partitions, cupboards, shelves, shop fronts, facias, shutters and other shop fittings or of bank, office, public house bars and bar fittings, which have usually been prepared or partly prepared, i.e., planed, moulded, cut into lengths, etc., by wood-working machinist (486) g.v. or by shop fitter's joiner (474) g.v.; fits and joins these parts or sections together by cutting, dovetailing, morticing, gluing, grooving, planing, dovelling, moulding, planing, etc., according to prepared plans or designs, and attaches grilles, blinzes, door springs, locks and other metal fittings thereto; may be employed either entirely in workshop or entirely on outside work, i.e. erecting in situ, or partly in one and partly in the other.

484.—WALKING AND UMBRELLA STICK MAKERS, BENDERS, DRESSERS.

bender (stick making), gas benders; bends sticks to shape required, e.g. crook or straight handle, by heating them at a gas flame or more rarely, in a kiln of hot sand, and curving round in mould or block of required shape; in small businesses sometimes also does work of straightener, g.v. dresser (stick making); finisher; smooths sticks; sandpapers and varnishes them, and rubs them with pumice, in preparation for polishing, or final coat of varnish.

filer (stick making); files and files handles and stocks, by hand, to give desired shape and appearance.

finisher (stick making), see dresser. fitter, fitter-up (stick making); tapers upper end of stick with a hand knife; fills mouth with hot resin, and inserts tapered end therein; plunges stick in cold water, to harden resin; polishes mouth on a lathe spindle revolving rapidly; also tapers bottom end of stick and attaches ferrule, by driving brass rivet through with hammer.

kilnman (stick making), see straightener.

scorcher (stick making); heats, with a blow pipe, surface of stick, to change its colour or to produce ornamental marking.

sorter (stick making); sorts sticks, according to purpose for which they are intended, i.e. for umbrellas, or walking sticks.

stick maker; general term for workers engaged in any operation incidental to making of walking sticks or umbrellas, or parasols, etc., including bender, dresser, filer, fitter, scorcher, straightener, trapper, stick carver (485), stick ferruler (499), stick moulder (288), stick polisher (489), stick pumicer (489), stick varnisher (499) g.v.

straightener (stick making); filer; straightens sticks by placing them in a kiln of hot damp sand, and then manipulating them in a wooden frame.

trapper (stick making); smooths stem of stick and reduces it to circumference required, with hand tool or by drawing, by hand, through die of trapping machine.

485.—WOOD CARVERS; CARVERS AND GILDERS; PICTURE FRAME MAKERS.

carver, animal; a carver g.v. who carves animals and figures upon furniture and other woodwork, or as separate ornaments.

carver, wood carver; carves designs on wooden articles, e.g. furniture, cabinets, church ornaments, screens, paneling, etc., with hand gouges, chisels, punches and mallet; works, by hand, small portions of carvings or moulding for ornamentation of carriages, railway carriages, tram cars, etc.; clamps pieces of wood to bench, and sketches outlines of design in pencil, balancing effects of light and shade and taking account of wood grain; cuts away wood with gouges and chisels and finishes out surfaces according to effect desired; sometimes specially designated, according to class of work done, e.g. architectural wood carver, cabinet carver, chair carver, ecclesiastical wood carver, stick carver.

carver, compositor; carves designs on mirror or picture frames, etc., made of a composition of plaster of Paris and gum, using a chisel and mallet.

carver, letter; wood letter carver; letter cutter; wood letter cutter; wood type cutter; a carver g.v. who cuts out from wooden blocks with hand and machine tools, large letters used in printing posters, etc.

carver's grinder; grinder (wood); roughs groundwork of carving with a punch.

carver, stock (small arms); a carver g.v. who cuts ornamental devices on grip of gun stock, taking care to keep gun balanced.

compo moulder, compo, compo press head; compositing press, compo moulder; a composition of whiting, glue, and, if required, colouring matter, by hand; puts mixture into hopper head of a power-driven compo moulding machine; passes wooden backing, for picture frame moulding, into machine, which automatically spreads composition on backing and moulds it to desired form with a pressing tool; after composition has been partly hardened, passes it, if further decoration is required, into another machine, fitted with roller die, which impress required decoration upon it; cf. compo press worker (507).

composition frame maker; a picture frame maker g.v. using composition mouldings.

composition glider; a glider g.v. who specialises in gliding composition mouldings.

composition mounter, composition ornaments, composition ornament decorator; applies composition ornaments to picture or other frames, with glue and/or small nails or screws.

composition press man, see compo moulder.

cutter, block cutter (wallpapers); a wood carver g.v. who carves wallpaper designs on wooden blocks for printing wallpapers.

cutter, letter; wood letter cutter, wood type cutter, see carver, letter.

embosser; puts wood, after it has been softened by steaming, in a press, and applies pressure by moving lever so that wood is embossed with a die of required pattern.

embossing machinist, wood embossing machinist; passes strips of wood into a machine fitted with gas-heated top and bottom patterned rollers or dies, which impress pattern on wood, giving it an embossed or carved effect.

fronter; wood, see carver's fronter.

gilder; (i) gilds chairs, picture frames, etc., by coating them with size and whiting, and then with size and oil, applying gold leaf, and burnishing; (ii) decorates railway carriages, sewing machine covers, etc., by gliding, by process described above, by applying brown lacquer with brush, or by laying a paper transfer on work, and passing a heated iron over transfer to cause decorative pattern, inscribed on transfer, to adhere to work, afterwards damping transfer and removing paper.

letter finisher, wood letter finisher; trues up, smooths, polishes and puts final finish, with fine hand tools, upon large wooden letters cut by wood block carver, picture frame mounter and removing paper.

mount cutter, see picture frame mounter.

ornament maker (wood), see carver.

Oxford frame maker, Oxon frame maker; a picture frame maker g.v. who specialises in making Oxford frames, i.e. frames with corners carved in a Gothic pattern.

picture frame fitter-up; fixes picture in mount, inserts and fixes glass and picture in frame; tacks on wooden backing, over which he pastes brown paper; screws in rings for picture cord, sometimes also cuts glass.

picture frame joiner; saws mouldings to required length, for frame, shooks or planes also saws, and glues and nails pieces together to form frame; or glues and nails together mouldings which have been cut to size by machine.

picture frame maker; cuts mitres from stock frame moulding; glues and tacks up to make throughout cheaper class of picture frame, including fitter-up with glass, mount, and back.

picture frame mounter; mends corners and bevels mount, or inner framing to picture, made of cardboard or of thin wood, using a mount cutting knife or machine.

picture framer; assists customer to select frame from stock to suit picture, or to select frame moulding from stock; in latter case makes up frame, see picture frame maker; (if a mounted picture) fits up picture frame, see picture frame fitter-up.

picture frame strainer maker; makes wooden frames on which strainers g.v. stretches canvas or other material; measures wood and cuts to size; cuts and tensions cross battens; haunch mortises in corners to receive tapered and tightening wedges and at centre to receive halter; assembles and glues battens in place.

strainer, picture frame strainer, artist's frame strainer; strains canvas or other material for oil painting, etc., on wooden frames, fastening to edges of frame with short nails; drives wedges into mortises in corners of frames to increase its size and so tighten canvas.

486.—WOOD TURNERS AND MACHINISTS.

aeroplane woodworker; general term for any person engaged in cutting, shaping or assembling together wooden parts of aeroplanes (or airships); is usually a semi-skilled worker only capable of performing one, or a few, machine operations; cf. machinist.

holer and borer (wood wind instrument); combines work of boring and balancing (see rougher and borer, and holer) in workshop where work is not sectionalized; sometimes does work of setter-out g.v.

holster mangle or roller maker, *as for roller maker*.

joiner (cooperage); a stove maker g.v. who passes stave, after it has been hollowed and rounded, into an automatic planing machine, which joints stave, i.e., bevels edge, stacks staves after they have been jointed.

leg maker (piano); piano truss maker, truss maker (piano); cuts and shapes piano legs, using lathes, fret cutting machines, and spindle moulding machines; sometimes also cuts and shapes other wooden parts of piano.

machine attendant, machine feeder, machine minder, machine tender (automatic woodworking machinery); passes wood into machine, by hand; collects wood after it has been processed through machine; sometimes also turns handle of wheel propelling travelling cradle which carries wood past cutters; sometimes inaccurately called machinist g.v.

machine hand, *see* machinist (piano hammer).

machine joiner, *see* machinist, joiner.

machine joiner; passes a piece of wood on its edge along a flat bed and over revolving cutter of flat joint making machine; in this way makes edge of wood perfectly straight, so that joints of sections (e.g. in table top) are quite true.

machine minder (piano sections), *see* machines (piano sections).

machinist, wood cutting machinist, wood machinist, wood working machinist; general terms for two classes of workers who feed and operate machines used for shaping or preparing wood, e.g. turning or drilling, dovetailing, dovelling, four-cutting, morticing, planing, or spindle moulding machine; (i) sets up machine, i.e. makes accurate adjustment of cutters and other parts of machine by hand and sometimes makes his own cutters, especially for spindle moulding machine, by hand filing and forging of cutting parts; feeds wood into machine; (ii) merely sets machine in motion, passes wood into machine, removes finished wood as it issues from machine and stacks it where required, but does not set up machine; sometimes specifically designated, e.g. builders' machinist, cabinet machinist, cratemaker's machinist, joiner's machinist.

machinist (automatic woodworking machinery); (i) is in charge of one or of several automatic woodworking machines, which may be fed by machine attendants g.v.; sets up machines, i.e. adjusts cutters and other parts; sharpens, and, if necessary, makes cutters by hand, with hand tools; (ii) sometimes inaccurately used in sense of machine attendant g.v.

machinist, box making; box maker's cutter, cutter, cutter-out (wooden boxes); a machinist g.v. engaged in preparing wood for use in box making.

machinist (cooperage), cooper's machinist; passes work, by hand, into one of various machines used in a cooperage for planing, shaping, jointing, scoring and chining, tonguing and grooving, champing and pinching, splicing, or iron hoops riveting, and switches on power-drive of machine.

machinist, clamping-up; places door or other articles constructed of wood, after prepared parts have been assembled and glued, on bed or table of machine, which forces parts together; adjusts, by hand, screws which hold article in place, and manipulates screws or levers for forcing parts together.

machinist, crate-maker's; adjusts measuring gauge of power-driven planing machine; sets machine in motion, by moving a lever or otherwise; passes wood for crate-making, into machine, and stacks it after it has been planed.

machinist, door dressing; passes doors, after they have been clamped in clamping-up machine, into a special type of planing machine, fitted with rubbing cutters which plane surface of woodwork.

machinist, joiner; machine joiner; a joiner (474) g.v., trained in manual wood work, who has also acquired a knowledge of woodworking machinery, usually as a piano hand g.v.

machinist, Lendeman; (i) sets up Lendeman machine, which grooves, tongues, and joints wood at one operation, i.e. adjusts cutters and other parts of machine by hand; sets machine in motion, by moving a lever or otherwise; passes wood into machine; (ii) sets machine in motion and passes wood into machine, but does not set up machine.

machinist, match-boarding; watch boarding machine man; a machinist g.v. in charge of a machine (usually a cutter machine) used for cutting grooves and tongues in match boarding; simultaneously machine-planes top and bottom surfaces of board; if a skilled worker, also sets up own machine, as described under machinist g.v.

machinist, mill; saw mills machinist; a machinist g.v. employed in a saw mill where wood is cut, drilled or planed as well as sawn; cf. saw mill machinist (481).

machinist, morticing, *see* morticer.

machinist (piano sections), piano section wood working machinist; machine minder (piano action); feeds hopper of automatic machines with wooden parts of piano actions, to be inserted in them, or to cut them to required size and shape.

machinist (piano hammer); machine hand, wood machinist (piano hammer); glues together blocks or panels of timber, cut by machine saw; and cuts panels thus formed into strips of standard size and measurement, each strip containing material for a complete set of hammers (about 88); sometimes also saws timber into blocks or panels, puts strips of padded wood through a moulding machine, to cut and mould hammers to required thickness; cuts sets of hammers into separate individual hammers in a cutting machine or guillotine, and makes shank, or stem, of hammer, by cutting timber in a machine saw, and rounding it in a moulding machine.

machinist, shaping; shaper; a spindle head g.v. who shapes ornamental "flat" parts of furniture.

maker-ready (wooden bobbins), *see* bobbin maker-ready.

match boarding machine man, *see* machinist, match boarding.

mop stick maker, *as for* handle machinist.

morticer; morticing machinist; a machinist g.v. in charge of a machine used for cutting slots, i.e. mortices, to receive tenons, projecting ends of other pieces of wood cut to corresponding shape, if a skilled worker, also sets up own machine, as described under machinist g.v.

moulder, wood moulder, moulding machine hand, moulding machinist, moulding mill machinist; (i) makes and sharpens, by hand filing, cutters for power-driven moulding machine; sets up machine, i.e. inserts cutters into position by accurate adjustment; sets machine in motion, by moving a lever or otherwise, and holds wood up to cutters, which revolve and cut away superfluous material, thereby reducing article to required shape; (ii) sets machine in motion, and holds wood against cutters, but does not set up his own machine; cf. spindle hand.

mouthpiece cutter (wood wind instruments); cuts out wooden mouthpieces for wood wind instruments, by means of specially shaped hand tools, e.g. chisels, gouges, files, sometimes does work of borer g.v.

oval turner, oval lathe manipulator; a turner g.v. using a lathe fitted with an oval chuck, so that it turns wood in oval instead of circular shapes; brings chairs to bear upon wood as it turns in lathe.

panel planer hand, *as for* planer.

pan maker, pan worker (concertina); cuts, grooves and bases pans (boards to hold reeds or notes of concertina), already planed, by setting in machine, controlled by foot lever; sets tools and gauges as required; trims pan to correct shape, peels, log peeler, peeling machine attendant (match boxes); skilful cutter (match boxes); spindle machine attendant, skilful peeler, skilful peeler; places log of wood in chuck of machine which peels off thin shavings or veneers, to be converted into skillets or making in which to split, for match making; switches on power-drive of machine, and turns a wheel which brings cutter to bear on log as it revolves in machine.

penholder maker (wood); (i) cuts wood into long rods of convenient size for lathes or turning machine in which penholders are made; feeds and operates this lathe or machine, and finishes penholders with sandpaper; (ii) general term for any machine element g.v. engaged in manufacture of wooden penholders.

pick belt maker, *as for* handle machinist.

planer, planer hand, planing machinist, wood planer, wood planing machine operator; wood feeder; a machinist g.v. in charge of planing machine having revolving cutters which remove roughness from timber as it passes over a horizontal bed; if a skilled worker, also sets up his own machine, as described under machinist g.v., and sometimes sharpens cutters, with file and other hand tools.

plank borer (piano); borer holes, by machinery, in wreat plank, for purpose of fixing wreat plate therein; usually done by marker-out (485) g.v. reed maker (piano), action reed maker, hammer out machine, which wood into machines which cut, plane and mould main part of piano action, on to which smaller parts of action are screwed; controls power-drive of machine by means of switches.

read stave maker (lectern machinery); a machinist g.v. who makes wooden stave, or framework, on which reeds are mounted.

reed borer; reed piercer; places reed on a disc, which is made to revolve, either by means of a treadle or by switching on power-drive of machine, slides head stock of machine, with boring bit attached, until bit is in contact with reed, and pierces centre hole therein.

reed maker; a turner g.v. who fashions reeds on a lathe.

reed piercer, *see* reed borer.

ribbon block maker; a turner g.v. or machine attendant g.v. who turns blocks, used for display of ribbons in shape on a lathe or automatic woodworking machine.

ring maker, wooden ring maker; a turner g.v. who shapes wooden rings for curtain poles, etc., on a special lathe; sometimes specifically designated, e.g. cornice ring maker, curtain ring maker.

roller maker, roller turner; a turner g.v. who turns rollers on a lathe; cuts tenons and slots in beaming machine, and fits in metal sections of square section; sometimes specifically designated, e.g. mangle roller maker, rougher, rougher-and-borer; borer (wood instrument); splits log of wood with a hand chopper and selects suitable pieces by experience; roughly shapes blank on a hand

lathe, and bore hole to gauge required, on lathe or wood boring machine; boring operations sometimes done by turner *q.v.*

router (block or roller cutting); takes wooden block or roller and fixes it on bed of power-driven vertical cutting machine, in position required; switches on power-drive of machine, and guides cutter, by means of a hand lever, over work, thereby cutting or routing; cuts wood between metal strips which have been fixed in block or roller by print cutter (267) *q.v.*, to give depth when printing on wall-paper.

sealer; heel sealer, wood heel sealer; *concealer*, heel *concealer*, wood

heel concealer; forms seals, i.e. portion of wood heel in which heel part of boot or shoe fits, by holding wood against power-driven, shaped revolving cutter; switches on power-drive of machine; sometimes also does heel thinning; *cf.* thinner.

setter-out (wood wind instruments); drills key fitting and note holes in wooden tubes of wood wind instruments, by means of a setting-out machine; sets up machine with drilling bits and gauges, and controls machine by levers to drill holes in required places on tube; sometimes done by holer and borer, or by turner *q.v.*

shaft maker (textile machinery), as for beam maker.

shaft turner (golf clubs); a turner *q.v.* who turns wooden shafts of golf clubs on a lathe; usually also shapes heads of wooden clubs on lathe.

shaft turner (spades and shovels), as for handle machinist.

shank maker (piano hammers); cuts long narrow strips of wood, about 1/2 inch square, with machine saw, and puts them through a mandrel to round them, to make shanks or stems of piano hammers.

shaper; set machinist, shaping.

shuttle block cutter; cuts out blocks of box or other hardwood in shuttle maker *q.v.*, on file machine saw.

shuttle maker; secures prepared blocks of hardwood in a power-driven combined boring and grooving machine, which bores out holes at each end of shuttle; hollows out oval grooved hollow in centre of shuttle, between holes already bored out, either with hand tools or in specially adapted machines; sets machines in motion by moving levers.

shock block maker, **shock block maker**, as for handle machinist.

skillet chopper; operates skilled chopping machine, which reduces to skillets (i.e. small thin flakes of wood, used for making match boxes), shavings or veneers peeled off logs of wood by peeling machine attendant *q.v.*; clamps end of pile of shavings in skillet chopping machine at end of bench on which they are piled, allowing ends of shavings to protrude a measured distance beyond cutters of machine, moves lever causing cutter to descend and cut shavings into skillets; piles skillets on trays, ready to be used in making match boxes.

skillet machine attendant, **skillet peeler**, *see* peeling machine attendant.

spade handle maker, **spade and shovel haft or tree maker**, as for handle machinist.

spigot maker, **spile maker**; turns, on automatic or gauge lathe, wooden pegs (spigots) which control flow of liquids from casks, etc.

spindle band, **spindle machine band**, **spindle machinist**, **spindle moulder**; a moulder *q.v.* who feeds and operates a power-driven vertical spindle moulding machine; makes and sharpens cutters by hand filing, for this machine; sets up machine, and holds wood up to cutters, which revolve and cut away superfluous material, reducing article to required shape.

spittle maker (*Herfordshire*), as for handle machinist.

split cutter (match); cuts splints, i.e. match stocks, in a machine, from shavings or veneers peeled off logs of wood by peeling machine attendant *q.v.*; *cf.* skillets chopper.

split machine attendant, **split peeler**, *see* peeling machine attendant.

spool blocker; puts timber on face plate of blocking machine, and brings circular saw into contact with timber, in required position, by pressing a treadle lever; switches on power-drive of machine, which simultaneously cuts out spool or bobbin, and bore a hole therein with blocking tool.

stale maker, as for handle machinist.

stave maker; (i) a cooper's machinist *q.v.* who makes pieces of wood, roughly cut to shape of staves for casks or barrels by hand sawyer (481) *q.v.*, into one of three successive machines (following, rounding and jointing) used for shaping staves; (ii) a machine by means of levers and switches; (iii) a wood turner *q.v.* who turns police batons, ladder rungs (sometimes called staves) and other staves, on a lathe.

stocker, **stock maker**, **stocking machinist** (guns); holds piece of wood from which gun or rifle stock, butt or fore-end is to be made, against cutter of a profiling machine, i.e. a machine fitted with a moving cutter which follows outline or profile of article to be cut, or roughs out blank of gun or rifle stock, etc., with a hand, circular or hand saw and a planing machine; *cf.* stocker (416).

stock maker (wheels); a wood turner *q.v.* who turns hubs of wooden wheels and shod them ready for reception of axle and axle box.

stopper maker (wood), **alright stopper maker**; turns hardwood bottle stoppers on a lathe; mills and screws ends.

tenon should maker, *see* turner, fringo mould.

tenoner, **tenon hand**, **tenoning machinist**, **wood tenoner**; a machinist *q.v.* in charge of a power-driven tenoning machine, which shapes prepared pieces of wood to form tenons, or projecting tongues to fit into mortises, or holes of corresponding section, in other pieces of wood; if a skilled worker, also sets up his own machine (tenon machine); and sometimes sharpens cutters of machine with file and other hand tools.

tent pole maker; passes wood into an automatic rounding machine; switches on power-drive of machine, and turns handle of machine causing pole to travel through machine.

textile broach maker; a wood turner *q.v.* turning a spool or broach (Scotland) for use in textile manufacture.

thinner, **heel thinner**, **wood heel thinner**; reduces thickness of lip, i.e. front edge of seat, of wooden heel, by holding heel against power-driven, shaped revolving cutter; switches on power-drive of machine; turner usually does by sealer *q.v.*

topper (wood heels); holds top, i.e. the end of wooden heel, against revolving cutter to smooth it; marks edge of top by holding heel against a similar cutter; switches on power-drive of machine.

trawl shaft turner, as for turner.

trenail maker; trenails maker; turns, on a gauge lathe, trenails (trenails), or hardwood pins, used for securing chairs to railway sleepers, dock planks to ships' timbers, etc.

tree turner; a turner *q.v.* who shapes wooden handles of spades and shovels on a lathe, from square piece of ash plant.

trennel maker, *see* trenail maker.

truss maker (pianos), **piano truss maker**, *see* leg maker.

turner; wood turner, wood turning machinist; secures a piece of wood between "centres" of a lathe, which may be of various types, and reduces

it to a circular or oval section by applying chisels or other hand tools to it as it is made to revolve in lathe; often specifically designated according to kind of wood used, e.g. hardwood turner, as according to purpose, for which article is intended, e.g. boot last turner, bowl turner (textile machinery), spool turner, wooden spool turner.

turner, **brush**; brush wood turner; a turner *q.v.* who fashions wooden backs and handles of brushes and brooms, from rough blocks produced by sawyer (481) *q.v.*, usually on a vertical spindle moulding machine or on a lathe.

turner, **fringe mould**; fassel mould maker; a basket *q.v.* who shapes, from wooden blanks, on a gauge lathe, small wooden drops or wooden tassels, used for attachment to blind cords or to form foundation of ball fringes.

turner (musical instruments); takes instrument or fitting thereof in rough form, as fashioned by rougher and borer *q.v.*, and shapes it by holding cutting tool against it, as it rotates on lathe; also turns socket joints; sometimes also does work of rougher and borer, and of setter-out.

turner, **pipe**; bowl; for maker, bowl turner (tobacco pipes), pipe after maker; cuts wooden bowls and stems of tobacco pipes to shape on a lathe, which has an inner boring blade, and two cutters curved cutters.

turner, **roll**; barrel turner.

turner (rollers for barrel organ); turns revolving cylinder of barrel organ, as roughly fashioned by carpenter (474) *q.v.* in a lathe, and glues cartridge paper thereon ready for music maker (648) *q.v.*

turner, **turner**, **turner** *q.v.* who fashions ornamental chair or table legs, and other spiral work, on a lathe.

turner, **twist**; a wood turner *q.v.* who faxes wood in chuck of semi-automatic machine fitted with a revolving cutter which turns it, and switches on power-drive of machine; turns wheel attached to machine, by hand, to produce twisted effect on wood after turning, for use as Jacobean fittings for furniture, etc., unless machine is fitted with automatic device for twisting as well as for turning; adjusts machine by hand, fits and adjusts cutters.

turner, **wood block**; cone maker, wood cone maker, or block maker; makes wooden blocks or cones on which hats are shaped, using lathe, spoke-shave, etc.

turner (wood heels), **heel turner**; shapes backs of wooden heels, after they have been banded on a vertical moulding machine.

turner (wood wind instruments), as for turner (musical instruments).

veneer cutter, **veneer maker**; cuts veneers (very thin sheets of wood) from logs, either with a long knife, mechanically-driven, which revolves round log, or with a special saw, or with a special saw adjusted to cut veneer of precise thickness required.

vertical spindle moulding machinist, *see* spindle band.

wooden spill maker; receives long sheets of veneer, which have been cut from log of pine wood, and passes them into a machine, which uses an automatic knife edge to trim into spiles of required dimensions.

wooden spoon maker; a wooden ware maker *q.v.* who specialises in cutting, shaping and turning wooden spoons, partly by hand, with woodworking tools, and partly by machine, e.g. turning bowl of spoon on a lathe.

wooden ware maker; a wood turner *q.v.* who specialises in turning wooden bowls, cups, etc., from rough blocks of a lathe, and finishes them with hand tools and rubbing with sandpaper.

wood facer, *see* planer.

wood heel shaper, **wood heel spindle band**, *see* broussier.

wood turner, **wood turning machinist**, *see* turner.

498—OTHER SKILLED WORKERS.

arrow maker; pares one end of arrow length of specially seasoned red dead red; puts on and rivets pointed metal sheath; makes three slots at other end of arrow and glues in three pieces of feather; makes notch in feathered end to receive bow string; smooths and polishes, all by hand, with wood-working tools.

back fitter, back maker (piano and organ); glues together bracing and general structure of back to take sound board and iron frame.

haker's peel maker; makes haker's peel, a kind of wooden shovel, with wedge-shaped blade, for shovelling dough into oven; cuts blade with gluing, cuts or shapes it by hand; makes handle on lathe or trapping machine, and fits handle and blade together.

hampbo furniture frame maker, hambo furniture maker; after-up of hampbo furniture; assembles parts of hampbo furniture, prepared by hampbo machinist (481) g.v., by hand, using woodworking tools, and boring, filing, screwing, gluing or nailing as required.

header (carriages and coaches), body header; fixes on heading (wood or metal) to cover joints, or for decoration in coach building.

beam maker (piano), beam man; makes beam on which butt and jack sections are screwed together; assembles (453) g.v. in making piano actions, by sawing, recessing, planing, etc.

beetle cutter, beetle maker; *bleeker's stamp maker*; cuts, from hard wood by hand, and shapes heads of finishing mallets (*beetles*) used in finishing textiles.

bellows maker; cuts out and sews or rivets leather parts, fits metal parts if required; cuts wooden parts to correct size and shape and fits parts together to make complete bellows; works by hand, with hand tools.

bellows maker (harmonium); cuts wood to required size and planes it; glues and screws wooden parts together and attaches leather to frame; screws brass hinges in place; varnishes and fixes bellows to harmonium case.

bellyer, belly maker, belly man (piano); sound board adjuster, sound board hand, sound board maker; cuts, planes and glues together thin boards to form sound board (belly), and fits with great accuracy, sound board, bridges, fillets and back bars (or ribs) of piano.

header, bent timber maker, bent timber man, bent wood maker (coach), bent wood worker, see timber tender.

hinder's board maker; makes boards for use of book binders; or for drawing board maker.

bleasner's stamp maker, see beetle cutter.

block floor layer; lays floors in patterns, with blocks of standard dimensions, generally held in position with mastic preparation.

block maker (wall paper); builds up and glues together several layers of wood, forming wooden blocks used in wallpaper printing.

block maker (wood); cuts out frame i.e. side pieces, and fillets, i.e. connecting pieces, for shape blocks from pieces of wood, by hand, using hand tools, receives wheel or share (usually ready made of iron or lignum vitae), and assembles whole-frame, fillets, and wheel or share, with bolts and screws.

blower-off, oak tester; tests repaired cracks by admitting steam or hot water through bung hole, inserting temporary bung, and reports any escape of steam or leakage to trimmer (477) g.v., who marks defective staves, etc., for repair by cooper (477) g.v.; sometimes varnishes and paints top and bottom chimes or rims and bung holes, etc.

bobbin board maker, creel board maker; takes bobbin board or creel

board, prepared by joiner (474) g.v., and drills holes in it, by machine, to hold bobbins or pins in textile winding and spinning machinery; presses a lot step, i.e., earthenware lining, into each hole drilled to minimize friction.

bobbin end prasser, wood bobbin end presser, wood bobbin end stamper; glues end presser (bobbins); receives bobbins, ends of which have been turned and bevelled, i.e., reduced to smaller diameter than that of rest of bobbin, and presses on to these bevelled ends, in a clamping machine, wooden flanges, having a centre hole, called gland ends; in small shops, makes his own gland end; for this purpose he takes circular pieces of wood, with centre hole, already prepared; glues one side of piece; puts two pieces together in pairs, with glued surfaces touching, threads pairs along an iron bolt, fixed in position; when bolt is tight, screws pairs tightly together by turning a nut at end of bolt; and leaves them until glue has set; then uncovers pairs of glued ends, removes them from bolt, and uses them as described above.

bobbin tester; places wooden bobbins, one at a time, on mandrel or spindle of a lathe, which is set in motion, and, as they rotate rapidly, tests them by observation and with a shile, or more usually by hand, to ensure that these true, and are in no way faulty; cf. bobbin slow tester (480).

boot last maker; last maker; (i) shapes blocks of wood, with last-maker's knife, sandpaper, with sandpaper, and attaches metal plate to bottom; (ii) general term for worker engaged in any of the processes of boot last making where (as is usual) work is subdivided, including converter (486), finisher (486), plainer (483), spring finisher (488), toe and becker (488), turner (486) g.v.

boot tree maker; cuts block of wood to the shape of a boot with saw, and shapes it with hand knife, spokeshave or shisel; then finishes with sandpaper, also shapes wedge which is inserted between front and back parts of tree to strain leather.

bottomer (chairs—not case), chair bottomer; adjusts bottoms of chair legs to prevent rocking, by sawing or rasping to one level; sometimes does by cabinet maker (473) g.v.; cf. bottomer (same) (473).

bottom maker (textile machinery); cuts out bark from fallen trunk of tree by hand, using an adze; roughly cuts trunk into cylindrical form, using axe and adze, ready for bowl turner (480) g.v.

bow maker (archery); bowyer; (i) pares length (6 to 7 feet) of seasoned yew wood with special spokeshave, from middle to each end; and sandpapers wood and makes notch at each end, for bow string; carves hand grip of bow with plane, lathe, etc.; (ii) makes bow by taking two lengths of yew, half bow length, joins them by "duck joints" of small pieces of wood at centre and then proceeds as above; smooths and polishes.

bow maker (violin), violin bow maker; forms backs of violin bows from pieces of wood, by hand, using hand tools, and assembles other components, including hair, to make complete bows.

bowyer, see bow maker (archery).

boxwood worker; turns pieces of boxwood on a lathe, planes and cuts them as required, by hand, with woodworking tools, to make tool handles, chess men, scales, rulers, etc.

brail flier, brail framer; receives bowl, after it has been cut by bowl

maker (483) g.v., and turns, so far as turning is possible, by wood turner (486) g.v., and bolts it against cutters of a power-driven wheel, to frame or smooth it; files neck of pipe and knots, by hand, with a file.

brush wood finisher; shapes wooden stocks of brushes, by hand, with spokeshave and bench knife.

bush hand; borer or drills hole in top of oak with hand auger; points bush or nozzle, and screws it tightly into bored hole with a two-handed boring tool; sometimes also repairs bushes, nozzles; cf. nozzle repairer, butter box maker; a scale board box maker g.v. making scaleboard boxes for butter.

butter cutter maker; shapes, with hand and hand saws, flat wooden cutters or patterns for dividing butter; planes and sandpapers.

butter marking plate maker, butter mould maker, butter print maker; turns, on lathe, block, for marking butter with a pattern, which is afterwards carved by hand, cf. cutter (482).

camp equipment maker; assembler; folding wooden framework of articles of camp equipment (bedsteads, chairs, washstands, etc.) and attaches canvas fittings to them.

camp stool maker; assembler; folding wooden framework of camp stool and nails on, with brass-headed nails, pieces of canvas or carpet, to form seat.

oak tester, see blower-off.

cattle crib maker; cuts pieces of wood, usually elm, to required dimensions and fastens them together to make racks, mangers or feeding troughs for cattle.

chair shaper; shaper; fashions frames of chairs to desired shape, by hand, with spokeshave and rasp.

chequer (small arms); cuts a cross-hatched or chequered pattern on wooden fore-ends and butts of guns and rifles by hand, using a small steel-toothed tool.

cigar box maker; general term for worker engaged in one of the processes of making cigar boxes, where (as is usually the case) work is subdivided; may be either (i) a sawyer (484) g.v. cutting furrows in thin boards with circular saw, (ii) a wood working machinist (480) g.v. planing boards on planing machine; (iii) a man cutting them into small pieces, as required; (iv) a man (or a woman) nailing together these pieces; or (v) a woman lining box so made, with paper, using brush and paste, see cigar box liner (509).

cleaver ("cricket bat"); fixes in vice, roughly shaped blocks of seasoned willow wood and draws two-handed knife over surface, paring off wood, to shape blade of cricket bat.

clug block maker; splits small logs of alder wood into rough blocks for use of clug sole cutter g.v., using an axe or mallet and a splitting tool.

clug sole maker; general term for any worker operating woodworking machines for making clug soles, including band sawyer (483), bottom leveler, rounder, shaker, hollerer, gripper, and sandpaperer g.v.

coat hanger maker (wood); general term for any person engaged in making coat hangers, i.e. either cutting wood to shape with a hand saw, or assembling parts, or varnishing completed article with a brush.

creel board maker, see bobbin board maker (wood).

cricket bat handle maker; assembles strips of cane and thin strips of rubber, planes cane, by hand, to correct dimensions and glues whole together; turns handle on lathe and cuts spine out.

cricket bat maker; cuts wood roughly to shape and size of blade of cricket bat; turns it to shape on a lathe, gives final shape to blade by hand paring to ensure correct balance, and presses it in a hand or power press; assembles cane sections, rubber slips, etc., and glues them together; turns them on lathe and cuts to shape of handle; splices and glues handle to blade; sandpapers and finishes surface; binds handle with waxed hemp on a foot or power lathe.

cue maker, billiard cue maker; receives handle or butt end and cue, which has been roughly shaped and tapered by wood turner (480) g.v., and glues it there by sawyer (481) g.v., and glues cue to butt; glues together sections on butt; cuts off ends to correct length, hand-planes whole, and sometimes sandpapers it and glues on leather tip, but this is more usually done by finisher (490) g.v.

currier's beam maker; takes large pieces of sawn tree trunk, and shapes it with adze, plane and sandpaper to make currier's beam, i.e. wooden block over which hide or skin is laid for dressing.

derrick maker, see mast maker, wooden.

dolly maker, see maiden maker.

drawing board maker; saws, planes, grooves and tenons pieces of wood; inserts stiffening pieces, and finishes to make drawing boards.

dresser-off (for sails); roughly squares circular legs, by hand, with an adze.

ebony handle maker, as for hand saw (wood).

ender-up (textile machinery); finishes off legs and pegs (used as risers or sinks in weaving looms), by sand papering and varnishing.

engraver's block maker (wood); makes wood engraver's blocks, usually from box-wood, by accurately cutting with fine machine saw, oblongs of standard sizes from sections across box trees; makes compound, i.e. large blocks, by slotting, drilling and bolting together area blocks and half-stanza box maker; assembles and nails together parts of light boxes, prepared by sawyer (481) g.v.; cf. fancy box maker (554).

finisher (action rails), action rail finisher; hammer rail finisher; covers action rails (known as "hammer rest rail" and on "half blow rest" respectively), as received from hammer rail maker (480) g.v. with felt, and joins them together with hinges and screws.

finisher, coffin; fits meetings, plates, handles, etc., to coffin with screws; usually also polishes outside of coffin, see polisher (478), and lines inside, see coffin trimmer (508).

finisher (coopering); (i) shaves and scrapes barrel of cask after it has been built by cooper (477) g.v.; may also chamfer or chime ends of staves to form top and bottom rings and affixes end hoops; (ii) completes cask or barrel by putting on permanent iron or wooden hoops.

finisher (small arms), see maker-off (small arms).

fitter-up of bamboo furniture, see bamboo furniture maker.

fret work; makes articles of fretwork throughout, cuts, or fret, cutter (481), and fixes fretted designs upon furniture, etc., with nails or glue.

glove stratcher maker; cuts glove stretchers from beech or boxwood, by hand, and shapes with knife or cutter.

glue and presser, see bobbin and presser.

glue (brushes); attaches backs to filled brush stocks, by brushing back with hot glue and fixing bristles in clamping frames till firmly set.

glue and joint maker, glue-up; (i) shoals (i.e. plane, sand, glue) and joins together various parts of furniture, etc.; (ii) applies glue with brush to prepared surfaces of wood, pieces in cramping machine, and forces together by adjusting screws.

grader (wood heels), heel grader, wood heel grader; cuts V-shaped pieces from upper end of wooden heel with small circular saw, holding heel against guides.

grid maker, wood grid maker; cuts wood to sizes required on circular saw or fastens together pieces of wood already prepared

to make "grid," i.e. wooden frame containing openings to admit air or to allow escape of water; may merely glue laths to frames, or groove and loose parts of grid before joining together.

trip maker, bayonet grip maker; (i) cuts hardwood with circular saw, and shapes it on spindle mounting; (ii) makes bayonet handles for fixing on bayonet tangs; finally trims them on abrasive wheels; (iii) passes wood into automatic machine which cuts and shapes it; switches on power-drive of machine, and adjusts machine as required.

tripper (dog sole); cuts out groove round dog sole, for attachment of upper, on a wood cutting machine.

guitar maker; makes guitars of wood, using hand and machine tools; cuts sections to shape and glues them together, and, after finishing surfaces, mounts keys, bridge, strings and other accessories or ornaments.

haft maker, see handle maker.

hammer shifter; fits new wooden shafts in old and new hammers, makes head secure by driving hard-wood wedges into handle; sometimes makes shafts or handles for hammers, either by turning on a copying lathe, or with a hand spoke-shaving tool, see handle maker. Some dresser may also make and repair rivet and tool boxes.

hancie maker (wood); haft maker; makes handles for tools, leopolds, etc., throughout, largely by machine, but usually with some additional hand work, e.g., sometimes files handles, or dresses them with a spoke-shave, plane, adze or chisel, drills holes for fitting to tangs, squares and finishes ends of spade handles to receive blades, etc.; cf. handle machinist (480).

hatchet man (coal mines); (i) see timber cutter; (ii) sharpens pit props by cutting point with small hatchet; (iii) prop sharpener (481); head-up (casks) fits and drives in head after cask has been cleaned.

head maker (casks); makes head throughout, i.e. combines work of head cutter (481) and head shaper v. and head shaper (casks); rounds, bevels and shapes heads, as received from cutter, with chisel and other hand tools, to fit ends of casks or barrels; may level edges by holding in a bevelling machine.

heel maker, see wood heel maker.

heave dresser, heave maker; a handle maker g.v., who makes handles or heaves for axes, adzes, picks, etc., from rough wood, with planes, adzes, chisels, spoke-shaves, etc., and glass-paper.

heelower (dog sole); shapes cast or top side of dog sole on a wood cutting machine.

hooper-off (casks); completes wet cask or barrel by putting on permanent iron hoops; drops welded iron hoops (sometimes) of pipe size over cask and hammers into place with blunt chisel; knocks off temporary hoops.

hoesery shape maker; partly turns, and then shapes with hand tools, hoesery shapes used for hoesery finishing.

hurdle maker; splits timber (generally chestnut); selects and prepares poles or other small round timber for uprights; mortises them to receive cross rails; drives in cross rails and pegs them, and puts in cross braces; usually works in a workshop.

hurdler; receives saplings, usually of willow or ash, and strips them of their small branches; splits sapling with hand hook; takes out stout pieces of split wood, sharpens them, at one end and bores holes in them, for insertion of cross pieces; inserts thinner pieces of wood as bars, in holes so made; binds structure with rope; selects piece of wood nailed diagonally across bars; makes fences of hurdles to make; usually works in wood yard of farm or sheltered corner of copse; cf. hurdle maker; in remote

country districts, cuts own saplings and makes hurdles at home.

tinemaker maker; saws and joins wood to make outside frame of incubator, wooden trays, partitions, etc.; lines frame with tin and inserts lamp and other fittings.

tinplate band (organs), general inside band; engaged in workshop where organ builders specialise in different branches; makes and fits up action controls, sound board and similar work appertaining to inside of pipe organs; organ builder (478); makes sets of key makers (pianos); makes sets of piano keys by gluing together several boards of bass wood, and marking out scaling; glues on chasing, i.e. thin strip of wood that goes from end to end of keys; glues on ivory, celluloid, or galahiti for keys; cuts out keys by machinery; bores holes for centre and front pins and bushes holes with felt; glues black pieces on "sharps," and inserts leaden weight at end of each key to give balance in process; are sometimes sub-divided.

key maker (organs), organ key maker; makes "frames" and "panels"; bores holes in frame and inside of panels; files (scry) and files sharps; cuts apart panels, and inserts pins; also fixes individual keys in correct position.

lapboard maker; cuts, shapes and planes, on wood working machines, lapboards, i.e. boards, which clasp folded; usually covers boards with paper.

last maker, see boot last maker.

lath cleaver, lath render, lath river, lath splitter; lathes render; splits timber, already cut to required length, into laths, used in plastering, by hand, with an axe.

lattice reader, see lath cleaver.

leg block maker (pianos); works on a spindle, wooden block attached to a spindle; glues parts together and veneering; usually done by part maker (478) g.v. lift maker; fits together or builds cases or cages used in carrying goods; passes them up or down a shaft; work similar to that of coach builder (479) g.v.

maiden maker; dolly maker, peggy maker; saws with circular saw, and turns on lathe, wooden blocks, free sharp handles and pegs for "dolly" of working machine; horse hole for pegs and fits them all together.

maker-off (small arms); feister; finishes wooden fore-end and stocks of cut and driven rifles; does spoke-shaving, rasping and buffing.

mallet maker; makes wooden mallets on woodworking lathe and with hand tools.

mandoline maker, as for guitar maker.

marker-off, marker-out; marks wood, with pencil, to shape and size required, indicating where it is to be cut, bent, etc.

maat maker (wooden), maat and spar maker; derrick maker, spar maker, yard maker; shapes masts, spars, yards, and derricks from rough trunks of wood, with chopping axe, adze, etc., to required dimensions; sometimes assisted by shipwright (wood) (482) g.v.

measure maker, rim measure maker; steams thin pieces of hardwood in a steaming chamber; bends them by hand, over a jig or mould, clamping them to a wooden frame; inserts screws; cuts circular pieces for bottoms, with hand saw or hand saw, and fits them into cylinder formed on jig; rivets whole together by hand, or on crivette machine; sometimes specifically designated, e.g., corn measure maker, fruit measure maker.

measurer (timber), see timber measurer.

modeller (wood), see wood model maker.

needle, repaire (cooperage); a bush band g.v. who recovers old bushes or muzzles from repaired cask with a hammer and chisel, inserts new bush, and screws it into hole with a two-handled bashing tool.

oar maker, boat oar maker; *see our and oar maker*; receives *our* form, i.e. a fir pole, usually imported already roughly cut, and then it cuts, i.e. draws shape of *our* there in chink; saws it to shape indicated, with a circular saw, or cuts it down, by hand, with a two-handled knife and chopper; planes it with hand plane; nails leather collar or beam in position, to reduce friction; when *our* will rub on rowlocks, with copper nails, and sometimes nail strip of copper on edge of blade; usually done by mast maker, *q.v.* or block maker *q.v.* outside fitting; sometimes and assemblies, during removal, heavy furniture made in sections; screws and numerous bolts, hinges etc.; may sometimes also do work of furniture porter. (470) *q.v.*

pan maker (harmonium); *only wood to also for "pan"* (reed wind-chest for harmonium); glues frame together, and makes slots, by boring holes in pans, over which reeds are fixed by knivel *q.v.*, *cf.* *pan maker* (concertinas) (480).

parquet flooring maker; makes *parquet* flooring which has been cut out by circular saw, or fret saw in case of intricate design; operates wood-working machines which groove and tongue edges and plane surface of *parquet* sections ready for laying; or makes up *parquet* panels from sections and binds together with glue.

parquet floor layer; wood floor layer; lays prepared *parquet* flooring, by gluing or nailing, with grooves, by planes top, and scrapes with iron scraper; applies wax polish, or sometimes, stain or French polish.

patent floor layer; lays floors with patent composition, usually containing some mastic mixture, sand, etc.

pattern maker (wood scales); *see wood scale maker* (piano).

peggy maker; *see maiden maker.*

piano bracket maker; cuts with saw, and shapes with chisel, plane, etc., wooden candle brackets for pianos; usually done by part maker (473) *q.v.* typical shaft, glass; grinds and polishes surface of pick handle on glazing wheel on machine, where abrasive material is smeared on leather face of wheel.

plate lock stocker; recesses and bores wooden blanks which encase working fittings of plate or stock locks.

poker worker; haws in *haws*, by tracing with heated tools usually on wood but also on leather, cardboard, etc.; uses type of bending iron for repeat or standard patterns.

pole builder; trims and strips stems or trunks of trees for use as poles for telephone, telegraph, or other electric wires; mounts cross trees, by checking them in and bolting them into position; fixes, by each screw or other screw, step brackets as required, for climbing; usually done by carpenter or joiner (474) *q.v.*

propeller maker, propeller shaper; receives wood for aeroplane propellers, which has been cut by sawyer (481) and by woodworking machinist (486) *q.v.*; glues several thicknesses of wood, as prepared, together, taking care to lay each thickness opposite ways of grain from the last; planes whole in a band-manipulated press until glue is set; cuts and trims to shape with saw, plane, spokeshave and other hand tools; polishes whole with sand or glass paper, ready for French polisher (475) *q.v.*

pulley block maker, pulley maker, or for block maker (wood).

racquet frame maker; *see tennis racquet frame maker.*

raiser (coopering); *cooper-up, tenon-raiser*; rounds and stands them up in first hoop to form oak or barrel, ready for trusser (477) *q.v.*

rake maker; turns, cuts and fits together component parts of wooden hay rakes.

rester-up, *see* raiser.

rope block maker, or for block maker (wood).

rougher (dog sole); bottom leveler; holds block of wood, intended for dog sole, against revolving cutters of smoothing machine to remove roughness.

rounder (dog sole); *see side cutter rule finisher;* passes rule, which has been prepared by rule framer *q.v.*, holds a machine, which scores marks thereon, indicating inches, millimetres, etc.; punches numbers thereon with hand punch and hammer; rubs, i.e. sandpapers it; polishes it with hand pad, and adds brass parts (if any).

rule framer; takes piece of wood, usually boxwood, for better class of rules, and saws it to correct length; planes top, bottom, edges and ends, by hand with a plane, or on planing machine, and bevels one or both edges, by hand or machine.

rustic carpenter, rustic wood worker, rustic work maker, rustic worker; makes garden seats, garden tables, and etc., from wood in a rustic style, i.e. wood that has not been stripped of its bark or subjected to any machinery; usually a rough carpenter (474) *q.v.*

saddle maker; shapes wooden shoes from solid wood, with power cutters, finishing with hand tools.

saddle tree maker; constructs wooden base for saddle trees by hand, using woodworking tools; glues component parts together; covers with canvas, and, if required, sandpapers and varnishes completed work.

seashell board maker; assembles and sticks together veneer or chip wood, previously cut to proper sizes, with paper strips and paste, to form box; *cf.* cardboard box maker (584).

scale box maker; (i) makes fitted wooden box which holds weights for scales; (ii) saws, planes and joins wood to form box portion of scales.

scale tang hatter; makes wooden scales, i.e. handles for butchers' knives and for cheap household knives; puts scales on tang through holes, drilled by a machine; then polishes scale and end of tang on stone grindstones of varying fineness till they are perfectly smooth.

scall maker, or for our maker, except that wood used is generally spruce.

scythe shaft maker; bends shafts for scythes to shape under steam pressure (see shaft bender), turns handles on lathe and fits into shaft.

shaft bender; (i) *free bender;* bends shafts or handles for scythes, hoes, etc., by placing in steam chamber to soften them and then bending to shape and clamping tight in a shaping or bending vice (ii) *shaftman;* makes shafts for light carriage by bending timber to shape by steam process, usually done by wheelwright or coach builder (475) *q.v.*

shaftman (carriages); (i) *see* shaft bender; (ii) shapes cart, carriage or van shafts from solid timber, by hand, with adze, plane and other hand tools and fits parts together, with necessary fittings, hinges, etc.

shankner (dog sole); cuts out instep in dog sole, on woodcutting machine.

shaper, *see* chair shaper.

sharp gluer (piano); glues, by hand, ebony sharps on to keyboard.

sharp maker (piano); cuts ebony or other hardwood, by fine machine saw, to size required for piano or organ sharps; cleans and polishes them on sandpapering machine ready for gluing on to keyboard.

shuttle block presser; presses hardwood shuttle blocks in hydraulic press, to increase density of wood.

shaver cutter; rounder; shapes dog sole, by cutting outline of sole with a wood cutting machine.

sieve maker (wood or cane); (i) bends and nails wooden frame of sieve, attaches gauge, or works wire through to form mesh; (ii) makes, by hand, a

kind of basket called a "sieve," of woven willow rods, for packing apples and other fruit etc.

sole cutter (clog), sole maker, clog sole cutter; shapes wooden blanks or blocks, in readiness to be attached to clog upper by clog assembler (415) *q.v.*; uses heavy band knife, weighing 2½ lbs., known as stock, bollow, or gripper.

sound board adjuster, sound board hand, sound board maker (piano); *see* bellier.

spade and shovel shaft finisher; uses hand tools to cut and shape ends of standard handles, made by handle machinist (486) *q.v.*, and to fit them to spades and shovels; fastens shaft to spade with rivet.

spar maker, *see* mast maker (wooden).

spokehave maker; forms spokehave grips from barwood on wood turning lathe and wood cutting machine; inserts blades and cuts tool with quick-drawing circular saw.

spring fastener (boot last); last spring fastener; bores holes in lasts, by machine, and fits spring for fastening together parts of last.

stocker (gun); stock maker; makes stocks of guns or rifles, by hand, from pieces of walnut wood, which have previously been roughly shaped; fixes them to rifle or gun, chiselling and cutting "head" of stock (where stocks union of spurs) with great accuracy to ensure perfect fitting of rifle or gun mechanism; *cf.* stocker (486); sometimes specifically designated, *e.g.* gun stocker, pistol stocker, rifle stocker, shot-gun stocker.

stock flier, stock finisher, stock machinist (gun); finishes on sand wheel or leather buff, surfaces of rifle or gun stocks, and fore ends, in readiness for varnishing.

stock maker, *see* stocker.

tally maker; wood label maker; saws wood into thin boards, and smooths on planing machine; cuts boards into small pieces with circular saw; uses balance scale, and sets out point on one end by holding against guide in machine.

tannia racquet frame maker; racquet frame maker; bends strip of wood to shape of tennis racquet frame by application of steam and by use of wedges; rasps, files and planes frame thus bent; smooths it with spoke-shave and sand paper.

tennis racquet polisher; rough polishes tennis racquet frame, by hand, with sandpaper, before stringing, and finally polishes it, by hand, after stringing, with spirit varnishes and pads.

timber bender; bender, bent timber maker, bent timber man, bent wood maker (coach) bent wood worker, wood bender; (i) places wood in steaming vessel and bends it round shaped blocks, fixing it in position with clamps or wedges; (ii) *a* carpenter (474) *q.v.*, or *a* cooper (476) *q.v.*, who fits selected timber into joints or frames, and places the frame, with the timber inside, in a chamber into which steam is introduced, thereby giving timber permanent set or bend for use in shafts, felloes, body moulds and frames.

timber cutter; hatchet man; cuts, with hatchet or saws, timber to required size for props, sleepers, choirs, etc., at surface of coal mine; *cf.* sawyer (481).

timber fender; a timber expert, whose duty it is to find suitable wood in timber yard or store for special work.

timber hewer, *see* timber squarer; *cf.* timber feller (116).

timber measurer, wood measurer; takes dimensions of timber, using calipers and tape measure, and calculates amount of useful wood in bulk; marks timber and records quantities in book.

timber selector; (i) chooses timber for purchaser, in timber yard; (ii) decides for what purpose various kinds of timber in stock are suitable; judges quality and degree of maturity.

timber squarer; timber square; roughly squares timber with an adze; cf. timber square (481).
tee and beeler (foot lath); last toe and beeler; shapes toe and heel of last with last maker's knife, after it has been turned by machine.

tray maker (wood); cuts out pieces of three ply and other wood for boxes and sides; joins them together with tenon joints and screws to form wooden trays; sometimes done by cabinet maker (473) g.s.

tree bender (spades and shovels); see shift bender.

trills maker; nails or rivets together laths to form trills, i.e. a kind of network, of diamond or square pattern.

trimming board maker; shapes trimmings board, used in upholstery trade, by hand, with woodworking tools, working wood endways of grain, to prevent cutting knife penetrating.

trug maker; makes by hand, using woodworking tools, boat-shaped wooden basins, for use of gardeners; using thin boards of hard wood split by hand and bent; nails stridge on to wooden frame-work.

veneer drier; takes charge of stock of veneers, dries them in heat for hours, and makes them perfectly straight between presses.

veneer matcher; selects pieces of veneer whose grain and natural markings will accord well together; takes a number of pieces, so selected, together, and cuts them to required shape and dimensions, with hand or band saw; glues them on surface to be veneered, e.g., piano panel, table top; places whole in press, with heated sine sheets to keep glue plastic while wood slowly sets, and screws press down with hand screw, removes work from press when set and scrapes surface, by hand, with steel scraper tools.

venetian blind maker; receives laths planed by machinist (490) g.s. and sometimes also sawn to required length by sawyer (481) g.s.; if laths are not sawn to length, saws them with hand saw; punches holes in slats in laths; cuts beam on which blind hangs; fixes webbing and cord and small pulley wheels in top beam, all by hand, using woodworking tools, screws and nails.

violin maker, violoncello maker; makes instrument of chosen wood, with hand tools (chisels, gouges, knives, planes, saws, etc.); fits stud, tail piece and thumb pegs for attaching of strings; makes and fixes finger-board; is often largely engaged in repairing violins or similar instruments.

washboard maker; (i) cuts out parts of washboard from machined lengths of wood, using woodworking tools, fits together, with brass or zinc screws or nails, and trims off edges; (ii) makes frame and fits sheet of corrugated zinc.

washing mald maker; assembles parts of "washing mald," i.e. trough and stirring mechanism; fits together, and makes watertight; cf. malden maker.

wattle maker; a bundle maker g.s. who makes frame work of hurdle and then weaves it with twigs or wattles.

wig block maker; shapes, with hand tools, wooden blocks to hold wig in making.

wood bender, see timber bender.

wood dresser (harness furniture); cuts out and shapes, by hand, using woodworking tools, wooden base for lined cart harness, ready for metal casing.

wooden bobbin finisher; finishes off with hand tools, roughly turned wooden bobbins and fixes metal attachments.

wood fibre maker, see wood wool cutter.

wood finisher; smooths finished work usually with glass and sandpaper either by hand or by holding wood work against face of sandpapering

or buffing machine, usually done by joiner (444) or cabinet maker (473) g.s.

wood floor layer; (i) see parquet floor layer; (ii) lays floors with wooden blocks, arranged in a pattern, usually on a foundation of cement, fixing blocks by means of mallet-bitumen; plans or scrapes to one level and applies first polish.

wood handle maker (not tool); as for handle maker; may shape principally by hand from hard woods, e.g., box, ash, ebony, using saw and small lath.

wood heel maker; heel maker; (i) shapes wooden heels with chisel and spokeshave; (ii) general term for operations engaged in any of the various operations of wood heel making, when work is subdivided, including blocker, breaster (486), concaver (486), grader, scourer (489) g.s.

wood hewer; cuts and shapes wooden beams with axe or also for "rounds" or "points" of other piles which are to be steel shod and collared.

wood label maker, see tally maker.

wood letter cutter, wood letter maker; chisels or pencils outlines of letters on pieces of well-seasoned, smooth wood and cuts out solid letters by use of sandpaper, of a horse wheel or more generally, of a small hand saw; finishes off letters by bevelling, filing, sandpapering, etc.

wood measurer, see timber measurer.

wood model maker; modeller (wood); makes models in wood, working from scale drawings; measures and marks out wood accurately, cuts parts with fine saw, planes and shapes with various wood cutting hand tools; joins parts together with small nails and screws; may also do wood carving, see wood carver (485).

wood packing maker, see wood wool cutter.

wood pipe maker (organ); an inside hand g.s. who makes wooden organ pipes by gluing and pegging together boards of definite length, into long square tube.

wood rake maker; makes handle by drawing stick through die of trapping machine to smooth it and reduce to required section; saws, shaves and hoves head; makes teeth on trapping machine, and fits parts together.

wood scale maker (piano), pattern maker (wood scaler); makes a pattern in wood (called a wood scale) of a piano scale, from which a mould is afterwards taken for use in making iron scale of a piano; work done by hand, with hand woodworking tools wood shell maker (drums, etc.), saw scaleboard wood, i.e. thin wood, generally spruce or ash, to required length, steams it in steam chamber, bends it to shape of drum by hand on a jig or shaped mould fitted with clamping screws, joins ends with glue, or with rivets or staples, which are driven in by hand or on machine, presses join, if glued, with a hand-manipulated cast press fitted with hand screws; leaves drum shell to dry.

wood shovel maker; fits on to turned handle, a shovel-shaped piece of wood, made by chisel and spokeshave.

wood wool cutter, wood wool maker; wood fibre mald, wood packing maker; places waste veneer or waste peelings from logs, in a pile, on bed of a machine, and clamps them in position, switches on power-drive of machine, which planes thin shavings from pile as it advances automatically towards horizontal cutter of machine.

wood worker; general term for any person working in wood, e.g. as a joiner (474), or as a wood cutting machinist (485) g.s.

wood worker (orthopaedic); cuts out and fashions wooden parts of surgical appliances, by hand, taking measurements from plaster casts or moulds, and using woodworking tools.

writing slate framer; fits wooden frames, decorated or hand-beamed together, round slate.

yard maker, see mast maker (wooden).

499—OTHER WORKERS.

axle packer; for large axles, shingles over finished bearing parts of axles, in process of making or fitting, or for transport, with wood and hoop iron to prevent damage.

backer-up; feeder, Sawyer's wife; assists sawyer (483) g.s. to push wood up to power-driven circular saw and to pull it away after it has been cut, cf. puller.

barb chopper; bark cutter; (i) chops bark, by hand, with a small axe or chopper, (ii) shovels or tips bark into hopper-head of a power-driven chipping machine, shovels chopped bark, as it is discharged from machine, into sacks.

barb cleaner; bark grinder, bark scraper, bark shaver; cleans rough bark from cork with a revolving wheel equipped with cutters; also grinds cut blocks of cork on a sandpaper wheel to produce smooth surface.

barb cutter, see bark chopper.

barb grinder; (i) feeds bark into grinding mill, for convenience of transport, or to prepare for extraction of tanning liquors; cf. bark grinder (339), (ii) see bark cleaner, bark machine attendant, see wood barler.

barb picker; sorts and grades wood bark by kind, quality, size, thickness and suitability.

barb scraper, see bark cleaner.

bark shaver; (i) see bark cleaner; (ii) removes bark from tree with band scraper.

bark sifter; uses a riddle or screen to separate bark from larger pieces of bark in a cork producing workshop.

bark stripper; cork stripper, cork dresser; cuts cork, as imported, into long strips, suitable for further cutting or machining, either with a hand knife, or by passing cork into a power-driven machine fitted with a revolving cutter.

bark worker; general term for any worker engaged in preparing bark to be used for cork, ornamental purposes or for tanning.

barrel driving man, see machine barrel driver.

basket; letterer, basket maker; prints with stencil, or paints with brush, by hand, name of prospectus owner, upon sides of baskets.

bavin holder (firewood); holds hays, i.e. long bundles of brush-wood, for faggot maker g.s. who saws them to required length and ties them into bundles.

bavin maker; waste maker; makes up bundles of waste wood in coppices or forests for use as fuel.

bench hand, bench man; (cabinet making), assists joiner (474) or cabinet maker (475) g.s. in work upon machine-made cabinets or furniture; makes minor adjustments with hand tools and screws on fittings.

broom maker; broomer; trims sticks for handles with draw knife; makes up bundles of broom, haws, birch or other twigs, and binds to handle with osiers or split sticks; often done by birch broom maker g.s.

binding board maker (for braid, etc.); glues strips of wood to edges of small, narrow pieces of wood (already machine cut), to make binding boards for braid, cord, etc.

birch broom maker; broom finisher, broomer; makes handles of long wooden stakes with birch twigs with draw-knife; makes up bundles of birch or other springs twigs; pegs them on handle and bands them round with wings of osier or split stick.

birch picker; bark shaver; (twigs suitable for making brooms, etc. babbler, see sandpaperer.

bobbin harreller; places finished wooden bobbins in barrels and pours linseed oil over them before they are painted.

bobbin counter; wooden bobbin counter; tube counter and bobbin checker; counts number of finished wooden bobbins turned out by machines; makes simple record of number made by each machine for payment purposes.

bobbin polisher (wood); feeds polishing machine with finished bobbins, with one hand, and with other hand works a lever which brings bobbins into contact with abrasive mop.

bobbin sandpaperer; smooths surface of finished wooden bobbin with sandpaper on a special lathe.

bobbin sizer; measures size of bobbins or other turned articles, with a "size" or gauge; rejects those that are too large or too small; cf. bobbin sizer (486).

bobbin slow tester; tests bobbins for looseness by placing them on a spindle revolving at low speed; cf. bobbin tester (483).

box maker (match factory); matches.

box maker; (i) makes match boxes, by putting thin strips of seasoned wood, or, more often, of cardboard, into a machine, which cuts strip, folds it into shape of box and joins edges; (ii) makes match boxes of thin strips of wood by hand; places strip round mould, covers with gummed paper and affixes striking part at side.

branch river; gives timber with a cleaver, and shapes the piece of timber with hand knife to form branches, i.e. pointed implements used in thatching; cf. wood reuder.

broom dealer; see birch broom maker, broomer; (i) see broom maker; (ii) see birch broom maker.

brush machine finisher; a sandpaper machine hand q.v. finishing brush stocks; cf. moulding machine hand (486).

buffer (baskets); see willow buffer.

thung maker; see rust pug maker.

camberel maker; camberel maker; camberel maker; (i) splits timber into lengths with cleaver; shapes and finishes with draw knife, and saws notches forming camberels or gambrels, used for holding carcasses in butchers' shops; now usually made of steel; (ii) cuts carcass sections, with hand saw, from naturally curved pieces of ash; saws notches, and finishes with hand tools.

cane chair sorter, cane sorter; sorts out various thicknesses of reeds and canes.

carpenter's mate; usually a labourer q.v. in carpenter's shop; may perform simple carpentry work at bench under supervision; assists carpenter (474) q.v. by holding up work and keeping tools.

chair paperer; sandpapers chair frames, by hand, after they have been shaped.

chip breaker, chip chopper; feeds logs of medicinal or dye woods into chipping machines in which they are broken up, and catches machines.

cleanser, cleanser-up (piano); scrapes (mucks off) and rubs veneered parts of piano with sandpaper or glasspaper, preparatory to polishing.

clipper (coopering); makes special wooden hoops (used in dry cooperage) by cutting strips to required length and nicking ends which are then clipped together; usually done by hoop maker (477) q.v.

clothes peg maker; (i) cuts pegs and shapes sticks; cuts out fork by hand, and attaches band of tinplate at upper portion of fork with rivet or small nail; (ii) turns knob headed pegs on lathe or shapes pegs by drawing through die of trapping machine.

conveyor attendant; removes baskets of finished bobbins from conveyor for transit to packing room; also removes empty baskets and stacks them.

cooper's assistant; assists cooper (477) q.v. generally, keeping him supplied with staves, hoops, etc.; removes finished barrels, cleans up workshop, etc.

teek drawer-off, cork stripper, see bark stripper.

creeper peg maker (textile machinery); turns creeper pegs (wooden pegs fixed in creeper for holding bobbins) on a wood turning lathe and cuts them to required length.

crescoter, timber crescoter; carries timber to and from tank in which timber is impregnated with creosote under steam pressure; puts timber in tank; controls steam pressure by means of a lever; removes timber from tank after specified time.

cutter-down; removes frames consisting of a stout welding band of hand-made matches, dipped at both ends, by hand, from dipper (148) q.v.; fixes it in guillotine machine and moves lever operating knife which cuts them in half; may also do work of box filler (349) q.v.

dowel maker; passes wood by hand, into automatic machine, in which it is turned and cut into dowels, i.e. small round section, pieces of wood used for joining sections of furniture, etc.; together, test machine in motion, by moving a lever, and collects dowels produced by machine.

drum lagger (electric cables); a labourer who fixes wooden battens or "lagging" pieces on to drums, from rim to rim, to protect wound cable from damage.

end finisher (pencil); feeds automatic machine which cleans, i.e. smooths and trims up, ends of varnished pencils.

faggot maker; takes long bundles of brushwood which are cut and bundled in the woods, and saws them into small bundles or faggots.

feeder (saw-mills); see barkier-up.

ferruler (walking sticks); tapers end of walking or umbrella stick by shaving with a knife or by twisting in a cutting machine; fits a ring or cap of metal round the end, to strengthen it or prevent splitting and wearing, and fixes by driving in a small brass nail and filing smooth; usually done by fitter (484) q.v.

finisher (bullaun cues); glues leather tip on end of cue, and gives cue final sandpapering.

finisher (boot lasts); scours (boots lasts), smooths surface of wooden last by holding it against revolving wheel covered with sandpaper or other abrasive material; polishes it by holding against revolving waxed or soaped cotton mop.

finisher (lead pencil making); general term for operatives engaged in finishing lead pencils, including finisher, varnisher (lead pencil), polisher (lead pencil) and stamper (lead pencil) q.v.

firewood chopper; wood chopper, wood cutter (wood yard); chops pieces of wood, cut by firewood cutters q.v. by hand, into short lengths suitable for burning.

firewood cutter; cuts wood by hand or circular saw, into suitable lengths for chopping into small sticks.

fish skinner (walking and umbrella sticks); rubs surface of stick with dried, cleaned fish skin to required smoothness.

gambrel maker, see camberel maker.

glass paperer, or for sandpaperer.

groover (lead pencils); grooving machine attendant; feeds wooden pencil slats into machine which grooves them ready for receiving leads.

hemp planer; planer (rod machine); smooths surface of wood or wooden articles, by shaving top layer away with hand plane on a bench.

heath broom maker, or for birch broom maker.

labourer; assists skilled workers, e.g. cooper (471), shipwright (473), sawyer (481), woodworking machine hand (483) q.v., by moving and stacking timber, sawn and machined wood, manufactured articles, etc.; keeps skilled worker supplied with materials, holds up work, looks after tools, keeps fire pot hot, cleans benches and workshop; carries timber in

yard or moves it by dragging on iron skids or rollers; usually specifically designated, e.g. carpenter's labourer, coach builder's labourer, joiner's labourer, joinery works labourer, pattern maker's labourer, raft (timber) timber yard labourer, saw mill labourer, sawyer's labourer, ship joiner's labourer, shipwright's labourer, timber, cutter's labourer, (mines) timber yard labourer, wheeler's labourer, wood drying kiln labourer, wood planing machine labourer, wood yard labourer, yard labourer.

ting maker, lag and peg maker; turns wooden pegs on lathe, and drills holes for pegs in wooden blocks (lags) used for forming patterns on dobbie looms.

liner; see *scutcher*-down; marks out timber for cutting, with chalk or with straight edge and pencil.

machine barrel driver; barrel driving man; rolls barrel or cork on to platform of barrel driving machine; slips an iron hoop over end of cork; adjusts and secures iron arms, suspended over platform, to the hoop; moves, causing platform, with cork upon it, to rise by hydraulic power, thus pressing hoop against movable iron arms and forcing it tightly on to cork; removes cork when hoop is forced on as tightly as it will go.

machine nailer, see nailing machinist.

moulder (lead pencils), see wood worker (lead pencil).

moulding checker; measures mouldings as they come from machine; collects them, according to size and pattern, prior to passing them into stock.

nailing machinist, nailing machine attendant; machine nailer; operates a nailing machine used for making boxes; passes nails into hopper head of machine; places bar or section thereof on table beneath machine; manipulates lever to actuate plunger which carries nails from hopper head and drives them one by one into wood-work of box.

nesting hand (match boxes); one of two workers who put pieces either of outside covers or of slides, i.e. inside portions, of match boxes into receiving guides of an automatic machine; this machine conveys both outer covers and slides along a bar fitted with devices which lift slides with matchsticks, and slips into outer covers; another worker takes off filled boxes at other end and puts them in a basket crate; cf. box filler (match) (343).

enkinment box maker; passes strips and discs of thin peeled wood into automatic machine, which twists strips into circles and glues them to discs; also pours glue into feed container of machine.

outside box machinist (match boxes); feeds match box making machine with skillets, received from skillet chopper (483) q.v.; fixes open of printed paper on spindle of machine, and keeps feed trough of machine supplied with paste; switches on power-drive of machine, which automatically folds sections of paper, pastes them, and delivers outer covers complete, ready for nesting hand q.v.

paperer, see sandpaperer; sometimes specifically designated, e.g. stock paperer.

paper hand (piano hammer); puts strips of wood after they have been shaped by spindle hand (486) q.v. through power-driven sandpapering machine, to smooth part of hammer that is not covered with felt.

part finisher (piano); cleans wooden parts of piano frames with sandpaper or glasspaper, before they are assembled or polished; works partly by hand and partly with a belt machine.

peeler (basket making), rod peeler, rush peeler, twig peeler, willow peeler; peels rods of willow, osier, rush, etc., before weaving, by means of a brake, a kind of pincers.

peg maker; general term for any worker making wooden pegs, by varying method; usually specifically designated, e.g. bent peg maker, clothes peg maker, crescent peg maker, shuttle peg maker, tent peg maker, vent peg maker, etc.

peg maker (tools); passes wood, by hand, into automatic machine which cuts and shapes pegs for use by boot makers (412) q.v. in attaching soles to uppers, switches on power-drive of machine and collects pegs after they have been cut and passed through machine.

peg maker (casks), see vent peg maker.

plier (coopering), see stave stacker.

pump maker (firewood), see bavin maker.

pipe pumice (wood), see polisher, pipe.

split maker, see vent peg maker.

planer (not machine), see band planer.

polisher (lead pencil), wood polisher (pencil); feeds hopper of polishing machine with lead pencils, which are automatically polished in preparation for varnishing.

polisher (wood pipe), hater polisher; pipe pumice (wood); (i) polishes inside and outside of bore and stem of pipe, either with power-driven revolving pumice stone, or by covering with polishing paste and holding by hand against sandpaper belt; (ii) polishes both inside and wooden stem of pipe after staining (see briar pipe stainer (398)) by holding it against revolving disc of calico.

polisher (wood heels); smooths surface of wood heel by holding it against revolving wheel covered with sandpaper or other abrasive material; polishes it by holding against revolving wheel of scraped cotton wool.

puller-out, pull-out key (saw mills); stands at back end of circular saw bench and pulls wood through when sawn nearly to end, cf. backer-up.

pumice; smooths coat of polish or varnish on wooden articles by rubbing with moistened pumice powder on a pad.

runcar's attendant; carries bobbins from reeling machine to reeling machine; cf. bobbin runner (488).

rounder, rounding machine attendant; feeds machine with pencil or penholder blanks to round them.

rubber, rubber-down, see sandpaperer.

rule ruler; sandpapers rules for rule finisher (498) q.v.

sand blaster (on wood); imprints designs on smooth surface of wooden panels or other articles by exposing parts to be decorated to blast of fine sand driven by compressed air, other parts being masked by cardboard or other suitable shield.

sandpaperer, sander, sand paper machine hand, sandpapering machine; bobby, popper, rubber, rubber-down; rubs surface of finished wooden articles with sandpaper or glasspaper by hand, to make smooth or to prepare for polishing or varnishing; or prepares surfaces of wooden articles by bringing them into contact with a revolving disc covered with sandpaper or glasspaper.

saw settler-out, see liner.

sawyer's mate, see backer-up.

scaleboard collector, scaleboard sorter; collects and sorts scaleboard, as produced by scaleboard cutter q.v. and stacks or stores it where required, according to length, thickness, kind, etc.

scaleboard cutter; clamps wood, generally spruce, on bed of scaleboard cutting machine; adjusts blade of machine, by hand, to cut wood to requisite thickness (one thirty-sixth of an inch); switches on power-drive of machine, causing a wide blade to move forward and shave thin sheets from wood.

scourer (boot last), see finisher (boot last).

scourer (wood heels), heel scourer; smooths surface of heel, when it has been shaped, by holding it against rotating wheels covered with sandpaper.

shave maker, shave turner, see vent peg maker, cf. peg maker (488).

shoulder (penholders); feeds penholder sticks into machine which cuts shoulder on stick, to take steel mount or holder; often also feeds tapering machines (see taperer).

shuttle peg maker; turns shuttle pegs or pins on a lathe, and cuts them to required length.

skewer bottom drier; applies glue to head of wooden skewers, and places skewer bottom on to bath on to skewer, ready for fixing into position by machine.

skewer maker (textile machinery); cuts and turns wooden skewers for cotton winding frames, by feeding wood into automatic machine.

sleeper pickler, see for creosote.

slide machine attendant (match boxes); attends feeds and operates machine, which makes slides, i.e. inner portion of match boxes; replenishes supply of wooden strips, paper, cardboard and gum in machine as required; cf. outside box machinist.

spool maker (harp wire); makes, by mailing together machine-made wooden parts, large spools upon which harp wire is wound.

square sorter; sorts good squares from waste wood from sawmill, in which wood is cut into squares ready for forwarding down into bobbins; passes waste to chemical department to be made into charcoal or sold as firewood.

stacker (coopering), see stave stacker.

stamper (lead pencils); feeds hopper of stamping machine with lead pencils, which are automatically stamped therein with name of firm, indications of quality, etc.

stamper (planes); numbers each hammer in a set with an indelible stamp, to indicate its position in a set; usually done by hole borer (488) q.v.

stave stacker, stavic (coopering); pier, stacker; a labourer who piles staves in open stacks, with air spaces between, for seasoning; carries them from ship or truck to stack.

stick polisher; polishes or varnishes sticks for umbrellas, parasols, or walking sticks.

tallyer, tally man, see timber checker.

taperer, tapering machine attendant; feeds penholder sticks into machine which tapers them; often also feeds shouldering machine (see shoulder).

telegraph pole dresser; strips, with draw knife, bark and skin of trees selected for use as telegraph poles.

tant peg maker; cuts out shaped pieces of wood from boards, which curl hand saw, and catches them in wire cutting machine to make pegs, used to secure tant ropes to ground.

timber checker; tallyer, tally man, wood checker; verifies measurements of timber received at docks, in timber yard, or in works; keeps simple record of timber received or despatched from wood yard.

timber loader, see wood loader.

timber man; arranges and stacks timber in works yard and issues supplies to sawyers, coach builders, etc., as required.

timber marker; brands ends of timber with branding iron to indicate quality, cubical contents, etc., may also mark for cutting.

timber preserver, timber preserver; seasons or treats timber with chemical substances, generally creosote, to preserve it, may paint surface of wood with solution or place timber in a high pressure chamber to impregnate it with chemicals and so render it non-inflammable, or less liable to rot, or seasonless in appearance; cf. creosoter.

trailer-out; levers hauls of timber on to low trolley and pushes it along rails in and out of saw mill.

transferer; applies coat of thin shellac to smooth wood surface, by hand with brush, lays on transfer and sets aside to dry; tears off paper and rubs transfer clean.

tubbie; carries barrels from cooperage to warehouse; cf. tubble (477).

tube counter and tubbin checker, see bobbin counter.

varnishar (lead pencil making); attends varnishing machine which automatically coats pencils with varnish; feeds pencils into hopper and watches machine for smooth running.

vent peg maker, bung maker, put maker, shave maker, shave turner; turns circular wooden pegs, or plugs, for barrels, from square or round sticks, using lathe or trapping machine.

waste wood sorter; sorts over wood from which bobbins have been made, takes out any good bobbins inadvertently left in it, and fills up bags of firewood.

willow buffer; buffer; strips willow twigs in boiling water and removes bark, by hand, exposing buff-coloured wood.

wood barkar; barkar machine attendant; removes bark from logs either by hand, with a two-handed knife, or by fixing logs in front of revolving cutter of a machine.

wood bundle maker; makes up bundles of firewood, places string and chopped sticks in kind strong to proper height and ties up.

wood checker, see timber checker.

wood chopper (firewood), see firewood chopper.

wood splitter (wood pulp); wood splitter; splits thicker logs in halves in splitting machine and afterwards feeds them into chopping machine in which they are converted into chips.

wood cleaner (wood pulp); wood duster, wood willower; feeds wood chips into large revolving screen to remove dust and dirt before boiling.

wood cleaner (wood yard); strips tree timber of branches and leaves.

wood cleaner, see wood reder.

wood cutter (wood yard); (i) see firewood chopper; (ii) see wood reder.

wood chopper (wood pulp); see wood cleaner.

wooden knitting pin maker; sharpens point of wooden knitting pin, in a machine similar to a pencil sharpener; affixes small wooden head, with glass, and varnishes pin.

wooden screw maker; passes wood, by hand into machine, which automatically shapes and turns wooden screws; sets machine in motion, by moving a lever, and collects finished screws produced by machine.

wooden skewer maker; makes wooden skewers for weaving, by hand, from saw twigs, by trimming with knife.

wood faggoter; a coppice worker who makes up bundles of waste sticks, or of rough stakes, for firewood, fascines or other purposes.

wood loader; timber loader; loads timber on to saws wagons with chain, blocks and rollers.

wood reder; wood cleaner, wood cutter (wood pulp), wood splitter; splits timber, with cleaver or wedge and mallet, into pieces suitable for various purposes, e.g. making of tool handles.

wood splitter; (i) see wood chopper; (ii) see wood reder; (iii) a woodman, who splits wood in the tree, by driving in iron wedges with blows of mallet.

wood willower, see wood cleaner (wood pulp).

wood worker (lead pencils); moulder; puts wooden sticks to be moulded into halves for pencils, in hopper of moulding machine; keeps feed clear from joints; sticks, in halves, pass automatically into glazing machine.

Sub Order 2.—Other Workers.

502.—BEDDING AND MATTRESS MAKERS.

bedding cleaner; feather man; takes bedding to pieces; cleans covers by steam or hot water, and beats filling by hand, to remove lumps and to aerate it.

bedding maker, bed maker; general terms for any worker engaged in making bedding, e.g. in filling cases with hair, feathers, or flock, or in sewing up ends and finishing; sometimes specifically designated, e.g. feather bed maker.

feather man, see bedding cleaner.

feather picker; separates and prepares feathers for filling beds.

filler, see stuffer.

hascock maker; general term for any worker engaged in making hascocks, i.e. either cutting out covers, stuffing them, or sewing them up.

mattress maker; levels, by hand, stuffing material, which has usually been inserted in mattress cover by another worker, though some mattress makers do their own stuffing, of stuffer, stitches mattress, by hand, with string and a special needle; secures stuffing material in position by running-in process, i.e. by attaching leather discs (tufts) connected by strings to upper and lower surfaces of mattress cover and tying them tightly; by hand, inside mattress, (cf. tufter) a stiletto or similar tool being used to piece mattress cover and leather tufts.

pillowcase maker; a mattress maker g.v. who makes mattresses stuffed with straw (pillowcases).

stuffer; filler; stuffs mattresses, hascocks, cushions, etc., with hair, wool, straw, or other stuffing material; sometimes also levels stuffing material, and secures it in position by running-in process; cf. mattress maker.

tufter; stitches through mattresses, after they have been stuffed (see stuffer), at various intervals to keep stuffing in position, using special needle and passing twine through leather discs (tufts) on each side to prevent twine from pulling through.

503.—CARPET AND LINOLEUM PLANNERS.

carpet layer, carpet fitter, carpet fixer; lays, stretches with claw hook, and fixes carpets, with or without underlayment as planned by carpet planner g.v.; frequently done by carpet planner.

carpet planner; measures floor space of room to be covered and decides best method of laying carpet; cuts out pieces to shape of room, often also patterns where possible; often also lays them (see carpet layer).

floor covering layer; general term embracing carpet layer and linoleum layer g.v.

linoleum (lino) layer, linoleum (lino) fitter, oilcloth fitter, oilcloth layer; lays, and fixes with nails or glue, linoleum or oilcloth, as prepared by linoleum planner g.v.; frequently also plans it before laying.

linoleum planner; oilcloth planner; also for carpet planner.

oilcloth fitter, oilcloth layer, see linoleum layer.

oilcloth planner, see linoleum planner.

504.—UPHOLSTERERS & COACH TRIMMERS.

braider (carriages, etc.); fixes braid, covering edges of upholstery in coach building; usually done by coach trimmer g.v.

carpet sewer; (1) makes up carpets by sewing borders on to central square with strong thread and a special needle; may also make up squares by sewing carpet strips together; sometimes sews up carpet to fit special

dimensions of room; (2) an upholsterer g.v. who sews together pieces of carpet to form covers for furnature, chair binder; tacks braid on other stuffing cover over padding of back and seat of chair and over webbing under seat.

couch stuff over man; an upholsterer g.v. who specialises in making couches of which the framework is entirely upholstered.

coverer (aeroplane); stretches on and nails, glues or stitches fabric covers of aeroplane (wings, bodies and fuselages) to wooden or aluminium framework.

cushion filler (vehicles); fills cushions with flock, etc.; secures padding in position, using string, fabric or leather discs, rosettes and buttons; in perambulator making, work is sometimes done by upholsterer g.v.

finisher (aeroplane); trimmer; trims and cuts off tags, ends, threads, etc., from sewn material of aeroplane, etc.

leather stitchee (furniture); stitches edges and other parts of leather covering of furniture, and assists upholsterer g.v. generally.

leather worker; general term for workers in leather on furniture, rolling stock, etc., including budget trimmer, saddler (railway rolling stock) (348), leather stitchee g.v.

linar, cabinet liner; covers, with linen, silk or other fabric, inside of cabinet case work.

mender (vehicles, etc.); repairs torn seats and upholstery; usually done by upholsterer g.v.

ottoman maker; an upholsterer g.v. who specialises in the covering of ottomans, a light type of couch.

sofa binder; binds, with braid or other fabric, springs and stuffing of sofa, before cover is put on; sometimes done by upholsterer's assistant (500) g.v.

stuffer (chair, cushion, sofa, etc.); inserts, arranges and fixes padding of articles of furniture, carriage, etc.; sometimes done by upholsterer's assistant (530) g.v.

trimmer; (1) upholsterer's trimmer; trims edges of applied covering material; covers backed edges with braid, and attaches rosettes and other embellishments and assists upholsterer g.v. generally; (2) see upholsterer; sometimes specifically designated, e.g. aeroplane trimmer, basketie trimmer, coach trimmer, perambulator trimmer.

trimmer (aeroplane, airships, etc.), see finisher (aeroplane).

trimmer, budget (coaches and carriages); cuts out, with hand knife, according to pattern, leather fittings used in coach building, for hood, splashboard, aprons, etc.; finishes edges of leather with hand tools, applies dye or stain to them, by hand, if required, and tacks or fixes leather fittings in position.

carriage, coach; upholsterer (carriage); cuts out, by hand, with shears or knife, material (other than leather) to be used in upholstering carriages, coaches and motor cars; stuffs and lines seats, by hand; tacks in position, the pieces of leather required on outside of vehicle.

trimmer, leather (railway coaches); trims padded leather work in railway coaches; cuts and turns leather straps, etc., by hand, with hand tools. Sometimes also cuts out leather for use in making railway cushions, and assists saddler (344) or upholsterer g.v.

trimmer, upholsterer's, see trimmer.

trimmer, white; a specially skilled coach trimmer g.v. or upholsterer g.v. who undertakes work involving use of light coloured and delicate materials.

upholsterer; (1) applies springs, padding, cushions, covers of cloth, silk, leather, or other material, decorative articles of furniture; tacks webbing with string; inserts padding and covers with braid or other fabric;

cuts out, fits, and tacks in place, exterior cover; does each edge of material by tacking, on braid, rosettes, etc.; (2) see trimmer; sometimes specifically designated, e.g. aeroplane upholsterer, carriage upholsterer, perambulator upholsterer.

upholsteress; general term for women engaged in coach upholstering, usually sewing covers for seats, etc.; sews together pieces of carpet; stuffs and makes throughout hascocks, etc., sews together, and edges with cord, if necessary, loose covers for furniture.

505.—OTHER SKILLED WORKERS.

coffin trimmer; cuts padding and satin to shape and lines inside of coffin; nails lining in with tacks and trims edges with gimp or frilling; usually done by coffin finisher (436) g.v.

cushion maker; levels, stitches, runs in cord, braid, etc., and ties down chair cushion cases which have previously been filled with wool, hair or other padding.

506.—OTHER WORKERS.

breaker feeder (rag flock making), see flock machine tender.

flock machine tender; breaker feeder; feeds rags to breaker machine, which tears and breaks them to a degree of fineness, necessary for upholstery padding, bedding and cushion filling; attends machine generally.

trimmer's assistant; assists trimmer (504) g.v. by holding tacks, tools, etc.; may do less skilled tacking and cutting or trimming of fabric when tacked.

upholsterer's assistant; assists upholsterer (534) g.v. by covering, stitching, cutting web, etc.; cuts and sews linings to cover padding.

ORDER XVI.—MAKERS OF AND WORKERS IN PAPER; PRINTERS, BOOK-BINDERS, PHOTOGRAPHERS, ETC.

Sub-Order 1.—Makers of Paper, Pulp, Straw and Card Board.

511.—FOREMEN AND OVER-LOOKERS

rag-house overlooker, rag-house overseer; supervises work of rag-cutters (519), rag dusters (518), rag sorters (534), and labourers employed in or about rag-house, is responsible for various quantities and quantities of rags used; assigns duties to workers under him and checks their time; engages and discharges rag-house workers; sometimes also, where rag-bolling is done in conjunction with cutting, sorting and dusting, supervises rag-bolling workers.

512.—BATMEN AND MACHINE MEN.

beaterman, rag beater; in charge of a number of beating engines which disintegrate and soften materials, i.e. asbestos, straw, grass, rags, wood bogs, etc., used in manufacture of paper, strawboard, millboards, etc., and reduce them to pulp; has expert knowledge of textures or qualities of pulp required in making various papers, etc., consults power-driven engines; instructs helpers as to quantities of water to be let into engines and amount of china clay, case, resin and (for coloured paper) dye to be added; after pulping is completed, takes small sample of pulp and passes it to chemist for analysis.

cutterman, rotary; **ripperman**, **trimmer** (card and pasteboard); **adjusts rotary cutting knives on machine used for trimming edges of large mill boards, using measuring gages, feeds machine with mill-boards and controls power which drives machine, by means of switches.**

cyllinder man, s. s. dryer.
dumper, dumperman; **assists super-calenderman q.v. by attending a reeling machine fitted with a mechanically operated dumping device used for dumping paper in preparation for super-calendering; watches reeling or re-reeling of paper for creasing, beakings, etc. and assists in lifting on and off rolls of paper to and from spindle of machine.**

dipper, size dipping; **dips hand-made sheets into sizer vat of gelatine, cf. tub sizer.**

dry ender, dry end man, s. s. dryer.

dryer, dryerman; **cyllinder man, dry ender, dry end sizer**; **attends steam-heated drying cylinders round which paper passes in papermaking machine when starting machine or after breakage of paper web takes the paper from end to end of the drying cylinders to ensure it following the correct path; while machine is working, watches for breakages of paper, regulates steam and makes any minor necessary adjustments; see also calender assistant.**

dryerman, left (hand-made paper), dryworker (hand-made paper), dryworker; **is employed in drying loft, in which hand-made sheets of paper are suspended in small batches on cowhair ropes; changes position of sheets at intervals so that all are subjected to equal drying conditions.**

embosser; **or for linoleum except that machine is fitted with an engraved steel roller, running in contact with a paper case, to impress a grain on paper.**

emblemmer (card, pasteboard and paper), s. s. coater, haryla.

enlarger (photographic paper); **a calendar attendant q.v. engaged in passing special photographic paper through rolls of calendaring machine to give it a glossy surface; cf. enlarger (photographic paper) (198).**

finisher (card and pasteboard); **general term for workers who examine, sort, count or tie up boards, or do other finishing operations prior to dispatch.**

finisher, plate (millboard), s. s. glazer, plate.

finisher, paper; **maker-up, s. s. finisher**; **general term for workers in the finishing (s. s.) department including paper counter, paper sorter q.v., etc.; in hand-made paper trade may be responsible for quality and quantity of paper sent out.**

finisher, plate, s. s. glazer, plate.

finisher, s. s. glazer, paper.

glazer (card and pasteboard), s. s. rollerman (card and pasteboard).

glazer, friction; **glazer (paper)**; **a calendar attendant q.v. operating a machine which glazes paper by passing it between beveled rollers or cylinders, of different diameters revolving at different speeds; keeps cylinders clean and regulates flow of beccowax to cylinders by turning taps on or off.**

glazer (paper); **(i) s. s. plate glazer; (ii) s. s. friction glazer.**

glazer, plate; **glazer (paper), miller, general finisher (millboard), plate finisher, plater, press rollerman, roller, rollerman (hand-made paper); passes a pile of sheets and plates prepared by interleaver (519) q.v. several times between rollers pressed powerfully together and returns it to interleaver; repeats process, after re-arrangement of sheets by interleaver as often as necessary to obtain requisite finish; may sometimes also do the work of interleaver.**

guillotine man (asbestos), s. s. trimmer (asbestos).

guillotine man (paper mill), s. s. cutter, guillotine.

inspector (card and pasteboard); inspects goods before despatch to ensure good quality.

jordan man; shovels half-stuff, i.e., semi-prepared pulp, into hopper feed of specially designed machine used for pulp refining; manipulates valves which control water flow; switches on and off power which drives machine.

linoleum; lino machine man; with assistance of labourers, fixes reel of paper on machine consisting of steam-heated steel rollers and paper rollers between which two sections of linen pass, power pressure being applied to rollers in order to impress linen pattern on paper, guides end of paper between hush sheets and rollers, and switches on and off power which drives machine.

machine assistant, first; **the head workman's assistant (519) q.v. who usually acts as dryerman q.v.; cf. spare machineman (512).**

machine man, lino, s. s. linoleum.

machine man, paper coating; **general term covering haryla cutter, paper counter, tracing paper counter, etc.**

machine man, wood; **wood pulp machine man; manipulates valves which control flow of water into machine in which wood pulp is washed after boiling; switches on and off power which drives machine.**

machinist, s. s. finisher, paper.

mill, s. s. glazer, plate.

mingler; teller-out; **stands at mechanically fed, power-driven gum or paste roller; applies sheets of paper, by hand, to roller; places sheets, after gumming or pasting, of travelling belt on which they pass to card maker (pasteboard paper) (519) q.v.**

mixer, haryla mixer; **(i) measures quantities of gelatine and of chemical colouring matter to be mixed with haryla, and directs and supervises work of haryla mixing machine operator (519) q.v.; (ii) very rarely, performs duties of haryla mixing machine operator (519) q.v.**

paper maker; general term denoting a skilled worker in paper making, especially machineman (512) or beaterman (512) q.v.

paper overhauler, paper overlooker, s. s. sorter, paper.

plater, s. s. glazer, plate.

potcher, potcherman, s. s. bleacher; **sometimes specifically designated, e.g., esparto grass potcherman, rag potcherman, wood pulp potcherman.**

presser (card and pasteboard), s. s. pressman.

presser, hot; **(i) places cardboard or paper sheets between iron plates in hydraulic press; operates press by means of foot lever; removes sheets when pressed; (ii) places cardboard or paper sheets between sine sheets, and passes them between revolving heated rollers; cf. hot presser (547).**

presser, wet, s. s. pressman.

pressman; presser (card and pasteboard), wet presser; **places pile of boards or paper, as received from coucher (512) q.v., in press; operates press by means of foot lever, causing web of paper to be squeezed out; removes boards or paper when pressed.**

reeler (paper mill), reelerman, reelman; ripperman, slitterman, slitting machine man, winder, winderman; **(i) with assistance of labourers, places reel of paper, as received from paper-making machine, on reeling machine; adjusts rotary cutters to divide paper into widths required and to cut off rough edges; switches on and off power which drives machine, and watches re-reeling for creasing or breakage of paper; helps in removing re-reeled paper from machine; (ii) s. s. back tenter; (iii) s. s. cutterman (paper mill).**

ripperman; **(i) s. s. reeler (paper mill); (ii) s. s. cutterman, rotary.**

roller (card and pasteboard), s. s. rollerman (card and pasteboard).

roller, cold; **(i) is in charge of calender in which bowls, s.e., cylinders, or rollers are cold and not heated; (ii) s. s. rollerman (card and pasteboard).**

roller (hand-made paper), s. s. glazer, plate.

rollerman (card and pasteboard); cold roller, glazer (card and pasteboard), reeler (card and pasteboard); attends reeling machine used for rollerman (hand-made paper), press rollerman, s. s. glazer, plate.

sheeter, s. s. sorter, paper.

sizer, engine sizer; **taps from pulps of tube into beating engine, as instructed by beaterman q.v., size, resin, and alum, at intervals during progress of beating; sometimes also acts as spare beaterman q.v.**

sizer, tub sizer; **manipulates valves to maintain quantity of size in vat through which hand-made sheets or machine-made paper web are slowly passed mechanically; in machine-made paper trade, sometimes also acts as dryerman q.v.**

slitterman, slitting machine man, s. s. reeler (paper mill).

sorter; general term covering paper sorter, waste paper sorter, rag sorter (514) q.v., etc.

sorter, paper; s. s. sorter; paper overhauler, paper overlooker, sheeter; overlooks paper sheets or cards, sorts them and throws out all those which are defective.

teller-out; (i) s. s. mingler; (ii) s. s. beaterman.

townsman, s. s. bleach engineer.

tracing paper maker, s. s. coater, tracing paper.

trimmer (asbestos); guillotine man (asbestos); cuts up and trims sheets of asbestos millboard or sheeting in a guillotine cutting machine; cf. guillotine cutter.

trimmer (card and pasteboard); (i) s. s. cutter, guillotine; (ii) s. s. cutterman, rotary.

washer, rag washer; (i) s. s. breaker; (ii) s. s. boiler.

water hauler; keeps the water course, in connection with paper mill, clear by clearing filters with rakes; controls by means of levers supply of water to lodges or dams.

waterproof (paper and millboard), waterproofer (paper maker); feeds with paper (on reel or with cardboard) in sheets a machine which, by a system of rollers, takes up waterproofing composition from a trough, or duct, and applies it to paper or cardboard, finally passing waterproofed paper to a re-reeling mechanism or delivers waterproofed cardboard at rear of machine.

winder, winderman, s. s. reeler (paper mill).

wood pulp grinder man; puts logs of wood in a paper basin of grinding machine, in which they are ground to pulp; manipulates valves which control flow of water on to grinding stone of machine to prevent friction, burning, or production of pulp of a brittle, porous quality; switches on and off power which drives machine and opens valves through which pulp is delivered to vat.

wood pulp pan man; wood boiler, wood pulp boiler, wood pulp boilerman; shovels wood chips into revolving pans in which they are boiled to pulp in prepared liquor; manipulates valves which admit liquor or discharge pulp; switches on and off power which drives machine.

wood pulp willower, s. s. breaker, wood pulp.

519—OTHER WORKERS.

baler (board making); collects cuttings from reeling machine; compresses them by means of a press, and binds them into bales ready for re-use as raw material.

haryla mixing machine operator; places haryla, as instructed by haryla mixer (518) q.v., in tank of mixing machine; admits water into tank;

after beryta mixer has added coloring matter, switches on power which drives revolving paddle in tank of machine, when ingredients are sufficiently mixed, draws off mixture in pail from tap in tank of machine, and passes through fine mesh sieve into separate storage tank.

beater's assistant, *beaterman's assistant*; *beater*, *iller* (North Country); *beeper*, wheels cranes or boxes containing rags, esparto grass, china clay, or other ingredients used in preparation of pulp to beating machine; shovels or pours ingredients into holders of beating machine as instructed by *beaterman* g.v. and assists *beaterman* generally.

bleacher (wood pulp making); places wet boards of soda wood pulp, by hand, in bleaching powder solution in vat; sees that vat is kept full of pulp.

black houseman; removes pulp from bleaching chamber, where it has been mixed with bleaching solution, and trucks it to beater house.

bleaching solution mixer, *bleach mixer*; supervises working of mixing machine, i.e., a tank containing mechanical stirrer; switches on and off power which drives machine; empties chloride of lime from sacks into tank; opens valves which admit water to tank; judges when solution is complete, adding more water if required; opens valves which permit liquor to run off to bleaching vat; boards, places sheets of lime and made paper between glazed boards to flatten them out before they are pressed.

board mill labourer (card and pasteboard); does unskilled work and assists generally in mill.

brusher, *brushing machine man*; men rest of coated paper in a brushing machine, used for giving an extra bright finish to some coated papers; switches on and off power which drives machine; cleans brushes when required, takes off finished rolls of paper from machine.

calendarman's assistant; helps *calendarman* (518) g.v. to place reel of paper in position on calendaring machine; does various cleaning and other unskilled jobs, and assists *calendarman* generally.

card maker (*paper maker*); *paper center*, *pasteboard maker*, *poster* (card and pasteboard), *sheet poster*; passes several sheets of paper together to make cardboard, by hand or by machine, fixing reels of paper in machine, filling paste reservoir, watching cutting knives, etc.

carrier-off, see *drawer*.

catcher, *sheet catcher*, see *cutter boy*, *causticiser*, *caustic liquor maker*, *caustic mixer*; *liquor mixer*, *liquor man*, *liquor mixer*, *panman*; mixes caustic soda with water to make caustic liquor in which rags, esparto grass or other raw material are boiled; cf. *soda causticiser* (148).

chemical worker, see *liquor man*, *wood pulp*.

clay mixer; shovels china clay into mixing vat, turns on water; stirs with wooden stirrer, and stirs through above, in preparation for further treatment by *beaterman* g.v.

cutter boy, *catcher*, *paper*, *boy*, *boy*, *layer*, *sheet catcher*, *theater*; (i) watches sheets as they come out of the cutting machine and lays them flat, if they are wrinkled; in some machines has to pick up sheets from a travelling felt and pile them up; (ii) takes boards off board-making machine.

cutter, *card*; cuts cardboard into various shapes and sizes with guillotine, press stamping, or rotary cutting machines.

cutter, *esparto grass*; feeds cutting machine with esparto grass, using a fork to load hopper head of machine.

cutler, *rag*; draws rags, by hand, across a knife blade at an angle to cut them into suitably sized pieces.

cutting machine hand, *cutting machine man*; assists *cuttermen* (518) g.v. in feeding roll of paper in machine, attending working of machine, etc.

damper boy, *assist*; *damper* (518) g.v. at machine.

devil, *devilman* (paper making), see *cuttermen*.

drawerman, *wood pulp drawerman*; a labourer attending draining vats, in which wood or rag pulp is drained after boiling, bleaching, washing, etc.; after liquid is drained off through perforated floor at vat, shovels out pulp, and trucks it to machines for further processes; to scrub out floors of vats.

drawer, *drawer-off*; *carrier-off*; carries out sheets away from cutting machine to warehouse or sorting room.

drier (asbestos), *carrier*, or *wheels* in trucks, sheets of asbestos mill-beds to drying room; hangs up sheets by clips in drying room; removes drier sheets as required.

dryerman, *loft* (board making), see *dryworker* (board making).

dryerman's assistant, *nipper*; assists *dryerman* (518) g.v. in putting web of paper round drying cylinders; when starting paper making machine; does other odd jobs.

dryworker (board making); *loft dryerman* (board making); hangs boards on to drying screens in drying room by hand.

duster, *cuttermen*; *devil*, *devilman*, *esparto grass shaker*, *rag shaker*, *thrasher*, *yelloweer*; shovels or rakes rags, esparto grass, or other material into hopper head of machine, which opens lugs at rags or fibres of esparto grass or other raw material with mechanical beaters and teasers, and removes dust and other foreign matter by air suction pipes; switches on and off power which drives machine; often speedily decomposed, cf. *esparto grass dusterman*, *rag duster*.

edge-runner, see *kollegrang man*.

feeder (card and pasteboard); (i) passes sheets of paper into pasting machine; (ii) see *beater's assistant*.

felter (leather board); interchanges pieces of felt with sheets of leather board in readiness for pressing.

filler-in (North Country), see *beater's assistant*.

filter man, *filter boy*; cleans flows of filter tanks, through which waste water flows from paper-making machine, with shovels, brooms and water, and does other filtering work in connection with filter tanks.

folder; folds sheets to size required by hand or machine.

front side boy; assembles reels of board at pasting machine, so that any reel which has been unwound can be immediately replaced.

glue boy; mixes glue and carries it to board pasting machine.

grainer attendant; regulates power driving a machine which impresses a surface on boards resembling the appearance of grained wood; adjusts pressure screws and guides in boards, cf. *embosser* (518).

grinder, *grinderman*, *grinding machine man*, see *kollegrang man*.

grinder, *sawdust*; shovels sawdust into hopper of grinding machine to reduce it to wood flour in making of paper; starts and stops machine as required; cf. *kollegrang man*.

hanger; (i) hangs up wet sheets of cardboard to dry; (ii) in hand paper manufacture may be a *dryworker* (518) g.v.

helper, see *beater's assistant*.

hydraulic press attendant, *man* or *hand*; *press picker*; places paper or guillotine, press stamping, or rotary cutting machines.

interlayer; *mill*; *roll girl*; places single sheets of hand-made paper and plates of polished copper or zinc alternately in a pile ready for plate glazer (518) g.v.; after rolling, rearranges sheets and plates for subsequent rolling if necessary.

lipper; *ink boy*; assists *grainer attendant* g.v. in lifting up boards to machine.

litter, see *cutter boy*.

kollegrang man, *wood pulp kollegrang man*, *edge runner*, *grinder*, *grinderman*, *grinding machine man*, *paper pulper*, *pulperman*; feeds, by hand, and attends to edge-roll of kollegrang, which consists of a pair of circular grindstones with grooved periphery, which revolve on a granite bedstone surrounded by trough containing water and thereby break up waste paper or paper pulp, produce being washed on mechanical filter.

labourer; does general yard work in paper mill, e.g., carting, carrying, trucking, shovelling, cleaning and odd jobs generally.

lay boy, *layer*, see *cutter boy*; cf. *layer* (hand-made paper) (512).

liquor maker, *liquor man*, *liquor mixer*, see *causticiser*.

liquor man, *wood pulp*; *chemical worker*; empties chemicals from sacks into tank containing water, to make solution in which wood pulp is boiled; varies strength of liquor as instructed; by chemical (506) g.v. or according to formula corresponding to kind of wood pulp to be boiled; stirs liquor with wood stirrer, or regulates power which drives mechanical stirrer.

little backwater; *machine boy*, *machine helper*; (i) clears away waste from breaker in paper-making machine; assists *backwater* (518) g.v. in taking roll out, and watches presses to give warning of breakages of paper; performs odd jobs; (ii) assists *machineman* (512) g.v. in board making.

loader; loads goods in despatch department.

lobber (card and pasteboard); piles up sheets of pasteboard, etc., after they have been through the pasting machine; cf. *poster*.

machine boy, *machine helper*, see *little backwater*.

machineman's assistant; assists *machineman* (519) g.v. in keeping machine in good running order.

machine minder, *machine tender*; general terms describing assistants on any machine in paper or board making; sometimes used as synonym for *machineman* (512) g.v.

mill, *roll girl*, see *interlayer*.

motor, see *picker*, *engine*.

zipper, see *dryerman's assistant*.

pan cleaner (wood pulp); assists *wood pulp panman* (518) g.v.

panman, see *causticiser*; *man*, *panman* (148).

paper center, see *card maker* (pasteboard).

partier, *pick*; *partier*; separates hand-made sheets, after they have been pressed, to enable *dryworker* g.v. to hang them up.

partier, *sizer*; separates sized hand-made sheets, after they have been pressed, in preparation for loft drying.

pasteboard maker, see *card maker* (pasteboard).

picker, *pick*; a *picker* scraper, g.v. via clean-up, knife, etc., auxiliary picker or strainer, at back of press bed of some paper making machines, with a steel picker.

picker, *dry*, see *picker*, *esparto grass dry*.

picker, *engine*; *note picker*, *note*; picks "notes," i.e. knots, etc., from half stuff as it is conveyed from breaker engine to beater engine.

picker, *esparto grass dry*; *dry picker*; picks out visible impurities in esparto grass while it is being conveyed to boilers on a moving belt.

picker, *note*, see *picker*, *engine*.

picker scraper, **picker rubber** *strouserman*; cleans this in strainers (pickers) free from all impurities which collect there and clog the machine.

picker, wet; removes, by hand, conspicuous foreign matter from rags after they have been boiled.

press packer, *see* hydraulic press attendant.

pulper, paper; **pulperman**, *see* koller-ganggen.

rag chopper, **rag chopperman**; feeds rags into hopper lead of rag cutting machine, and performs general labouring work in rag-house.

reel-off (tracing paper); **reels** paper by hand or machine, measuring it into suitable lengths for each reel.

roster; (slang), a porter who carries bales of raw material for board making from yard to heating department.

sand table man; cleans out grit, dirt, etc., from sand trap or baffle plates through which pulp passes to press plate machine or wet end of paper-making machine, using a shovel.

scram boy; attends to strainers on board-making machine, keeping them clear by removing waste matter, etc., by hand, using brushes, water, etc.

shaker, **esparto grass**; **rag shaker**, *see* dusterman.

sheet carrier; carries sheets of hand-made paper to and from the drying lift.

sheeter; (i) *see* interleaver; (ii) *see* cutter boy; (iii) *see* sheet (518).

tabster (card and pasteboard); passes sheets of card or pasteboard into machine which cuts them to specified size; adjusts cutters of machine, using measuring gauge; switches on and off power which drives machine.

tester, **single**; adjusts cutting knives of machine used for accurate cutting of hand-made paper in single sheets, using measuring gauge; feeds machine with paper and uses hand lever or foot treadle to operate knives and cut paper.

size mixer; puts ready prepared size (either vegetable or animal) into boiler containing heated water; stirs with wooden stirrer; draws off solution from top in boiler, and strains it through sieve into reservoir, ready for use by dipper, *g.v.*

teorter (card and pasteboard), *see* sorter, waste paper.

sorter, **esparto grass**; (i) removes dirt and impurities from esparto grass, on hand-manipulated wire screens; (ii) (in machine process) puts grass, with a lay fork, on travelling band or lattice or sorting machine.

teorter, **waste paper**; **waste sorter**; **sorter** (card and pasteboard); sorts waste paper, by hand, according to colour and quality.

sorting machine man, **esparto grass**; feeds, by means of a lay fork, a machine in which esparto grass is partially cleaned and sorted.

stacker; piles up sheets of paper or cardstock for stock or despatch purposes.

strainerman, *see* picker scraper.

stripper; separates hand-made sheets of paper from each other, by hand, in preparation for plate glazing.

thresher, *see* dusterman.

washerman; places felts used in making hand-made paper on rollers, by means of which they are mechanically drawn through water; regulates power which drives machine; removes felts and passes them to rougher (512) *g.v.*

water boy, **waterman**; adds requisite amount of water to rotary boilers in which certain raw materials, *c.g.*, rags, for paper are boiled.

twister softener; operates valves and cocks of water softening plant in paper mill, adds softening agent as instructed.

weigherman (card and pasteboard); supervises despatch of boards to landing department.

wet end boy; assists machineman (512) *g.v.* in attendance on wet end of board-making machine.

willawer, *see* dusterman.

Sub-Order 2.—Printers, Bookbinders, and Photographers.

021.—FOREMEN AND OVER-LOOKERS.

assistant overseer; *sub. overseer*; assists overseer (hand compositors) *g.v.* in control of any department which is too large to be supervised adequately by overseer in charge.

clicker; in charge of a composing section; duties vary in different establishments, but are mainly—(i) to receive copy in bulk from overseer *g.v.* and with it full instructions, (ii) to give copy out in portions to compositors (522, 523) *g.v.* working under him, with instructions; (iii) to keep account of copy given out; (iv) to superintend setting up of work; (v) (when wet is being done at presswork rates) to book each man's wages, extra, etc.; (vi) to produce a general bill, showing total cost at which work is produced.

controller hand; charge hand or foreman, over women and girls in any department of controller hand (530).

examiner, **bank note**; an examiner (printer's) *g.v.* specially skilled in examining bank notes.

examiner, **cheque**; an examiner (printer's) *g.v.* specially skilled in examining cheques.

examiner (printer's); **inspector**; examines in store-room printed sheets or forms as they come from machines to detect defects, sometimes also acts as foreman or forewoman.

foreman (wellpress, pattern room); superintends operation of various machines in pattern room of a paper factory and work of workers therein.

inspector; (i) a foreman inspecting output of printing machines; (ii) *see* examiner.

overlooker (lithographer's); (i) an overseer *g.v.* either generally, or in a section or department of works; (ii) examines sheets after printing.

overseer (bookbinder's); superintends book folding and binding department; responsible for discipline and conduct of staff and for quality and quantity of work done; receives instructions from manager or assistant manager of works; is sometimes responsible for estimate of cost of production.

overseer (hand compositors); in charge of composing room; supervises and arranges work for compositors (522, 523), *g.v.*, and gives instructions to clicker *g.v.* as to how work is to be done.

overseer (lithographer's); *as for* machine overseer (letterpress), in charge of lithographic printing department.

overseer, **machine** (letterpress); in charge of printing machine department and superintends the work of machine misters (522) *g.v.*; responsible for discipline and for quality and quantity of work produced; assists costing and estimating department in calculating prices.

sub-overseer, *see* assistant overseer.

022.—COMPOSITORS—HAND.

box hand, **fudge box hand**; a compositor *g.v.* who sets up type for "last news" or "stop press," which is put into a box and inserted in stereo cylinder.

case hand, *see* compositor.

compositor; **case hand type setter**; sets up type from which printing is to be done; picks out letters, etc., from compartments or "cases" in frame before him and arranges them in a grooved piece of wood, called a "stick"; when line is complete, transfers type to "galley," or long

tray from which first proof is pulled by pressman (529) *g.v.*; corrects type after proof has been checked by reader (548) *g.v.*

compositor (jobbing); a compositor *g.v.* engaged in general miscellaneous printing work, *c.g.*, handbills, tickets, catalogues, etc., as distinguished from those engaged in one particular branch of printing, especially newspaper printing.

compositor (music); a compositor *g.v.* who has been specially trained to set up music type.

imposer, *see* stone hand.

make-up, **make-up hand**; a compositor *g.v.* who makes up composed type into page form.

plate hand, **plate imposer**; a stone hand *g.v.* who puts electrolyte or stereotype plates into correct positions in chase for print.

plate-maker; imposes unmounted plates, *i.e.*, makes them on boards or blocks of suitable thickness to make plate type-high; backs or adjusts by affixing paper strips to get surface of plate absolutely true, and give clearer impression.

poster (hand); a combining compositor *g.v.* specially trained to set up type (often exceptionally large, and made of wood instead of metal) for printing posters.

stone hand; **imposer**; imposes type, which has been set up in page form, in correct position in chase or iron frame, for printing in sheets.

type setter, *see* compositor.

023.—COMPOSITORS—MACHINE OPERATIVES.

compositor (linotype), *see* linotype operator.

intertype operator; a linotype operator *g.v.*, operating intertype machine.

linotype man, *see* linotype operator; rarely used.

linotype operator; **compositor** (linotype), **linotype man**; depresses keys of keyboard of linotype machine (each key corresponding with letter of alphabet or typographical sign), thereby assembling matrices of type in line, from which, when complete, line of metal type is automatically cast as a single bar of metal.

monotype keyboard operator, **monotype operator**; operates monotype machine by depressing keys of keyboard, thereby punching paper roll, which is used by monotype center attendant (524) *g.v.*

stringer type machine operator; a linotype operator *g.v.* working at a stringer type machine.

typographical operator; a linotype operator *g.v.* operating typograph machine; adjusts batter strokes periodically by raising a lever.

024.—STEREOTYPES AND ELECTROTYPES.

backer-up; prepares back of copper shell received from electrotype *g.v.*, by brushing it with and (to act as flux) lays sheet of tin foil on shell; places whole in shallow pan over molten metal (lead or an alloy thereof), causing tin foil to melt and spread in an even layer over back of shell; removes tray containing tinned shell to bench, and pours molten metal over shell to gauged depth; when cool, hands to finisher (electro) *g.v.*

black leader; coats wax moulds, received from wax moulder *g.v.*, with powdered black lead by (i) brushing and polishing them with hand brush dipped in black lead; (ii) placing moulds in a machine fitted with revolving brushes and fed with black lead; finally places moulds under running water to remove superfluous black lead, and passes them to wax moulder or to electrotype *g.v.*

builder, ruler; applies wax by heated hand tool to wax mould of electroplate to produce depressions in parts of plate not to be printed.

caster, see founder (stereo).

caster, mechanical; *see* monotype caster attendant.

caster, monotype; *see* monotype caster attendant.

electrotypist; receives wax mould from black leader *q.v.*; suspends mould, on rod, in bath of sulphate of copper through which an electric current passes, causing deposit of copper to form a shell on mould; decides when deposition is complete; removes mould from bath and shell from mould and passes shell to backer-up *q.v.*

electrotypist's assistant; assists electrotypist *q.v.*

finisher (electro); *see* stereo finisher.

finisher (stereo); *see* stereo finisher.

founder (stereo); *caster, platemaker;* pours molten metal into casting box, which contains mould made from a "dog," i.e., sheet of brass paper and cartridge paper coated with paste, thus forming stereotype plate.

monotype caster assistant; *monotype caster operator's assistant;* assists monotype caster attendant *q.v.*

monotype caster attendant; *monotype caster operator;* mechanical caster; *monotype caster, monotype casting machine attendant;* operates and adjusts casting machine, which, when fed with paper roll punched by monotype keyboard operator (523) *q.v.*, produces required type.

monotype caster operator's assistant; *see* monotype caster assistant.

monotype casting machine attendant; *see* monotype caster attendant.

moulder (stereo); forms mould for making stereotype plates from a "dog," i.e., sheets of brass paper and cartridge paper coated with paste and damped with water; lays dog on surface of type or plate to be moulded, and beats with heavy brush; removes mould to form, presses and dries it in hand-manipulated hot press, and passes it to founder (stereo) *q.v.*

planer; *see* stereo finisher.

platemaker (stereo); term used in newspaper printing, *see* founder (stereo).

raiser; *see* builder.

steel facer; puts a steel face on electro of engraved plate by a secret process of electro-deposition and case-hardening.

stereo finisher; *finisher (electro), finisher (stereo), finisher, turner;* planes down backs of stereotypes or electrotypes to required thickness with planing machine.

stereotypist; general term denoting any man engaged in part of the process of stereotyping, e.g., founder, moulder or finisher *q.v.*

stereotypist's assistant; assists stereotypist *q.v.*

turner; *see* stereo finisher.

wax moulder (electro); pours molten wax from ladle on to metal plate or holder; after wax has set, firm and surface has been treated by black leader *q.v.*, lays photo-engraved plates, and/or type to be reproduced, face downwards on wax; presses whole in hydraulic press (hand or power operated); removes from press; lifts from wax, subjects which have been moulded; examines wax mould for defects, and passes it to black-leader again.

526.—PROCESS ENGRAVERS.

collytype photographer, collytype photographic operator; a photographer (process engraving) *q.v.* who obtains reversed negative of photograph, printing or drawing, from which a positive on a glass plate is made by collytype plate maker *q.v.*

collytype plate maker, collytype process operator; coats glass plate with hatched solution of gelatine, and dries it in a hot oven, thereby giving it a grained sensitive surface; prints positive on plate from prepared negative in camera.

engraver, half-tone; *see* etcher, half-tone.

engraver, photo, photographic engraver; *see* engraver, process.

engraver, process engraver, photo engraver (hand tooling); receives etched plate from etcher *q.v.*; examines plate with help of magnifying glass, and uses hand engraving tools to outline work for roller (543) *q.v.* if required, to remove whites, or high lights, from half tone plates, and defects or spots generally, to engrave borders on plates, burnish them and finish them generally for printing purposes.

engraver, process; process block engraver; photo engraver, photographic engraver, processman; general terms for anyone other than a photographer (process engraving) of a process engraver, etc. (hand tooling), employed in process engraving, including metal printer, deep etcher, and line etcher *q.v.*

engraver, wax; blackens brass plate with black lead, then coats it with white wax composition; suggests design by scratching through wax with scribbling tools, leaving plate exposed where lines are required in resulting print; may also, after engraving, blacken waxed plate and place it in electrolytic bath, thus depositing copper on surface; completes block; *cf.* electrotypist (524).

etcher; (i) in photo engraving trade, general term for any worker (monotype, *q.v.*, immerse, prepared metal, *q.v.*, brass, copper, etc., plates in acid baths to dissolve away the metal not protected by image or picture; includes colour etcher, line etcher, half-tone etcher, line etcher, process block etcher, and rough etcher *q.v.* (ii) also used in more restricted sense as equivalent of line etcher *q.v.*

etcher, colour; three colour process line etcher; a fine etcher *q.v.* engaged in three-colour process; specially skilled in "hitting" and retouching plates with an acid-resistant stopping-out ink so as to reproduce colour values of original sketch or picture.

etcher, deep; a fine etcher *q.v.* who retouches and works on plate by hand, using acid to deepen etching where runner or other similar tool would be too drastic.

etcher, fine; process fine etcher; etcher; an experienced etcher *q.v.* capable of under-taking all etching processes except line etching, *see* line etcher, "bites" i.e., immerses plate in bath of ferric chloride; steps out with acid-resistant etching ink parts to be lightly etched; deep etches to produce clean whites; sometimes also finishes plates with hand tooling, graver, etc.; also works over plates returned for further treatment.

etcher, fine, three-colour process; *see* etcher, colour.

etcher, half-tone; half-tone engraver; a fine etcher *q.v.* preparing plates to reproduce work in black and white (rather than line).

etcher, line; *etcho etcher;* an etcher *q.v.* producing plates in process of making line blocks, e.g., reproductions of black and white line drawings taken with printer's hand roller) to strengthen and protect lines against action of acid, by forming shoulders to lines; finally scrubs off accumulated ink, etc., from surface of plates with solution of warm potash; rolls plate again with hand finishing roller, and subjects it to final bath of acid to clean away protecting shoulders; passes plate to moulder (stereotypist) (543) *q.v.*

etcher, photographic; an etcher *q.v.* who treats copper plate or cylinder, prepared by photogravure, with a printer (543) *q.v.* in a bath of ferric

chloride, thereby obtaining a sunken or intaglio image of original photograph, painting, or drawing.

etcher, process block; general term covering colour etcher, line etcher, line etcher, rough etcher, etc. *q.v.*

etcher, rough; an etcher *q.v.* subjecting plates to a bath of acid to produce first or extra depth in etching, which such is required, particularly for newspaper illustrations prior to treatment by fine etcher *q.v.*; sometimes done by line etcher *q.v.*; terms nearly obsolete.

etcher, zinc; *see* etcher, line.

half-tone operator, half-tone process operator; *see* photographer (process engraving).

line operator; obtains negative of line drawing in same way as half-tone process operator, but without use of cross line screen.

offset-litho operator; a photographer *q.v.* who obtains a negative, not reversed in position, with or without using a screen; *cf.* photo-litho operator, used for posters, maps, stationery headings, paper bags, cartons, etc.

photographer (process engraving); half-tone operator, half-tone process operator (i) wet plate process; collodion over one surface of glass plate, and places it in a bath of silver nitrate for sensitizing; takes plate, in wet condition, in dark slide and camera, and exposes it; for half tone work, cross focuses and adjusts position of cross-line screen, i.e., a glass screen with network of fine lines; for line work, no screen is used; after exposure removes negative from dark slide and develops and fixes the image, if necessary, by immersing negative in bath of copper or silver solution or lead nitrate; passes negative to metal printer *q.v.* (ii) (dry plate process) or for wet plate process except that photographer does not prepare plate.

photographer process operator; general term covering half-tone process operator and three-colour process operator *q.v.*

photographer's studio operator; a photographer *q.v.* who obtains negative from photograph, drawing, or painting, and from this makes reversed positive on glass plate, by exposing to a source of light, negative and sensitized glass plate placed in contact.

photo-litho operator; a photographer *q.v.* who obtains negative, reversed in position, with or without using a screen, *cf.* offset-litho operator.

photo-operator (lithographer); photographs drawings to be lithographed; prints from negative on to collodion coated plate of aluminium or zinc in vacuum frame by means of mercury lamp, washes printed plate with cotton wool and water, to remove part of collodion film, leaving imprint of photograph; rolls with black (printer's) roller covered with ink, and washes off excess of ink; passes plate to gummer (lithographer) (549) *q.v.* for light etching.

printer, half-tone process; *see* printer, metal.

printer, metal; half-tone process printer; polishes copper or zinc plate by hand, using brass or rag, pumice powder and soft whiting; pours sensitive solution of gum and bicarbonate on one side of plate; attaches plate to hand-manipulated whirler, which whirles it to produce even coating of solution; when dry, places plate in contact with negative made by photographer (process engraving) *q.v.* in printing frame, and prints therefrom by means of arc lamps; after printing, washes plate in running water to dissolve away glue and bicarbonate; washes in solution of light; immerses plate in bath of aniline dye to bring up image or picture for examination for defects; again washes in running water; finally heats plate by holding it with pliers over a flame to burn image or picture into hard acid-resistant enamel; passes plate to etcher *q.v.*

printer, offset litho, *as for* printer, photo-litho process *q.v.* except that negative is not reversed.
printer, photo-litho process; obtains a positive print, for use in lithography, on paper or on thin grained metal, from a negative, by placing negative and paper or thin metal in contact in printing frame and exposing to sunlight or to arc lamp.
printer, three colour process; prints plates for use in colour printing by processes similar to those of metal printer *q.v.*

processman, see engraver, process.

three colour operator, three colour process operator, a photographer (process engraving) *q.v.* who makes three or four negatives, from coloured drawing or coloured still life subject, through colour-sensitive filters or panochromatic dry plates, adjusting cross-line screen at different angles in camera to avoid blurring or moiré effect; these negatives are afterwards used in production of sets of metal plates which, when superimposed by printer using different coloured inks for each plate, reproduce effect of original subject.

627.—PHOTOGRAPHERS.

artist, ferrotype, see photographer, artist.

artist, photographic; a photographer *q.v.* who aims specially at artistic results.

assistant, camera man's; is under-study and assistant to camera men *q.v.*

assistant, photographer's; photographer's shop assistant, photographic assistant, photographer's receptionist; deputises for photographer *q.v.* in shop or reception room, arranges style of portrait and adjusts pose of sitters, sometimes also takes photograph.

camera man; a technical operator who manipulates cinema camera; sets up camera on stand, adjusts shutter and diaphragm for correct exposure; fixes film in place; takes photographs by turning handle under direction of producer (832).

cinematographer; general term for any person skilled in cinematography, including camera man, film developer, and sometimes film producer (582) *q.v.*

developer, film; develops film negatives or positives in laboratory or dark room, using special film developing apparatus, fixes film on supports in tank, runs in developing solution for given time; places in fixing solution and washes in running water; hangs in drying chamber to dry; for cinema film developing, see machine minder (film developing).

developer, photographic; immerses plate or film in solution until it is sufficiently developed; rinses it in water and places in hypo (sodium thiosulphate), washes plate or film in running water, and allows it to dry, in works in subdued light that will not injure sensitive surface of plate.

drummer; drying room hand; winds cinema films from frames used in developing tank on to large revolving drums to dry; rewinds them, when dry, on to reels.

drying room hand, see drummer.

emansaler, photographic; polishes surface of finished photographs by spreading special polishing mixture on a smooth surface, *e.g.*, glass, placing print face downwards thereon, and pressing it with a small rubber squeegee.

enlarger; places original negative of photograph in an enlarging lantern; projects enlarged image, focused to required size and sharpness of outline, on to a screen; shuts off lantern screen, and exposes it to light of lantern; subsequently develops enlarged print.

equalizer (machine printing); adds fine semi-transparent mineral paper,

etc., to back of thin negatives, so that in machine bromide printing, where several negatives are printed on one sheet, density of all is uniform and exposure facilitated.

finisher, photographic; combines functions of mounter, print trimmer, retoucher, and spotter *q.v.*

fixer; hypo boy, washer; makes prints which are being fixed, *i.e.*, made permanent, under surface of solution of hypo (sodium thiosulphate) and prevents them from changing together, which would interfere with fixing process.

fixer, *hyp.* see fixer.

intensifier; increases contrast or density of a negative or of a print by immersing it in a bleaching agent, and then redeveloping image with an intensifying solution.

lantern slide maker; makes positives from original negative by re-photographing on a special lantern plate; binds up with plate of clear glass, to protect film side of plate.

liner-up, see retoucher.

machine minder (film developing); fixes film spread in developing machine, and fastens end of film to frame; film tank with developing solution; sets machine in motion to take film through solution in a given time; supervises washing and winding on drum for drying.

machine minder (film printing); operates machine which prints cinema films from negatives; fixes negative and positive films in machine, adjusts light and sets machine in motion to print from negative to positive at correct exposure.

mounter; (i) prepares adhesive and rubs it over back of print with a stiff brush; places print in position, previously marked on mount; applies roller squeegee to ensure perfect contact; (ii) sticks piece of adhesive tissue to back of print with a hot tool; sticks tissue to mount, in correct position, with same tool; then puts mount and print in hot press.

operator, photographic, see photographer.

perforator minder; is in charge of machine which perforates blank films. **photographer; photographic operator;** obtains images by chemical agency of light upon sensitive surfaces, may be directly responsible for all processes, from exposing plate in camera to producing finished print; or may only expose plate, leaving further action to assistants.

photographer, street; itinerant photographer; ferrotype artist; does photography out of doors by ferrotype process; uses a tin or iron plate as support for pictures, and prepares face of metal by immersing it in collodion sensitized with a silver salt; exposes it in camera while wet; builds up pictures with an iron developing agent, and fixes it by soaking in a solution of sodium cyanide.

photographer, title, see title maker. **photographer, travelling;** travels about the country photographing special subjects, *e.g.*, scenery for picture postcard agency, or machinery for an engineering contractor. **photographer's receptionist, see** assistant, photographer's.

printer, bromide; exposes paper, coated with a gelatine emulsion of silver bromide, under a negative to artificial light; develops, washes and fixes print, generally by hand, but sometimes by machinery; gives further toning treatment if print other than black is required.

printer, carbon; prints photographs from negatives by using sensitized gelatine tissue, which is subsequently washed to remove portions unacted upon; mounts remaining tissue which forms picture upon glass, paper, or other support.

printer, collodion, see printer, P.O.P. **printer, film printer;** takes charge of machine by which cinema films are printed from negatives.

printer, photographic; (i) in photographic industry, combines duties of

bromide printer, carbon printer, P.O.P. printer, and platinotype printer *q.v.*, etc. in small establishments; (ii) in lithographic industry, prints from photograph, on photo-lithographic paper, image which can then be transferred to lithographic stone.

printer, platinotype; exposes paper, coated with a solution of potassium chloroplatinate mixed with a solution of ferric oxalate, under a negative to daylight; develops exposed print in a solution of neutral potassium oxalate, producing a picture in pure metallic platinum black; clears print by passing it through three baths of acidified water, to remove all traces of iron; washes print, and dries it off.

printer, P.O.P.; collodion printer; prints photograph by placing specially prepared paper behind a negative in a printing frame and exposing it to light; tones print in a bath containing chloride of gold; washes it; fixes image by immersing same in a bath of hypo (sodium thiosulphate); washes it in running water, and allows it to dry. **print trimmer;** cuts off with a knife, from finished print placed on cutting board, parts which disturb balance of picture.

retoucher; *liner-up;* works up negative by hand to remove defects; lessens density by scraping film of negative with a knife, or increases it with a lead pencil; also points in titles at edge of negative. **spotter;** (i) fills in holes and other defects in negative with water colour paint or pencil to match surrounding tints; (ii) remedies defects on finished prints.

stainer, film, see tinter, film.

stereographer; trims and mounts pictures, by hand, so that each is in correct relation for use in stereoscope. tinter, film; film stainer; measures out quantity of dye required, and puts it in a tank containing water; places cinematograph films on tray, and submerges tray in dye tank, by hand; removes tray for drying process; sometimes also performs work of washer and tinter *q.v.*

title maker, title printer; title photographer; is in charge of camera with fixed lighting stand for photographing title cards, for cinema films.

tinter; paints in titles at foot of lantern slide or photographic negative with small retouching brush and opaque quick-drying paint; *cf.* retoucher.

toner; changes colour of a photograph by staining its chemical composition or by adding another metal deposit; passes print through toning solution; fixes, washes, and dries it.

washer, see fixer.

washer and tinter; washing room hand; is in charge of washing cinema films wound on frames after development; if film is to be tinted; also does work of film tinter *q.v.*

washing-room hand, see washer and tinter.

winder, frame; winds exposed cinema film on frames in dark room before development.

628.—LITHOGRAPHIC ARTISTS AND TRANSFERERS.

artist, autograph; a lithographic draughtsman *q.v.* who copies signatures or hand-writing, either on to lithographic stone, or on to paper from which designs are transferred to stone.

artist, chrome; works upon stones to be used for reproduction of designs in colour by lithographic process; applies on each of the stones used for a given design an amount of chalk corresponding to the strength of the colour at each point, and is thus responsible for reproduction of colour values in original drawing, also often applies lithographic ink with a brush, to retouch and strengthen drawing.

artist, lithographic; an artist either engaged in original work for reproduction by lithographic process, or acting as lithographic draughtsman, *q.v.* or as chromo-artist, *q.v.* (formerly design lithographic transfers for use in decoration of pottery, earthenware and china.

artist, monochrome; a lithographic artist *q.v.* who works in one colour.

cartographer, cartographer; see draughtsman, geographical; *cf.* cartographic (585).

colourer, colourist, plan, see map colourer.

colourer, print; applies colour by hand to printed outlines on lithographic stone.

designer, lithographic designer; designs borders, end-pieces, monograms, lettering, etc., for reproduction by lithographic process.

draughtsman, geographical; cartographer, cartographer; topographer; draws map, and prepares for its reproduction by engraving or by lithographic process, by indicating colours to be used, lettering, etc.; is responsible for its geographical accuracy, for correct enlargement or reduction of scale, and for accuracy of colouring.

draughtsman, lithographic; printer's draughtsman; facsimilist; copies or traces design on paper from which it is transferred to stone, or on steel facsimilist, see draughtsman, lithographic.

lithographic writer; a lithographic draughtsman *q.v.* skilled in lettering.

map colourer, map colourist; plan colourer, plan colourist; time drawing prepared by geographical draughtsman *q.v.* before printing by lithographic process; or colours by hand, maps printed in black and white.

print stenciller; colours maps or prints, or marks patterns on paper, with stencil plates and liquid colours, or by means of an aerograph, an instrument working by compressed air, which discharges colour in form of fine spray from nozzle.

stippler (lithographer's); a lithographic artist *q.v.* who obtains effects of graduated tones by stippling.

topographer, see draughtsman, geographical.

transfer engraver; engraves copper or steel plates, for printing transfers for lithographic machines.

transferer; (i) see transfer maker; (ii) combines functions of transfer maker and transfer puller *q.v.*

transfer maker; transferer; works over red chalk drawing of original, on transfer paper, with lithographic chalks, in preparation for transferring it to stone; sometimes also acts as transfer puller *q.v.*

transfer patcher; applies patches to transfers, to alter small details, *e.g.*, agent's name on an advertisement, and thus save making fresh transfer.

transfer printer; printer, with lithographic ink upon litho paper, design from engraved plate which is to be reproduced by lithographic process, as in music printing.

transfer puller (lithographer's); pulls small copper plate from lithographic stone, and, with hand press, prints transfers (or copies from original) which he then pulls off plate or stone; or applies transfer to warm stone; pulls it through press; wets transfer and peels it off.

229.—PRINTING MACHINE SETTERS AND MINDERS.

cropper hand, see machine minder, plates.

lithographer, see printer, lithographic.

machine manager, printing machine manager; lithographic machine manager; a machine minder *q.v.* in a large printing works.

machine minder, printing machine minder; printing machine setter; adjusts packing of cylinder, so that all parts of work receive correct pressure; adds "overlays" to increase pressure, and to obtain depth of tone

when work includes illustration. attends to defects in running of machine as they occur, and is responsible generally for way in which printed sheet is turned out; sometimes specifically designated according to kind of machine, *e.g.*, letterpress machine minder, cylinder machine minder, rotary machine minder, machine minder, lithographic; in machine minder, lithographic machine, either flat-bed or rotary, makes ready for printing, sees that stone is retaining design and examines prints as they are taken off.

machine minder, platen; copper hand; has charge of platen machine; makes ready for printing by so adjusting packing of platen that all parts of work receive correct pressure; often does laying on and taking off.

machine minder, process; process printer; a machine minder *q.v.* who is specially skilled in setting up process blocks in printing machine and printing from process blocks.

machine minder, tin plate; tin plate minder, tin printer, tin printer; in charge of special type of flat-bed or rotary lithographic machine, which prints from stone, aluminium, or zinc on to tin sheets; work similar to that of lithographic machine minder *q.v.*

machine minder, zincographic, see printer, zincographic.

map maker; a lithographic printer *q.v.* who prints maps.

printer, aluminium, as for printer, lithographic.

printer, aluminium rotary; a lithographic printer *q.v.* who prints from aluminium plates, on machine similar in principle to rotary printing machine.

printer, anastatic; prints from anastatic characters etched in relief on zinc plates, by hand press or machine.

printer, art; fine art printer; terms loosely applied to a machine minder *q.v.* skilled in any printing such as process block printing or photo-graphy.

printer, bank note; a machine minder *q.v.* printing bank notes usually from a steel plate.

printer, cheque; a plate printer, machine minder, or lithographic printer *q.v.* engaged in printing cheques.

printer, chromo-lithographic; colour printer, printer in colours; lithographic machine minder *q.v.* specializing in colour printing; ensures that each colour, as printed, is in exact register to remainder of print.

printer, colliotype; colliotype machine printer; a printing machine minder *q.v.* who produces illustrations from colliotype plates in a colliotype printing press.

printer, colour; printer in colours, see printer, chromo-lithographic.

printer, cycle transfer; a lithographic machine minder or printer *q.v.* who works on specially prepared transfer paper, of paper coated and made transparent so that design can be again transferred to enamelled surface of cycle head.

printer, enamel goods; a lithographic printer *q.v.* who inks litho stone with hand roller, lays on sheet of celluloid, rubs celluloid into contact with stone by means of wooden tool, places inked celluloid sheet in correct position on enamel ware and transfers ink to ware by rubbing; enamel ware is then ready to be fired; cleans celluloid sheets and litho stone.

printer, envelope; a platen machine minder *q.v.* who feeds automatic printing machine which prints lettering or heading on envelope.

printer, heraldic; a machine minder *q.v.* setting up and supervising the running of one or more machines distemping heraldic devices.

printer, ink; uses sample inks in ink factory in printing press to test quality of ink manufactured.

printer, intaglio; photogravure machine printer; places metal intaglio cylinder in position in machine, sets roll of paper and adjusts machine for even printing; fills and empties colour troughs, controls machine by means of levers; stops and adjusts machine, if necessary, during printing.

printer, letterpress; a printing machine minder *q.v.* who does ordinary printing as distinguished from illustration work such as lithography or process block printing.

printer, lithographic; lithographer; general term for workers who print from stone, aluminium, or zinc prepared by lithographic process, including transferers (528), printers (548), and machine minder *q.v.*

printer, music; a letterpress, lithographic or zincographic machine minder *q.v.* printing music.

printer, numerical; a machine minder *q.v.* operating machine either of the platen or cylinder type, who has knowledge of chess which operates automatic numbering mechanism.

printer, oil colour; a lithographic machine minder or printer *q.v.* who prints in oil colours.

printer, oleographic; a chromo-lithographic printer *q.v.* who prints oleographs.

printer, paper bag; a platen machine minder *q.v.* printing paper bags.

printer, photogravure hand-plate; produces illustrations from a flat etched copper, *i.e.*, photogravure plate, by rubbing ink into it, cleaning surface, and printing from it on to damp paper brought into contact with plate under hand-operated rollers.

printer, photogravure machine, see printer, intaglio.

printer, plate; prints from copper or steel plates, on which design or lettering is sunk below surface of plate, instead of being raised as in letterpress work; covers plate with ink which is rubbed into design; wipes off excess of ink, and passes plate protected by blankets, through hand press; sometimes specifically designated, *e.g.*, copper plate printer, steel plate printer.

printer, playing cards; a machine minder *q.v.* specially skilled in printing playing cards, which are usually produced by letterpress printing; has to exercise care in obtaining an even distribution of ink.

printer, post card; a machine minder *q.v.* printing post cards in large sheets by letterpress or lithographic methods.

printer, process, see machine minder, process.

printer, ticket; sets up and supervises working of ticket printing and numbering machines by semi-skilled assistants.

printer, tin; tin box printer, tin plate printer, see machine minder, tin plate.

printer, zincographic; zinc printer; zincographic machine minder; a lithographic printer *q.v.* using zinc plates instead of stones; aluminium printer *q.v.* may sometimes be called a zinc printer.

printing machine setter, see machine minder.

reeler, reel ticket maker; prints reels of revenue tickets for entertainment taxation or reels of any other kind of ticket on special machines.

three colour worker; makes colour impressions by superimposing three primary colours (blue, yellow, and red) on sheets in machines; operates letterpress printing machine, and prints from three-colour (or four-colour) process blocks; work sometimes done by lithographic process; *cf.* chromo-lithographic printer.

tin plaster, *see* machine mender, template.
 transferer, transfer printer (template); prints transfers from engraved plate on to paper stock, on a flat-bed machine (see plate machine mender, 529); applies paper to sized surface of template, by means of roller, and leaves to dry; washes paper off when dry, leaving transfer attached to surface of tin box, etc., which is to be decorated.
 wharfedale machinist; a machine mender *q.v.* in charge of wharfedale machine.

530.—MACHINE ASSISTANTS.

brake hand, brakeman, *see* controller hand.
 controller hand; brake hand, brakeman, printer's *striker*, *striker* hand; is first hand on a rotary newspaper printing machine, after machine mender *q.v.*; strikes a lever or operates switches to start or stop machine; adjusts brake on paper reel to keep constant the speed of paper as it revolves, *see* version hand; in mender's absence, is fully capable of running machine.
 cropper boy, cropper lad; (i) *see* feeder plate; (ii) an assistant to plate machine mender (529) *q.v.*
 feeder, machine feeder; *layer-on*, machine *layer-on*, *striker*; places paper in position by gauges, sheets of paper to be automatically drawn into printing machine; sometimes specially designated according to machine, *e.g.*, lithographic machine feeder; *plate feeder*, lithographic machine; *tin printing machine feeder*; puts blank tin sheets in tin printing machine and takes them out after impression has been made.
 feeder, machine ruler; machine ruler *layer-on*, machine ruler's assistant, *ruletin* (ruling), ruler's feeder, ruling machine feeder; passes sheets to be ruled into machine ruler; watches to see ink reservoirs remain filled and that ruling is properly done; assists generally machine ruler (533) *q.v.*
 feeder, platen; *cropper boy*, *cropper* lad, platen *layer-on*, printer's *machinist*; a feeder *q.v.* who lays unprinted sheets on platen of printing machine, with one hand, and takes out printed sheet with the other.
 feeder, ruling machine; ruler's feeder, *see* feeder, machine ruler.
 feeder, tin printing machine; *see* feeder, lithographic machine.
 flyer, machine flyer, *see* taker-off.

fly hand (newspapers); takes off folded papers in quantities at delivery end of newspaper printing machine; helps brake hand *q.v.* to join paper in cases of breakages.
 layer-on, machine layer-on, *see* feeder.
 layer-on, machine ruler, *see* feeder, machine ruler.
 layer-on, platen, *see* feeder, platen.
 machine assistant, machine attendant, machine hand, machine operator; printer's assistant, operative printer's assistant, printer's *machinist*, printer's operative, printer's operator; *chief* machine, *chief* rollers, often acts as feeder, taker-off *q.v.*, etc.; sometimes specifically designated according to machine, *e.g.*, lithographic machine assistant.
 machine boy, machine lad, as for machine assistant.
 machine ruling assistant, *see* feeder, machine ruler.
 machinist, printer's; (i) *see* feeder, platen; (ii) *see* machine assistant.
 paper wetter; soaks up paper when it breaks in machine continuously fed with paper roll; work frequently done by brake hand *q.v.*
 plate hand; a machine assistant *q.v.* mending a small machine in which a plate, printing multiple reproductions of a single design or lay-out, is used, *e.g.*, for labels.

pointer; a feeder *q.v.* who attends to "press points" or "register points" in printing machine; when sheet of paper is fed into gauges for first-side printing, these points pierce it; and, when second side is printed, pointer lays sheet so that holes fall exactly on corresponding points, thus obtaining "register" of pointer (569).
 printer's assistant, operative printer's assistant, printer's operative, printer's operator, *see* machine assistants.
 printer's *striker*, *see* controller hand.
 puttin-in (ruling), *see* feeder, machine ruler.
 reel hand; *spindler*; a machine assistant *q.v.* who fits reels of paper into a rotary printing machine, in some cases puts spindles through reels; affixes brake by hand; adjusts distance of reel from brake with standard wooden stick and by tightening nuts on spindle; operates by lever electric hoist which raises reel into position for printing machine; work sometimes done by controller hand *q.v.*
 roller; applies ink rollers to forme, by hand, for pressman (548) *q.v.*; work usually done by apprentices.

spindler (printing works), *see* reel hand.
 striker hand, *see* controller hand.
 stroker-in, *see* feeder.
 taker-off, machine taker-off; *flyer*, machine *flyer*; takes sheets from printing machine (either platen or cylinder) where not automatically delivered by machine; sometimes specifically designated by name of machine, *e.g.*, lithographic machine taker-off.
 tension hand; controls tension of paper as it unwinds from reels on rotary printing machines; stops machine when it breaks and takes paper end by hand through rollers before machine is restarted.
 wetter; dampens before printing, either by use of fine spray or by pressing in power press with interleaved absorbent paper which has been previously wetted.

531.—PRINTERS (so-called).

printer; *typographer*; general term for any person, usually skilled, engaged in printing industry, including machine minders (529), lithographers (529), etc.; the senior machine minder in a printing works is often so-called, *typographer*, *see* printer.

532.—BOOKBINDERS.

album maker; cuts out cardboard, leaves and covers, by hand, with sharp knife; makes them up into albums for stamps, photographs, etc., and passes to sewer (hand or machine) *q.v.*
 all-round hand; general hand; is skilled in all branches of bookbinding; *see* finish binder, stationer's binder, forwarder, case maker, blocker (537), etc.; usually employed in small bindery establishments.
 back hanger; fixes piece of mull or cotton to back of book, by hand, and also strip of paper, to strengthen binding, after book is rounded and blocked.
 binder, *see* bookbinder.
 binder, account book, *see* binder, stationer's.
 binder (cheque book), *see* wrapper.
 binder (cloth); binds books in cloth; may be either publisher's binder or stationer's binder *q.v.*
 binder, flush; glues up books and affixes boards; presses book, puts on cloth or leather back and pastes down end papers; cuts book flush with edge of cover at top, bottom and fore-edge, by hand or power-operated guillotine.
 binder, leather; a bookbinder *q.v.*

binding books in leather, by hand, may be either publisher's binder, stationer's binder, or miscellaneous letterpress binder *q.v.*
 binder, publisher's; letterpress binder; combines work of forwarder, case maker, blocker (537) *q.v.*; puts book into case either by hand or by machine; presses book.
 binder, stationer's; account book binder, vellum binder; as for forwarder, except that (i) work is done by hand, (ii) operation of blocking is usually omitted, (iii) covers are not made apart from book; fixes split boards to tapes; covers them with leather, buckram or cloth and impression design or lettering on cover with hand tools.
 binder, vellum, *see* binder, stationer's.
 bookbinder; binder; general term for any skilled worker engaged in book-binding; includes forwarder, case maker, and all classes of binders *q.v.*
 book cover paper; brass brass caps on edge of cover to clasp and keep book tightly closed.
 book cover maker, *see* case maker.
 case maker (hand process); book cover maker; receives cloth, straw-boards and blank papers for covers ready cut; glues cloth; places straw-boards in position on cloth with help of gauge; sticks "back paper" between the two boards to stiffen back of case; cuts off corners of cloth with shears, and turns edges inward; rubs cloth side with folder, to prevent blisters, and bangs up case to dry before passing it to blocker (537) *q.v.*
 case-making machine operator; feeds cloth to guides, which direct it into case-making machine, which glues cloth, places boards and stiff back paper in position and completes case.
 coverer; puts cover on book and places it in press; in letterpress binding, pastes together cover and book which have been completed separately; in account and miscellaneous book binding, covers covers cloth into machine, and pastes book to leather, cloth, etc., and passes book to finisher *q.v.* for lettering.
 Crawley operator; puts books in position in a power-driven machine, known as Crawley machine, which automatically performs operations of rounding and backing.
 cutter, cloth; *cuttin-out*, material cutter; cuts up rolls of cloth in a cutting machine; adjusts gauge to width required; moves lever to start machine; passes cloth into machine, and removes it when cut.
 cutter, machine; trimmer; operates, with a treadle, guillotine cutter which holds book firmly while knives come down and trim off three paper edges of book, *i.e.*, head, fore-edge, and tail.
 cutter, material, *see* cutter, cloth.
 cutter-out, machine; cuts edges or sections of paper to shape and size for book, by hand or press operated cutting machine.
 examiner; inspects book after binding is complete to rectify faults.
 finisher; finishes covers of books with heated hand tools and/or in a hand-manipulated hot press; glues boards, and initials designs or lettering in colour, and completes binding generally after covering.
 folio maker; a bookbinder *q.v.* who specialises in making folio books *i.e.*, large books in which the printed sheet is folded only once and thus makes only two sheets on four pages.
 forwarder (cloth, leather); blocker, refeller; does actual binding of book after it has been sewn; pipes or presses book in slipping machine to make it solid; trims edges on guillotine machine; glues up and attaches first lining of mull by hand; rounds and backs book on machine, or by hand, and attaches second lining of paper by hand; affixes boards and covers book wholly or partly in leather, cloth, etc.

general hand, see all-round hand

head bander; affixes ready-made band, by hand, with adhesive, to head and tail of book to give a better finish; in *high-class work*, also makes band, by hand, by weaving coloured silks, joint makers, before binding, sticks strips of cloth to end papers of book by hand, with adhesive, to strengthen it and to serve as a hinge.

leather case maker, **leather case book maker**; a case maker *q.v.* making covers, or book covers, of leather, generally by hand.

leather embosser; embosses designs on leather cover of book, either by hand-manipulated hot press or by hand tool.

liner, **straw board liner**; *winder*; glues or pastes sheets of paper to straw boards by machine or hand.

mounter, see *liner*.

mounter, **book**; fixes, by hand, brass or other metal edging on corners and edges of book covers to save wear and tear; *cf.* book clasper.

portfolio maker; a case maker *q.v.* specialising in making, by hand, of portfolios.

roller, see *forwarder*.

rounder; taps back of glued up book with hammer to make it round; sometimes done by *forwarder q.v.*

sewer (hand or machine), **sewer** (stationery book), **sewer** (vellum); joins together sections of book by machine or hand sewing; in best class of work, stitches by hand, on to tapes or cords, which are afterwards fixed to cover of book.

stitcher; sews together sheets of pamphlets either by hand or machine; in the latter case, usually makes "three book" stitch in fold of pamphlet or $\frac{1}{2}$ -inch from back.

trimmar, see *cutter*, *machine*.

vellum binder; cuts backs of ledgers out of straw-board or cloth-board and fixes them on book; work sometimes done by vellum binder or stationer's binder *q.v.*

wrappper; **binder** (*cheque book*); glues back of unbound book, the sheets of which are fastened together either by wire or thread, and fastens round it paper cover called a *wrapper*; may perform the work either by hand or by machine.

533.—MACHINE RULERS.

paper ruler (*hand*); rules up, by hand, copies of ruled paper for account books, ledger forms, etc., to show how paper will appear when ruled by machine ruler; work usually done by machine paper ruler *q.v.*, but ruling of proof requires special care.

paper ruler (*machine*); machine ruler, ruling machine ruler; superintends machine ruler, which rules lines for account books, ledger forms, etc.; sets up pens in required position in machines equipped with pens (some machines have dies instead of pens), and regulates supply of ink.

ruler, **account book ruler**, **paper ruler**, **printer's ruler**; general terms covering hand and machine paper rulers.

ruler, **machine**, see *paper ruler* (*machine*).

rolling machine minder, see *paper ruler* (*machine*).

534.—PATTERN CARD MAKERS.

pattern book maker; arranges fabric patterns according to shade for insertion in pattern book or bundle of patterns, and binds them together.

pattern card maker (*stationery*); cuts out pattern cards from sheets of cardboard by rotary cutting machine.

pattern room worker (*wallpaper*); collects and collates patterns of wall-papers; re-cuts them to take out card, and binds them into books.

535.—WALL PAPER PRINTERS.—BLOCK.

block printer; lays colour on stereo, i.e., a felt covered frame, with a brush, and presses wooden pattern block on it; raises block, by hand, or in large pattern work, by means of elastic to which block is suspended, and wrings it round; carefully presses block on paper to correspond exactly, or register, with pattern.

decorator (*paper staining*); elaborates design on high class printed wallpaper by printing, with hand stencils in gold, silver, and special colours.

stenciller, **stencil worker**; supplies designs on wallpaper with a brush, using stencil plates and distemper colour.

536.—WALL PAPER PRINTERS.—MACHINE.

colourer, see *grinder*.

enameller; coats surface of paper with enamel by means of a grinding machine; *cf.* *baryta coater* (*516*).

grainer (*paper staining*); a machine printer *q.v.* operating machine fitted with rollers on which pattern resembling grain of wood is engraved.

grinder; **colourer**, **padding** **machinist**; as for machine printer (*paper staining*); attends machine which produces ground or plain paper, i.e., a plain that serving as foundation for pattern of wallpaper.

machine printer (*paper staining*), **machinist** (*wall paper*); **printer** (*wall paper*); fits rolls of plain paper into wallpaper printing machine; fills boxes with colour from a can; switches on power which drives machine and sees that machine is printing properly.

padding machinist, see *grinder*, **printer** (*wallpaper*), see *machine printer* (*paper staining*).

537.—GOLD AND SILVER BLOCKERS AND STAMPERS.

blocker (*lead pencil making*), see *glider* (*lead pencil making*).

blocker, **blind**; stamps in design on book cover or other article, with metal stamp, in hand or power driven press, without ink or colour.

blocker, **colour**; **ink blocker**; stamps in design on book cover or other article, with metal stamp, in hand or power-driven press, after applying coloured ink to stamp.

blocker, **foil**, as for *blocker*, *gold*, but uses foil instead of gold leaf.

blocker, **gold**; **gold printer**, **gold blocker**; prepares material, *q.v.* leather, cloth, vellum, plush, or paper, for book covers, hat leathers, hat labels, etc., with size, blocking powder or glair; after gold leaf is applied by layer-on of gold *q.v.*, stamps in design with hot metal stamp (*hand or steam driven press*), brushes off surplus gold, not impressed by stamp, into gold bin; sometimes presses a blind impression, i.e., without gold, on material before stamping is done.

blocker, **ink**, see *blocker*, *colour*.

blocker, **silver**; **silver printer**, **silver stamper**; as for *gold blocker q.v.*, but uses silver instead of gold leaf.

blocking feeder; feeds cards or other material into press together with leaf or foil; controls press by means of foot lever.

brusher, **gold** (*printer's*); brushes off surplus gold, not impressed by stamp, into gold bin; *cf.* *duster* (*538*).

brusher, **gold**, **printer's**; a gold blocker *q.v.* who stamps trade mark, name, etc., on leather lining or label which is put inside hat.

finisher, **gold**; stamps design on cover of book with hand tools; applies gold leaf to design and stamps in gold leaf; does same work as gold blocker *q.v.*, but by hand tools instead of by machine.

glider (*lead pencil making*); **blocker**, **stamper** (*lead pencil making*); presses heated steel stamp on pencil and applies gold leaf or aluminium powder, which adheres to impression.

gold and silver printer; contains work of gold blocker and silver blocker *q.v.*; may also do work of bronze letter printer (*538*) *q.v.*

gold printer, see *blocker*, *gold*.

hat printer, see *embosser* (*hats*).

hat tip gold printer; a hat tip printer *q.v.* printing gold on hats.

hat tip printer; **tip printer**; a gold blocker *q.v.* or a bronze letter printer (*538*) *q.v.* who prints "tips" (circular pieces of lining, made of silk, and placed inside crown of hat) with trade mark, name of maker or of retailer, etc. in black or in gold or by lithographic process.

label printer (*hat labels*); an embosser *q.v.* engaged in printing labels to be affixed inside hats.

layer-on, **gold** (*printer's*); lays on gold leaf or applies gold dust, by hand, to paper pointed with size.

layer-on of **gold** (*bookbinder's*); cuts up very thin sheets of gold leaf and lays them, by means of slightly greasy pad of hair or camel's wool, on that part of calendar or cloth cover of book on which design is to be embossed; usually done by finisher or by gold blocker *q.v.*

metal leaf ticket printer; prints tickets or labels with gold or silver leaf by means of heated press; fixes leaf on sunk letters on these tickets or blocks.

silver printer, see *blocker*, *silver*.

stamper (*lead pencils*), see *glider* (*lead pencils*).

stamped, **gold**, see *blocker*, *gold*.

stamper, **silver**, see *blocker*, *silver*.

stamper, **printer's**; general term which covers blind, colour, foil, gold, ink and silver blockers.

tip printer, see *hat tip printer*.

538.—BRONZERS.

bronze letter printer; a bronzer *q.v.* who operates plates printing machine applying size instead of ink, passes steel type printed to bronzing machine minder *q.v.*

bronzer, **printer's bronzer**; **printer's glider**; general terms for anyone engaged in bronze printing; usually applied to bronzer letter printer, bronzing machine minder, duster, or metaliser *q.v.*

bronzer, **card**; **card edge glider**, **card glider**; paints card or card edges, with size and puts on bronze dust either by hand or by machine, burnishing by machine when required.

bronzer, **lithographer**; applies bronze, by hand, with pad, to paper mounted in glue or size by lithographic process.

duster, **duster-off**; (i) removes, by hand, with brush or pad, metal powder, flock, etc., from parts which have not been sized; (ii) holds prints under nozzle of suction pump, which sucks off surplus metal powder.

edger, **glit**, see *glider* (*bookbinder's*).

finisher, **card**, see *glider*, *card*.

glider (*paper staining*); (i) a block printer (*537*) *q.v.* who prints with liquid gold; (ii) prints wall paper with size and passes it through bronzing machine, by which metallo powder is applied and the surplus powder drawn off by suction; *cf.* *bronzing machine minder*.

glider, **book-edge glider**, **edge glider** (*bookbinder's*); old edger; places book after trimming in press, and scrapes edges until perfectly smooth; brushes edges over with size, lays on gold leaf and allows it to dry; finally burnishes gold leaf by hand with a tool; in some cases, applies colour to edges before gliding, thus producing "red under gold" edges.

glider, **card**, **card edge glider**; **card finisher**, **printer's glider**; (i) (card edge gliding) places cards in press after they are trimmed and scrapes edges until perfectly smooth; brushes them over with size, lays on gold leaf and allows it to dry; burnishes gold leaf by hand with agate or bloodstone burnishing tool; (ii) see *bronzer*, *card*.

gilder, mount; a card edge gilder *q.v.* who gilds edges of mounts.
 gilder, passe-partout; applies size and bronze dust by means of machine to passe-partout binding.
 gilder, printer's; (i) see gilder, card; (ii) see bronzer.

machine feeder, bronzing (lithographer's or printer's); takes sheets after they have had parts of their surface printed or coated with size and places them in bronzing machine.
 machine minder, bronzing; is in charge of bronzing machine, sets and adjusts it for correct working, replenishes bronze dust box; cleans and sets working parts; takes sheets of paper off machine after bronzing, and examines them.

metallizer; lays sheets of Dutch metal (bronze) or gold leaf on work previously painted with size.

540.—OTHER SKILLED WORKERS.

aerographer, aerograph worker, aerograph artist; sprays paint through aerograph pencil by compressed air to produce colour designs on Christmas cards, wallpapers, or any painted surface, with or without use of stencils.
 almanac maker; makes calendar by affixing, in correct order, printed sheets (each giving a day or a month) to card foundation, using gum, wire stitching machine, etc.

are light printer; (i) see blue printer; (ii) see phototype printer.

beveler; cuts stereotypy, electrotypes, or process plates to required size on guillotine machine and finishes with bevelled edges on a power beveling machine or by means of hand plane.
 block maker, see mounter (stereotyping).

blue printer; are light printer; produces copies (white lines on blue ground) of engineer's drawings or architect's plans, by exposing tracing of drawing over sensitized paper (ferro-prussiate, etc.) in a printing frame to sunlight or are light, developing and washing print in large flat dishes or sinks, and drying; may also work by phototype process, producing copies with black lines on white ground, see phototype printer.

board chopper (bookbinder's); cuts strawboard or millboard with board-cutting machine or guillotine by placing board against gauges, and pulling lever or otherwise operating machine.

brusher (paper staining), see glaser.

Christmas card maker, birthday card maker; attaches suitable printed slip to ornamental cover and ties together with ribbon, etc.

cleaner, lithographic plate or stone; removes old designs from lithographic plates or stones, by grinding or by use of chemicals; usual name is lithographic plate or stone grinder *q.v.*
 colourer, photographic; paints over photographs in water colours or oils; sometimes previously prepares surface with a flat wash of some special medium.

copyholder; manuscript reader's assistant, reader's boy, reading boy; reads aloud from original manuscript or copy, while reader *q.v.* or corrector of the press *q.v.* checks printed proof.

corrector, *see* picker.

corrector of the press, press corrector; press reader, press reviewer; a reader *q.v.*, proof reading for newspapers.

counter, paper counter; teller; counts and piles sheets in numbered groups before cutting or despatch.

cutter, guillotine; machine cutter, paper cutter, printer's cutter; adjusts paper on bed of cutting machine, bringing it into exact position under knife; clamps pile of paper with heavy iron clamps, and moves lever which releases heavy knife.

cutter, index; places required number of book leaves, folio sheets, etc. on machine; adjusts cutter of machine; presses a foot lever which brings down cutter, and cuts sheets or leaves to shape and size required; passes cut material to numberer (549) *q.v.*

cutter, label; a guillotine cutter *q.v.* or a shear cutter *q.v.* who trims edges of labels.
 cutter, machine; paper cutter, see cutter, guillotine.

cutter, playing card; cuts up printed sheets into playing cards by means of rotary cutting machine.

cutter, printer's, see cutter, guillotine.

cutter, shear; cuts edges of showcards, strawboards, etc., with hand lever shears.

cuttermen (wall paper); cuts, by paper into lengths of 12 yards, each piece being 22 inches wide.
 designer (paper staining), paper hangings designer; designs, draws and colours patterns for wall paper.

designer, printer's; arranges "lay out" for advertisements, etc.; is often a specially skilled compositor (522) *q.v.*

engineer's photo printer, see phototype printer.

flicker (paper staining); presses block covered with size on paper as in block printing, *cf.* block printer (535); passes paper, so printed, through drum or trough of linen filled with wool or silk floss, and beats underneath drum to make floss adhere to paper.
 folder, book folder (bookbinder's); receives printed sheets in position in which they leave printer's hands and folds them by means of a small wooden or bone spatula, so that pages run in numerical order and are in register; folding for ordinary book-binding is usually done by machine, *cf.* folding machine feeder (549).

glaser (paper staining); brusher; (i) fixes coat of paper on rollers of brushing machine, used to produce satin finish on paper, treating surface with French chalk; see that boxes attached to machine are filled with chalk; regulates power-drive of machine by means of levers or switches, and sees that it is working properly; (ii) hand process, for small quantities, applies French chalk to paper, and rubs it with brushes or with a cloth, by hand.

grinder, lithographic plate or stone; "grains" or slightly roughens surface of lithographic plate or stone for production of half-tone work; uses a sand or machine driven wheel and sand; or works all over surface of stone with a mechanically-driven revolving disc attached to flexible rod and manually hanging from ceiling.

grinder, lithographic plate or stone; (i) grinds stone level with revolving wheel of glass, or removes old work by grinding or planing away a certain thickness depending upon length of time work has been kept on stone; (ii) grinds zinc plates, usually by placing them with a number of pebbles or marbles in a tray, which is shaken from side to side by machinery; usually acts also as lithographic plate or stone cleaner *q.v.*

guillotine hand (wallpaper); cuts paper mainly for pattern books, using ordinary paper guillotine.

impression taker (roller engraving); takes off trial impressions on cloth of finished engraved rollers on an impressing (or small printing) machine with coloured pastes, gets colour paste into doctor or waste box of machine, allows paste to run on to roller and removes superfluous paste by running roller to revolve against doctor knife; places cloth by hand on bed plate and by means of lever, controls counter, does not touch under revolving roller, removes cloth for examination when impression has been made.

leveler; levels copper plate by hammering on lithographic press.
 map examiner, model; examines model map globes representing the earth, to ensure that the map sections are correctly pasted on.

map maker, dissected (lithographer's); a map mounter *q.v.*, who cuts maps into sections, mounts sections on linen or other fabric, or on strong paper, to facilitate folding, and makes them up into book form.

map maker, model; attaches printed sections of map to globe to form demonstration model of the earth, etc.
 marbler (bookbinder's), book-edge marbler; works at a trough filled with size; mixes colours and throws them into trough, where they remain on surface of size; draws comb-like instrument over the colours to make design required; dips edge of book into mixture; washes off surplus size from edges and allows book to dry.

marbler (paper staining), paper marbler; paints paper by hand to imitate surface of marble.

mounter, chart, see mounter, map.

mounter, dry; lot mounter; mounts maps, showing cards, etc., on mounts by placing very thin sheets of gelatine between map, etc., and mount, and then applying heat by rubbing with a heated iron or by placing in a heated press.

mounter, hot; (i) attaches letterpress forms to iron slab (which takes place of "chase") with adhesive paste, in preparation of galley sheets, in printing machine; (ii) see mounter, dry.

mounter, map; chart mounter; glues or pastes printed map on to linen or cardboard.

mounter, plan, *see* for mounter, map.
 mounter (printer's); (i) see mounter (stereotyping, electrotyping and process engraving); (ii) see mounter, print.

mounter, print (lithographer's); mounter (printer's); fixes printed sheets on stiff card with adhesive liquid or in a press by application of heat, see mounter, dry.

mounter (stereotyping, electrotyping and process engraving); block maker, mounter (printer's); affixes blocks, electro or process plates to slabs of wood or metal with nuts or spurs, catches, taking care to make plate and mount together standard type high; sometimes also cuts metal to required size with circular saw; roasts out portions of plate to be left white in finished block, with ruling machine, *i.e.* revolving cutter on a power-driven spindle, and bevels edges of plate with rotary beveler; sometimes specifically designated, *e.g.*, process mounter, half-tone process mounter.

mounter, three colour process, a mounter (stereotyping, electrotyping and process engraving) *q.v.*, who mounts plates, prepared by three-colour process.

news hand; general term for any printer's craftsman engaged upon newspaper work, including compositor (520), printing machine minder (529), machine assistant (539) *q.v.*; term is used mainly to differentiate workers engaged on newspaper work from those on ordinary letterpress printing, where both kinds of printing are carried on.

nittler (stereotyping); reduces thickness of metal plates by means of nittling or planing machine.

panel maker (paper staining); places sheets of paper pulp in large hydraulic press in manufacture of very thick metal coverings in solid relief, *e.g.*, hieroglyphs, anaglyphic and similar decorations; removes them after being pressed, and generally looks after press, drawing, etc.

paper stainer; general term for workers engaged in colouring paper by hand or machine.

picker, see shiner-up.

photography carbon printer; *aqueous* a carbon print from a reversed positive on to a copper plate or cylinder, and immerses it in hot water, thereby dissolving away gelatine unaffected by light; cf. carbon printer (327).
 photo-type printer; *see* light printer, engineer's photo printer; reproduces, by photo-type process on zincotype printing paper, tracings of engineer's drawings or architectural plans; places tracing over sensitized paper in printing frame and exposes to act light; removes paper, develops and washes in porcelain dishes or sinks, and finally dries it in drying chamber or in heated press.

pickar; corrector, inserts corrections in type on metal stereotype plates, and repairs broken letters, with pointed tool.

pocket book maker; fixes diary or writing paper sheets in cases or covers and finishes paper binding.
 polisher, lithographic plate or stone; smooths lithographic stone after it has been ground, by moistening it and rubbing another stone upon it.
 polisher, tin plate (lithographer's); polishes sheets of tin, after printing, with pumice powder, by hand, or machine.

post card colourist; paints post-cards by hand, or colours drawings or photographs.

post card glasser; feeds cards into machine which applies coating of varnish or gelatine; or may apply glass by hand brush or squeegee.

post card maker; cuts up printed cardboard sheets into postcards by means of rotary cutting machine.

poster writer, or for show card writer; or may be a lithographic printer (536).

preparer, lithographic plate or stone; general term covering lithographic plate or stone grinder, polisher, grainer or cleaner g.c.

pressman (lithography); *proof*, *prover*; pulls or prints in from stone from lithographic stones or plates preliminary proofs as work advances; cf. transfer printer (538) and printer's pressman.

pressman, printer's pressman; proof puller, proof prover; inks by hand with roller, a forme, stone, sheet, electro, or process block, and, by means of hand press, obtains proof from block, forme, stone, etc.

process artist; (i) prepares photographs, drawings, etc., for photo process reproductions; increases contrast in light and shadow for half-tone work by touching up with white and black paint; amends backgrounds by patching photographs, etc.; makes line drawings for newspaper reproduction by taking over outlines of photograph, the background of which is subsequently bleached out; designs surrounds for illustrations; (ii) puts light and shadow drawings of machines, and otherwise retouches them, with brush or aerograph pencil, to make them suitable for reproduction.

proof (lithographer's), *see* pressman (lithography).

proof passer (lithographer's); examines lithographic proofs before printing.

proof puller, proof prover, *see* pressman, printer's.

prover (lithographer's), *see* pressman (lithography).

tracer (lithographer's); takes work from lithographic machine to racks for drying.

reader, printer's reader, proof reader; printer's reader, proof reader; reads proof pulled from type and corrects all errors in composition, grammar, punctuation, etc.; is usually assisted by copyholder g.c.

reader, manuscript, *see* copyholder.

reader, press, *see* corrector of the press.

reader's assistant, reader's boy, reading boy (printer's), *see* copyholder.

reviser, machine; a reader g.c. who finally revises printed sheets before machine is set in motion.

reviser, press, *see* corrector of the press.

reviser, printer's, *see* reader.

roller, proof, *see* reader.
 roller, hot (printer's); manipulates hot rolling machine, which, by means of hot rollers, dries, presses, and colours sheets received direct from printing machine.

roller-up (lithographer's); inks stone by passing a roller, covered with lithographic ink, over it.

router; routs or gouges out portions of stereos, electro, or process plates by revolving cutter on a power-driven spindle; cf. moulder.

skinner-up (lithographer's); *patcher*, *arranger*; colour transfers before transferring them to stone.

show card designer; draws out a design of lay-out for a show card, either roughly in pencil to be worked up by show card writer or in more detail with ink and colours for actual use or for reproduction by lithographic or other printing process.

show card maker; cuts out show cards from cardboard, by hand, or by machine; gouges out or rotary cutting machine mounts printed matter on card, *see* show card moulder.

show card mounter; a moulder g.c. fixing printed sheets on to show cards.

show card writer; paints prices and descriptions of goods, by hand, on show cards for window or shop display.

stencil (tin tickets); coats ticket, by spraying with a ground of white or other paint and stores to harden on paint; places store over ground of white; sprays coloured paint over it and stores again; finally applies coat of varnish, by spraying, and again stores.

stone tinter (lithographer's); prepares lithographic stones for map printing, i.e., colour on either with chalk or penicillin variation in tint as required, e.g., deeper tint round boundaries of specified areas, countries, etc.

stripper (process engraving); *turner*; treats film of several negative plates with rubber solution, and then strips film from glass with methylated spirit; places these films face downwards on one large sheet of glass, so effecting subsequent economy in photo process; sometimes done by metal printer (536) g.c.

teller, *see* counter.

ticket maker; (i) cuts out ticket blanks from cardboard with a guillotine or rotary cutting machine; (ii) prints or writes, on small strips of cardboard, previously cut in a cutting machine, prices and descriptions of goods, for window display; may also write show cards, *see* show card writer.

ticket varnisher; varnishes tickets with a brush by hand and sets aside to dry, or more usually feeds them into varnishing machine, which applies a coat of varnish and then carries them through drying chambers.

ticket writer; as for show card writer, but work usually of simpler character.

tin ticket writer; writes on tin tickets by applying coloured paint with a brush; ticket is afterwards stored to be hardened.

turner to scale operator (blue prints); a phototype printer g.c. who prints from engineer's or architect's tracing on to specially sensitized paper by means of exposure to act light and transfers imprint to gelatine surface on a slab, takes copies from the plate, by laying a sheet of paper on gelatine and pressing the two into even contact.

turner (process engraving), *see* stripper.

varnisher (lithographer's, paper staining), *paper* varnisher; (i) hand pressing, paints cards or paper with varnish, with a brush, and sets cards aside to dry; (ii) varnishing machine

varnisher; machine process, instructs labourers as to filling varnish ducts, or troughs, in machine; regulates power which drives machine; passes cards or paper into machine; watches varnishing process to detect flaws; piles up varnished cards as they come from drying end of machine, or, if reels of paper are being varnished, watches re-rolling machine for breaks, creasing, etc.

varnishing machine moulder, *see* varnisher (lithographer's, paper staining).

window ticket maker; a ticket maker g.c. who cuts out window tickets.

window ticket writer, *see* for show card writer.

549—OTHER WORKERS.

assistant back tender (paper staining); usually a boy who assists back tender (paper staining) or machine printer (paper staining) (536) g.c.

back tender (paper staining); machine hand; stands at back, i.e., delivery end, of wallpaper printing machine; fills colour boxes with distemper paint from a can; helps machine printer (wallpaper) (539) g.c. to lift rolls of paper on to and off machine; assists machine printer (wallpaper) generally.

bench hand (printer's); distributes printed sheets to workers for folding, perforating, etc., and collects work when finished; assists women staff in heavy manual work, e.g., lifting heavy packages; may also count or check numbers of sheets or forms, pack and label parcels for despatch; cf. bench hand (535).

black leader; pastes or inserts carbon paper sheets in manifold books.

carrier, roller (paper staining), *see* washer (paper staining).

carrier-away (printer's), *see* machine labourer.

carrier-out (paper staining); a labourer who carries rolls of paper, etc. in various sections of wallpaper factory.

checker (paper staining); keeps account of rees of paper used, and of pieces of wallpaper produced.

checker, bank note; a checker (printer's) g.c. who checks the numbers of bank notes.

checker (printer's); overlooks work of numberer (bookbinder's) g.c. to ensure that no blanks are left.

cleaner, printer's, *see* machine labourer.

cleaner-out (bookbinder's); brushes off, from case, surplus gold not impressed by stamp in gold blocking.

clearer, *see* type distributor.

collator (bookbinder's, printer's); checks work of gatherers g.c. and sees that pages, illustrations, etc., are in correct order.

colour mixer's labourer, colour shop labourer (wall paper); fills mixing vats and does odd jobs in colour shop.

compositor's labourer; carries frames and type from one department to another, and acts as messenger for composing room.

cordar, *see* stringer.

damping boy (lithographer's); assists at lithographic press.

devil, printer's devil, *see* printer's boy.

dusting boy (lithographer's); removes, by hand, surplus bronze from parts of sheet which have not been used.

tayelet machinist; places sheet of paper or card on plate of power-driven revolving machine, and operates foot lever which causes plunger to be brought into contact with paper or card and automatically punch hole and fix metal eyelet thereon.

folder, book folder (printer's); paper folder, folding boy; (i) folds sheets of paper, into page size by hand, and fits one edge to prevent bulging; for more exact handwork in best class machines; (ii) *see* folder (bookbinder's) (545); (iii) *see* folding machine feeder.

folder, music; a folder (printer's) *q.v.* specially skilled in folding music.

folder, paper, *see* folder (printer's).

folding boy (printer's), *see* folder (printer's).

folding machine feeder, folding machine operator; book folder, folder (printer's), folding boy, paper folder; feeds printed sheets into folding machine so that edges are in contact with guides at front and side, or so that small bells perforate the sheet at time of printing are placed over steel points on feeding board of folding machine; starts and stops machine; removes stack of folded sheets from hopper.

folding machine minder; adjusts and supervises working of folding machines.

gatherer; arranges folded sections of pamphlet or book in order, usually by "signatures," or marks at foot of page, so that pages run consecutively.

gummar (bookbinder's); applies gum to back of books, by machine or brush; also gums edge of illustration pages etc. for insertion in books.

gummar (lithographer's); applies gum acid, to etch stone, after design has been transferred, using a broad flat-backed brush.

gummar, paper; printer's gummar; (i) lays down to be gummed side by side, and gums them by hand; (ii) feeds machine with paper to be gummed or takes it off as it comes out at other end.

hat tip slicer; prints hat tip with size before gold leaf or bronze dust is applied by hat tip printer (537) *q.v.*, *cf.* bronze letter printer (538).

knocker-up (printer's); evens up pile of printed sheets, before cutting them in guillotine cutter, by knocking side and ends on table or other flat surface; usually done by guillotine cutter (545) *q.v.*, himself.

linoquering machine feeder (lithographer's); feeds tin plates into linoquering machine, which applies varnish to them by means of rollers.

linotype assistant, boy, labourer, man; assists linotype operator (523) *q.v.* by carrying away type when completed, melting up used type metal, etc.

machine band (paper staining); *see* back tester.

machine labourer (printer's); carrier-boy, printer's elevator; sweeps up machine room; fetches supplies of paper; carries away paper from machine, etc.

numberer, bank note; a numberer *q.v.* specially skilled in numbering bank notes.

numberer (bookbinder's, printer's); numbering machinist, paper, roller paper; numbers pages in book, tickets, cheques, etc.; operates by means of hand or treadle machine which automatically changes number after each impression; places paper so that number comes in right position, takes care that numbers run consecutively and adjusts it when additional figure becomes necessary.

numberer, cheque; a numberer *q.v.* specially skilled in numbering cheques.

numberer (paper staining); works small hand stamp which applies identification mark to back of roll or piece.

numbering machinist (bookbinder's), *see* numberer (bookbinder's, printer's).

ollar (paper staining); greases machines, and attends to their smooth running generally.

oller (printing); a printer's labourer *q.v.* who oils the rollers and rotary machines in newspaper office; sometimes done by brake hand (530) *q.v.*

paper, roller paper; *see* numberer (bookbinder's, printer's).

paperer (bookbinder's); fixes, by gluing at front and end of book, strong paper, called "end-paper" or "waste paper," by which book is afterwards bound to its covers; sometimes also acts as forwarder (532) *q.v.*

paper flattener (printer's), *see* presser, hot.

pastor (bookbinder's); fastens, by hand with paste, edges of end-papers in front and back of book, and does other pasting work required in book-binding.

perforator (bookbinder's, printer's); feeds sheets into perforating machine, which perforates paper by means of revolving toothed wheel.

plier (paper staining); (i) stacks rolls of wall paper when finished, (ii) *see* plater-down.

plater (bookbinder's), map and plate plater, plater; pastes maps and plates in books.

plater-down (paper staining); *plater*; receives paper at taking off end of wallpaper printing machine, and folds or plaits it in a file preparatory to rolling it.

pointer; a folding machine feeder *q.v.* *see* chain register "by laying about so that holes pierced in it by press points in printing machine fall exactly on points in folding machine." *cf.* pointer (533).

presser (bookbinder's); feeds with book and, by means of hand lever, operates hydraulic press which presses out sponginess from books after folding and sewing, removes books after pressing.

presser, hot; pressing man; paper flattener (printer's); places thick hot iron plates at intervals between printed sheets, and lays between glazed boards in screw or hydraulic press, thereby removing indistinctness caused by type in printing and giving paper a perfectly smooth surface; *cf.* hot presser (538).

pressman's labourer; fetches and carries for pressman (543) *q.v.*

printer's boy; devil, printer's devil, printer's lad, shop boy; does any odd jobs in or about printing office; sweeps rooms, runs errands, and acts as general shop boy.

printer's labourer; does various odd jobs of an unskilled character in or about printing office.

printer's lad, *see* printer's boy.

puller to pieces (bookbinder's); breaks up books into sections preparatory to re-binding.

reeler (paper coating machine); attends to reeling of coated paper, when dry, from festoon-carrying roller to paper coating machine; sets empty spindle in reeling machine and removes it when full, controls reeling machine by means of levers; keeps laps on festoons straight, between coating and reeling machines; carries away rods from reeling end to coating machine end of drying span between machines.

reeler (paper staining); attends to lines or festoons of paper at back of printing, grounding, or varnishing machines, and to reeling of paper.

roller changer; changes copper rollers of wall paper printing machine.

roller, ticket; feeds machine which winds strip tickets, after they have been printed and perforated, into thick rolls ready for use.

roller-up (paper staining); attends to reeling machine, which winds paper from reels on to rapidly revolving steel rod; stops machine, when a mark appears in margin, and cuts off paper.

sawer, book (printer's); saws backs of books, cuts by hand, or by machine, after cutting holes along back with small saw.

shepboy, *see* printer's boy.

sorter, wallpaper; to discover defects.

stitcher (printer's), wire stitcher; fastens backs of pamphlets by means of wire stitching machine, which passes wire through sheets and presses ends flat.

stone shifter (lithography); lifts lithographic stones in and out of presses or machines.

stringer (printer's); *ceder*; runs string through showcards after lettering.

tire boy (paper staining); hangs paper in long festoons from drying rods after it has been printed by block printer (533) *q.v.*; lifts rod on to rails with a long-handled T shaped implement; sometimes also spreads colours on "sieve" for block printer.

type distributor; *ceder*; returns type to case, from which it came, after printing has been done; usually done by compositor (522) *q.v.*

varnishing machine feeder (lithographer's, printer's); passes printed sheets into varnishing machine.

washer, blue; washes blue printing immediately after printing in long tanks containing running water.

washer, glass (process engraving); washes off film from used photographic negatives with nitric acid, or cleans new glass in same way; rinses with water and leaves to dry, glass then being ready for coating, or recoating, with sensitive solution.

washer (paper staining), roller washer; roller carrier; washes rollers from printing machine, or blocks used by block printer, in water and chemicals, after printing has been done, using brushes, etc.

washer-up (bookbinder's); (i) as far washer (paper staining); (ii) cleans soiled parts of books before finishing process begins, washing off stains, removing superfluous glue, erasing fingermarks, etc.

winder, winder-up (paper staining); re-coils finished wallpaper into small rolls of suitable length for sale.

wire stitcher (bookbinder's), or for stitcher (printer's).

Sub-Order 3.—Makers of Stationery, Cardboard boxes and other works in paper.

551.—FOREMEN, OVERLOOKERS AND FORM SETTERS.

form maker, form setter (cardboard boxes); machine setter; sets up metal rules for cutting out and creating folding boxes; superintends the running of the machines, which are operated by folding box stamper (553) *q.v.*

jobber (paper tubes), *see* paper tube jobber.

machine setter, *see* form maker.

paper tube jobber, paper tube machine setter, paper tube machine tackler; jobber, paper tube overlooker, tackler; superintends running of machine for making paper tubes and keeps them in good order.

paper tube overlooker, *see* paper tube jobber.

tackler, machine tackler; sets, adjusts and keeps in running order, paper bag making machines, superintends all operations performed by these machines.

tackler (paper tubes), *see* paper tube jobber.

552.—PRESSERS, STAMPERS, SCORERS AND PUNCHES.

cap maker (cardboard boxes); presses out caps for round cardboard boxes and tubes by power machine.

creator, *see* scorer.

cuttar, cuttar-out (paper flowers); stamper; lays several sheets of paper under press; places metal stamp or die of required outline on paper; combs press by means of lever so that metal stamp is pressed through paper, so cutting out paper shape (petal, leaf, etc.). moves stamp and repeats process; sometimes specifically designated, *e.g.* flower cuttar, cuttar-out, artificial flower cuttar, cuttar-out, disc cutter, paper; cuts dies for round cardboard boxes by power or hand machine.

embosser, card; a paper embosser *q.v.* who moulds borders of cards by hand machine or power press.

embosser (envelope and stationery), *see* stamper.

embosser, paper; *embossing feeder;* (1) attends to embossing machine, which, by pressure between intaglio and relief rollers, leaves impression on paper, e.g., resembling grain on leather; (2) operates a hand machine, or power press to give an embossed and perforated effect to edges of paper d'écous, etc.

embosser (razor cuts); operates heated press by hand to emboss raised device on sides of case.

embosser (wallpaper); operates embossing machine, which, by pressure between intaglio and relief rollers, leaves impression on paper. In this relief, embossing is done by plates, which are inserted into machine, and colour is applied afterwards, by hand; in low relief, rollers are used after paper has been printed; cf. *stomina printer* (paper staining) (558).

embossing feeder; (1) see *embosser, paper*, (2) see *stamper*.

laced paper maker, lacor; (1) stamps out lace or fancy paper articles by hand, machine or power press; (2) feeds and operates roller d'écous machine, which cuts machine and perforates paper lace, such as is used for trilling chocolate boxes; finished work is removed by female assistant.

machine hand (paper patterns); see *stamper, dress pattern*.

machine minder (music rolls); see *perforating machine minder*.

machine operator (music rolls); see *perforating machine minder*.

perforating machine minder (music rolls); machine minder, machine operator; fixes stencil (cut by stencil cutter q.v.), which determines pattern of perforations in perforating machine, attends to machine while it is working and sees that perforated copies reproduce original correctly.

perforator, card; pattern card perforator, stamp perforator; as for *perforator* (549).

plunger, machines operator; feeds, with blank, "plunger" machine which makes cardboard box in one operation.

presser; places labelled or paper-covered cards in hydraulic press, to press out bubbles or creases caused by pasting operations; sets press in motion with a treadle or with a hand lever.

puncher, see die cutter.

puncher, card; a paper puncher q.v. who punches out cards.

puncher, label; places knife or cutter, having shape of label to be cut, in position on pile of paper or cards and operates press, which is then brought down upon them by machinery.

puncher, paper; (1) cuts out, with loose cutters, shaped labels or envelopes in flat sheet; (2) lays paper in set position in bed punching machine, and sets machine in motion with foot lever.

scorer; creaser; (1) marks sheets by pressing against register points on bench, so that they can be accurately fed into folding machine; (2) places cards in scoring or creasing machine which scores or creases card in readiness for folding; controls machine by rollers; removes scored cards and stacks ready for folding.

stamper; embosser, embossing feeder, stamps paper, envelopes, etc., with monograms, letters, designs, or crests, either in cameo (in white or coloured ground), in relief (in colour on white ground), or by the stamping; in all cases die is fixed in machine, and, if article is to be stamped in colours, colours are applied to die, which is then placed under die, which is pressed down upon it, by machine; sometimes also, in colours, using oil or vehicle, usually specifically designated, e.g. cameo stamper, full heading relief stamper, heraldic stamper, monogram stamper, relief stamper.

stamper, dress pattern; machine hand (paper pattern maker), sets knives, shaped according to pattern supplied by dress pattern maker (558) q.v., on top

of a pile of sheets of paper, puts knives and paper under hydraulic press, which presses knives through paper and cuts out patterns.

stamper, fancy box; folding box stamper; lays sheets of cardboard on plates of stamping machine; controls machine by lever so that flags and blades into which they fit, are stamped out; knives are usually set by mechanic (245) q.v.

stamper, machine (paper staining); an embosser (wallpaper) (552) q.v. who applies plate having pattern intaglio, to paper as it runs on another plate, having pattern in relief.

stamper (paper flowers); see *cutter* (paper flowers); sometimes specifically designated, e.g. flower stamper, artificial flower stamper.

stamper, pattern card; a stamper q.v. who stamps out pattern cards.

stencil cutter (music rolls); performs stencil paper, at places marked by music arranger, with a hammer and punch.

553—ENVELOPE AND PAPER BAG MAKERS.

bag hand, see paper bag maker.

black bag maker; (1) makes black bags taking form of block when opened, by hand, using a metal folder; arranges edges to overlap, and applies gum or paste with brush; (2) fixes reel of paper on power machine; regulates power which drives machine; sees that paste boxes on machine are kept supplied with paste; machine completes bags automatically.

envelope folder; folds envelopes, by hand, using a flat bone instrument, frequently also gums envelopes together.

envelope machine folder, envelope machine hand; (1) maintains supply of blanks of envelopes in rack of folding machine, from which they are automatically drawn into the machine and are folded and gummed, (2) extracts finished envelopes from dryer, fixes in hands in order to correct warping and stacks.

envelope maker; general term for any worker engaged in making envelopes, including cutter (555), envelope folder and gummer q.v.

gummer, envelope gummer; an envelope folder q.v. who gums edges by hand and makes special envelopes.

needle envelope maker; folds and gums together, by hand or machine, special envelopes for packing needles.

paper bag feeder; feeds out sheets into folding and pasting machines.

paper bag maker; bag hand; (1) makes bags by hand from previously cut sheets of paper by means of a metal folder, or, in the case of flat bags, by folding seam without metal folder; arranges edges to overlap and applies gum with brush; (2) attends to machines which produce bags from reels of sheets of paper; feeds sheets of paper into machine or fits reel of paper on spindle; watches machine for smooth working and examines finished product periodically; machine is usually set by mechanic (245).

seal packet maker, as for envelope maker.

554—CARDBOARD BOX MAKERS.

barrel maker; makes cylindrical barrels and lids of cardboard by attaching sheets of cardboard to circular wooden ends with glue and tacks or rivets.

box hand, box maker (fixture boxes); coverer; turns up, to form box side, pieces of cardboard already cut to shape and creased; pastes on thin fabric or paper strips to secure corners; cuts up paper or cloth for lining and covering, pastes it and runs down firmly; cuts felt or baste and glues along bottom of fixture boxes, cf. *box maker* (479) and (658).

box maker, cardboard box maker; general term for all workers engaged in making cardboard boxes by hand or by machine, or partly by hand and partly by machine, operations differ according to type of box made and methods and machines employed; includes scorer (552), stamper (552), carton maker, killer maker, cutter (558), finisher (558), layer-on (554), slider (554), box and slide machine attendant; attends automatic machine which cuts and folds cardboard and paper, and pastes together to make sliding boxes, e.g., cartons for cartons, plus baggage tied with material by hand; removes boxes as made.

carton maker, as for box maker.

container maker (electric lamps); a box maker q.v. who makes cartons for packing electric lamps for despatch.

coverer (fixture boxes); see *box hand* (fixture boxes); cf. *coverer* (559).

flange box maker; receives box made by box maker q.v. and glues round edges of top and sometimes of bottom, or pastes it into gluing machine, lays a piece of cardboard on glued surface so that it projects as a flange beyond edge all round and presses it firmly; passes to coverer (559).

skillet maker; a cardboard box maker q.v. who makes skillets or cardboard boxes with plain ends which are to be covered with printed wrappers.

strawboard box maker; a box maker q.v. who makes boxes of strawboard, a kind of coarse thick cardboard.

555—OTHER SKILLED WORKERS.

borderer, black borderer, envelope black borderer; arranges envelopes or note paper, using small bone instrument, so that only border is exposed, applies black varnish with brush.

Braille writer; encrier; sets out plates of Braille type in an embossing machine and feeds sheets of paper, to be embossed, into machine, switches on and off power-drive of machine and removes finished sheets.

bust maker; tailor's dummy maker; cuts up strawboard into small pieces and mixes it with floor paste to required consistency; spreads this evenly over iron or aluminum model or mould by hand and with small hand scoop; sets to dry and then cuts sections away from mould; pastes sections together to form complete bust or dummy; may also paint or varnish last; sometimes specifically designated, e.g. coat bust maker, dressmaker's bust maker, tailor's bust maker.

card ornament maker; cuts out fancy paper covers or shades for candles, with a punch.

carbon paper coater, carbon paper machine minder; typewriter carbon maker; fixes coils of paper to spindles of one or more machines which, by a system of rollers, coat paper with dope, i.e., a special ink compound; guides end of paper over or between various rollers to re-reeling end of machine; fills dops, or troughs, with dope from a can; regulates steam-heating of rollers by turning tape or valves; controls power-drive of machine; supervises coating process; watches re-reeling end of machine to note breaking or creasing of paper; if such occurs, stops machine and repairs or adjusts paper, by hand; removes reel of coated paper from re-reeling end of machine.

card beveller, card finisher; (1) hand bevelling or finishing; arranges a pile of cards so that edge of pile slopes at required level angle; places pile in nipping press and presses shaped edge with sharp knife; finishes with sand paper and, if required, applies gold leaf, afterwards burnishing with agate stone; (2) machine bevelling; places pile of cards in press of

machine and manipulates seven on machine which causes rotary knives to cut beads on cards; applies gold leaf, if required, and furnishes by hand.

card maker; passes card sheets into a roller machine which passes separate sheets together.

carton paper worker; undertakes all processes of manufacture of carton paper; mixes materials used, e.g., paper, pulp, china clay, glue and whitening; works materials into mould by hand; dries it by artificial heat.

checker; see counter.

cloth slitter (typewriter ribbons); see cutter, cloth (typewriter ribbons).

coater (typewriter stencil paper); see waxer (typewriter stencil paper).

compaction maker, **compendium maker** (stationery); assembles strawboard, tape, paper, etc., already cut to size and appropriately scored for binding; makes case by hand, pasting covers over strawboard and pasting paper sections to contain envelopes; gives pad of paper to case; inserts envelopes, etc., and finishes off.

cornstar; see cutter, corner.

counter; checker; checks numbers of stamped revenue envelopes, etc., in packets.

cutter; **cutter-man**, **cutter-out**, **cutter-up**; see gauges according to size required; places paper, pasteboard, card, etc., on table of rotary cutting machine, or guillotine; controls descent of knife or knives by means of lever; sometimes further designated by the article cut out, the material used, or by machine operated, e.g., slipper cutter, box cutter, envelope cutter, index paper label cutter, etc.; or card cutter, note-paper cutter, paper cutter, etc.; or guillotine cutter, machine cutter, rotary cutter, shears cutter, etc.

cutter, cloth (typewriter ribbons); **cloth slitter**, ribbon cutter; places, with assistance of labourers, roll of cloth on spindle of machine; adjusts cutters of machine according to width of ribbons required, using measuring gauges; guides end of cloth between rollers of machine; switches on power-drive of machine, causing cutters to slit cloth in continuous ribbons; removes spools of ribbon from spindles at re-reeling and of machine; in some cases, also seals edges of ribbon on spools by spring composition on them, with a hand-operated aerograph machine, to prevent fraying.

cutter, corner; **cornerer**, **slitter**; places cardboard under cutters of power machine and controls cutting carried by means of lever; may cut out corners with hand machine by pulling down cutting knife with hand lever; stacks cut cards.

cutter, mount; picture mount cutter; cuts mounts from boards of standard size and takes aperture of necessary size, using bevelled hand knife or mount-cutting machine.

cutter (paper collars, cuffs or fronts); places a small pile of stiff prepared white paper on bed of power-driven cutting press; places cutter in position in upper part of press, and switches on power, which causes cutter to descend and cut paper to required shape; if cutting out articles with imitation stitching or other impressions, passes paper into machine can sheet at a time.

cutter, ribbon; see cutter, cloth.

cutter-down (typewriter ribbons); cuts typewriter ribbons, after they have been coated with ink, into lengths, by feeding into cutting machine; sometimes also winds them on spools, when not done automatically by cutting machine.

cutterman; see cutter.

cutter-out, **cutter-up**; see cutter.

cutter and creaser, **cutter and scorer** (cardboard boxes); builds up and fits into cutting and creasing machine shaped knives or cutters; usually done by mechanic (245) g.v.; may also do work of layer-on g.v.

dampener, **dipper**, see waxer.

drawing monitor; mounts drawings, photographs, prints, etc., on cardboard, by hand, using mountant or paste.

dress pattern maker; paper pattern modeller, pattern modeller (paper pattern); cuts out, by hand, paper dress patterns from which knives are made to be used by dress pattern stamper (552) g.v.

edger; affixes paper edging, by machine or hand brush, to ribbons cut from cloth, for use in typewriters.

embosser to the blind; see Brasile

envelope designer; prepares designs for envelopes to size and shape required by customers, from which cutting knife used by paper puncher (552) g.v. is made.

examiner (carbon paper); inspects sheets of carbon paper before they are packed, to detect defects; in some cases, examines paper, when it is unwound from reel to be cut, and performs cutting.

examiner (music rolls); examines perforated sheets, compares them with original and marks incorrect notations.

fine can riveter, **fine can stitcher**; rivets together, by machine, edges of long strip of vulcanised fibre to form silver can.

fine can turn-over; softens end of silver can, made of vulcanised fibre, with a heated iron; puts steel or wooden ring over top of can, to stretch top, and turns back softened fibre in cover ring; often also rivets turned over top of can in a power-riveting machine, or passes can to fine can-riveter g.v. to be riveted.

fine worker; (i) general term for an person engaged in manufacture of part manufacture of articles made of vulcanised fibre, i.e., cheaply produced compressed paper, including drillers, sawyer, turner, riveter, or assembler, puncher, etc. (ii) makes articles of vulcanised fibre through-out; in either case, processes and machinery used similar to woodworkers (451, 456, 458, 459) g.v.

finisher (music rolls); combines work of fixer and of fronter (559) g.v.; also marks sheet with lines indicating variations in time, in volume of tone, etc.

finisher (paper collars, cuffs or fronts); puts collars, cuffs, or fronts, after they have been cut out by cutter (paper collars, cuffs or fronts) g.v., under a power-driven or treadle-driven punch, which makes button-holes or stud-holes therein; for collars, also folds collars, by hand, following lines already impressed on articles by cutter; for fronts, also creases front, by hand, down machine to form a pleat, and places neck band, with small piece of linen to top edge of front.

finisher (perchment containers); passes container, which has been rolled and coated by roller girl (559) g.v., into finishing machine; machine turns over edges at top and bottom, makes groove into which cover fits and presses bottom in place; controls machine, which is set by mechanic (245) g.v., by means of levers; takes sheets from containers of machine and stacks them.

fireplace ornament maker; makes decorative screens for fireplaces by folding and gumming together pieces of fancy paper and cardboard.

fixer (music rolls); rectifies mistakes in perforated music sheets pointed out by examiner (g.v.) by enlarging perforated slits (if too short) with scissors or patching them (if too long) with paper and glue.

fong maker; makes fong used as matrix in stereotyping by pasting together layers of blotting paper and tissue paper with a special paste called stereo composition.

label maker, **tag maker**; general term covering any worker engaged in the manufacture of labels, including label cutter, label puncher (552), and eyelet machinist (550) g.v.

lamp shade maker; makes paper lamp shades, largely by hand, from thin cardboard or fancy paper, on a wire frame.

layer-on (cardboard boxes); places sheets of cardboard on platen of cutting and creasing machine; controls by means of lever, revolving knives which cut and crease sheet to required size and shape; removes cut sheet and stacks it; work sometimes done by cutter and creaser (552) g.v.

manifold paper maker; soaks Japanese paper in oil and interweaves it with tissue paper; places whole in press and thus saturates tissue paper with oil.

metal edger; folds sides of box and places it on a right-angled awl; controls levers of power-driven machine which binds edges with toothed strip of metal; usually also sets gauge which controls length of metal edging to be cut off.

mounter, see waxer.

mount binder; see passe partout binder.

mount maker; pastes white paper centres on cardboard and decorates edges by lines or stamping.

music roll maker; perforates paper rolls for pianolas, player pianos, etc., by machine.

note-paper folder; folds sheets of note-paper by hand or by machine.

paper blind maker; makes paper blinds, by beaming edges of paper, received from paper mills cut to size, and machining lace on lower edge.

paper collar maker, **paper cuff maker**, **paper front maker**; general terms covering cutter (paper collars, cuffs or fronts) and finisher (paper collars, cuffs or fronts) g.v.

paper pattern modeller, see dress pattern maker.

paper maché boilerman; feeds old or scrap paper, previously disintegrated, into stationary or rotary boiler, where paper is boiled to a pulp.

paper maché dryer; places moulded paper maché articles on shelves in heated room to dry.

paper maché hand (theatrical properties); builds up hand round base of model received from theatrical property moulder and completely encloses it; usually grases model and for hand to be removed, removal of mould; pours liquid plaster of Paris into space between hand and model; when set removes mould, grases inside and pours into paper maché or lines inside with paper maché; leaves paste to dry and turns or pulls out when cast or shell is hard enough; sometimes done by theatrical property maker (588) g.v.

paper maché liner; **paper maché moulder**; (i) forces wet paper maché, by hand, into plaster mould made by mould maker (118) g.v.; (ii) (in manufacture of large quantities), operates hydraulic press to press paper maché into a metal mould; sometimes also places moulded articles in heated room to dry.

paper maché mixer; mixes pulp with turpentine, whitening, resin, china clay, and glue or starch paste, in mixing and grinding machine.

paper maché moulder, see paper maché moulder.

paper maché worker; general term for workers engaged in working paper maché, including paper maché boilerman, mixer, liner, moulder.

passe partout binder, **passe partout maker**; mount binder, assembles glass picture, mount and back board, and binds edges with gummed paper; affixes rings to back with adhesive paper or with metal tag.

pattern card beveller; a card beveller g.v. who bevells pattern cards.

pattern case maker; makes case for holding patterns of fabrics, etc., by pasting together cardboard, paper, imitation leather, etc.
pattern modeler (paper patterns), see dress pattern maker.
post card examiner; inspects completed post cards for faulty coloring, printing, etc.

sheet paster; pastes sheets of paper together to form visiting, correspondence, playing cards, mounting boards, railway tickets, etc., either by hand or, much more generally, by machine.

slitter (cardboard boxes); places roll of paper on spindle in slitting machine and passes end of paper through rollers of machine and fastens to re-winding spindle; controls by means of levers slitting knives which cut the thin cardboard or paper into narrow strips for binding boxes or for reeling into tubes.

silver can maker (tube); general term covering all persons engaged in making silver cans of compressed fibre, including fibre can cutter, riveter, turner-over, varnisher (559) g.v.

slotter, see cutter, corner.

spooler (mangle rolls); attaches ends of perforated sheets to spool, with glue, by hand; winds sheet round spool by machinery.

spool maker (music rolls); fastens thimble on to end of dowel, i.e., wooden core to cardboard spool with a pin, by machine; turns hole through thimble and dowel, by machine, to receive pin which secures flange to dowel; fixes flange on to thimble and dowel, and inserts flange, complete with thimble and dowel, into cardboard spool.

stamp examiner; examines stamps to detect defects and variations in colour.

stencil paper examiner; examines stencil paper to detect irregular coating or other defects.

stove ornament maker; makes decorative screens for stoves, by folding and gumming together pieces of fancy paper and cardboard.

tag maker, see label maker.

tailor's dummy maker, see hush maker.

transfer slide maker; makes magic lantern slides by pasting printed paper transfer between glass mounts and binding edges with black paper.

typewriting carbon maker, see carbon paper color.

typewriting ribbon inker, **typewriting ribbon machine minder**; places spool of ribbon on spindles of one or more machines; guides end of ribbon between rollers of machine to re-reeling end; switches on and off power-drive of machine; fills ink ducts with ink from a can, removes inked spools from machine.

vulcanised fibre machine minder; fixes, with assistance, reel of special absorbent paper to machine; guides end of paper between rollers; switches on power-drive of machine, causing paper to pass slowly between rollers and through a bath of chloride on to a cylinder, on which it is automatically wound; watches paper during process, to ascertain that necessary coating is being obtained; when desired thickness has accumulated, winds off sheets of material, i.e., vulcanised fibre, with a knife to sizes as instructed.

waxer; dipsper, dipper, moistener; coats boards with wax or soap solution by dipping in molten wax or soap solution, prior to pressing into cardboard boxes by machine press.

waxer (typewriting stencil paper), **stencil paper waxer**; coats (stencil paper); passes sheets of tissue or other paper into a roller machine, which coats them with liquid wax.

winder (typewriter ribbons), **ribbon winder**; winds typewriter ribbon on to spools, by hand or in small power machine; sometimes also cuts it to required lengths.

writing pad maker; assembles strawboard, cover, pad of writing paper and tape; glues top edges of pad to tape and fixes cover and strawboard back by same means.

559—OTHER WORKERS.

adhesive seal maker; feeds embossing and die stamping machine with gummed paper and removes seals as stamped and cut out.

assembler, see fitter.

assistant vulcanised fibre machine minder; assists and works under direction of vulcanised fibre machine minder (558) g.v.
bander (cardboard boxes); places box on block of banding machine and fastens end of gummed paper strip issuing from machine to box, sets machine in motion by means of a lever so that gummed paper is applied all round edge; removes box and passes to turner-in g.v.

bender (cardboard boxes); shapes; passes slow and other boards into power machine, where they are forced into contact with projecting rib or lip on roller, thus making impression in board so that it can be easily bent; sets gauges; stacks boards when bent.

blinder (cardboard boxes); **blinder, blitter-up**; binds, by hand or machine, edges of cardboard box with gummed paper, which holds together and serves to strengthen edges, in machine work, presses part of scored card blank, which will become bottom of box, against stock similarly shaped which revolves slowly; bends over each side against successive sides of stock as they come uppermost and joins sides and strengthens bottom edges by applying strips of paper.

blitter, blitter-up (cardboard box), see blinder.

blocker (cartridges); places cardboard case of sporting cartridge, with metal bottom laid in position, in upper part of machine; turns handle which sets machine in motion and fixes bottom on to case as it spins on sprayer; moves hand lever, bringing rimming wheels into contact with edge of metal bottom, thus fastening it securely on the case.

board combiner, see paster.

board liner (cardboard boxes); **sheet liner**; (i) covers cardboard with plain or ornamental paper by hand, using paste and brush; (ii) passes cardboard into pasting machine by which it is carried over a roller and brought into contact with pasted paper and delivered at back, finished; stacks lined boards to dry.

bobbin band presser; manipulates hydraulic press which presses together several thicknesses of cardboard and strawboard to make flanges for bobbins.

bobbin maker (cardboard); operates a machine which rolls and cuts pasteboard to convenient size and shape for making bobbins, pins and tubes; see also paper tube maker.

bon-bon maker, see cracker hand.

book-felder (stationery); folds sheets of paper, for making into writing books, by hand, using a bone instrument.

bottle cap machines operator, as for bleaker.

bottle seal maker; an adhesives seal maker g.v. who makes seals for bottles.

bottomer (cardboard boxes), **topper and bottomer**; (i) places box on block and pulls gummed paper from machine on to edge of box; sets machine in motion by moving a lever, so that paper is stuck to top and bottom of box and cut off automatically at required place; removes and stacks box to dry; (ii) brushes hot glue on glue board, sticks piece of paper of required size lightly into glue and places glue on size upon bench; places box on glued paper and smooths with fingers.

breaker, see stripper.

calender man (compressed paper); passes vulcanised fibre sheets through calender, to produce a smooth surface.
card labeller; puts gummed labels on cards, show cards, boxes and other articles of cardboard, as labels are received from mangle g.v.

card ribboner; threads ribbon through cards, almanacs, etc.; ties it in ornamental bow.

card trimmer; cuts edges of blocks of cards with a guillotine to get a clean edge after they have been roughly cut out by cutter (558) g.v.

case maker (cartridge rockets), a **paper tube maker g.v.** who makes cartridges or rocket cases.

casemaker (envelope making); (i) gums envelope flaps by arranging a series of envelopes, one on top of another, so that only edges of flaps are showing; brushes over with gum and sticks to dry; (ii) (hand machine operating) places envelopes in press and discharges away each envelope separately; (iii) (power machine operating) feeds machine and supervises running.
casemaker, paper; gums together edges of paper articles.

cigar box decorator; pastes on, by hand or machine, decorative labels or bindings to exterior of wooden cigar boxes.

cigar box liner (paper); affixes with paste, by hand or machine, plain or fancy paper to inside of wooden cigar box.

container tube maker, see paper tube maker.

cop tube maker; a paper tube maker g.v. who makes cop tubes for use in textile trades.

corrugator, corrugated pecking maker; places reel of cardboard or paper on spindles of machine, using a pulley block; guides end of material between rollers of machine; starts machine with a hand lever, and stops it when required; takes off corrugated paper at delivery end.

cosaque maker, see cracker hand.

coverer (cardboard boxes), **paperer** (i) lays paper, cloth or other material, material, which has been glued by gluer g.v., on block and sets machine in motion by moving a lever, thus causing machine to put glued paper on box, fold ends, stick them down, press paper in back and deliver finished box in back; (ii) lays glued paper on box or band; folds ends, sticks them down and presses paper, etc. to box—all by hand.

cracker hand, **cracker maker**; **bon-bon maker**, **casaque maker**; prepares cracker by laying out; inserts for lining and snaps in ends; inserts round tube and gums paper, crimps cracker by hand, i.e., makes wrist at both ends of cracker with string, removing tube during process, guides cracker, or scrap, etc., on to pile of cracker, and packs cracker in boxes.

crinkled paper machine operator; places reel of paper on spindle of machine having two rollers, i.e., matrix and embossing rollers, guides give crinkled effect to paper, guides end of paper between rollers to re-reeling end; regulates power-drive of machine; removes reel of crinkled paper from delivery end of machine, sometimes also adjusts pressure of rollers by means of screws.

cutter, paper (cable making, paper tubes); **paper slitter**, **slitting machine driver**; places reel of paper in position at feed end of slitting machine, using block and pulley to lift it; adjusts cutters of machine, using measuring gauges; guides paper through machine to spindles on which it is to be re-reeled after being cut; switches on power-drive of machine; watches to see that cutting and re-reeling are going on without a hitch; removes paper, when slit, from spindles on which it has been re-reeled.

cutter, paper tube; places length of paper tube on spindle of cutting machine; adjusts cutters to length required; switches on power-drive of machine; presses treadle to bring cutters into contact with revolving mandrel; removes portions of tube, when cut.

cutter, telegraph paper, *as for* cutter, paper (cable making, paper tubes), cutting paper for tape machines.

cutter, tube; cuts long cardboard tubes to lengths required, usually by power machine.

cutter, wood, *as for* gun wad maker.

cutting machinist (razor cases); places razor case mould in machine; presses lever, so that outer case is cut through; removes mould, slides off top and cuts end of bottom or socket of case square in machine; sometimes done by hand knife by razor case maker *g.v.*

dryer; dries sheets of vulcanised fibre by hot air in drying room.

ender-on; *as for* (1) a binder *g.v.* who sticks a strip of gummed paper on the ends of cardboard boxes by hand, when box is too large to have both sides and ends of one piece; (2) a binder *g.v.* who holds box in position on block of machine, brings end of gummed paper strip in contact with box and moves lever setting machine in motion.

envelope straightener; flattens, by belt movement of hand, curling gummed edge of envelopes, as delivered by drying machine.

examiner, *see* sorter.

eyelet machinist (paper goods); *as for* eyelet machinist (549).

face and backer; a corrugator *g.v.* operating a machine which corrugates paper and applies corrugated material to face and back of plain material, setting them with adhesive; also keeps trough of machine filled with adhesive.

finisher, *see* fitter.

fitter; assembler, finisher; operates a machine which attaches bottoms to cardboard cylinders intended to be used as containers for jam, etc.; work similar to that of blocker (cartridges) *g.v.*

flag maker (paper); gums together two pieces of paper, printed with flag design, each on one side, and attaches them to stick, pin or string at folded edge.

flange coverer; a coverer *g.v.* working on flanged boxes.

flange fixer; tops extension or flange, by machine, to top and bottom of cardboard before it is folded to form box.

folder maker; makes throughout folders for holding papers; passes cardboard sheet through machine which punches and creases it; passes strip of metal through punched holes; fixes metal strip in position by wire-stitching or gluing back, and attaches clip.

frontier (music rolls); glues front or apex, containing title of piece of music, on to end of perforated sheet.

glazer (paper cartridge cases); *polisher*; places cartridge cases on holder of machine and glazes or polishes them by passing a burnishing iron to press on surface, as case revolves.

gluer; (1) applies adhesive to paper or cardboard, by hand with a brush, in manufacture of cardboard boxes, tubes or other articles; (2) passes cardboard over roller into gluing machine, which carries it to a wheel running in a glue well, where glue is automatically applied; machine may also fold cardboard, press it together and deliver at back.

gold tipper (cigarette papers); (1) hand process, applies strips of gold leaf to sheets of paper, using adhesive; afterwards wipes off superfluous gold with pad, and cuts guided paper to size required with a guillotine cutter; (2) machine process, fastens spool of paper on

machine, which takes up first adhesive composition and then gold dust from boxes; sees that boxes in machine are kept filled with gold dust and adhesive composition; regulates power which drives machine and supervises running of machine generally; makes minor adjustments to machine when required.

groover (cardboard boxes); passes thick sheets of cardboard into machine which cuts grooves in them so that they may be more easily bent to box form; controls machine by levers; sets gauges; starts grooved sheets or boards.

gun coating machinist; gumming machine feeder; fixes, with assistance of labourers, reel of paper in a machine which, by a system of rollers, takes up gum from a duct or trough and applies it to paper; paper is then conveyed, machine by machine, through drying room to re-rolling machine, guides end of paper between rollers of machine, and switches on power-drive of machine; directs labourers who fill trough or duct of machine with gum; watches re-rolling end of machine, and if paper shows any break or splitting, makes necessary adjustment or does repairs, by hand.

gummar, *as for* gluer.

gumming machine feeder, *see* gun coating machinist.

gun paper sorter; sorts or grades, in various qualities, sheets of gun paper by hand; throws out defective sheets.

gun wad maker; wad cutter (corridger); cuts out circular discs of cardboard, for use in sporting cartridges, on a machine.

handler (paper bags); paper bag drawer, stringer (paper bag); mixes string handles to paper bags by (1) laying ends of handle in position on bag and fastening down with strip of gummed paper, (2) gumming paper over the ends.

hydraulic press attendant (compressed paper); presses vulcanised fibre sheets in a heated hydraulic press.

impregiator (parchment containers, tubes, etc.); receives containers etc. from flasher (553) *g.v.* and places them on a moving band which carries them through a bath of melted wax; removes impregnated articles and sets them to dry, may add gas jets which heat the bath to correct temperature, and replenishes wax bath, where this is not done by machine (545).

labeller; affixes labels, prints, etc., to tops and sides of finished cardboard boxes, either by applying paste or other adhesive by hand with brush, or by flocking labels, etc. on to paste or glue board, or by placing boxes on block of labelling machine.

label sorter; examines completed labels and rejects any that are unsatisfactory.

lacing machine operator; places cardboard box on block of lacing machine and sets machine in motion by moving lever so that pasted lace paper is affixed to inner edges; the result is lace paper on spindle and replenishes paste box.

lids, slider-up; puts together, by hand, finished lids and boxes to form complete articles; if necessary, inserts lids in punching machine to have thumb holes punched in them; sometimes also ties up completed boxes in bundles.

mingler (gummed paper goods), *as for* mingler (518).

moulder (bottle caps); places paper caps on end of rotating spindle of a machine, by hand; uses a small bone instrument to press lower end of cap against spindle, constricting it at point where cap closes on bottle neck.

mouthpiece maker (cigar and cigarette); cuts stiff rolled paper to specified size on guillotine machine, which may be a treadle or a power machine; rolls mouthpieces and sticks edges, by hand, using gum or other adhesive.

nailer, nailer-up; nails together sides and ends of wooden frames and staples cardboard sides, by machine or by hand, to make wood strengthened cardboard boxes, drawer's fixture drawers, etc.

paper cap machine operator; puts parts of paper caps or similar articles in machine which automatically completes them and delivers finished articles at rear of machine.

paper cap or hat maker; (1) cuts out paper caps or hats with hand knife; (2) pastes edges of paper together to make caps, etc., of different patterns.

paperer (cardboard boxes), *see* coverer.

paper grinder; chaser, by machine, each edge of paper which is to form paper tube, so that there is no extra thickness at joint.

paper pattern folder; folds together, by hand, pieces of paper pattern.

paper pleating machine operator, *see* pleater.

paper splitter, *see* cutter, paper (cable making, paper tubes).

paper tube maker; case roller, container tube maker; roller (paper tubes), spiral winder, tube winder, tube roller, tube winder; feeds paper from reels into tube-making machine which pastes paper and rolls it into a tube until it reaches required thickness, *see* by gauge; brings cutting discs into play at end in length; sees that glue boxes in machine are kept filled.

passer (cardboard boxes), *see* sorter.

paste (cardboard boxes); board combiner; *as for* board liner, except that thin cardboards of various weights are used instead of paper.

pattern card mounter; pattern counter; fixes fabric patterns to cords with metal tag or gum.

pattern card trimmer, *as for* card trimmer.

pattern mounter, *see* pattern card mounter.

piecer-on, *see* ender-on.

pleater; paper pleating machine operator; (1) runs paper from small reel between rollers of machine which plants it into pleat folds, etc.; (2) places small discs of paper in revolving machine which, by an automatic plunging movement, plants them into capsules, and ejects completed capsules into basket beneath machine.

polisher (paper cartridge cases), *see* glazer.

post card counter; counts post cards into packets of 10, 25, 50, etc.; makes up assorted packets of picture post cards.

post card trimmer, *as for* card trimmer.

post wrapper gummer, *as for* coverer.

pyramid maker (tobacco factory); makes dummy cigarette boxes, etc., of cardboard, and fastens them together with paste, forming pyramid for exhibition in tobacconist's window.

razor case maker (paper); (1) wraps by hand pieces of brown paper soaked in glue size, round wood mould; then wraps round patterned paper and greases with tallow; when dry wraps round further layers soaked paper squares up by pressing in a heated press operated with hand lever, sets to dry; case then passes to embosser (552), varnisher and cutting machinist *g.v.*; (2) feeds and controls by lever machine which makes cases automatically from paper maché.

roller (paper tubes), case roller, *see* paper tube maker.

roller girl (parchment containers); folds parchment-like paper lightly round a cone of wood or metal, having shape of container to be formed, and pastes overlapping edges round by finisher (553).

shaper (cardboard boxes), *see* binder.

sheet liner (cardboard boxes), *see* board liner.

shell maker (paper mill); a paper tube makes g.p. who makes tubes (generally of cardboard) upon which paper is wound.

slitting machine driver, *see* cutter, paper (cable making, paper tubes); *striker*; *examines finished cardboard boxes, envelopes, paper tubes, etc., and rejects any that are defective.*

spiral winder, *see* paper tube maker.

stacker (cardboard boxes); stacks cardboard boxes passed along belt of automatic staving machine, ready for binder g.p.

stayer (cardboard boxes); a binder g.p. who strengthens box by binding edges with gummed paper strip in machine.

stencil gluing machine (cardboard boxes); operates stencil gluing machine which affixes labels to cardboard boxes, applying glue to edges of label only.

stitcher (cardboard boxes), wire stitcher; wire stitches or rivets cardboard boxes, by looking across under needle or punch of power-driven machine; controls machine by switch or lever; sets hobbin of wire in machine and threads end through eye of needle.

stringer (paper bag), paper bag stringer, *see* haulier (paper bag).

stripper (cardboard boxes); breaker; breaks off waste board from edges of stamped-out box blanks as they come from stamping machine.

tank minder (vacuumized fibre); tank minder; puts sheets of vacuumized fibre in tanks or tubs of water, to extract acid left by chloride process, *cf.* vacuumized fibre machine minder (558); turns taps to empty or fill tanks, as required; removes sheets from tanks when time indicated by foreman has elapsed.

teletype tape maker, *see* for cutter, paper.

ticket sorter; sorts tickets after they have been out and printed.

tin card moulder; moulder with paste or gum, pieces of paper coated with different kinds of paint, distemper, stain, etc., to numbered and named spaces on tin card.

topper and bottomer (cardboard boxes), *see* bottomer (cardboard boxes).

trucker (paper tubes); collects trays of wet tubes from tube making machines, and conveys them in trucks to drying stoves.

tube maker, tube roller, tube winder, *see* paper tube maker.

tub minder, *see* tank minder.

turner-in (cardboard boxes); (i) strips corners of gummed or pasted paper projecting beyond edges of cardboard boxes with scissors; turns in or fastens down top and bottom edges and smooths with fingers, (ii) places box on block of machine and sets machine in motion by moving lever so that edges of covering paper are automatically turned in.

varnishbar (fibre can), fibre can varnishbar; coats exterior of fibre can with varnish, by dipping or brushing.

varnishbar (razor case); coats case by hand by brushing with black varnish.

wrapper; feeds machine which pastes and covers cardboard boxes or lids entirely with paper.

ORDER XVII.—BUILDERS, BRICKLAYERS, STONE AND SLATE WORKERS, CONTRACTORS.

Sub-Order 1.—Builders, Bricklayers, Stone and Slate Workers; Contractors.

600.—EMPLOYERS AND MANAGERS.

master sinker (mine); usually a contractor who undertakes vertical excavations through strata for mine shafts; supplies or hires plant and machinery; employs necessary labour, *e.g.*, head sinker (561), borer (560)

(*q.v.*), supervises making of trial borings to test probable mineral wealth of prospected mine; is usually an authority on geological surveys. waywarden; undertakes the maintenance of trenches on a sewage farm, under contract; engages and supervises work of labourers, and of bricklayers if trenches are brick lined.

561.—FOREMEN AND GANGERS.

bank walker (canals, waterworks, etc.); patrols banks of canals, rivers, channels supplying waterworks, or of waterworks filter beds, and is responsible for their maintenance and repair; notes any defects or leakages in banks, and gives instructions to handmen (581) (*q.v.*) as to necessary repairs, *e.g.*, concreting, timbering.

bricklayer (charge hand), *see* foreman bricklayer.

chargeman (railway); a foreman (*q.v.*) or a ganger (*q.v.*) in charge of men engaged on permanent way work on a railway.

foreman; (i) supervises and sometimes engages and discharges some or all men engaged on a job or in a workshop or yard; is responsible for efficient carrying out of work done by men under him; sometimes sets or lays work out according to plans, specifications or instructions using levelling, measuring, and other instruments; is often responsible to employer for ordering and issuing material and for economical use of material; sometimes keeps records of time worked by each man, or checks record kept by timekeeper (562) (*q.v.*) or other employee, and prepares time and wages sheets, sometimes also pays workmen on behalf of employer; often allocates responsibility for certain jobs, or for certain sections of work, to sub-foremen or gangers (*q.v.*); usually a practical expert in one or more crafts, or in one or more departments of employer's business; often specifically designated, *e.g.*, bridge foreman (railway bridge construction and repair), foreman clayman (railway), foreman clayburner (*see* clayburner (561)), foreman dyker (cutting or repairing dykes on railway land), permanent way foreman (railway), relaying foreman (railway), renewal gang foreman (railway), foreman of street works, (ii) in building trades, *see* foreman, general (building trades).

foreman, ballast crushing; directs work of gang working on ballast crushing machines, and sees that work is being carried on satisfactorily; keeps records of output of machine, and of material received and sent away; if crushing is done at ballast pit also directs work of men engaged in excavation, and records quantities of material excavated and number of loads sent away; engages and discharges workpeople, as required, usually also keeps time and wage records, and sends records weekly to employer; sometimes also superintends concrete mixing operations, *i.e.*, mixing of ballast with cement and water, where they are carried on in conjunction with ballast crushing.

foreman, bricklayer; bricklayer (charge hand), supervises bricklayers (565) (*q.v.*) engaged on construction of brickwork. usually works under direction of general foreman (*q.v.*), is responsible to him for efficient carrying out of brickwork, and consults with him, as to engaging or discharging bricklayers, gives measurement and levelling instructions to bricklayers, indicates nature of bond required, *i.e.*, style in which bricks are to be laid, and sometimes lays first course, or first two courses as a model for bricklayers; indicates, by measurements, exact position of window and door openings, and position of arches over these; sometimes draws, from

working drawings supplied by general foreman, plan of particular arch required in each position.

foreman, builder's, *see* foreman, general (building trades).

foreman, gas or water (gas and water mains); in charge of gas or water main laying operations in a particular area, or is responsible for upkeep and repair of mains in such an area, receives instructions from headquarters of gas or water undertakings as to laying or upkeep and repair of mains, and passes on such instructions to pipe linemen (559), pipe or service layers (578), and labourers (581) (*q.v.*) and directs their operations; requisitions materials from headquarters, and keeps records of materials received, reports from time to time to headquarters on progress of work; keeps time records of men employed under him; engages or discharges men, as required, directly or indirectly; sometimes tests mains, or supervises tests thereof, to detect possible leakages, using test meter for gas and stethoscope for water.

foreman, general (building trades); foreman, builder's foreman; is responsible to employer and to architect for efficient carrying out of constructional or repair work on a building and consults with them, or reports to them, as required; gives detailed instructions to foreman bricklayer (*q.v.*) and other sectional foremen and to gangers (*q.v.*) as to work to be done; gives them orders, requisitions for materials, and prepares working drawings, for their guidance; often helps in setting or laying out of work, using drawings and specifications supplied by architect; uses theodolite and dipping levels, *i.e.*, large spirit levels, to obtain levels on building site; keeps day work records of casual workmen, and sometimes also keeps time records of all workers, forwarding these records weekly to employer; orders materials required for building, firms, or requisitions them from employer's yards; engages or discharges workers as required, either directly or through sectional foreman.

foreman mason; in charge of men engaged either on a yard, dressing stone for use in building or as monuments, or erecting stone on building site; (i) in yard, superintends work of banker masons (572) (*q.v.*) employed in yard, sets or lays out work to be done by banker masons, from architect's drawings, using set-square, board, rectal templates (which he sometimes cuts out) and various squaring and measuring tools; (ii) on building site, superintends work of fixer masons (572) (*q.v.*) erecting stone on site, under direction of general foreman (*q.v.*); for more general duties, *cf.* foreman bricklayer.

foreman pavior; paviers' ganger, (i) a working foreman (*q.v.*) working with and directing operations of a small number of paviers (579) (*q.v.*) engaged in repair or maintenance of paving; (ii) chief operations, *see* ganger.

large gang of paviers; or of a number of traveller groups of paviers working on different sections of paving job, each under its own ganger (*q.v.*); sets out work according to measurements or pre-arranged plan; issues instructions to gangers or paviers regarding contours, levels, etc.; engages or discharges workers, as required; sends time records and progress reports to headquarters.

foreman pipe layer; superintendent of street pipe laying (waterworks); is responsible to employer, *e.g.*, contractor, town authority, gas or water company, for efficient carrying out of drain, gas, water or other pipe laying job; directs men engaged in laying and jointing of pipes, indicating where, according to plans and specifications, manholes, trenches are to be dug; sees that correct alignment and required gradient are being preserved, using various levelling and other instruments; sometimes sets out

by measurement, or according to plan, exact size and depth of manholes, if any, and directs bricklayers engaged in building them; requisitions for materials from headquarters; keeps record of work done, and reports to headquarters; sometimes keeps time records of men employed, and forwards them to headquarters; engages and discharges workers, directly or indirectly, as required; sometimes also takes test readings of pipes, using compressed air testing appliances for gas, or hydraulic test appliances for water.

foreman platelayer, platelayer foreman; foreman surfaceman (railways). *foreman wayman;* is responsible to railway authorities for upkeep of permanent way of railways, including works, railways or water sidings, and is in charge of platelayers (577) (q.v.) employed thereon; cf. ganger (571).

foreman, road; highway ganger, road ganger, foreman surfaceman (roads). *relaying slip and drainage ganger, slipman and drainage ganger, slipman and drainer ganger;* a foreman (q.v.) in charge of men constructing, repairing, widening or otherwise improving roads and is usually responsible to local authority (in repair work) decides which parts of road are to be torn up with picks or with scarifier, i.e., apparatus attached to steam roller, and instructs workers as to kind of surface required; cf. foreman of street works.

foreman slag crusher, as for foreman, ballast crushing.

foreman, slag mill, as for foreman, ballast crushing.

foreman slater; a foreman (q.v.) who superintends slaters (570) (q.v.) engaged on job, and, on small jobs, works with them; consults with carpenters (474) (q.v.) as to spacing of roof rafters, and with plumbers (232) (q.v.) as to lead or zinc work, so far as these affect slating operations.

foreman surfaceman (roads), see foreman, road.

foreman surfaceman (railways), foreman wayman, see foreman platelayer.

foreman, working; leading hand, (building trade); a foreman bricklayer (q.v.) or other sectional foreman who works at trade side by side with men whom he superintends, usually on a small job; usually works under direction of general foreman (q.v.).

foreman, yard; a foreman (q.v.) in charge of a builder's or other yard and of material or stores contained therein; keeps records of materials or stores in stock and orders new supplies as required; directs loading or unloading of materials.

ganger; in charge of a gang of men, e.g., navvies, engaged on a job or an section of contract, usually under control of a foreman or general foreman (q.v.), whose instructions he passes on to gang; is responsible for efficient carrying out of work by men in gang; sometimes keeps records of men in his gang and recommends to foreman engaging or discharging of workers; sometimes, on smaller jobs, works with the men; often specially designated e.g., ballast ganger (railway), ballast loading ganger, electrification ganger, railway ganger, sand loading ganger.

ganger, bridge tending; a ganger (q.v.) in charge of gang engaged in tarring iron or wood work of railway bridges; gives instructions to scaffolders (564) (q.v.), if such are employed, regarding erection of scaffolds.

ganger, drainage; a ganger (q.v.) in charge of gang engaged in excavating trenches and laying drain pipes therein under instructions from headquarters, e.g., local authority, or from foreman pipe layer or district foreman (q.v.); instructs workers as to correct alignment and jointing of pipes.

ganger, extra; (i) in charge of a gang of men kept in readiness for use in any emergency, meantime performing odd duties; (ii) stands by to take place of working ganger in emergency.

ganger, flying aqued; controls and directs work of gang engaged at place of breakdown on permanent way.

ganger, highway, see foreman, road.

ganger, length (railway); a ganger (q.v.) who is responsible for supervision and maintenance of length or section of permanent way on a railway.

ganger, navy; in charge of a gang of navvies engaged in excavating soil for making permanent way of railways, or in digging foundations for buildings, or trenches for laying pipes, cables, etc.; issues instructions as to depth and width of trenches, etc., and gauges depth of trenches or workings by means of profiles, i.e., T-shaped timber framework, set at intervals along trenches.

ganger, paviors', see foreman pavior.

ganger, relaying slip and drainage; slipman and drainage ganger, slipman and drainer ganger; (i) (railway) controls and directs work of gang engaged in laying drains, etc., or in relaying slips of earth and drainage; (ii) (roads), see foreman, road.

ganger, road, see foreman, road.

ganger, walking (pavior); a ganger (q.v.) employed by local authority, who goes from place to place to see that men, e.g., road sweepers, dust collectors, paviors, steam roller men, working alone or in scattered parties, are carrying on their duties satisfactorily.

head slaker; a foreman (q.v.) in charge of mine borers (580) (q.v.) making trial borings or sinking mine shafts, and in responsible to master slater (580) (q.v.) for efficient carrying out of work; supervises erection of hauling or lifting apparatus at head of shaft; directs borers as to boring tools to be used; sometimes works as a borer.

inspector (sets); a foreman (q.v.) employed at quarry to examine sets made by settmakers (375) (q.v.); sees that sets are properly dressed and true to measurements.

leading hand (building trades), see foreman, working.

plaster house leader; a foreman (q.v.) in charge of plaster house-men (589) (q.v.).

skipper; slang name given to foreman, ganger, leading hand (q.v.).

superintendent of flag yard; (i) in charge of yard where flagstones are stored; keeps records of flagstones received and issued; (ii) in charge of masons (572) (q.v.) dressing flagstones in a yard, and works with them; keeps time records of workers and output of work.

superintendent of street pipe laying (waterworks), see foreman pipe layer.

562.—CLERKS OF WORKS.

clerk of works; represents architect, civil engineer, or building owners at building or other works under construction, to ensure that designs and conditions of contract are duly observed; examines quality of materials; measures up work done and reports periodically.

563.—BUILDERS' (not otherwise distinguished).

builder's bandyman; property fobber, property repairer; has limited skill in all types of building operations, and employed on simple jobs in brick-laying, painting, paperhanging, plastering, and sometimes simple plumbing.

house repairer; a builder's bandyman (q.v.) employed on house repairing; sometimes also performs work of plumber (526) (q.v.).

property jobber or repairer, see builder's bandyman.

564.—BUILDERS' LABOURERS.

black and fall man; fixes pulleys in position on building scaffold, and ropes or chains for working pulleys, by which building material is hauled up to stagings; work usually done by scaffolder (q.v.).

brick chipper, brick cleaner; cleans previously used bricks, ready to be used again, by chipping them with an axe or chopper to remove pieces of mortar or cement adhering to them.

builder's labourer; assists, or waits upon, skilled building trades operative in a great variety of jobs.

drainar (builder's); a skilled navvy (581) (q.v.), or labourer who digs channels, water courses, or sewers, to carry off water or drainage; sometimes lines channel with brick or concrete, usually done by bricklayer (565).

excavator (builder's); (i) a navvy (581) (q.v.) engaged in digging out soil, for foundations of buildings, trenches for drains, etc.; (ii) helps to set up mechanical excavator, e.g., steam navvy, steam shovel, and remove excavated soil in barrows, or shovels it into skips or tubs, etc., for removal.

mortar grinder, mortar mill grinder; shovels rubble, bricks, sand, stone, lime, cement, or other materials into pan of machine, which either grinds them, simply, in dry state, or grinds and also mixes them into mortar; in latter case, regulates by means of top flow of water into pan; shovels ground and/or mixed material out of pan when operation is complete.

mortar mill labourer; assists mortar grinder (q.v.) in shovelling materials into mortar grinding or mixing machine, and in removing ground material, or mortar, therefrom; sometimes also wheels materials to machine, and wheels powdered material or mortar away, in a barrow.

mortar mixer; mixes mortar, for use of bricklayer (563), mason, (572), etc. (q.v.); makes ring of sand, with shovel, and shovels lime into centre of ring; pours water on lime, to slake it; when it is slaked, pours on more water, draws sand into lime with a long-handled tool, i.e., larry, and works material to and fro until they are thoroughly mixed; prior to mixing, sifts sand, if necessary, with a hand sieve or by throwing it, with a shovel, against a vertical sieve.

mosaic worker's labourer; a builder's labourer (q.v.) who mixes sand, cement, and water with a shovel, in correct proportions, as instructed by foreman (563) (q.v.); carries mixture to mosaic worker (571) (q.v.) for use in making cement bed for mosaics; also makes a slurry of cement with water by stirring it about with shovel to make liquid cement for pouring over mosaic when laid; carries slurry to mosaic worker in pail or other receptacle.

pug mill machineman, pug mill worker; see corner grinder; pug mill is commonly thought of as used in building trade to denote an edge runner mortar grinding pan, driven by power; cf. pug miller (119).

rigger, scaffold rigger, see scaffolder, scaffolder, scaffold builder; rigger, scaffold rigger, slinger, staging hand; (i) sets up vertical poles, and secures them firmly in earth or in tubs filled with soil or concrete horizontal and diagonal poles, and pulleys, i.e., short horizontal poles at right angles to longer horizontal poles, thereto with ropes or chains, and tightens knots in ropes or chains by hammering wedges into them; (ii) erects and secures bays for staging on which bricklayers (565), etc. (q.v.) work; erects pulleys, or blocks and falls, for use in raising material to stagings; (iii) erects patent screwbolting, i.e., steel tubes fitting into one another, which is secured by bolts.

altagar, *see* scaffolder.
staging hand, *see* scaffolder.

yard boy; engaged upon light unskilled labour in or about the yard, *see* *yard boy*.
yard sweeping and stacking material.
yard man; does the heavier type of unskilled labour in builder's yard, *e.g.*, loading and unloading material, stacking heavy material, and preparing tracks of materials for jobs, as required.

666.—BRICKLAYERS.

boiler fixer, boiler setter, boiler setter; a bricklayer (q.v.) who builds brickwork foundations or setting for boilers and fixes boilers in position.
brick archer, brick arch builder, brick arch man; a bricklayer (q.v.) who specialises in building arches of fire chambers or kilns, furnaces or ovens.
lays bricks, usually fire bricks, or spreads fire clay, on wooden centring, *i.e.*, framework in shape of arch erected by carpenter (174) (q.v.), and removed when arch is set.

brick cutter; a bricklayer (q.v.) who specialises in setting out and cutting of bricks for fire arch or pier work, *i.e.*, gauged work; makes working drawings from plan, on setting-out board, exact shape of each separate brick being indicated; cuts bricks, *i.e.*, a special soft kind known as cutting bricks, to required shape with wire saw, using both mallets, boxes, and/or wooden templates; rubs bricks smooth, after cutting, on flat stone; sometimes done by gauged arch fixer (q.v.).

brick kiln builder; a bricklayer (q.v.) who builds kilns for burning bricks.
brick kiln repairer; a bricklayer (q.v.) who repairs kilns for burning bricks.
bricklayer; *bricklayer* (always); lays bricks in lime or cement mortar so that wall, etc., is tied well together, and in such a way as to avoid continuous vertical joints; lays foundations, damp courses, etc.; sometimes specifically designated according to purpose for which bricks are laid, *e.g.*, furnace bricklayer, sanitary bricklayer.
bricklayer, firework; furnace bricklayer; muffle bricklayer; furnace builder, muffle builder; (i) a bricklayer (q.v.) who builds brickwork of furnaces for factories, etc.; (ii) *see* furnace liner.

bricklayer (pottery); a bricklayer (q.v.) who bricks up oven doorways *i.e.*, clammings, when oven is ready for firing; does other similar work requiring skilled bricklaying, specially adapted to pottery's oven.
bricklayer, sanitary; house drains layer, house drain repairer; a bricklayer (q.v.) competent to lay and test house drainage, and to build in brick manholes, inspection chambers, etc.
brick setter; a bricklayer (q.v.) who builds foundations for boilers, or builds and repairs furnaces.

brickly (slang), *see* bricklayer.
chimney builder, chimney repairer; *fixe* builder; a bricklayer (q.v.) who specialises in the building or repair of chimneys, flues, etc.
cupola outdrier, cupola fettler, cupola repairer; a specialised bricklayer (q.v.) who builds or repairs cupolas, lining with fire brick; patching with clay is done by cupola rammer, cupola tenter (180) or foreman; *cf.* bricklayer, firework.

cupola rammer; rams refractory material between firebrick lining and iron shell of cupola, with long handled iron tool; usually done by cupola builder, fettler or repairer (q.v.).

fettler (steel works); repairs lining of converters, cupolas or furnaces with refractory material, between heats; fills up cavities formed by action of corrosive slag, and parts which have crumbled away owing to high temperature; also repairs top holes and inbye parts; sometimes done by furnacemen (171) (q.v.) and his helpers; *cf.* fettler (183).

fireplace fitter; a bricklayer (q.v.) who builds fireplaces and fixes in iron grates, marble surrounds, etc., *cf.* range builder.

fire builder, *see* chimney builder.
furnace builder, *see* bricklayer, firework.

furnace liner; firework bricklayer, furnace bricklayer, muffle bricklayer; a bricklayer (q.v.) who lines furnace with firebricks or blocks set in fire-clay or a fire resisting cement.

furnace repairer; a bricklayer (q.v.) who is engaged in repairing brickwork of furnace.

gauged arch fixer; a bricklayer (q.v.) engaged in building gauged arches, *i.e.*, arches made of bricks specially shaped by cutting, generally cuts as well as fixes bricks; *cf.* brick cutter.

grave builder; a bricklayer (q.v.) employed at a cemetery in building brickwork of graves, vaults, etc.

house drain layer, house drain repairer, *see* bricklayer, sanitary.

muffle builder, *see* bricklayer, firework.

oven builder, oven maker, oven repairer; a bricklayer (q.v.) who specialises in building or repairing bakers' ovens, or other ovens for heating or drying.

oven liner; a bricklayer (q.v.) who lines the inside of ovens with fire bricks; often done by oven builder (q.v.).

pointer, brick pointer, house pointer, tuck pointer; picks out old mortar from joints of brickwork and replaces with finely prepared mixture of cement and sand, using a special small trowel, called a pointing trowel; in tuck pointing, points with mixture of cement and sand coloured to tone with brickwork; finishes pointing with a fine joint of white or black mortar, applied with a tuck pointing tool; generally done by a bricklayer (q.v.), but some men specialise in pointing, and cannot lay bricks.

range or stove builder, range fixer; *fixure* setter, *stove* setter; a bricklayer (q.v.) who erects brickwork of stoves or ranges, *e.g.*, sides or jambs and flues; receives ironwork of stove or range in sections, bolts or screws them together and builds them in with brickwork setting pieces by piece, with fire-resisting cement.

retort builder; retort setter; a bricklayer (q.v.) engaged in building gas retorts of firebricks and fireclay, *i.e.*, series of arched furnaces used in production of coal gas at gas works; also builds brickwork flues connected therewith.

retort mender, retort patcher; a bricklayer (q.v.) who repairs retorts by relining with fireclay bricks; or by mixing fireclay, placing quantity on end of long rod or pipe, inserting pipe into retort, depositing fireclay in hole or crack to be mended, and working it well into position.

rockwork builder; sets in cement old broken bricks, rock stone and rubble to form walls or rock gardens and borders.

setter, *fixure*; stove setter, *see* range or stove builder.

setter, retort, *see* retort builder.
sewer builder; a bricklayer (q.v.) who builds such sewers as are of brick construction; also lays pipes to which household drains are connected.

terra cotta fixer; a bricklayer or a mason (32) (q.v.) who fixes terra cotta tiles, other than roofing tiles, or terra cotta facing blocks; sometimes also fixes ornaments, *e.g.*, statues, vases, etc., to fronts of buildings in similar manner to ordinary brickwork or stone-work.

trumpet maker (blast furnace); a fettler (steel works) (q.v.) who lines vessel, through which molten steel passes in Siemens process, with either composition or firebrick.

566.—BRICKLAYER'S LABOURERS.

bricklayer's labourer, bricklayer's assistant, bricklayer's board carrier, bricklayer's hod carrier, bricklayer's hodman, bricklayer's tender; *hod carrier*, *hodman*; mason's mortar; carrier mortar, bricks, etc., to bricklayer (565) (q.v.) and waits on bricklayer generally.
hod carrier, hodman, *see* bricklayer's labourer.

567.—PLASTERERS.

architectural modeller; a plasterer (q.v.) who specialises in making by hand, with wooden tools known as scapels, models to scale in plaster of Paris, clay or gessoine, from architect's design; makes the moulds from such models by pouring liquid plaster thereon.

tempo press man, compo press worker; measures required quantities of ingredients, usually resin, whiting, glue and oil, to make "compo," or composition for relief decorative work; ingredients vary, according to different qualities of compo required, known as "composition," "carton pierre," and "papier maché"; beats each ingredient in a separate copper or jacketed boiler, which is heated by steam generated by gas; regulates heat of copper; mixes contents of each copper by stirring it by hand; pours contents of all four coppers into a tub or other receptacle, and mixes them together, with a long piece of wood, to consistency of putty; cuts compo when mixed, into suitable slices by hand with a knife, and places these pieces on floor of workshop to cool; when required for mounting on wall or cornice, re-beats compo in steam-heated boiler to consistency of putty, and presses it into specially prepared wooden moulds by hand; then puts moulds into hand press and presses compo and moulds with hand levers; removes moulded compo from press and trims it, by hand, ready for mounting.

throwa fixer; nails or screws fibrous plaster on walls or ceilings; fills in joints and sometimes finishes corners or mitres, with specially prepared plaster, using trowels and other hand tools; sometimes done by a plasterer (q.v.) specialising in such work.

throwa plasterer; a plasterer (q.v.) who applies plaster with a trowel to a cotton sheet held in a rough framework of laths, "stick and rag work"; builds up plaster ornaments, *e.g.*, ceiling cornices, "roofs" for ceiling centres, in plastic state, and applies wooden moulds thereto to give shape of article required; finishes-off plaster ornaments with trowels and other hand tools.

lath nailer, lathbar; nails laths in position ready for plasterer; in many parts of country done by plasterer (q.v.).

plasterer; applies plaster with plasterer's trowel and float to walls, ceilings, partitions, etc., to render a smooth hard surface; sometimes previously affixes laths over which plaster is spread.

rough carter; (i) prepares surface of exterior walls with groundwork of cement or lime mortar and finishes with washed shingle, the shingle being thrown on to surface before mortar is set; (ii) throws rough mixture of shingle and lime mortar on surface of exterior walls. (iii) directs mechanical means of removal of mortar, and calls-pumpers, streams of mortar, and afterwards shingle, on to exterior surface of walls.

stucco carver, stucco pointer; carves designs on cement work or stucco, on exterior of a building, when it is partly set, or draws lines on otherwise plain work representing blocks of stone, using small pointing trowels or other tools.

568.—PLASTERER'S LABOURERS.

plasterer's labourer, plasterer's mixer, plasterer's server; works with plaster (567) (q.v.) and mixes or prepares materials and hands them to him, or carries them in a hod to the scaffold on which he is working.

569.—GLAZIERS.

decorative glass worker; makes decorative glass panels or windows, following an artist's design; cuts ornamental and coloured glass into various shapes by a diamond cutter, and fits them into lead or copper channels in a framework; solders joints with soldering iron or with blow-pipe and solder.

glazier, cuts glass and fits it into window frame with putty; is also done subject to vibration, e.g., of carriages, motor cars, shop windows, etc., fits frame edging over rubber or leather packing, round the glass.

glazier, church lead, see glazier, fret.

glazier, fret; church lead glazier, fret lead glazier, glazier (stained glass windows), lead worker in stained glass; his together stained glass windows for churches, etc., by cutting and fixing pieces of stained glass with putty or cement into strips of grooved lead, which he solders together, in accordance with artist's design; usually done in manufacturer's workshop, but sometimes in building where the roof is to be placed; cf. lead window maker.

glazier, first lead, see glazier, fret.

glazier, lead, see lead window maker.

glazier, patent; cuts to proper shape and inserts in rebates of patent section frames, sheet or moulded glass used in patent glazing.

glazier, pavement lighter; mixes cement and spreads a sufficient quantity in packets of iron frames for pavement lights cast to shape; when cement is partly set presses glass moulds or prisms into position; may add iron spikes or slabs or other fittings to prevent undue wearing of cement; in repair work, first cuts out worn or broken glass with hammer and cold chisel.

glazier (stained glass windows), see glazier, fret.

lead light fixer; inserts metal bars, by hand, in window frames; dips lead lights, decorative glass in lead framework, to these bars with wire; where metal frames are used, sometimes fixes lead lights to metal frames with screws; work sometimes done by carpenter (474) (q.v.).

lead light maker, see lead window maker.

lead window maker; lead glazier, lead light maker; makes leaded windows by fixing small pieces of white glass or white and coloured glass in a lattice framework of lead with putty or cement in accordance with a simple design.

lead worker in stained glass, see glazier, fret.

plate glass fitter; a glazier (q.v.) who specialises in cutting and fixing plate glass.

three branch hand; a glazier (q.v.) who can also undertake planing and painting; applies only to small country shops.

window glass cutter; cuts glass to measurement for window frames, doors, etc., by hand, using diamond cutter, measuring rules and T square.

570.—SLATING AND TILING.

asbestos slater; paper slater; fixes by hand, with hammer and nails, asbestos slates, tiles, or sheets used instead of slates on roof.

blue slater; a slater (q.v.) who works in blue or ordinary slates, as distinct from grey slates; cf. grey slater.

felt roofer, feltier; covers roof with "felt" before it is slated; and fastens down with hammer and nails.

grey slater; Westwoodland slater, parchmenter slater, parchmenter rough caster (slater); a slater (q.v.) who works in parchmenter or grey slates; requires more skill and experience in matching, bedding and trimming, owing to difficulties of material worked in.

paper slater, see asbestos slater.

parchmenter rough caster, parchmenter slater, see grey slater.

roof repainer; a slater or tiler (q.v.) who repairs damaged roofs.

roof tiler; instructs carpenter as to correct distance between battens on roof, which depends on size of tiles; nails tiles to battens; trims tiles to fit awkward places in roof, with hammer and chisel or with special cutting tool; fixes and torches ridge tiles, cf. slater.

rough caster (slater), see grey slater.

sheet asphalt roofer; an asphalt layer (570) (q.v.) who spreads hot asphalt brought to him by a labourer, on flat roof, using hand trowel, wooden float, or a similar tool.

slater; sorts slates into "clumps," i.e., into groups of approximately equal thickness, and takes care that those in same clump are fixed together, to preserve uniformity; sees that labourer leads roof properly; trims edges of slates, with a chopping tool called "axe"; marks, with a gauge, places where holes are to be pierced in slates and pierces holes, where indicated, with a spike attached to axe; nicksches slates to roof with hammer and nails; fixes ridge tiles and torches them, i.e., secures them by filling interstices with mortar; in repairing roofs, rips out mulla from damaged slates with a metal tool known as a "rip," inserts new slates and secures them in position with chips of lead or slate.

tiler, see roof tiler.

vulcanite roofer, vulcanite rooding layer; lays hot vulcanite on flat roofs; as for sheet asphalt roofer.

Westwoodland slater, see grey slater.

571.—TILE LAYERS; MOSAIC WORKERS AND COMPOSITION FLOOR LAYERS.

cast worker (terrazzo); a terrazzo hand (q.v.) who casts terrazzo mosaic (made of stone cubes without set design) in wooden moulds; sometimes makes mould himself to required design, or takes mould from stock; coats mould with oil to prevent adhesion of cement; places coloured cubes of stone in bed of cement in mould; removes mosaic when set and rubs surface smooth with gritstone.

composition floor layer, composite decklayer; fireproof floor fitter, fitter or maker, floor layer, floor plasterer, jointless floor layer, polished floor layer, lay "composition" or mosaic floor; sets up one or more gauges on floor to be covered, indicating depth of composition which is to be laid thereon; spreads floor composition, which he sometimes also mixes, usually by adding water and stirring with a shovel; draws "straight-edge" rule, about 12 feet long, across surface to level it; "finishes" surface by adding another layer of composition and smoothing it with trowels, wooden floats or similar tools.

encaustic tile fitter; fixes encaustic tiles on walls, either with screws or by spreading cement on walls and setting tiles therein; cuts tiles to shape with hammer and chisel if necessary.

encaustic setter; a bricklayer (565) or plasterer (567) (q.v.) who sets encaustic tiles in position in a bed of cement.

faience and mosaic fitter, faience worker; fixes faience or mosaic tiles or panels with screws or in cement on

interiors or exteriors of buildings; see rough tiler, and mosaic worker.

fireproof floor fitter, layer or maker, floor layer, floor plasterer, see composition floor layer.

hearth maker, see tiler.

jointless floor layer, see composition floor layer.

marbles man; a mosaic worker (q.v.) who lays marble mosaic doors, etc.

mosaic cutter; cuts or breaks up variegated pieces of stone or glass in a workshop, with hammer or mallet, and chisel, sets out selected fragments of stone or glass as cut or broken; frequently gets pattern drawn to scale, on sheets of brown paper, and attaches it thereto with adhesive, to form mosaic panel in reverse.

mosaic fitter, mosaic setter; (i) (terrazzo worker) mixes cement and stone chips, constituting mosaic pattern, on floor and rolls it several times; before final rolling, satisfies himself that mosaic is laid to correct thickness and sprinkles a topping of stone chips in cement; sometimes also does work of polisher (q.v.); (ii) (designer, mosaic artist, etc.) cuts away wall or other surface with hammer and chisel if not previously properly prepared for mosaic panel; mixes cement and spreads it with trowel and float over surface; presses reverse side of mosaic panel (see mosaic cutter) upon it, wipes away surplus cement and when set, washes off brown paper; touches up face of design by filling in cement or rubbing with gritstone.

mosaicist, mosaic worker, mosaic pavement maker; venetian pavement maker; (i) mason's term for all workers in mosaic, including mosaic cutter, mosaic fitter, mosaic setter, polisher (q.v.); (ii) a tile layer (q.v.) laying or fixing mosaic tiles.

patent floor layer, see composition floor layer.

polisher (mosaic); rubs surface of mosaic floor after it has been laid by mosaic fitter (q.v.), with gritstone, to render it perfectly smooth and to polish it.

terrazzo hand, terrazzo worker; a mosaic worker (q.v.) working in terrazzo, i.e., ordinary pavement work as distinguished from picture or design work in mosaic; sometimes work of cast worker, mosaic fitter and polisher (q.v.).

terrazzo worker; cuts tiles to exact size to form tessellated pavement; usually done by tile manufacturer's works; may also lay and fix tiles.

tiler, tile fitter, tile layer; Acrob maker; fixes and sets tiles in cement on floors, hearths, walls, round ranges or grates, etc.; may be done by bricklayer (565) or plasterer (567); sometimes specifically designated according to place tiled, or tile laid, e.g., mosaic tile fitter, mosaic tile pavior, range tiler, tessellated tile fitter, wall tiler.

tile slabber; cements together tiles and glazed bricks to form hearths, kerbs, range surround, etc.

venetian pavement maker, see mosaicist.

wall tiler, see tiler; may also be done by bricklayer (565), especially where walls represent banded brick work.

572.—MASONS.

archer (colliery working); builds of stone and repairs arches of permanent ways in collieries; as for mason.

banker hand, hewer or mason; hardstone banker mason; cuts and if necessary, saws, blocks of stone at "banker," bench of heavy timbers, using heavy hammer or mallet and chisel, or saw, and sine template, which indicates required size of stone; gauges stone with calipers or other measuring tool; dresses, i.e., finishes, stones either on dressing machine or, more usually, by hand, using mallet or hammer and chisel.

builder mason, Scotch and Cornish term, see fitter.

sculpture mason, *see* monumental mason.

cheek and corner maker; a mason (q.v.) who shapes or gauges and dresses "cheeks" and corner stones.

chimney piece maker (stone), *see* mantelpiece maker.

curb maker (stone); a mason (q.v.) who makes stones of marble "curbs," or ledgers, for fireplaces.

dry waller, *dry fence waller*, *dry stone waller*; *fence waller*, *stone hagger*; a mason (q.v.) who builds "dry stone" walls, i.e., walls made of rough stone, without mortar.

dyker; builds, by hand with hammer, trowel and straight edge, i.e., long rule, stone portion of dyke or ditch usually of roughly shaped stones and sometimes without cement or mortar.

fence waller, *see* dry waller.

fixer, **fixer mason**; **builder mason** (Scotland and Cornwall); a mason (q.v.) who receives stone blocks already cut, shaped, and usually dressed by banker mason (q.v.); lays and fixes them in building with cement or stone mortar; instructs labourers (573) (q.v.) as to rigging pulleys, or blocks and falls, for lifting material; if further dressing required, dresses stone with mallet, or hammer, and chisels; in fixing, uses mallet and trowel, spirit level, rules and straight edges; does some distorting, i.e., lays bricks, cf. bricklayer (563).

granite settler; a mason (q.v.) who fixes granite blocks in buildings.

gravestone maker, *see* monumental mason.

hardstone banker mason, *see* banker mason.

haewy; term used in parts of Scotland for banker mason (q.v.).

knobbler; prepares and squares corners and edges of blocks of Kentish rag, i.e., Kentish sandstone, with hammer and chisels for use on buildings.

machine mason; a mason (q.v.) who works in mason's yard operating "cogger" or other machines for planing or dressing stone, with assistance of labourers (573) (q.v.) or by operating derrick or other lifting apparatus; planes stone to be machines on bed of machine; if stone needs raising drives wedge under it; operates clamping or other device to secure stone in place and to adjust cutting, planing, or dressing tools to required position; moves lever to switch on or off power-drive of machine, as required; sometimes grinds tools of machine by hand on a grindstone.

mantelpiece maker; **chimney piece maker (stone)**; a mason (q.v.) who cuts and makes mantelpieces of stone. **marble mason**; (i) cuts and shapes marble with mallet or hammer, and saw, cf. banker mason; finishes marble by rubbing it with rubbing stone, stone or marble on which he sprinkles water and sand as abraded; sometimes also lays blocks of marble in wall, pavement, etc.; cf. fixer; (ii) a monumental mason (q.v.) working in marble.

mason, **stone mason**; (i) cuts, shapes and dresses stone for use in building or as tombstones, monuments, etc.; or erects stones in buildings; usually either a banker mason or a fixer (q.v.); cf. machine mason, marble mason, etc.; sometimes specifically designated, e.g. mason in tin floors (tin mason); (ii) in shipyards, lays and concretes foundations for machinery; (iii) in foundries, engineering shops, etc., cuts, lays and fixes in cement foundations for furnaces, boilers, machinery, etc.

monumental mason, **monumental marble mason**; **sculpture mason**, **gravestone maker**, **toad maker**; cuts, with hammer, mallet and chisels, stone or marble for, and erects, monuments, tombstones, etc.; uses cutting lathe on occasion; may also carve simple designs and engrave inscriptions, cf. gravestone cutter (574).

rubble waller; a waller mason (q.v.) who constructs walls of undressed stone. **scutcher**; cuts stone or brick for mason's use with "scotch" or bricklayer's tool comprising flat blade set in handle at an angle; usually done by waller mason (q.v.).

stone ditcher, **stone fence**, **stone and fence waller**; builds stone boundary walls or "fences" of rubble (small stone) or broken flints, slabs, etc.

stone hagger, *see* dry waller.

stone masons tacker; a mason (q.v.) who fixes masonry blocks with mortar or artificial blocks, or with a layer of artificial stone while still plastic and before it has set.

tomb maker, *see* monumental mason. **waller**, **waller mason**, **walling mason**; wall mason; sets in position, stones of walls, bridges, docks, river banks, etc., and sees to their being well pointed and bonded; often also "scutches" his own stone, especially when using flints; cf. scutcher.

whinstone dyker; a mason (q.v.) who builds dykes or ditches of whinstone; cf. dyker.

573.—MASON'S LABOURERS.

mason's assistant, **mason's labourer**, **mason's tender**; **mason boy**, **mason carrier**, **shed labourer**, **stone rubber**; assists mason to lift and dress stone; makes and carries mortar; does various kinds of unskilled work; looks after tools; sometimes specifically designated, e.g. monumental mason's labourer.

mason boy, or **carrier**, *see* mason's assistant.

rubble dresser; prepares, i.e., breaks up with hammer or picks out suitable pieces of "rubble," i.e., pieces of undressed stone used for filling in; usually done by mason's labourer (q.v.).

sawyer's rubbing bed hand; **stone rubber**; a mason's labourer (q.v.) who rubs surface of sawn stone with a piece of harder stone, sand, and water to give it a smooth surface.

shed labourer, *see* mason's assistant. **stone rubber**; (i) *see* mason's assistant; (ii) *see* sawyer's rubbing bed hand.

574.—ARCHITECTURAL, MONUMENTAL CARVERS.

architectural sculptor, *see* stone carver.

architectural sculptor; a highly skilled stone carver (q.v.) who carves designs or figures, from designs furnished to him, for church decoration; sometimes also carves in wood, cf. ecclesiastical wood carver (585).

letter engraver, **stone engraver**; **letter cutter**; sketches lettering of inscription in pencil on stone, marble, etc.; cuts out letters with graving tools and chisels, and sometimes also points them with hand brushes and paints; where lettering is to be lead filled, recesses letters, i.e., cuts them more deeply; may also fill recessed letters with molten lead; when lead has cooled, planes off projections to leave smooth surface; sometimes specifically designated, e.g. marble engraver, monumental engraver, monumental letter engraver, monumental marble engraver, tombstone engraver. **foliage carver**; a stone carver (q.v.) who specializes on foliage designs.

gravestone cutter; a stone engraver (q.v.) who cuts inscriptions on gravestones.

letter cutter, *see* engraver. **marble sculptor**, *see* stone carver.

monumental sculptor; a stone carver (q.v.) who is sufficiently skilled to carve elaborate monuments, figures, etc.

sculptor's pointer; indicates, by means of special measuring instrument, called a "pointer," for guidance of sculptor or stone carver (q.v.)

where relief points are to appear in sculptured or carved design, and chips away, with hammer, or mallet, and chisels, superfluous stone, marble, etc., ready for sculptor or carver. **stone carver**; **architectural sculptor**, **marble sculptor**; cuts or carves, with special chisels and mallet, into a design prepared by architect, blocks of stone, sometimes roughly shaped for him by sculptor's pointer (q.v.).

575.—STONE CUTTERS AND DRESSERS.

apprentice settler, *see* sett maker's apprentice.

blocking dresser, *see* quarry mason.

burnishing stone maker, *see* cutter, burnishing stone.

cutting stone maker; cuts and smooths stones, weighing about 25 lb. for the game of "cutting," by hand, with chisels, hammer, measuring gauges and calipers.

cutter, **stone cutter**; cuts to shape and size by hand with hammer and chisel, or by machine saw (cf. sawyer), various kinds of stone, i.e., millstones, whinstones, tombstones, etc.; may also dress stone (cf. dresser).

cutter, **burnishing stone**; **burnishing stone maker**; uses a lapidary machine, fitted with foot, trestle, or handle, and with a saw, or whittler, for cutting square stones, also with a horizontal grinding wheel, usually platinum faced, for grinding surface of stone, holds stone against revolving wheel of machine, afterwards polishes stone by holding it against revolving buffing lathe fitted with wooden or hide leather wheel, also cuts, grinds, and rubs away waste stones for setting into brooches, rings, etc., by same methods.

cutter, **hons**, **oilstone** or **whinstone**; **benefice maker**; sets gauges and controls larer of machine which cuts or saws sand-stone of different grades of fineness and hardness; may also smooth by rubbing on sand table.

cutter, **sett**, *see* sett maker.

cutter, **trough**; cuts or works out cavity in a large block of stone to make drinking trough, using a special hammer, head of which is pointed at both ends; gauges correct dimensions of cavity with various measuring instruments.

dresser, **stone dresser**; **dresses**, i.e., gives required form and surface to articles of stone, by hand, using chisel, punch and hammer and rubbing with abrasive block, sand and water, or by power-driven clamping, planing and soiling machine, or by both. **dresser**, **chert** or **flint**; cleans flint with a pick before breaking and dresses according to quality.

dresser, **flag** or **paving squarer**, **stone squarer**; cuts or squares paving stones already chert to approximately required thickness by stone cutter (q.v.); squares them and dresses their face, i.e., removes irregularities, using mallet or hammer and chisels, rule, set square, measuring tapes, etc. **dresser**, **kerb**; roughs dresses granite, etc., in kerbs with chisel, punch and hand hammer (about 6 lb.); hatts down or finishes off surfaces required smooth with patent axe or pick, cf. kerbstone maker.

dresser, **millstone**; a dresser (q.v.) who also cuts grooves in grinding surfaces of millstones, and resharpsens them when worn; cf. stone-mill.

finer, *see* dresser.

finestman (emailed marble manufacturer); smooths marble, by holding it of revolving sanding table. **granite roll maker**, **granite roll truer**; cuts with special hammer, mallet and chisels and dresses granite rollers for paint making machine; trues up on polishing lathe. **grinder**, **stone grinder**; (i) sets gauges and cutting or grinding edges of machine which grinds face of stone (e.g. lithographic stone); places slab on bed of machine and controls

grinding by means of levers, (ii) pommers; throws or shovels broken stone into hopper or chute of grinding mills and removes pulverized stone.

grindstone maker; makes grindstone throughout, i.e., cuts, dresses, sounds, etc., with hand tools; nearly obsolete.

grindstone moulder; bores hole at centre, inserts and fixes, with cement or lead, steel axle in grindstone and mounts it in position for running.

grindstone rounder; dresses face of grindstone by hand with hammer, or mallet, and chisels; also cuts stone to required diameter and shape with head tools, using templates or moulds, cf. grindstone turner.

grindstone turner; forms grindstones of required diameter, by means of lathe, and cutting tool.

hammerer, see sett maker.

homestone maker, see cutter, bone.

kerbstone maker; both cuts (see cutter) and dresses (see dresser), polishing etc., by operating treadle, moving lever, pressing button, shifting small driving belt, etc.; sets gauges, cutting edges or dressing surfaces; fixes stone on bed at machine, cf. machine mason (572).

marble chimney piece maker; general term for workers engaged in cutting with hammer, mallet and chisels, or, by machine, and dressing marble chimney pieces.

marble turner; cuts marble in cylindrical form, etc. on lathe; sometimes specifically designated, e.g., monumental marble turner.

millstone builder, millstone maker; (i) cuts rough pieces of natural French burstone, by hand with hammer and chisels, into shaped blocks forming segments of a circle; places segments in position on a "base" on which are marked shape of circle and of segments using an adjustable template; after mass has been bound with hoop iron by blacksmith, may dress or finish stone and cut furrows on its surfaces by hand with hammer and chisel, cf. dresser, millstone; (ii) mixes, i.e., shovels, crushed burstone grit or emery grit with special cement and water; removes mould when mixture has hardened; may also dress bound stone as in (i).

mlager; sett finisher, settman finisher; a sett dresser (q.v.) who finishes "setts" roughly blocked out by sett maker, by chipping them with a sharp-pointed hammer, producing a flat paving stone (not stone flag), different from ordinary sett.

olistone maker; makes olistone, used for steel sharpening, by holding a piece of trolley rock or fire whitstone against a circular saw, to cut to shape; then holds cut piece of rock or stone against a "spinner," a small revolving padded iron disc, to polish it.

olistone maker, Turkey, see whetstone maker.

pommers, see grinder.

paving cutter; (i) see sett maker; (ii) a stone cutter (q.v.) shaping flag-stones with hammer and chisels.

pickler, see stone picker.

pitching maker; rough stone breaker; (i) makes pointed stones for haunches of new road; generally uses scabbling hammer, i.e., hammer with square ends, for dressing stone; cf. scabbler (572); (ii) makes rough rubble for pitching sides of embankments, culverts, etc.

polisher, stone; polisher; uses various abrasive powders and smoothing machine (jenny hand or spinner) to give polish to stone, e.g., lithographic stone, marble, etc.; may also

polish by hand on occasion; sometimes specifically designated, e.g., lithographic stone polisher, marble polisher.

polisher (enamelled marble); tender (enamelled marble); polishes enamelled surface of marble, after stoving, by rubbing it by hand with rotten stone.

pulpstones maker; a cutter and dresser (q.v.) who makes with hammer, mallet and chisel large mill stones for grinding wood into pulp for paper making.

quarry mason; blocking dresser; with hammer and chisel prepares stone to leave quarry, except such kinds as require dressing; works chiefly on beams, girders, blocks, coping, quoins, and other kinds of stone used in engineering constructional work.

random maker; cuts pieces of rock with pneumatic hammer, or with pick, hammer, and wedges, and shapes them into rough paving stones. "Random" sets, to any convenient size.

rough stone breaker, see pitching maker.

rubbing stone maker, rubbing brick maker; prepares a mixture of grit, stone and binding material, and moulds it to shape and use required for use in smoothing or cleaning surface of stone or brick.

rubbingstone rubber; trues up rubbing stones, used for producing smooth surfaces on stone, marble, etc., usually by rubbing them together.

setter (i.e. enamelled marble), see polisher (enamelled marble).

sander-at-saw; feeds with sand, and keeps wet with water to facilitate cutting, saw blades in stone cutting machine, usually while blades see working.

sawyer, stone sawyer; cuts stone with hand saw or operates machine saw.

sawyer (marble, enamelled marble); cuts marble with iron blades fed with sand and driven by hand or machinery; wire saws seldom used.

sawyer, swagge; one of two men who push barbed wheels, or formers, and swagge saw suspended over the piece of stone to be sawn.

scythestone maker; stone rubber; cuts and dresses, i.e., smooths and polishes, scythestones; in Flintshire chips stone by hand, and grinds it into shape by rubbing on hard slab; in other parts, sometimes works by machine.

seg maker, segment maker; cuts with hammer and chisels segments out of gritstone for building up grindstones.

sett maker; dresses, trims "setts" (stone paving blocks, generally of granite) to right size and shape for paving; generally done by street mason (579); (q.v.).

setter, see sett maker.

sett finisher, settman finisher, set mldger.

sett maker; block squarer, hammerer, knapper, knob maker, pointing cutter, sett cutter, settler, settman, squarer, stone squarer, wallstone dresser; cuts stone, granite, basalt, whinstone, into rough blocks with heavy hammer (shell, or maul) and then trims them into "setts," i.e., small blocks, of specific dimensions, for road making, with scabbling hammer (8-10 lb.) or with other hand hammers (tiffier or reel); does not use machines, except for blocking out rough cubes or jacks; sorts out his work at end of day for weighing and resawing; see also grinder; in a few quarries also does work of block cutter (572) (q.v.); cf. settman (572).

sett maker's apprentice; apprentice settler; assists sett maker (q.v.) generally and learns trade.

settman, see sett maker.

slate slider; cleans and levels, by filing, surface of slabs of slate for use in switchboard making.

squarer, block, see sett maker.

squarer, stone squarer; (i) see sett maker; (ii) see dresser, flag or paving, stone cleaver; drills holes with hand

drill on edges of blocks of stone, marble, etc., and inserts, and drives home with hammer, set wedges, thus forcing material apart.

stone drafter; stone marker; outlines from measurements, or with metal template or mould, shape of stone to be cut, using quarryman's black, usually done by foreman (561) (q.v.).

stone mchling, see mchling.

stoneman, miller's stoneman, stone-dagger; cuts furrows in grinding stones according to a formula with a "mill bill," a small tool like a basket; sometimes also assembles grinding stones, supervises their working, and makes any necessary adjustments in working.

stone marker, see stone drafter.

stone pestle and mortar maker; a cutter (q.v.) or stone machinist (q.v.), who, with hammer, mallet and chisels, or with sawing, dressing, planing, etc., machine, makes pestles and mortars and sticks of stone.

stone picker; picker; separates by hand, good from inferior stone; cf. picker (572).

stone planer; smooths surface of stone with plane, generally by coulter machine; see machinist.

stone rubber, see scythestone maker.

stone slate maker; cuts to required length and width, and if necessary, splits to required thickness, slabs of stone, "rooking stones," used in place of tiles or slates for roofing.

stone turner; works lathe for turning stone columns, balustrades, etc.

wallstone dresser, see sett maker.

whetstone maker; dresser (q.v.) who shapes and dresses whetstones with planing and smoothing machines after cutting.

576.—SLATE WORKERS AND SLATE MASONS.

boxer (enamelled slate); a slate mason (q.v.) who clamps enamelled slate sections of mantel-piece together with iron bars and bolts.

chimney piece maker (slate); a slate mason (q.v.) who cuts slate slabs, for manufacture of chimney pieces, with a circular machine saw, and fixes pieces together, in the works, with plaster.

cleaver, see splitter.

cutter; sorts rubble, i.e., odd lumps of slate and marble, taken from those pieces of sufficient size; cf. splitter.

cutter, slate cutter; sets gapes and cutting saw or knives of machine which cuts slates to various sizes with saw or knife; places slate slab on bed of machine; controls machine by means of levers; removes and stacks cut slates.

cutter, slate home; saws slate into "homes," for sharpening knives, etc., and smooths them on sand tables.

dresser, slate dresser; rubs surface and edges of slates or slate slabs by hand on sand tables to smooth them.

enamelled slate sander, finisher, slate finisher, see polisher.

footsman, slate footsman, footer; turnable bed; smooths slate by holding it on revolving sanding table, pushes heavy iron block by hand or by machine over sand table to level large flat table.

grinder, slate grinder, as for stone grinder (575).

machinist, slate machinist; slate mill worker; adjusts tools of machine for cutting, planing, sanding, drilling, and otherwise treating slate; switches on and off power-drive of machine; places slate slab on bed of machine; usually also grinds tools of machine on a grindstone or on an oilstone.

mason, slate mason, mechanic (slate slab factory); slate sink maker; (i) marks and prepares slabs of slate, for machine hands to plane cut and polish; finishes slabs to get perfect joints; drills, with hand or electric drills, holes in slabs intended for manufacture of tanks, to receive

nuts and bolts which fasten pieces together; or, fits together smaller articles of slate with plaster or with small metal fittings (up (ballast) fabric) placed inside slabs by machine, which he himself sets and operates; bores holes in slate on a boring machine; screws together requisite number of layers of slate; cuts holes in slate with hand saw, where pockets are to come; finally smooths and polishes surface with a special type of hand plane, dragged over surface with silver sand as an abrasive.

planar, slate planar; a slate machinist (q.v.) operating a slate planing machine; adjusts machine to suit various thicknesses of slate being worked.

polisher, slate polisher; emeryed slate sander, finisher, slate finisher; prepares slate for emerying, etc.; rubs surface with emery paper and sand paper, by hand; usually also does work of slate enamel (592) (q.v.).

polisher, writing slate; writing slate finisher; polishes surface of slate, either by hand or an revolving drum covered with emery cloth.

river, olog; local term for slate river (q.v.).

river, slate river; runs large masses of slate as quarried, at quarry, into rough slabs, with hammer and chisel ready for splitter (q.v.).

sawyer, slate sawyer; saws slates into slabs, (i) by using (for small slabs) ordinary toothed circular saw or a peached hand saw; (ii) by using (for large slabs) a circular saw set with steel rails on the periphery; sometimes specifically named, e.g., emeryed slate sawyer.

slabman, slab maker (quarry); a sawyer (q.v.) who cuts ends and sides of rough slabs, at quarry, with circular machine saw.

slate maker, see splitter.

talent mill cleaner; a labourer who cleans cuttings and slate rubbish from slate working machines.

slate mill worker, see machinist.

slate pencil maker, slate pencil worker; sets gauges and cutting tools in machine which forms pencils from slate or soapstone, when this is not done by machine setter (211) (q.v.); places slab of slate on bed of machine; controls machine by means of levers; removes pencils when cut to bias.

slate tank maker, see mason.

splitter, slate splitter; cleaver, slate maker; splits blocks, lumps or "clops" of slate into roofing slates or with chisels, or chisel-faced hammers of special shape, or by machine.

turntable hand, see footman.

writing slate finisher, see polisher, writing slate.

writing slate maker; a splitter (q.v.) who saws off rough edge of slate by circular saw; then splits slate by hand; may also smooth surface, cf. writing slate polisher.

677.—PLATELAYERS; RAILWAY UNDERMEN.

ballast and sand loader, ballast man, ballast train man (railway); an underman (q.v.) who is deputized with others, forming a small gang, to load trucks with ballast and sand, to travel with trucks and to shovel out ballast etc. to permanent way gangs along line; obsolete.

bank rider (railway); North East of England, an underman (q.v.) who rides tip truck full of coal or ballast, usually former, down inclines to dispose tips or to waiting ship and applies brake at bottom of incline; obsolete.

blocklayer, see platelayer (mines or quarries).

bridge tarring labourer (railway); an underman (q.v.) deputized to coat various parts of steel or wooden

bridges with protective covering of hot tar or mixture of hot tar and pitch; uses long handled tar brush; obsolete.

chairs (railway); an underman (q.v.) who places "chairs" in position on permanent way ready for laying rails; obsolete.

clay burner (railway); digs clay on bank of railway cutting or embankment, to harden clay for prevention of land slips; mixes crushed coal or pieces with clay and sets on fire; tends burning to ensure that it takes place evenly; obsolete; cf. clay burner (building) (561).

drafter, draughtman (railway); an underman (q.v.) who attends to drawing and repairs of drains on permanent way; obsolete.

electric track labourer (railways); an underman (q.v.) who works on maintenance or re-laying of track with live electric rail; obsolete.

fence loader (railways); an underman (q.v.) who loads fencing timber on trucks; obsolete.

ganger (railway); under control of district inspector (700) (q.v.), is in charge of a gang of men maintaining a length of permanent way, or renewing permanent way, or carrying out heavy earth works; responsibility includes seeing line is kept straight, that kays do not drop out, that space is allowed for expansion of metal; that rails are kept packed-up but not too high (engine fanned) but not too low (loosened) that drainage is effective; that boggles, banks, etc., are tidy; sometimes is drafted in charge of a small gang for incidental work in connection with above, as occasion demands, e.g. gang conveying ballast to other permanent way gangs; arranges duties of sections of gangs and sometimes, especially in small gangs, himself works with the gang; cf. foreman platelayer (561).

gang man, gangman; general terms for any undermen (q.v.) in any gang on permanent way.

leading man, flat (railways), see sub-ganger (railway); obsolete.

lengthman (railway); an underman (q.v.) in a gang engaged on maintenance of a specific section, i.e., length, of permanent way; obsolete.

lengthman, flat (railway), a sub-ganger (q.v.) in charge of gang engaged in maintenance work as distinct from re-laying; obsolete.

look-out man (railways); an underman (q.v.) who, by rote, is stationed near a gang of undermen working on permanent way, to warn them with horn or whistle of approaching trains; regulates pace of trains by signalling to drivers with coloured flags, duties normally performed by flagman (railway) (700) (q.v.).

maintenance man (railway); permanent way, labourer, permanent way man, (obsolete) railway labourer; an underman (q.v.) engaged on permanent way gang doing maintenance as distinct from relaying work; cf. relayer (permanent way).

packer (railway); an underman (q.v.) who packs ballast under and between railway sleepers to make foundation of the rails stable and level; obsolete.

packer, leading (railway); a sub-ganger (q.v.) in charge of a gang of packers (q.v.); obsolete.

permanent way man, permanent way labourer (railway), see maintenance man (railway).

platelayer, railway platelayer, see underman; obsolete.

platelayer (mines and quarries); (i) blocklayer; lays surface tramways and sometimes roadways; (ii) road layer, road setter; lays and keeps in repair rails for haulage system from working place to shaft.

platelayer, leading (railway), see sub-ganger (railway).

platelayer, road (tramway); rail layer (tramway); engaged on laying and maintenance of road tramway, keying and bolting rails and tie-bars in true level and alignment, laying and fitting switches at points, or removing and relaying sections as necessary, cf. underman.

rail layer (tramway), see platelayer, road (tramway).

railway labourer, see maintenance man (railway); obsolete.

relayer (permanent way); an underman (q.v.) engaged in relaying gang, (as distinct from maintenance gang, cf. maintenance man) mainly engaged in building permanent way, laying sleepers, metals, etc.; sometimes engaged by railway company on casual basis and ultimately transferred to maintenance gang on permanent basis, or is a permanent worker temporarily transferred into a gang doing relay work.

road layer, road setter, see platelayer (mines or quarries).

sawman (railway); one of a gang of undermen (see underman) who work on sewerage system of railway company; digs new trenches or opens old one; discards manholes and inspects condition of sewer; clears stoppages; obsolete.

sub-ganger (railway); leading platelayer, leading surface man, flat leading man (railways); assists ganger (railway) (q.v.) in supervising work of permanent way gang; takes charge of sections of gang and is responsible for section's jobs, where so deputized by ganger; or, where working directly under scrutiny of ganger, directs undermen and himself works with gang.

surfaceman (railway), see underman; obsolete.

surfaceman, leading (railway), see sub-ganger (railway).

tunnel repeller; an underman (q.v.) engaged on tunnel repairs; obsolete; cf. underground labourer (581).

underman (railways, not in signal box); platelayer, railway platelayer, (obsolete); surfaceman (railways); a worker in a permanent way gang supervised by ganger (railway) (q.v.).

In addition to supervising, duties include surfacing permanent way with fine ballast, laying and boring sleepers, bolting chairs to sleepers, laying and bolting sections of rails, laying and fitting switch levers at points, maintaining, by means of pick and shovel, level and alignment of permanent way bed, loading sand and ballast, by shovelling into trucks to provide ballast for other gangs using same, cleaning and repairing drains on permanent way, fencing, ditching and leading timber therefor, acting as flagman (700) or look-out man (q.v.) as occasion demands, or, newly engaged in a gang, as casual worker doing chiefly relay work, graduates to maintenance work where greater permanency is ensured.

678.—GAS AND WATER MAIN LAYERS.

cable and service layer (electrical); wire layer (electricity supply); (i) (cable laying) lays by hand, in prepared trench (often cement lined), various kinds of main electric cables, e.g., lengths of cable roughly bound together, single cable unwound from a drum, etc.; or, lays in trench pipes through which bound lengths of smaller cables are drawn by means of a long iron or wooden rod; (ii) (service laying) lays by hand in small prepared trench, ready for connection, single smaller cables for conveyance of current from main to consumer's premises; drills, or cuts with hammer and chisel holes through party walls for passage of cable; (iii) see cable hand.

cable hand; (i) cable and service layer, same's navy; carries out all excavation work required in laying electrical cable; (ii) assists cable and service layer (q.v.); (iii) in U.P.O. works in gang of men erecting on poles or laying underground cables for telephone or telegraph service; (iv) see cable hauler (571).

conduit layer; lays and repairs iron or earthenware conduits; runs molten lead, for iron conduits, or cement or composition, for earthenware conduits, into joints to make them watertight.

main layer; pipe layer; places pipes for gas and water mains end to end in prepared trenches in readiness for caulking; beds pipes in clay or cement and packs up with stones, etc., to obtain required alignment.

main layer (electricity supply); see cable and service layer (electrical).

main's navy; see cable hand.

pipe layer; see main layer.

pipe linesman, pipe ranger; lays gas or water pipes in trenches, dug by a laborer, under instructions from district foreman (561) (q.v.) or foreman pipe layer (561) (q.v.); places pipes end to end and makes joints; packs up pipes with clay, cement, stones, etc. to obtain required alignment; caulk joints by pouring in molten lead, when lead is set hammer it in joint with hammer and chisel; in repair work, breaks joints, removes broken section and relays and caulk joints of new section.

pipe tester (gas); tests section of gas main, after laying and caulking, by turning on gas and examining joints for leaks.

pipe tester (water); tests section of water main, after laying and caulking, filling section with water, and examining joints for leaks.

service layer (electricity); see cable and service layer.

service layer (gas); places lengths of service pipe, for conveyance of gas from main to consumer, and to end in prepared trench usually dug by laborer; paints joints with coat of red lead, winds yarn round thread of pipe, and screws one section of piping thus prepared into section already laid, to make joint; also cuts and threads pipes, if required, using trowel and thread-cutting disc and vice; sometimes also makes connections, in lead piping, from service pipe to meter, in consumer's premises.

service layer (water); places lengths of service pipes, conveying water from main to consumer, and to end in trenches dug by laborer or excavator (587) (q.v.); usually also joins pipes, either by "caulking," i.e., pouring in molten lead and hammering set lead, into joint with hammer and chisel, or, for earthenware pipes, by sliding joints with cement, using a trowel.

579.—PAVIORS AND STREET MASONS: CONCRETORS AND ASPHALTERS.

asphalter; (i) see asphalt layer; (ii) lays asphalt on floors, walls, roads, etc., or to form damp course of buildings, where required to keep out damp, using hand trowels and wooden floats to level and smooth surface.

asphalt layer, asphalt pavior; makes asphalt, which has been ground and heated in furnace, level over concrete base, consolidates by use of rammer, and finally irons to solidity with long handled hot irons.

block layer (wood); see pavior, wood.

caneawayman; see pavior.

cementor, ship cementor; mixes and lays cement, with trowel and float, in various parts of ship, such as galleys, forepeak, floorings, bilges, etc.; sometimes done by mason (574) (q.v.).

concrete layer, concretor; spreads concrete on road, floor or foundation of building, and levels it with shovel to obtain correct level; makes 'small pillars,' or "spots," of concrete here and there, and lays a long rule, "straight edge," or a long spirit level between spot and spot; where slight curve, or "camber," is required, uses a "camber" slip, a curved rule; sometimes done by mason (581) (q.v.).

concrete mixer; (i) mixes concrete, of water, sand, gravel, coke breeze, pebbles and cement, in correct proportions by hand with a shovel; (ii) is one of a gang who operate and feed a concrete mixing machine, shovelling ingredients into container of machine in correct proportions, setting machine in motion and emptying the container after mixing, by turning it over.

concretor, granolithite; a concrete layer (q.v.) who spreads concrete, composed of granite chips, cement and water, on road, floor, pavement, etc.; also smooths surface of granolithite concrete, after spreading, with a trowel; usually also makes own concrete by hand with a shovel.

dresser, stone and flag; see pavior, flag.

ferro-concretor; tips, pours, or shovels wet concrete, usually brought to him machine mixed, into wooden casings or forms, temporarily erected of round reinforcing-iron or steel rods and ties, where it is allowed to set.

flagger, see pavior, flag.

kerb layer, kerb settar; sets up a kerb, held in position by pegs at intervals, to mark line to which he is to work; sometimes spreads concrete with a shovel to serve as bed to kerbstones; lays kerbstones on this bed; spreads cement, with trowel, on ends etc. of kerbstones, for joints; pours liquid cement, "grout," into small hole left at top of joint to strengthen it; where necessary, e.g., curved foot-way, dresses kerbstones with hammer and chisel to make it fit its position.

pavior, street pavior; concrete-mason; lays paving stones, flagstones, bricks, etc., in a bed of mortar or cement, taking care that joints are broken, i.e., not continuous, and that level is correct and uniform; uses spirit levels, rules and straight edges; drives flagstones, etc., down into bed with a heavy wooden hammer, mallet or rammer; joints flagstones, etc., with mortar or cement; sometimes trims flagstones, etc., received dressed, e.g., street mason, to irregular shapes, as necessary.

pavior, flag; stone and flag pavior; flagger, stone and flag dresser; or for pavior.

pavior, sett; lays stone setts in concrete or mortar on previously prepared concrete bed; where setts are already trimmed and shaped, trims them, where necessary, to correct size and shape, to fit particular positions, with hammer and chisel; other operations as for pavior, street.

pavior, tar; tar layer; spreads evenly with shovel or fork mud metal (granite) and tar thrown down from carts on road surface; also spreads topping of chips and tar to be rolled in.

pavior, wood; block layer; one of a gang who lay wood blocks to form roadway surface, chopping blocks with small hand choppers to finish-off gutters, etc., and pouring tar over blocks, after laying, to allow permeation through cracks.

slab maker (chemical works); makes bottoms and ends of cells for electrolytic decomposition of salt, sets up framework of steel rods and wire in wooden mould or shuttering; mixes and pours in concrete; or for ferro-concretor.

street mason; works with pavior (q.v.) and performs necessary finishing or dressing operations with hammer and chisel to flagstones, paving stones, etc., before they are laid by pavior tar layer, see pavior, tar.

tramway layer, tramway repairer; a sett or road mason (q.v.) who repairs permanent way of tramways; sometimes done by tramway plate-layer (577) (q.v.).

580.—WELL, MINE-SINKERS, BORERS.

halder, haler (oil wells); operates power-driven baler or pump used for extracting water and oil from drill hole during drilling operations; erects, by hand, troughs or conveyors from drilled hole to containers or receiving tanks.

borer, artesian; artesian driller, artesian well borer, well borer, well driller; drills holes for wells with special machine drill, through impermeable strata, e.g., chalk, to permeable stratum, e.g., greensand; erects tackle, i.e., steel derrick, over spot where drilling operations are to take place; connects shafting from power drive of stationary engine to derrick, connects drilling or boring tools to sections of rods; as drilling proceeds, lengthens rods by bolting-on new sections; controls hand levers of mechanical drilling apparatus; uses various mechanical or hand-manipulated devices for hauling-up or lowering rods and drills; if necessary, inserts steel tubes in drilled hole, bolting various sections together as required; regulates power operating mechanical "shell tool," or sludge pump, for drawing-out debris during drilling.

borer, mine borer, mineral borer; makes trial boring to test probable mineral value of prospecting mine for mine sinking contractor; or for borer, artesian; sometimes makes observations during operation of bore during direction finding apparatus; cf. borer (564).

borer, oil well; see driller (oil wells).

borer, well; well driller; (i) see borer, artesian; (ii) see driller (oil well); (iii) see sinker, pump.

derrick man, derrick floor man (oil wells); works on deck of barge, fixing rigging, assisting driller, etc.; may also keep pump or haler in good repair.

driller, artesian; see borer, artesian.

driller (hrine wells); as for driller (oil wells); drilling often done by wellman (579) (q.v.).

driller (oil wells); oil well borer, well borer, well driller; operates machine drill to sink the borehole down to oil bearing rock; adjusts "jars," i.e., lengthens drill as boring proceeds; lowers pipe to line side of borehole where there is no danger of breaking down instructions of the driller in charge, who is responsible for drillings, derrick management, and power plant on alternate shifts.

driller, well; see borer, well.

runner; a driller (q.v.) or assistant to driller who operates the "runner" tackle for lifting rods for each fall of drill stem in boring operations.

sinker, mine sinker, pit sinker, shaft sinker; usually a miner (borer) (542) (554) (q.v.) who excavates earth and rock with pick, machine drill and blasting to sink pit shaft in mine; sometimes only directs operations of drilling and excavating.

sinker, artesian well; see borer, artesian.

sinker, pump; well sinker; well borer, well driller; digs out with pick and shovel, clay, gravel, etc., down to impermeable stratum, e.g., chalk to sink a shallow well for water drawing with winch and bucket, or for village pump, etc.; for artesian well sinking, cf. borer, artesian.

881.—CONTRACTORS' LABOURERS; NAVVIES.

aerial rope signalman; signals to man controlling aerial rope, to warn them to raise, lower, or despatch loads.

asphalter's labourer; conveys asphalt in pans or hoppers to asphalter (579) (q.v.) and sheds it on surface to be laid with asphalt; sometimes also strikes asphalt boiler and stirs boiling asphalt.

ballast crusher; shovels ballast into revolving pan of ballast crushing machine, controls by means of lever power-drive of machine, watches ballast in pan to see that it is crushed to required fineness, supplies pan, with a shovel, upon completion of crushing.

ballast crushing labourer; assists ballast crusher (q.v.) in filling and emptying pan of ballast crushing machine; wheels away crushed ballast to spot where it is being used, etc.

bank ranger (canal); bankman, bank fender; carries out necessary repairs, concreting, timbering, etc., to banks of canal or river, or to water-courses supply channels for tube locks, under instructions from bank walker (501) (q.v.).

bankman (canal); see bank ranger.

bankman (public works); skipper; releases and tips over contents of "skip" or tub, which tips to each side, used for transporting sand, stone, etc.

bankman, sinker's; removes earth or rock excavated by mine or well sinker, by shovelling into trucks or wheelbarrow from stage on which earth is thrown by sinker, or by emptying into trucks, buckets for tubs brought up by winding apparatus at top of shaft.

bank tender; see bank ranger (canal).

barrow runner; see wheeler.

beagle man; see segment torker.

canal bank labourer; canal worker; mixes concrete for repair of canal banks, and does the work where required, or, carries small piles into bottom and erects timber supports for canal bank, where made of timber; or, clears out and dredges canal as directed; does any other labouring work connected with maintenance of canal banks or channel or other canal works.

canal bank repairer; repairs earth-slips or other defects in canal banks as indicated by bank ranger (q.v.).

canal worker; see canal bank labourer.

cauldron man; see pot man.

cement gun operator; holds in position cement gun, worked by air pressure, which sprays liquid cement into cracks in brickwork or masonry, or sprays it against surface of building previously coated with metal lath, or against brickwork surface.

clay burner (building); a labourer who dips clay sub-soil from building foundations and burns it for use in garden paths and for general building purposes; mixes crushed coal or breeze and, spreading clay and breeze in layers, sets fire to whole; turns fire according to prevailing winds and adds more clay and breeze as necessary throughout day; cf. clay burner (railways) (387).

concrete machinist; tends and feeds with dry mixed ingredients, power driven concrete mixing machine; cf. concrete mixer (579).

crusher feeder; shovels stone, bricks, ballast, etc., into pan of crushing machine, as for ballast crusher.

cylinder sinker (bridge building); a miner (q.v.) who excavates earth inside cylinder or caisson, so sinking it for bridge foundations; usually works in compressed air chamber.

deep sinking labourer; navy or miner (q.v.) engaged in sinking deep holes or shafts.

drain layer; pipe layer, secondary pipe layer, service layer; lays drain pipes in trench dug by navvies (q.v.), taking care that pipes are laid at an

even gradient, and either straight or, if required, at proper angle; tests gradient by erecting "backs" of one or two levels, at intervals, and placing spirit level thereon, uses line and cord attached to pegs, which he drives into ground, to get proper alignment; sometimes also does work of pipe blower (q.v.).

drain pipe fitter; see pipe joiner (drainage).

electric cable laying labourer; assists cable and service layer (578) (q.v.).

excavator; a navvy (q.v.) who digs foundations of buildings, trenches for drains, gas mains, etc., and who assists in any blasting operations that may be necessary.

filler (public works); shovels excavated and other material into barrows, tubs, wagons, etc., for removal; sometimes also wheels barrows or pushes tubs, which run on a light railway, to place where material is to be dumped, empties them, and brings them back.

fire pot boy; gang boy; tends fire in brazier for use of gang of ballastmen or playblowers, and boils water for tea-making; keeps men supplied with drinking water.

flagger's labourer; assists flagger or street mason (579) (q.v.) by moving mortar or cement with shovel; lifting stones into position; ramming stones into bed, lining tools, etc.

gang boy; see fire pot boy.

granolithic labourer; assists in making of granolithic stone, an artificial stone made of crushed granite and cement; tends mixing machine, pours mixture into moulds; removes set slabs from moulds, etc.

grave digger; digs with pick, spade and shovel graves in cemetery or churchyard; fixes retaining walls of wooden boards and struts; lowers coffin by ropes into grave; fills grave with earth after burial ceremony.

highway labourer, highwayman, highway department labourer; see road labourer.

lamp post fitter; excavates and makes concrete foundation; erects and locates lamp posts in road construction, etc., ready for gas fitter to fit lamp and for service layer to connect with main; usually works under supervision of service layer.

layer-on; see stone layer.

leading man, leading labourer; leading hand of a gang of men, working under a ganger, and replacing him when he is absent; usually named according to the work done, e.g., leading ballast loader, leading roadman, etc.

masadamay, masadamiser; spreads macadam, etc., broken granite with a surface dressing of powdered granite, with shovel or fork; during steam rolling operations, sweeps water and cauded mud over surface of road metal.

mining sinker's labourer; does unskilled work, e.g., excavating, holding tools, or some sinking operations.

miner; does excavating under ground usually with hydraulic tools and blasting in construction of tunnels for railways, roads, sewers, canals, etc., or foundations of bridges, buildings, etc.; shoves up slides and places sections of steel lining; sometimes specifically designated, e.g., canal miner, land miner, public works miner, railway miner, saltatory miner, sewer miner, tunnel miner.

navvy; excavates soil for building foundations, railway tracks, roads, docks, canals, drains, etc., using pick and shovel, often does concreting and timbering work; sometimes specifically designated, e.g., canal navvy, excavator, road maker, trench digger.

navvy, slurry pond; works at pond or pit in which cement is mixed for use in concrete making; tips in cement from bags; controls flow of water from tap; mixes water and cement with long handled rake.

pavior's labourer; street mason's labourer; assists pavior (579) (q.v.) by mixing cement, moving slabs, etc., because of heavy labour, railway labourer; assists playblowers and packers on railroad construction and repair work by doing unskilled and heavy jobs such as shovelling, wheeling, and placing tubs in position, or assisting carpenters or masons, metal or other workers, in their construction work.

pile driver; operates pile driving machine which releases weight, raised by hand or mechanical power, and so hammers the pile home.

pila layer; guides piles, which are being by means of cranes, into pre-arranged position ready for pile driver (q.v.), using ropes attached to piles to guide them.

pipe joiner (drainage); drain pipe fitter; fits plain end of one pipe into socket of another, caulks joint with cement; passes special form of mallet pipe to connect any curved work may have found its way through joint into pipe.

pipe labourer (for contractor or undefined); see pipe track labourer.

pipe layer; see drain layer.

pipe track labourer; pipe labourer; breaks up surface, with sledge hammer and wedges, "cold chisels," or with pneumatic hammer; excavates trench for pipe track, with pick and shovel, removes excavated soil by wheelbarrow, etc.

pitch boiler; see pot man.

pitcher, stone patcher; a labourer who shovels stones from cart in heap on road ready for spender.

pond maker; a navvy (q.v.) who digs out ponds, and lines the sides and bottoms with concrete to make them waterproof.

pot man; cauldron man, pitch boiler, for boiler beds and ladles out pitch or tar into pits, and lines inside of fire under pot or cauldron, breaks up and replenishes cauldron with solid pitch; stirs cauldron with long iron rod.

potman, asphalt; a pot man (q.v.) heating and distributing asphalt.

powder roaster man; stokes fire which heats asphalt powder in preparation for laying, and stirs powder to distribute heat; sometimes also fills pans, etc., with roasted powder and takes it to asphalt layers (579) (q.v.).

public works labourer; does unskilled work in construction of roads, bridges, railways, canals, etc.

peg mill feeder (public works); feeds and tends peg mill, in which stone, brick, rubble, etc., is ground and mixed for manufacture of mortar, concrete, etc.

railway labourer; see permanent way labourer.

rammerman; fills in and rams down earth and other material on drainage excavations, etc.; usually done by navvy, as part of excavation or trench digging work.

river labourer (water works); does any labouring work connected with maintenance of repair banks or channel of river supplying waterworks; cf. canal bank labourer.

road cleaner; sweeps and cleans up road before tar spraying, and after road making or resurfacing is completed; cf. road cleaner (590).

road contractor (not employer); contracts with a local authority to keep in repair a certain length of road with materials supplied by them.

road labourer; see navvy.

road labourer, highwayman, highway department labourer; (1) employed by local authority in upkeep of roads e.g., sweeping, hedging and ditching, repairing ball in macadam surface, etc., (2) see stone labourer.

road maker, as for navvy.

road man; see road labourer.

rock breaker (road making); (i) breaks rock for road-making into small pieces with special hand hammer; (ii) throws or shovels pieces of rock into pan of crushing machine and shovels out crushed rock, cf. ballast crusher.

rope runner (public works); hoists loads of building material to scaffolding, with rope running over a pulley, sanitary pipe layer, see drain layer.

scarifier; attends to scarifying apparatus, i.e., apparatus for tearing up the worn surface of a road, on a steam roller; directs steam-roller driver and maintains teeth of scarifier at correct adjustment by hand with spanner or with manipulating bolts.

sea defence worker; maintains in repair sea walls, groynes, embankments, etc. with stone, rubble, or brickwork; usually a mason (572) or bricklayer (566) (q.v.).

sea groyne labourer; sea wall labourer; assists sea defence worker (q.v.) in building, maintenance of sea groyne, etc., by doing unskilled work, e.g., carrying or wheeling blocks of stone and timber, mixing cement, etc.

segment carker; hogsme man; fills in space between drain or pipe section and loose soil with a slurry of cement and sand.

service layer, see drain layer.

sett beater; a rammerman (q.v.) who rams down setts with a heavy hand-rammer, one or two handled beam of wood, into bed of slurry.

sizer, see picker.

skipper, see bankman.

sougher; (i) a dialect term for a labourer who constructs, by means of pick and shovel, ditches, drains or adits for draining a mine; (ii) in Ireland, a general term for a ditcher.

steam roller labourer; steam roller sweeper; spreads tar, tar mixture, or other similar substance, with brush, over stone or chinker to be rolled.

stone breaker, stone cracker, stone knapper, stone zapper; sets by roadside and breaks stones, usually flints, with hand hammer into sizes suitable for road meeting; is usually an old man.

stone crusher (road making), see for crusher feeder.

stone layer, stone spreader, stone strewer; for-car; spreads stones evenly on surface of road, with shovel or fork, prior to rolling.

street labourer; road labourer; general labourer waiting on pavioir (579) or road maker (q.v.); does heavy unskilled work in street or road making.

street mason's labourer, see pavioir's labourer.

surface labourer, surface man; maintains, by means of pick and shovel, level and alignment of road surfaces or of tramway permanent way beds, as shown on pegs placed in position by surveyor; cf. surface-man (railways) (577).

tar boiler (road spraying), see pot-man.

tar man, tar mixer; a tar pavioir's labourer (q.v.) who breaks up pitch or bitumen, by hand with hammer and iron spike, and mixes it with tar, in right proportion to be used on road surfaces; assists pot man (q.v.) and may sometimes stoke boiler; carries buckets of hot tar when and where required.

tar pavioir's labourer; assists tar pavioir (579) (q.v.); generally engaged in filling of barrows with tar paving mixture and wheeling it barrows to tar pavioir; may assist in spreading mixture and help in rolling laid surface.

tar sprayer; (i) holds perforated rose of mechanical sprayer, which sprays tar over surface of road; (ii) works handle of pump which forces tar through pipe or tube through tube to rose of sprayer.

timberman; puts up timber supports and crossbeams in trenches; does all timber work required on public works, etc.

trench digger, see for navvy.

trench labourer; does unskilled work in excavation and boarding up of trenches.

trenchman; responsible for excavation of trenches for pipes, mains, drainage and other purposes.

underground labourer; (i) excavates soil or rock to make tunnels, sewers, etc., or removes soil or rock excavated by miner (q.v.) and assists miner generally, (ii) a labourer employed underground in cleaning sewers and the like.

water track labourer; keeps water switches on sewage works and sewage farms, and drainage ditches, clear and free from obstructions.

well borer's labourer, well driller's helper, well sinker's labourer; assists well sinker (580) (q.v.); hauls out excavated material with windlass, rope, and bucket; lowers timber, tools, etc., as required.

wheeler; barrow runner; a navvy or labourer (q.v.) who wheels away and deposits soil.

works and ways department labourer; does unskilled work, such as trench digging, shovelling, wheeling material, loading and unloading supplies, tools, etc., in work of construction, road building, etc.

588.—OTHER SKILLED WORKERS.

brass letter fixer; fixes brass letters to glass, with adhesive mastic preparation, or to other bases with screws, etc.

builder's fitter; general term applied to gas fitters, hot water fitters, stove fitters or constructional iron fitters, etc., employed in building industry.

builder's mechanist; general term applied to carpenters, painters, bricklayers, masons, plasterers, and other skilled men in building trade, as distinguished from respective labourers.

building steam cleaner, see steam brush cleaner.

chimney shaft builder; a steepeljack or a bricklayer (565) (q.v.) who builds chimney shafts of factories.

chimney shaft feller; cuts out two or three courses of bricks on one side of chimney shaft with a hammer and chisel; either pulls chimney down, on side thus weakened, by attaching cable to chimney and pulling thereon with winch or otherwise, or puts wooden blocks into spaces from which bricks have been removed so that blocks are burnt out; work usually done by steepeljack (q.v.).

church tower climber, see steepeljack.

expanded metal fixer; fixes, with screws or nails, expanded metal, a perforated metal sheet used as key or bond to re-inforce concrete as base for plaster work; sometimes a carpenter (474) (q.v.), or, in firms having much of this work, a specialist on this operation.

ferro-concretor's iron worker; fixes iron or steel rods used to re-inforce concrete, either by driving them into ground with a hammer, or, by fixing them into position with struts as erection proceeds, vertically or horizontally as required; bends rods in wire if necessary, fixes "cross ties," i.e., short rods at right angles to main rods, and secures them, where they cross, with pieces of wire; cuts rods with hack saw and twists wire with pliers as necessary.

float; obtains smooth surface on floors, walls, etc., by running over moist cement, plaster, etc., and pushing over it a float (special kind of wooden crown).

house breaker, house ripper; pulls down and removes buildings, using crowbar, hammer and pick.

rigger; fixes up travelling cradles on the fronts, etc., of buildings for use by the steam brush cleaners, painters (592) (q.v.), etc.

steam brush cleaner; building steam cleaner; applies a solution to the brick or stonework of the outside of a building to be cleaned, and when still wet, directs a jet of steam on it and scrubs with wire brush to clean off the dirt, etc.

steel letter fixer, as for brass letter fixer (q.v.).

steepeljack, steepel peter; church tower climber; builds or repairs steeples, chimneys, shafts, etc.; erects his own ladders, and scaffolding, usually able to perform work as bricklayer (566), carpenter and joiner (474), slater and tiler (570), plasterer (567), plumber (582), painter (592), glazier (486), electrician (597) (q.v.).

thatcher, house thatcher; constructs a thick roof covering of straw or rushes, by fastening combed bundles of straw or rushes to the roof laths with straw or rush rope; trims edges with special knife.

589.—OTHER WORKERS.

bottom man; a steepeljack's improver, see (588), who assists and watches the top skilled men, thus gaining knowledge, experience and confidence.

frame scaffolder; erects frame scaffolding for new building by bolting together previously prepared steel tubes, timber, deals, scantlings, posts, etc.

plane house loader, plane house man; assists slater (q.v.) or stone planer (576 or 575) (q.v.) in planning machine, carries and moves about with levers and rollers, or travelling chains sleds of slate or stone.

rope runner (building); a lad who fastens rope to trucks waiting to be moved or shunted on light tramway after filling or unloading on excavation work.

scraper (stone quarries and works); removes stone clippings from mason's bunker or planning machine.

slater's labourer; assists slater (570) (q.v.) to sort slates; carries them in chumps up scaffolding to roof and ladders chumps elowwise against roof timbers conveniently to hand of slater; mixes mortar or cement for slater and assists him generally.

slate works labourer; general term for an unskilled worker who assists sawyers and machinists (576) (q.v.) in moving slate and assists generally in slate cutting and dressing mills; includes plane house loader, plane house man.

stone carrier (stone works); a stone works labourer (q.v.) who carries or assists in moving stone, by means of rollers, levers and chain lifting tackle.

stone weigher; weighs and records the weight of blocks of stone received in the stone cutting and dressing mills.

stone works labourer, as for slate works labourer.

tool boy, tool man; collects tools, and takes to forge for repair, e.g., picks.

winchman; turns handle of a hand winch to raise builder's material up to required level on scaffolding.

ORDER XVIII.—PAINTERS AND DECORATORS (NOT POTTERY).

591.—FOREMAN AND OVER-LOOKERS.

charge hand, see painter's foreman, colourman; pours certain quantities of dry colours from drums into other containers; adds turpentine, oil, white lead, etc., and stirs to obtain required consistency; puts with this mixture on a specially prepared board, called an approval board, which is shown to architect; usually also painter's foreman (q.v.).

painter's foreman, painter's nod (slang); charge hand; is in charge of painters (592) (q.v.), on a job, and is responsible for efficient carrying-on of work; usually also a colourman (q.v.). Indicates, with chalk or otherwise, dividing line between colours, marks-out work on door panels, etc.; sometimes also keeps time records of painters; engages or discharges painters, usually in consultation with general foreman (591) (q.v.). If work is employed.

592.—PAINTERS AND DECORATORS (House, Ship or General).

aerograph; machine painter, machine sprayer; directs spray of paint from aerograph on to part of building to be painted; sometimes uses a stencil, which he tucks on to wall and over which he sprays paint to produce a pattern. blacker; applies black paint to iron stoves, rough pipes, etc., with a brush, or, dipper, and a bucket of paint; hedges work on a frame, and manipulating a lever to lower or to withdraw frame as necessary; sometimes mixes his own colour; brushes black or other "black" in dry form, into containers, pouring in oil and stirring with a wooden stick. brush hand; (in N. England). see painter, (in Lower and S. of England). cf. painter's labourer (590).

colour mixer; a painter (q.v.) engaged part time in mixing paint for painters under direction of painter's foreman (591) (q.v.); cf. colourman (591).

decorator; a highly-skilled painter (q.v.) who also does gilding, silvering, stencil work, or delicate panel painting work; sometimes also does paper hanging, in doing silvering or gilding, applies gold size to surface to be gilded or silvered with a lead brush; cuts gold or silver leaf into small pieces by hand on special leather pad; picks it up with brush or knife, and applies it to surface to be covered; sometimes applies gold leaf in large pieces by hand pressure upon paper or interleaving upon which gold leaf is attached; or, dapples work by hand, with a brush, to obtain uniform surface on gold or silver work; sometimes specifically designated, e.g., church decorator, house decorator, yacht decorator.

distemperer; a painter or rough painter (q.v.) who applies distemper with special distempers and studding brushes to walls and ceilings.

enamelled slate blacker-in; applies black enamel or varnish to smoothed and cut slate with a hand brush; or, directs spray of enamel on to surface of work from a hand sprayer connected with a container from which enamel is forced by air pressure.

enameller; a painter (q.v.) who uses enamel (not stored) instead of paint, for better class of interior painting; sometimes specifically designated, e.g., furniture enameller, wood enameller.

figdier; a decorator (q.v.) employed full time on gilding-house decorations, etc.; may also gild by applying ready-made gilt paint with a brush.

grainer; (i) (the doves and trunks) a grainer and marbler (q.v.) who specialises in decorating tin boxes and trunks to resemble wood; may in some cases print decorations on surface with hand roller; (ii) see grainer and marbler.

graiser and marbler, imitator of wood and marble; grainer; paints wood, stone, iron, etc., to imitate grain of wood, or veining of marble; in graining, paints surface with flat colour, uses steel comb, pieces of rag or cotton wool, and his own fingers to give appearance of graining and of knots; in marbling, applies various colours to stone or other surfaces with brushes.

inquerer (not metal), as for enamel.

lacquerer, cold; applies coat of lacquer to cold metallic surfaces, usually brass, by dipping articles in a bath of specially prepared lacquer with a brush, or, for large articles, by spraying lacquer on; also articles made of dry; cf. hot lacquerer (591).

liner (house and weighing machines); paints gold or coloured lines free-hand on beams of scales, etc., with fine brush.

linear, cabinet case; a painter (q.v.) who paints lines of colour as decoration round outlines of cabinet or cases, using fine camel hair brush and straight edge or rules if necessary; cf. cabinet case liner (592).

liner, machine; paints lines, free-hand with fine brush, on machinery in engineering shop.

linoleum sprayer, see aerograph.

point dipper; coats parts of thorough machines or other articles with paint by dipping them in tanks of paint; may first prepare parts for dipping by sandpapering.

painter; (i) house painter, brush hand (N. England only); general term for anyone who paints by hand with a brush, woodwork, ironwork, plaster, or stone of interior or exterior of houses or other buildings; also applies varnish or enamel where required; often scrapes off old paint, unless done by scraper or by painter's labourer (592) (q.v.), or removes old paint by applying caustic preparation with a brush; often also prepares work for painting by rubbing down with glass paper and by applying special preparation to knots in woodwork; sometimes specifically designated, e.g., wood painter, hull painter; (ii) paints other articles of any kind except vehicles (593); sometimes specifically designated, e.g., bridge painter, drum painter, furniture painter, gas meter painter, machine painter, meter case painter, oil and paint and decorator, shoe painter, shell painter, ship painter, sign painter.

painter, engine; a painter (q.v.) who paints iron parts of engines when completed and in position.

painter, house, see painter.

painter, machine; (i) a painter q.v. who paints cast frame work of engines and machines; (ii) see aerograph.

painter, cold; a rough painter (q.v.) who covers large surfaces, usually ironwork, with a rough protective coating of oxide of iron with a brush. painter, rough; paints railings, rough ironwork, etc.; applies primary coats of paint to work which will afterwards have final coats applied by painter (q.v.); sometimes does whitewashing and distempers.

slate enameller; enamels slate by hand, with a brush, either in plain colours or in imitation marble wood designs; in imitating marble uses various colours; in imitating wood uses graining combs and fine fingers or pieces of cotton wool to obtain graining effect; dries by stoving, i.e., placing enamelled slate in drying ovens for specified time.

stenciller; paints patterns and decorations with a brush, stencil on wall and applying paint with brush, using a stippling action; usually marks a chalk line on wall to which he works; sometimes cuts stencils by hand with a knife from patterns supplied to him.

three brush hand; one who can undertake plumbing, painting, and glazing; term frequently employed in country districts.

593.—PAINTERS (Vehicles).

bodier-in, see brush hand.

body finisher; enamels and varnishes body of aeromobiles, mail cars, etc.; sometimes also paints on decorative lines, with a fine brush, but this is more usually done by liner (q.v.).

brush hand; bodier-in (perambulators, etc.); fills inequalities, cracks, etc., in woodwork of carriages, perambulators, rolling stock or other vehicles with plaster of Paris preparation, using a putty knife; paints on first coat of colour, and, when colour is dry, rubs it down with pumice powder or pumice stone and water to obtain even surface in readiness for body finisher (q.v.).

chassis finisher; applies final coats of paint or polish, by hand with a brush, to finished frame of self-propelled road vehicles; sometimes also does fine lining of liner.

colourman painter (tram cars); mixes, matches and prepares oil paints for use in painting tram cars; is generally also a coach painter (rolling stock) (q.v.).

decorator; paints interior and exterior of railway carriages, tram cars, etc., and ornaments them with decorative linings by hand, with a fine brush; sometimes covers ceilings and/or other interior surfaces with "linoleum" or other wall paper; ornaments interior with decorative transfers applied by hand; paints lines and panels.

dipper; (i) rule down with pumice stone and paper, glass paper, etc., work done by filler-up (595) (q.v.), to give smooth surface to panel work in preparation for varnishing; (ii) applies intermediate dead "coats of paint" to surfaces of tram cars or railway coaches, and flattens as above. figdier; paints surfaces to be gilded with quick-drying varnish; cuts gold leaf into required lines or shapes with knife on small pad; lays leaf on varnish by hand using a knife and stippling brush; covers applied leaf with coating of waterproof varnish with a brush.

gold liner (cycles); or for liner.

grainer; paints vehicles, applying coat of paint of one colour over another colour; with steel comb, rage, and his fingers, imitates grain of woodwork, producing appearance of polished hardwood; cf. grainer and marbler (592).

laster, see stenciller.

liner, colour liner (cycles), fine liner (perambulators), liner and finisher (carriages, etc.); streper (perambulators); paints ornamental lines, free-hand with fine brush in gold and other coloured paint on cycles, carriages, perambulators, tram cars, railway carriages, etc.; cf. gold liner (cycles).

painter (vehicles); vehicle painter; a general term covering painters of all types of vehicles; sometimes specifically designated, e.g., cart painter, chassis painter, coach painter, perambulator painter.

painter, baby car, see painter, perambulator.

painter, beechnette, as for painter, perambulator.

painter, both chair, as for painter, perambulator.

painter, body; car painter (rolling stock), see painter, coach (rolling stock).

painter, carriage; (i) see painter, coach (rolling stock); (ii) see painter, coach (private carriage).

painter, cart; cart painter; applies paint to cart and vans; may also mix own paints, i.e., pour dry colours into small vessel, adding oils, white lead, etc., and mixing to required consistency; does not paint to such fine degree of finish as coach painter (private carriages) (q.v.).

painter, chassis; applies first coat of paint or enamel to chassis, frame, wheels, etc., of self-propelled road vehicles by means of spraying; or, applies it by hand with a brush. painter, coach (private carriages, etc.); carriage painter; mixes dry colours, oils, etc., to right consistency for paint and, for final coats, matches paint with coach upholstery, etc.; glass-papers coach or carriage body

as required and applies successive coats of paint, enamel and/or varnish, with a brush, until desired effect is obtained.

painter, coach (rolling stock): coach body painter; body painter, car painter, carriage painter, railway carriage painter, railway coach painter; applies final coat or coats of paint to bodies of railway coaches or carriages with brush, and varnishes them after last coat of paint is on.

painter, inside (railway carriages): a painter (vehicles) (q.v.) who specialises in painting inside walls and ceilings of railway rolling stock; cf. coach painter (rolling stock).

painter, mailcart, see painter, perambulator.

painter, outside (railway carriages): a painter (vehicles) (q.v.) who specialises in painting outside of railway carriages; cf. coach painter (rolling stock).

painter, perambulator: baby car painter, mailcart painter; general term for body finishers, brush hands, line liners, and spring painters (q.v.).

painter, railway carriage: railway coach painter, *see painter, coach (rolling stock).*

painter, spring: paints and varnishes springs and undercarriage of perambulators, mailcars, etc., by hand with a brush.

painter, van, see painter, cart.

painter, vehicle, see painter (vehicles).

painter, wagon (rolling stock): paints wood and metal parts of railway wagons with brush by hand.

painter, wheel chair, as for painter, perambulator.

painter, wheel: (i) paints wheels of carriages, cycles, motor cars, etc., often in two or more colours, or adding a line of some distinctive colour; (ii) (rolling stock) paints and oils railway wheels and axles for prevention of rust during transit and storage.

painter, wheelwright's, as for painter (vehicles).

stenciller (rolling stock): letterer; places stencils on surface of rolling stock and paints over stencils by hand with a brush, using a stippling action to reproduce figures, letters, notices, etc.

striper (perambulators, etc.), see liner.
varnisher: covers bodies of motor cars, railway coaches, carriages, etc., after they have been painted, with coating of mastic or copal varnish, with hand brush and sash tool; in rolling stock, also varnishes ironwork of undercarriage or bogie.

594.—SIGN WRITERS.

decorator, ornamental decorator, see ornamental painter.

letterer, see writer, letter writer.

painter, advertisement: paints advertisements by hand, using fine brushes and oil paint, on advertisement boards and hoardings, either painting advertising designs containing lettering, or painting advertisements consisting entirely of lettering; usually work from a given plan or from smaller designs; sometimes also does work of sign writer (q.v.) or of poster artist.

painter, advertisement drop curtain: paints advertisements on canvas ground, enlarging them from small designs, for attaching to drop curtain of a theatre.

painter, blind: applies paint to window and shop blinds by hand with a brush; sometimes paints firm's name, etc., thereon with a brush, cf. sign writer, or by stencilling.

painter, glass: glass writer, (i) a sign writer (q.v.) who specialises in painting signs, written notices, designs, etc., on glass, with fine camel hair brushes; (ii) (for commonest class of work) paints signs, notices, designs, etc., on glass by aerographing process using stencils.

painter, ornamental; decorator, ornamental decorator: paints elaborate decorations, and fixes composition mountings.

painter, sign; a sign writer (q.v.) who specialises in sign painting.

writer, fascia; a sign writer (q.v.) who specialises in lettering fascia boards.

writer, glass, see painter, glass.

writer, letter writer; letterer; a sign writer (q.v.) who specialises in lettering various objects, e.g., finished bodies of railway coaches, doors, fittings or shell of ships, notice boards.

writer, ornamental; a sign writer (q.v.) who specialises in ornamental lettering as distinct from plain lettering.

writer, poster; a sign writer (q.v.) who paints prices, descriptions of goods, etc., by hand on paper or cloth for posters and signs.

writer, sign; paints letters and/or signs on posters, fascia boards of shops, glass tablets, blinds, public house sign boards according to his individual skill; his special method of painting depends upon branch of work upon which engaged, but usually chalks-in letters or designs and paints in finished letters, etc., by hand with fine brush; uses also gold leaf or gilt paint if necessary, applying former on an admirals base such as gold else or conglair after cutting lead to required shape; sometimes specifically designated, e.g., glass painter, sign painter, letter writer.

writer, title; a sign writer (q.v.) who writes titles and sub-titles in film production; often also designs artistic borders and ground work for title cards which are photographed on film.

writer to the trade; a sign writer working on his own account, who does all kinds of writing for firms too small to employ whole-time writer themselves.

writer, wire blind; a sign writer (q.v.) who specialises in sign-writing on wire blinds.

595.—PAPERHANGERS.

paper hanger; covers walls, ceilings, etc., with wallpaper, by estimating best method of application, cutting paper into proper lengths, brushing back of each length with paste, fitting over appropriate space on wall, etc., stretching, smoothing with brush and cloth, trimming top and bottom edges when necessary.

598.—OTHER SKILLED WORKERS.

barrier pipe stainer; stains bowl and stem of pipe, by hand, with cotton wool soaked in mixture of methylated spirits and aniline dye.

polisher's stainer; a stainer (q.v.) who puts dull stain on white wood as a base for polish.

stainer, wood stainer, wood dyer; (i) colours wood by dipping it in stain and setting it to dry; (ii) paints stain on wood to bring out grain or to imitate wood of another kind.

599.—OTHER WORKERS.

brush hand; (in London and S. England) *see painter's labourer.* In N. of England usage, in sense of painter, cf. brush hand (1922).

ceiling washer, as for painter's labourer.

chipper, chipper and scraper, chipper and sander; sander, scraper, chips and scrapes (old), paint, rust, or "scale" off any kind of ironwork (ships' plating, gaskets, etc.) in preparation for painting or re-painting, using a pneumatic tool, a small chipping hammer, or other hand tool.

coach painter's labourer; fills in blemishes or crevices of vehicle bodies with stopping of putty or special preparation, applies primer or first coat of paint, and, when dry, rubs down with pumice stone and water to make even surface for final coats of paint.

doper; applies dope (special water-proofing composition) by hand, with a brush, to fabric of awnings to tighten it, to render it airtight and watertight, and to reduce friction.

engine barrel paperer; applies filling (first rough coat of paint) by hand, with a brush, to castings, which have not been machined, and rubs surface down with glass paper to produce smooth surface for finishing coat.

filler, filler-in, filler-up; wood filler, wood filler-up; fills in grain of wood by rubbing in special composition, in preparation for polishing or painting, to smooth surface of wood, or, lays on first series of "primers" (ground-work paint).

filler-up (coaches), see rubber.
frame cleaner; cleans frames of self-propelled road vehicles; sand-papers or cleanses surfaces of rest and roughness prior to painting, polishing, or enamelling.

golf ball spotter; paints red spot or other coloured mark on painted golf ball with brush and paint.

lead labourer; a painter's labourer (q.v.) who applies coats of lead paint to woodwork and fills in cracks, etc.

lime washer, as for painter's labourer.

painter, bitumastic; applies anti-corrosive bitumen or bitumastic solution to any kind of ironwork, with a long-handled tar brush.

painter, golf ball; (i) paints finished golf balls, painting in a white paint and rolling it between palms of hands until it is evenly coated; (ii) places golf ball in special paint spraying machine; switches on or off driving power of machine; fills brush with white paint; removes painted balls when dry.

painter, pattern maker's; pattern scrubber; paints or varnishes patterns (i.e., patterns, usually wooden, of sections of machines used by engineers) by hand, with a brush.

painter, patch, var painter; tarrer; applies tar, with brush, to wooden buildings, (fences, etc., or to sides, top, and bottom of coal bunkers on ship; cf. tarrer (591).

painter, tin (tin bases); sprayer; sprays paint, with spraying apparatus, on finished tin boxes, containers, etc.

painter, tube; paints finished iron and steel tubes with brush or spray.

painter's labourer, painter's assistant; brush hand; cleans brushes, stirr paint, carries and sets up ladders, etc., and lays scaffold boards on scaffold or on rust, old paint, etc., and assists painter (592) (q.v.) generally; sometimes does low grade painting work under supervision of painter; washes walls, ceilings, etc., with lime, and puts on first "rough" ready for white-washing; strips off old wallpaper from walls, using water and stripping knife or scraping tool.

painter's rubber, see rubber-down.

pattern varnisher, see painter, pattern maker's.

pontoon sealer; a chipper q.v. who stands on a pontoon moored alongside a vessel and scrapes lower parts of hull therefrom; cf. ship scaler.

red leader; a painter's assistant (q.v.) who scales, scrapes, and applies first coat of paint (red lead) to surface to be painted (e.g., to interior and exterior of ship's hull); sometimes also applies anti-fouling composition to ship's bottom.

rubber, rubber-down; filler-up (coaches), painter's rubber; removes roughness from surface on woodwork of railway coach, tramcar, etc., with glasspaper, pumice stone or powder, etc., and applies priming and primary coats of paint, rubbing

down when each coat is dry, in readiness for painting; may also apply coat of battens, paint, of frame cleaner, flatter (503).

scaler, see *chipper*; cf. *scaler* (502).
scraper (for painter); cf. *see* *chipper*; (ii) scribes old paint with blow lamp, and scrapes it off with a tool; often done by painter (502) (q.v.).

ship scaler, ship scraper, chipper (q.v.) who cleans planks of a ship, inside and outside, in preparation for re-painting; or who scrapes ship's bottom, in a dry dock or in a slip way, to detach barnacles, seaweed, etc., using hammer and chisel, files and sometimes a shave hook, a small hand scraping tool.

ship painter's assistant, ship painter's labourer, as for painter's labourer.

size; applies a coat of size or similar substance to wood work, plaster walls, paper, etc., to render surface less absorbent for painting or varnishing.

sprayer (tin boxes, etc.), see *painter*, *size*.

stopper (sides); applies a coating of stopping paste with putty knife to provide a smooth foundation on sides for paint.

tanner, see *painter*, *pitch*.
varnisher; applies varnish (a solution of resins in oil or spirit) with brush or spray to painted, stained, or enameled surface of wooden or metal articles, e.g., furniture, in order to give a polish and a hard protective covering, sometimes specifically designated, e.g., handle varnisher, road varnisher (vehicle), stock varnisher (gun), wire mattress varnisher; often also done by painter (502) (q.v.) cf. *varnisher* (vehicle) (503), *varnisher* (gun) (549).

varnishing machine feeder; feeds rollers of varnishing machine with tinplates; removes varnished plates in racks to press.

whitener; washes ceilings, strips paper, and otherwise prepares surfaces for painters and paperhangers.

whitener, whitening-up, moulding whitener (furniture); coats lengths of wood moulding with a mixture of whitening and size by hand or by machine.

whitewasher; whitewashes walls, ceilings, etc.

wood filler, wood filler-up, see filler.

ORDER XIX.—WORKERS IN OTHER MATERIALS.

Sub-Order 1.—Workers in Rubber, Vulcanite, Ebonite.

602.—MIXERS, SPREADERS AND MOULDERS.

balata belt coverer; a balata solutioner q.v. spreading balata on one side of fabric used for belting.
base builder, see *tyre base builder*.
bottle maker; a moulder q.v. engaged only in moulding bottles from uncured rubber; cf. *hot water bottle maker* (508).

case maker; builds-up or for tyre maker (pneumatic), inner fabric only, of pneumatic tyres.

cementator, card cloth; cloth cementer (card clothing); a spreader q.v., who covers cloth for textile card clothing with a thin layer of rubber, and so cements two or more layers of cloth together.

coverer, rubber (marginal bandage); a spreader q.v. who covers surgical bandages with rubber.
dough and solution maker; india rubber mixer (best), mixer (wet), rubber mixer (wet), solution maker, solution mixer, wet rubber mixer; receives dry uncured rubber from mixer (dry) q.v. and feeds it to mixing machine; adds a solvent to form paste ready for spreading and vulcanising; operates machine by hand levers.

dry rubber man; dry mixer, india rubber mixer (dry), rubber mixer (dry), feeds by shovelling, etc., and operates, by hand levers, rubber mixer and warming machine previous to wet mixing (see *dough and solution maker*); adds stock chemical powders while rubber is being mixed, to strengthen, fill, and colour it, ebonite former, see *former*.

ebonite maker; ebonite worker, fibre worker, hard rubber worker, hard rubber worker, vulcanite mixer, vulcanite rubber maker; general term for any worker engaged in any process of making articles from ebonite or vulcanite, before vulcanisation; includes ebonite maker-up, ebonite mixer, ebonite moulder q.v. ebonite maker-up; (i) cuts uncured ebonite sheets with hand knife or scissors and builds-up, on mandrel, articles which cannot be made by former or moulder (ebonite) q.v.; if necessary solutions sheets together with special solution; (ii) see moulder ebonite.

ebonite worker; see *ebonite maker*; cf. *ebonite worker* (503).

extruder, see *former*.
fibre worker, see *ebonite maker*.
former, forcing machine driver; extruder, special machine for sheet; (i) feeds sack, sprayer, by hand, forcing machine or squitter, which forces dry uncured rubber through dies, to make tubes, hose, cable insulating rubber, and other articles; sometimes specifically designated, e.g., inner tube maker; (ii) makes articles of "reclaimed" rubber (i.e., old, used rubber) by forcing process, as in (i) above; (iii) ebonite former; makes articles of ebonite (a preparation of rubber) from ebonite "dough," by forcing process, as in (i) above.

hard rubber maker, hard rubber worker, see *ebonite maker*.
heel maker, india rubber heel maker, a moulder q.v. engaged in moulding rubber soles and heels.

mixer, dry; rubber mixer (dry), india rubber mixer (dry), see *dry rubber mixer*.
mixer, ebonite; a dry rubber man q.v. who shovels or feeds from chute ebonite mixture (a preparation of rubber) to a pair of heavy rollers; repeats operation until whole mass is well mixed; operates machine and regulates roller pressure by hand levers.

mixer (wet), india rubber mixer (wet), rubber mixer (wet), see *dough and solution maker*.

moulder, rubber moulder, india rubber moulder; india rubber presser, india rubber presser, presser, pressman; moulder or presser uncured rubber, or rubber mixture or dough, in steam or hydraulic press, which gives it required shape; this moulder, placed in press, receives paste by hand lever and removes moulds; sometimes specifically designated, e.g., gutta percha moulder, heel pad and sole moulder, rubber heel moulder, ebonite; ebonite maker-up; runs small pieces of ebonite dough into moulds to shape article before vulcanising, and places moulded ebonite into vulcanising press.

moulder, golf ball cover; heats a rod of gutta percha in boiling water to soften it, cuts off exact amount required; places it in mould, places top on mould (which is made in two halves), and puts mould in press.

moulder (rubber stamp making), vulcaniser and moulder; moulds rubber dough into type matrix, sets up by vulcanising press, then vulcanises stamp when set; cf. *vulcaniser* (503).
moulder, tyre; cycle tyre moulder, india rubber tyre moulder, motor tyre moulder; one of a gang, usually three or four men, who mould and vulcanise tyres from tyre mud or tyre finisher q.v.; places tyre mounted on wheel shaped core, or, for corded

tyres, specially mounted by air bag filler q.v. in mould, removes mould to vulcanisation pan and press, secures pan cover with bolts, regulates cores supplying steam to pan, operates lever controlling press and removes moulded and vulcanised tyre.
presser, india-rubber presser, rubber presser, see *moulder*; sometimes specifically designated, e.g., heel presser.

presser, golf balls; places mould containing tyre halves, covers and core in a steam-heated press, which is operated so as to close covers and mould their outer surface to specific design.

presser, hot; (i) a moulder q.v. using a steam press; (ii) a press vulcaniser (503) q.v. moulding and vulcanising in a steam press.

pressman, india rubber pressman, rubber pressman, see *moulder*.

profiler, see *spreader*.

roller coverer (tyres), see *tyre base builder*.

sheet maker; a spreader q.v. making sheeting waterproof; cf. *sheet maker* (505).

sole maker, rubber, see *heel pad and sole maker*.

solutioner, balata; operates a machine which spreads balata solution on fabric for making engine belts; duties as for spreader q.v.

solution maker, solution mixer, see *dough and solution maker*.

solution moulder; takes pieces balata (a substance resembling rubber) and solvent in mechanical mixer; starts and stops machine by means of levers; withdraws solution when mixing process is complete by opening outlet valve.

spreading machine attendant, see *former*.

spreader, rubber spreader, india rubber spreader; profiler, water-proofer; operates spreading machine, by which prepared rubber dough is spread on outer surface of canvas, and is then subjected to heat on steam-heated tables of machine; sees that unrolling of cloth or canvas, spreading of rubber dough, and re-rolling of material after spreading, proceeds evenly and correctly; sometimes specifically designated, e.g., cord clothing rubber spreader.

tile maker, rubber (moulding); a moulder q.v. who makes floor tiles from uncured rubber.

tube band; is in charge of machine extruding uncured rubber for tyre treads; operates levers, etc., to adjust roller pressure and to start and stop machine; directs warmer (extruding), feeder (extruding) (503) q.v.; cf. *former*.

tube maker, tubing machine hand, india rubber tubing maker, a former q.v. making rubber tubes by "forcing" or extruding process; sometimes specifically designated, e.g., inner tube maker, motor tube maker, inner tube maker.

tube maker, inner; (i) winds rubber sheeting cut by cutter (pneumatic tubes) (509) q.v. tightly round a shaping mandrel ready for tube wrapper (509) q.v.; joins up ends with solution and vulcanising; (ii) see *former*; (iii) is capable of performing all work of inner tube making as done by cutter (pneumatic tubes) (509), inner (i), tube maker, tube wrapper (509), vulcaniser, steam (503), etc., q.v. and is usually engaged in one or more operations.

tube maker, motor; an inner tube maker q.v. making inner tubes for motor car tyres.

tyre base builder; base builder, roller coverer (tyres); rolls vulcanite in layers, which is tacked into the grooved surface of a steel rim, which is basis of a solid rubber tyre for motor buses or lorries.

tyre maker (pneumatic), india rubber tyre maker (pneumatic), rubber tyre maker (pneumatic); builds up foundation of tyre cover by hand or machine, wrapping layers of rubber coated canvas, or alternate layers of

canvases and raw rubber, on a wheel-shaped core, and pressing layers together with hand rollers, see case-maker; forms beading with special roller or by pushing tyre edge against mechanically-driven roller; makes rubber tread with hand roller, ready for tyre moulder *q.v.*; when not done by tyre finisher (608) *q.v.*; uses special canvases for cord tyres; *cf.* case maker.

tyre maker (solid), india rubber tyre maker (solid); rubber tyre maker (solid); general term for any worker engaged in manufacture of solid tyres by any process, usually by squaring, or forcing process; includes former, tyre hoop builder, tyre moulder, tyre wiper, vulcanite maker, vulcanite rubber maker, *see* ebomite maker, waterproof, *see* spreader, wet rubber man, *see* dough and solution maker.

603—VULCANISERS.

cure man, *curer*, *see* vulcaniser.

endoring stamp maker, *see* vulcaniser (endoring stamp).

pressman, steam, *see* vulcaniser, press.

vulcaniser (endoring stamp); endoring stamp maker; presses special curer position over compressor's set-up type to make endoring stamp mould; dries mould on hot plate, fills with plastic rubber and vulcanises as for vulcaniser, press.

vulcaniser, cold; cure man, *curer* (cold); (i) vulcanises thin rubber articles by dipping them into disulphide of carbon, or other vulcanising agent; (ii) superheats machine which vulcanises special kinds of waterproof cloth by passing it over rollers running in trough of vulcanising liquid; guides cloth to rollers; operates starting and stopping levers; replenishes troughs.

vulcaniser, ebomite; a press vulcaniser or a steam vulcaniser *q.v.* engaged in vulcanising ebomite.

vulcaniser, hot air; cure man, *curer* (hot air); feeds material to be vulcanised to feeding roller in hot-air chamber; closes chamber door and operates hand lever, causing material to pass slowly over rollers in chamber; feeds vulcanised material so it issues from chamber on to receiving roller outside.

vulcaniser, press; cure man, *curer* (press); steam pressure; a steam vulcaniser *q.v.* who puts rubber articles in a mould; places iron plate on top and inserts between hollow steam-heated plates in a vulcanising press.

605—OTHER SKILLED WORKERS.

air ball maker, *see* balloon maker.

air bed painter, air cushion painter; covers air beds or cushions with decorative paint, using a brush or spray.

air bed coverer, air bed maker, air cushion maker, airproof goods maker; makes air beds, air cushions, lifebelts, etc.; cuts out rubber sheet to pattern, skivers, beats together and solutions seams; may also cover rubber by solution-treating fabric cloth and pressing it on; in small firms, often does work of air bed infuser (609) *q.v.*

armworker, hose armworker; specialises grip winder; operates hose-armworking machine, which strengthens rubber hose pipe, including "spindles," a patent hose, by coiling wire round it;

feeds hose from drum and wire from reel, to machine, and pulls levers actuating coiling mechanism; watches to see that there is no breakage of wire.

asbestos lining maker; makes up steam ionising rings, from rubber-coated asbestos cloth, by rolling it round rubber core, cold-pressing to shape in a mould under a power press, and then cutting into rings by machine.

balata belt finisher; trims belt edges with knife by hand, and stamps trade mark or name on that surface which is covered with balata by balata belt coverer (602) *q.v.*

balata belt maker; feeds bands of balata covered fabric, between rollers, which press them together, to make machine belting; usually also performs work of balata belt finisher and balata belt coverer (602) *q.v.*

ball blower; inserts hollow needle in vulcanised ball at spot where piece of unvulcanised rubber is attached to the inside; forces compressed air through hollow needle, thus inflating ball; withdraws needle and seals puncture with piece of unvulcanised rubber.

ball maker, rubber ball maker; makes balls by cutting out four segments of calendered sheet rubber; applies a piece of rubber composed without any sulphur in it (to avoid vulcanisation) to the inside of one of the segments; joins the four segments together with solution roughly in shape of a ball, enclosing a pinch of ammonium carbonate; places ball in mould which is heated with steam, thus vulcanised, the rubber being pressed into shape of mould by the steam freed from the ammonium carbonate on decomposition by heat; often acts as ball blower *q.v.*

balloon maker, toy balloon maker; air ball maker; (i) punches out very thin rubber sheet into sections; (ii) beats the sections together edge of pieces by a small power-driven hammer; places it in a dye vat; vulcanises by dipping in disulphide of carbon; inflates it to test it; (iii) dips glass or varnished wooden mould in growth of rubber dissolved in naphtha until mould is evenly and thinly coated with rubber; vulcanises rubber by dipping in disulphide of carbon; strips balloon off mould and inflates it to test it.

band maker, *see* elastic band maker.

belting maker, india rubber belting maker, rubber belting maker; folds sheet canvas and uncured rubber ready cut into thickness and width required for belt, and fastens layers with solution ready to be vulcanised.

billiard table cushion maker, *see* cushion maker, cushion stuffer (billiard tables).

block cutter (tent, tarpaulin, etc.); cuts, from rubber or compressed fibre, designs or lettering on the more simple blocks used by brander; work sometimes done by printer.

block maker, brake block maker; (i) cuts thick calendered rubber sheets into brake blocks, using hand knife, and vulcanises them in a hydraulic press, or for vulcaniser, press (603); (ii) cuts and shapes brake blocks of leather, rubber, or vulcanite, pressing material against circular saw wheel, which he switches on and off as required.

boot and shoe maker (rubber); solutions together, on aluminium, wood, or iron last, parts of boots and shoes, pressing joints with hand roller and finishing over with brush dipped in liquid sulphide.

borer (wind instrument, ebomite); bores out hollow barrel of wind instrument made of ebomite, to gauge; as for roaster (496).

brail, mouthpiece cutter, *see* vulcanite cutter (pipe).

brail mouthpiece turner (vulcanite), *see* mouthpiece turner (pipes).

calenderer, calender hand, calender man, india rubber calenderer, rubber calenderer; *sheeter*, passes rubber mixture, or dough, through calender machine having three or four pairs of steam-heated rollers to produce rubber sheets of any desired thickness, with or without a backing of canvas; where, as in some tyre-making firms, work is sub-divided, directs work of second hand, warmer-up, feeder-up (rubber calendering) (609) *q.v.*, and himself operates machine by switches, levers, etc., and regulates roller pressure by adjusting screws, etc.

calenderer, block; a calenderer *q.v.* who rolls rubber dough into sheets of exceptional thickness for rubber block cutting.

card measuring measurer, card measurer (textile machinery); cloth measurer; (i) measures rubber, coated cloth by hand before passing to card teeth setiers (225) *q.v.*; (ii) measures "fillets" (long strips) of rubber card clothing made by card setiers (225) *q.v.*

case turner (fountain pens), *see* turner, fountain pen case.

casement, india rubber casement, rubber casement; rubber solutioner, rubber solutioner, measurer (waterproof goods), solutioner, solutionist; sticks seams and joints of rubber goods together with solution by hand, with finger or brush, afterwards pressing seams with a hand roller on a work-table.

clacker (rubber); cuts out rubber upper for sole and canvas and canvas upper for rubber boots or shoes; either cuts with hand knife and template, or by placing shaped cutter upon number of calendered sheets of rubber or rubberised canvas beneath power press worked by hand-lever or foot treadle.

cloth doubler; passes two or more thicknesses of rubber-coated cloth, made by card clothing rubber spreader (402) *q.v.* through rollers to stick them together.

cloth measurer (textile machinery), *see* card clothing measurer.

collar cutter; places in position, in power press, layers of rubberised composition sheets for men's collars, or cotton interlining, and, manipulating clutch, cuts inner and outer collar shapes; cutting knives in machine as necessary.

collar maker (rubber); a general term covering workers, as distinct from collar cutter *q.v.*, employed on making men's collars out of special rubberised material; includes seamer, sewing machinist (419) *q.v.*, resuperposer (rubber stamps), sinker; sets up matrices of letters, etc., into which rubber dough is pressed to make rubber stamps.

coverer; cuts uncured rubber into lengths, by hand, using a knife; rolls rubber by hand over metal article, such as bit, and vulcanises as for vulcaniser press (603).

cover repairer, *see* tyre repairer.

cushion maker, cushion stuffer (billiard tables); billiard table cushion maker; (i) receives rubber of various lengths and thickness, and beats to square, rubber, seamed equally throughout; assembles lengths to approximately correct dimensions and cuts, by hand, to exact length and shape required, taking care to cut angles correctly; cements lengths of rubber together; (ii) as for block maker *q.v.*

dental rubber finisher; rolls into thin sheets between steam-heated mechanically driven rollers of small calender machine dental rubber used in making dental plates; as for calenderer.

dental rubber maker, *see* masticator hand (dental rubber).

digestor, *see* reclaimer.

elobite and vulcanite worker, *see* elobite turner.

elobite finisher; vulcanite finisher; fits up and polishes on rotating mop articles made of elobite or vulcanite, e.g., fountain pen barrels, hair combs, cyclic accessories, etc.

elobite turner; elobite and vulcanite worker; hard rubber turner, vulcanite turner; shapes upon a lathe, articles of elobite after vulcanisation; *as for* turner (585).

elobite worker; hard rubber worker; general term for any person working in elobite or vulcanite, e.g., elobite maker (582), elobite finisher, elobite turner (585).

elastic band maker; elastic rubber winder; band maker; (i) winds calendered rubber sheet compactly into block form, or round an open manifold until required thickness is obtained; vulcanises it, and cuts it into bands, with knifed lathe, to required gauge;

(ii) a forcer (592) *q.v.* who makes rubber tubing and cuts it into sections; *anagrus* packing maker; *see* rubber packing maker; *cf.* asbestos packing maker (398).

examiner; examines visually, finished articles to see that there are no defects and passes or rejects accordingly.

examiner, golf ball; examines golf balls after each stage in process of manufacture; tests for weight, size, resistance to compression, etc., by placing in a simple testing machine; also makes visual inspection; rejects defective balls.

feed maker; grooves and shapes elobite rods into fountain pen feeds on hand lever operated lathe.

fire turner, *as for* elobite turner.

finisher; (i) general term for any worker applying finishing touches to any rubber goods, e.g., ball painting; (ii) in elobite trade, plane, beroin, etc., elobite articles to give final finish; (iii) moulded goods, cuts off rough edges where rubber has over-run mould.

flexible gas holder maker; a hose maker *q.v.* making flexible gas holders and tubes.

flexible pipe and tube maker, *see* hose maker.

fountain pen fitter; assembles parts of fountain pens, and sees that cap fits barrel.

fountain pen maker; general term for any person engaged in manufacture of fountain pens, includes fountain pen fitter, fountain pen case turner *q.v.*

fountain pen polisher; polishes cap barrel and feed section of fountain pens, on buff or mop polisher.

fountain pen turner, *see* turner, fountain pen case.

garment maker, rubber; waterproof garment maker; commonly used in sense of waterproof garment sticker *q.v.* but may be used in sense of needle hand or finisher of waterproof garment maker (419) *q.v.*, or in general sense, for any person engaged in any process of making waterproof clothing.

golf ball hand winder; winds elastic rubber tape, by hand, tightly round centre of golf ball until it is evenly covered and ready for machine-winding into finished core.

golf ball maker, golf ball worker; general terms for any worker who performs one or more operations in golf ball manufacture, moulds core of golf ball in a press, vulcanises it by steam in a hydraulic press, winds rubber tape round core, places it in a shuttle, and winds elastic thread round it by machine from a bobbin; adds shell; finishes off by vulcanising; paints by rubbing with paint; binds palm of hand; *see* golf ball hand winder, machine winder, mould filler; mould opener; moulder (592), presser (592); press vulcaniser (593); golf ball painter (599).

golf ball machine winder; receives core from hand winder and places in shuttle of machine, which winds elastic rubber thread by machine (hand or power - driven) tightly round centre which is hand wound, until it is required size for core, golf ball mould filler; places core between two half-covers, and places the whole in mould which is hended to golf ball mould opener.

golf ball mould opener; opens mould when taken out of press, and removes golf ball, now complete with outer cover.

grinder, india rubber grinder, rubber grinder, waste rubber grinder; grinds pieces of waste rubber through a mill or rollers, to be ground into powder, ready for mixing with fresh raw rubber for manufacture of low grade products.

gutta percha worker, *see* rubber worker.

hard rubber turner, *see* elobite turner.

hard rubber worker, *see* elobite worker.

heeler (wood instruments); shapes holes for notes and stops in wind instruments made of elobite or *as for* heeler (495).

hose maker; flexible pipe and tube maker, pipe maker; (i) makes hose by winding spirally long strips of calendered rubber on a chain covered mandrel; solutions edges and presses them together; wraps round with thin cotton cloth or canvas to hold joints firmly, during vulcanisation; (ii) a forcer (592) *q.v.* who makes hose by forcing, or extruding process; sometimes wraps first a strand tube with rubberised canvas while still on mandrel, and again extrudes a layer of rubber over canvas; finally wraps thin cotton cloth or canvas round to exclude air between layers and to hold firmly during vulcanisation; sometimes further fits in a vacuum, e.g., vacuum brake hose maker.

hose maker, embedded; a hose maker *q.v.* who winds wire round a hose by machine (see armature), and then wraps further layers of rubber sheet and canvas.

hose maker, suction, *as for* hose maker, embedded.

hot water bottle maker; cuts, with hand knife or scissors, unwarped rubber sheets to pattern and solutions edges together, pressing with hand roller to form body of bottle; similarly cuts and fits bottle neck; may vulcanise in steam chamber or pass to steam vulcanisation (58).

insulating material maker; (i) mixes, kneads, rolls, and cuts up a composition, varying considerably as to ingredients, of rubber-like consistency into shape suitable for manufacture into electrical insulators; (ii) cuts insulating tape in strips from pure rubber cut sheet (unvulcanised), from various textures spread sheet, or from a composition of gutta-percha, *see* (i) above.

lathe hand; general term for any person working at a lathe, e.g., elobite turner, washer cutter (595) *q.v.*

masticator, rubber masticator; feeds by hand, corrugated rollers of masticating machine with pure rubber, to be pulped for surgical appliances, dental purposes, etc.; absorbs or otherwise removes pulped rubber from delivery tray; operates machine by hand levers.

masticator hand (dental rubber); dental rubber maker; a masticator *q.v.* employed only on making rubber for dental purposes.

mat maker, india rubber mat maker, rubber mat maker; a press rubber canvas (599) *q.v.* who, to shape, by hand, lengths of rubber sheets, lays one on top of another to obtain required thickness and solutions layers together; places mat in mould and press vulcanises it; sometimes

punches holes in it, *as for* mat puncher (599) *q.v.*, after vulcanisation, to form rubber.

mechanical rubber worker; stamps out of calendered rubber or rubber dough by means of a press, rubber articles used in engines and machinery, e.g., dies, plugs, valves.

mill operator, *see* warmer up.

motor tread filler, *see* tyre finisher.

moulder tyre head fitter, *see* tyre wirer.

moulder (rubber stamp making); mounds vulcanised rubber stamp in wooden or metal frame, ready for use; cuts stamp to size with scissors and affixes with adhesive, first beating metal mould.

mouthpiece bander (pipes); softens vulcanite mouthpiece of tobacco pipe in gas jet, bends it to shape by hand, and harries it in cold water.

mouthpiece driller (pipes); bores hole through vulcanite tobacco pipe mouthpiece with a power-driven drill.

mouthpiece fitter (elobite), *see* mouthpiece turner.

mouthpiece polisher (pipes); polishes vulcanite mouthpieces of tobacco pipes, by hand, on a revolving felt mop.

mouthpiece turner (pipes); draws mouthpiece turner (vulcanite), mouthpiece fitter (elobite); turns vulcanite tobacco pipe mouthpiece on a lathe, and fits them into bowls of tobacco pipes.

opener, an elobite turner *q.v.* who opens or enlarges the orifice of fountain pens to receive nib and feed.

oxidiser (linoleum making); attends machines oxidising linseed oil from raw oil to stored cake state; works pumps, *as for* pump driver (595) to govern flow of oil from tanks to trays for storing; regulates, by valves, heat of storing chamber; loads and unloads stove with trays.

pipe maker, *see* hose maker.

presser, belt; a pressman or moulder (592) *q.v.* who presses and then vulcanises flexible belts.

reclaiming, rubber; digester; feeds old rubber articles, which have been sorted by kind of rubber and cut up into pieces, into a grinding mill, to be ground to powder or small pieces; boils powdered waste rubber in boilers with alkalis, acids, and sulphides to render it to a working vat, dries it, and rolls it into sheets.

roller; general term covering workers using hand rollers, e.g., tyre maker (pneumatic) (592), waterproof garment sticker (593), ground sheet maker (599) *q.v.*

roller, rubber (textile machinery); rubber roller maker; wraps sheet rubber round metal rollers for use in textile machinery; vulcanises it *as for* vulcaniser, press (593) *q.v.*; may also smooth on a lathe or *for* roller turner (594) *q.v.* of roller canvas (tyred) (595).

roller, rubber (vulcanised); makes vulcanised rubber roller level and smooth, by pressing emery wheel against roller, as it rotates in a lathe; sometimes lubes by hand lever.

roller, rubber (surgical); india rubber hand, surgical hand; (i) a rubber goods maker *q.v.* making surgical and other appliances of india-rubber, (ii) fits together parts of rubber surgical appliances, e.g., metal or bone part of rubber syringe to bulb.

rubber drawer, *see* tubing drawer.

rubber moulder, rubber goods worker; solutions and joins up edges of pieces of unwarped rubber sheet or of covered fabric already cut to shape, which are then vulcanised by cancer (593) *q.v.*; sometimes specifically designated according to goods produced, e.g., first-class clothing maker, football bladder maker, geyser maker, hot water bottle maker, oil sheet maker, sleeping bag maker, tobacco pouch maker, water bed maker.

rubber mill hand, works in mill room as a general utility man, and masticator, rubber mixer (599), forcer (592), calender *q.v.*

rubber packing maker; engine packer; makes rubber packing and painting material of rubber, usually by rolling material round a mandrel and by cutting the tube thus formed into rings.

rubber piecer (card clothing); card clothing rubber piecer; joins strips of rubber with solution, or by pressing them together prior to vulcanizing, generally also beads or otherwise finishes edges with shaving knife, in preparation of rubber bases for textile card clothing.

rubber roller maker, see roller maker.

rubber slipper maker, or for boot and shoe maker (rubber).

rubber stamp maker, india rubber stamp maker; makes rubber stamps, by pressing rubber into moulds, squirting rubber dough into matrix or die cut up by compositor *q.v.*

rubber stamper; stamps pieces of uncured rubber into sole and heel pad shapes, on stamping machine; fixes dies in top half of machine, positions rubber thereunder, and operates lever actuating the stamp.

rubber tread maker, see tyre finisher.

rubber worker (aeroplane), see solutionist (aeroplane).

rubber worker, india rubber worker; gutta percha worker; general terms for any worker engaged in manufacture of rubber goods.

sawyer (rod); cuts up vulcanite rods into specified lengths for use in manufacture of penholders, etc., by pressing rod against circular saw which he actuates by hand lever.

screw stopper maker (ebonite); (i) as for stopper maker; (ii) an ebonite turner *q.v.* engaged in fashioning screw stoppers on hand lever operated lathe.

shaper, tyre shaper, see tyre curlier.

sheeter, see calenderer.

sheet maker; a calendar band *q.v.* who passes rubber dough through a calendar machine where rollers, to reduce it to required thickness, regulates setting of rollers (which determines thickness of sheets) and watches passage of sheet through rollers; see also sheet maker (DSE).

shrinker; (i) winds uncured rubber to be used for shoes, for purpose, *c.f.* rubber bandages, on drums, wrapping it at the same time with cloth kept under tension; places drum in heating chamber; (ii) places lat balloons on hot plate in order to dry them after drying.

sinker, see compositor (rubber stamp); sinker (waterproof garments), see cementer.

solutioner, solutionist, rubber solutioner, rubber solutionist, see cementer.

solutionist (aeroplane); rubber worker (aeroplane); applies with a brush rubber solution (dope) to covers of aeroplane wings to render them impervious to air and water; also cements joints in fabric with solution.

sorter, india rubber sorter, rubber sorter; sorts old, late different grades, sizes, etc., types and qualities, in preparation for being broken up for reclamation; see reclaimers.

spinalist grip winder, see armorer.

stepper maker (rubber works); fills steam-heated metal moulds with uncured rubber or low grade vulcanite, and puts them in vulcanizing press; turns screw handle to regulate pressure; removes moulded and vulcanized stepper.

surgical hand, india rubber surgical hand, rubber surgical hand, see rubber appliances maker.

tread cutter, see tyre tread cutter.

tubing drawer; rubber drawer; draws narrow strips of sheet rubber with solutioned edges through a round hole in a plate, whereby edges adhere, and strips are formed into tubes.

turner, fountain pen case; case turner (fountain pens), fountain pen turner; an ebonite turner *q.v.* making fountain pen cases.

turner (wind instruments, ebonite); turns barrel of wind instrument made of ebonite to size and shape required, on a lathe, as for turner (DSE).

tyre curlier; shaper, tyre shaper; shapes and expands rubber tyres from flat state in which they are received from tyre maker (002) *q.v.* by placing curving area inside, and ironing to shape by hand.

tyre finisher; motor tread fitter, rubber tread maker, tyre tread fitter; affixes tread to tyre cover by hand, with solution, before vulcanization; sometimes presses small pieces of rubber into required shape to form external surface of tread; usually does not re-tread, *c.f.* tyre maker (002), tyre retreader.

tyre repainer; cover repainer; repairs burst or worn tyre covers and inner tubes by solutioning and patching, or by vulcanizing process, see vulcanizer (002).

tyre retreader; attaches new treads to worn tyre covers by solutioning and vulcanizing, places tyre on wheel-shaped core, strips off tyre casing with hand knife, if necessary, cuts away worn casing and solution-on new canvas; build-up and solution-on new rubber tread as for tyre finisher; wraps tyre in canvas and vulcanizes as for vulcanizer, steam (003).

tyre tread cutter; tread cutter; (i) most usual, cuts long strips of tread from tube band (003) *q.v.* into lengths, using hand knife, and weighs; (ii) cuts calendered rubber sheets into strips, and builds them by solutioning into shape for use in re-treading tyres; (iii) cuts up and weighs lengths of solid rubber for making solid tyre.

tyre tread fitter, see tyre finisher.

tyre wiper; motor tyre band fitter, wiper; (i) affixes tread wire to outer edge of tyre covers to strengthen them and to facilitate fitting them into wheel rim; receives cover from tyre maker (002) *q.v.* and beads wire into each edge of canvas layer by tapping and with solution; (ii) inserts tread wire by hand into lengths of solid tyre for carriages.

valve examiner (tyres); examines and tests valves of tyres, to ensure that they are airtight, by inflating tube and placing valve under water; usually done by valve fitter (009) *q.v.*

valve maker (mechanical); (i) cuts rubber valves for engineering and chemical trade fittings, out of rubber sheeting by means of a power stamping machine; (ii) a screw vulcanizer (003) *q.v.* making engineering valves.

valve rubber maker; a tubing drawer *q.v.* making valve rubbers.

varnisher, india rubber varnisher, rubber varnisher; (i) polishes semi-finished or finished rubber goods, by hand, using cloth impregnated with shellac polish; (ii) attends polishing or varnishing machine; controls by means of a system of levers, feeds rubber goods to rollers, passing goods through trough of shellac; guides polished goods to hot drying drum and finally to winding-on roller; maintains supply of polish in trough.

vulcanite cutter (pipe); brier mouth-piece cutter; cuts up blocks of vulcanite, on a power-driven guillotine; or circular saw, into sizes convenient for making into mouthpieces for tobacco pipes.

vulcanite finisher, see ebonite finisher.

vulcanite turner, see ebonite turner.

warmer up; mill operator; warms raw rubber by passing it between steam-heated rollers, in preparation for calendering.

waterproof cover maker; cuts out parts of cover from rubberized cloth, using tin patterns; solutions seams, and passes to machinist (419) *q.v.* and finisher *q.v.*

waterproof cementer, waterproof garment stickler, waterproof stickler; sticks together with rubber solution, seams of waterproof garments, applying solution with fingers or brush and rolling-over seams with hand roller.

waterproof maker (rubber), as for garment maker, rubber.

wirer, see tyre wirer.

609...OTHER WORKERS.

air bed inflater, air cushion inflater, air cushion tester; fills air beds or cushions with air by machine pump, inserts needle of bed of cushion with soap solution and leaves bed, etc., inflated for several hours; inspects periodically and detects leaks by observing soap bubbles; in small firms, often done by airport goods maker (009) *q.v.*

assembler (rubber shoes); assembles parts of rubber shoes into sets, and takes them to making room.

balloon printer; stencil or paints toy balloons, by hand, using paint, stencil and brush, after they have been made and before being inflated by other workers.

balloon tester; inflates toy balloons with a hand-operated air compressor to test their tensile strength and air tightness, often done by balloon maker (003) *q.v.*

band buffer; removes rough edges from rubber bands as cut, by holding against revolving balls.

batch carrier; carrier (rubber); carries chemical compounds in powder form, from drug room to rubber mixing mills.

block cutter; (i) cuts up thick calendered rubber sheets into blocks with a power-driven circular saw or guillotine, (ii) feeds rubber-covered canvas sheets into machine which cuts them into strips for making engine packing.

block roller; rolls up thick calendered rubber ready for cutting by block maker (003) *q.v.*; work usually done by block maker.

bogey man; carrier (rubber); carries rolls of rubber on trolley or bogie truck from one department to another. bradler; operates a machine which brakes out of or substitutes yarn round hose or tubing.

brander, see stamper.

cable packer; coils rubber-insulated electric cables on drums, ready for vulcanizing.

card clothing rubber cutter; rubber block cutter; cuts thin sheets of rubber from large cylindrical blocks, by machine, for use in making card clothing; sets block in grips; adjusts knife to cut to required thickness and controls machine by lever.

carrier (rubber); (i) see batch carrier; (ii) see bogey man.

cellar man, see dryer.

chalk slaver; drug slaver; riddles chalk in dry-room prior to its being mixed with other chemicals ("drugs").

cleaner (tyres, etc.); removes, by hand, adherent particles of chalk and by-products of vulcanization as rubber goods (tyres, etc.) come from vulcanizing chambers.

cleaner, india rubber or gutta percha (electric cable); india rubber washer; prepares and cleans (in music staves) rubber used in severing electric cable, by heating, kneading by hand, and removing scum.

cleaner, rubber, see washer.

clicking machinist; operates clicking machine which punches or cuts sheet rubber into shapes for making various rubber appliances; fits dies, or knives into machine, positions rubber and pulls, lever actuating dies or knives; or positions rubber, places a die thereon and pulls lever causing a buffer to descend on die.

cloth cutter (card clothing); cuts card clothing of rubberized cloth, etc. and with wire teeth for textile combing, into narrow strips (dilets) by machine; adjusts machine to cut to required width, guides cloth into machine; starts and stops machine by levers.

cloth labourer (card clothing); assists operatives making card clothing, e.g. cloth cutter, cloth doubler (608), card clothing rubber spreader (602), g. collar; cuts card tube, as it emerges from forcing machine or squitter, in way of French chills.

conductor, *see* flosser.

cracker; passes waste rubber through a slotted mill, to cut it into small pieces, preparatory to their being powdered in grinding mill by reclaimers (608) g.v.

cutter (boots and shoes); (i) cuts out rubber soles from calendared sheet by hand, using knife or scissors, and following pattern cut from tin; (ii) cuts out soles from sheet by power-driven circular knives (operated by treadle) which travel round pattern; (iii) cuts up waste rubber into cured rubber sheets to required length and width for sole, etc., inner tubes, on a table using hand knife.

cutter (tyres, etc.); India rubber cutter, rubber cutter; (i) *see* mixer's cutter; (ii) cuts up waste rubber (tyres, etc.) by machine before cracker (*see* cracker) or grinding for reclaiming (*see* reclaimers).

cutter, band; as for cutter, washer.

cutter, hose; cuts rubber sheet and coated canvas into strips for hose makers (608) g.v. using knife and straight edge; or, feeds rubber sheet to rollers of hose machine fitted with guillotine; adjusts screws regulating width of material cut, and operates levers to start and stop machine.

cutter, insulation; insulation maker, insulator maker; a clicking machinist g.v. who cuts or stamps, into suitable sizes, rubber or composition for use as insulating material in electrical industry.

cutter, mixer's; cutter (tyres, etc.); India rubber cutter, rubber cutter; cuts lumps of raw rubber to convenient sizes, by hand, with a large knife, at same time removing stones and other impurities.

cutter, rubber (textile machinery); cuts, by hand, "baucuts" (lumps) of raw rubber into small pieces for washer g.v.

cutter, rubber block (card clothing); *see* card clothing rubber cutter.

cutter, washer; makes washers by cutting from rubber cylinder revolving on a lathe mandrel; adjusts, by hand, lathe knife to cut washers to required thickness; starts and stops lathe by means hand lever; sometimes also cuts rubber bands.

cutter-out, abouite; hand rubber cutter-out; cuts up abouite dough, using scissors or hand knife, into small pieces or strips ready for abouite moulder (602) g.v. or abouite make-up (602) g.v.

cutting machines (tyres); operates bins machine for cutting; prepared tyre canvas; feeds material to machine rollers passing it to guillotine; operates levers actuating machine and removes cut canvas; adjusts regulator governing cut canvas cut; dental rubber pecker; packs finished sheets of dental rubber between glazed linen presses, cuts up to regulation size, boxes them and labels the boxes.

dipper; dips mould several times in strong solution of rubber to obtain coating on mould, thereby forming small thin articles of pure rubber, e.g. tests, drug steers, see chalk steers.

drug weigher; India rubber powder men, India rubber weigher, powder men, rubber powder men, rubber weigher, weigher; weighs out chemicals used in rubber mill for strengthening and conditioning raw rubber.

dryer; calenders; (i) dries sheets of washed rubber by steam heating or air current, in preparation for manufacture of rubber dough; (ii) spreads

washed rubber in drying chamber or on drying screens in reclaiming process.

eraser maker; feeds and operates machine which cuts thick sheet rubber to required shape and size for erasers, pressing sheet against circular knife, operated by hand lever.

examiner, *see* sifter (boots and shoes).

examiner (inner tubes), infuses cycle, etc., inner tubes on mechanical-driven air pump and leaves inflated for 24 hours to test for leakage, etc.; makes visual examination of tubes for defects.

examiner, tyre; examines cycle, etc., visually for defects, e.g., damaged heading, parts finished in moulding press, and passes or rejects accordingly.

eyelid roller; attends power-driven machine which punches holes and inserts eyelids down fronts of rubber boots or shoes.

feeder (extruding); under direction of tube hand (602) g.v., feeds rollers of extruding machine with uncured rubber passed-on by warmer (extruding) g.v.

feeder-rop (rubber calendaring); under direction of calenderer (605) g.v., passes warm mixed rubber between calender rollers by hand.

foxer (rubber boots and shoes); convector; puts rubber solution round edges of canvas top with a brush, by hand, sometimes also fixes thin layer of calendared sheet to canvas top, to render shoes watertight; cf. cementer (608).

glue maker (chemical and electrical); cuts prepared uncured sheet rubber to required solutions, edges, and sorts them up.

glove maker (surgical), India rubber glove maker; (i) a dipper g.v. who places wooden or metal moulds, having shape of a hand, on a rack or table, and dips rack, by hand, continuously into troughs of rubber solution, until coating of rubber moulds is of required thickness; strips rubber from mould, and varnishes it, or dips in "cold cure" vulcanising solution before stripping; (ii) controls rotary machine which performs dipping operation, as in (i) above; fixes and removes gloved moulds, operates machine by means of hand levers and maintains supply of solution in trough.

golosh fitter; layer (boot and shoe); presses, in hydraulic press, strips of rubber previously sewn to sides of shoes; often done by heat and shoe maker (rubber) (608) g.v.

ground sheet maker; solutions edges of vulcanised rubber-covered cloth, either by hand, or with brush, and pleats it to form a stronger hem, hand-rolling hem to make secure fastening.

heel pad sorter; examines rubber heels and soles for flaws, and sorts into different shapes and sizes.

heel and trimmer; trims raw edges of moulded heels and heels, by hand with scissors.

hose band, rubber; *see* hose maker's assistant.

hose maker's assistant; rubber hose band; (i) assists hose maker (608) g.v. by corrugating hose (made by "forcing" or extruding process) with chalk to prevent it from sticking; (ii) assists armorer (608) g.v. in wiring process.

hose ditcher; stitches, by hand, strong canvas covering over large flexible hose after it has been vulcanised.

inner bag fitter; removes, from cord tyres, wheel shaped core used by tyre maker or by tyre finisher g.v., inserts air bag and inflates with compressed air pump for use of insulation tyre (602) g.v.

insulation maker, insulator maker, *see* cutter, insulation.

joiner-up; joins together open ends of cycle, etc., inner tubes, using rubber solution; vulcanises solution at joint by brushing over with sulphur

chloride and carbon bisulphide solution, sometimes also does work of valve filter g.v.

lapper, *see* wrapper.

layer (boots and shoes); *see* golosh fitter.

mat puncher, India rubber mat puncher, rubber mat puncher; punches holes and patterns in rubber mats, by hand, using a mallet and punch, or places mat in lever operated press machine, sometimes done by mat maker (608) g.v.

medical rubber maker; makes such articles as tests, bulbs for syringes, etc., by dipping moulds repeatedly, by hand, in a rubber solution.

mould cleaner, golf ball; removes surplus gutta percha squeezed out of mould in press.

pimper; inserts eyelids, etc., in hot rubber in process of making rubber heels, etc.

polisher; polishes proofed cloth, by hand or machine, after it has been spread by spreader (602) g.v.

powder man, India rubber powder man, rubber powder man, *see* drug weigher.

ring maker; (i) cuts packing rings and washers from calendared sheet by placing a number of sheets under circular cutters in a press; (ii) makes umbrellas rings and gauge-gauge rings from sheet rubber by wrapping it round a mandrel, by joint action of two rollers of sheet, and rolling up with the fingers.

rubber crusher; *see* washer.

rubber mincer; feeds waste rubber to roller machine which breaks it up into small pieces prior to rognation; controls machine by levers.

rubber mixer; attends masticating (mixing) machine and feeds it with rubber that has been washed (*see* washer); adds naphtha and sulphur after mixing.

screener, *see* washer.

second hand (rubber calendaring); under direction of calenderer (605) g.v., guides calendared rubber between sheets of fabric on another roller in calendaring machine, in rubber tyre making.

sorter (boots and shoes); examiner; examines rubber boots and shoes visually for defects; rejects defective articles; sorts into pairs and sizes.

stamper; bronzer; stamps sizes and brands by hand, with rubber stamp or with stencil, brush and paint, on rubber boots and shoes, rubber tyres and other articles.

stopper polisher (rubber works); a trimmer, engaged in trimming or polishing stoppers.

storeman, storier; feeds with rolls and stakes hot-stove, used in rubber drying process.

strainer; filters impurities out of rubber solution, by passing it through a sieve.

stripper; strips rubber boots and shoes from lasts after vulcanisation; arranges lasts in trays for re-use.

stud riveter; fixes steel studs in semi-cured trends of motor tyres; punches, on automatic punch, holes for studs; inserts stud by hand; secures by spinning, e.g. expanding, inside of studs on power-driven spinning machine.

tacker; fastens rubber shoes together in pairs by a power sewing machine.

test roller; removes dust on moulds from dipper g.v. and rolls up thin edge of tests with fingers to form a load; usually done by dipper.

test stripper; strips rubber tests from moulds received from test roller or dipper g.v.

tile roller, rubber (stamping); places cured rubber sheet in press, pulls actuating lever, and removes stamped-out rubber tiles.

trimmer, block trimmer, India rubber trimmer, rubber trimmer; trims raw edges and ends from vulcanised articles, using hand knife, scissors, emery paper, or power-driven knife.

trimmer, solid tyre; cuts away extra weight from heavy solid tyres with a long hand-knife.

tube skiver; *horvle*, or *skiver*, inside of one end of *eyele*, etc., inner tube for joiner-up *g.v.* on skiving machine; places mandrel mounted with tube in machine and presses tube end against revolving circular knife, actuates machine by hand levers; sometimes punches hole for tube valve by hand with hammer and punch.

tyre wiring machinist; wiring machinist (tyres); sews wire by machine into edge of canvas strips used in making "wired-on" tyres.

valve fitter; inserts valve stem into hole in *eyele*, etc., inner tube and checks on rubber valve cap, using rubber solution; vulcanizes solution by brushing over with sulphur chloride and carbon bisulphide solution; tightens valve washers and nuts; sometimes done by joiner-up *g.v.*

varnisher (boots and shoes); varnishes over rubber parts of shoe while it is still on last, either by dipping, or by applying varnish with brush.

warmer (extruding); feeds, under direction of tube hand (602) *g.v.*, steam heated rollers of rubber extruding machine with uncured rubber and passes on rubber to feeder (extruding) *g.v.*

warmer-up (rubber calendaring); under direction of calendarer (608) *g.v.*, passes mixed rubber for calendaring to steam heated rollers for preliminary warming; operates rollers by hand lever.

washer, rubber; washer, rubber washer and cleaner; cleaner, rubber cleaner, rubber crusher, arbeiter; attends and feeds washing machine having heavy corrugated rollers through which raw rubber is passed under a powerful jet of water, which washes out grit and other impurities.

washer, balata; soaks raw balata in water, washes in rotary machine, and passes it through washing rollers.

washer, india rubber (electric cables); see cleaner, india rubber (electric cables).

weigher, india rubber weigher, rubber weigher; see drug weigher.

wire spinner; spins wire on lathe for armoring inside of suction hose.

wiring machinist (tyres); see tyre wiring machinist.

wrapper, tube wrapper; lepper; fixes in lathe, rubber, covered mandrel from tube maker, inner (602) *g.v.*, starts up machine and wraps layers of wet cloth on revolving tube for vulcanizer, steam (602) *g.v.*

Sub-Order 2. — Workers in Bone, Horn, Ivory, Celluloid, etc.

612.—TURNERS.

billiard ball maker, billiard ball turner; makes ivory billiard balls by turning solid pieces of ivory on lathe constructed with special adjustable holding chucks, and by applying hand tools to the revolving ivory; is specially skilled in turning billiard balls which are held in eight different positions during turning; *cf.* turner. turner, bone turner, beak horn turner, celluloid turner, horn turner, ivory turner, vegetable ivory turner; makes or turns articles of tortoiseshell, celluloid, xylonite, erioloid, ivory, bone, horn, as cases may be, on power-driven lathe; in large works, sets up material and adjusts lathe tools and gauge; keeps lathe running and stops it, if necessary, to change tools during turning; is small worker, fits up work and applies hand tools to material as it revolves at high speed on lathe; may be further designated by article turned, *e.g.*, bone disc turner, bone ball turner (cutlery and tool handles), button turner, comb turner, horn handle turner.

613.—SCALE CUTTERS AND PRESSERS.

haft cutter, see handle cutter; sometimes specifically named according to material worked in, *e.g.*, bone haft cutter, horn haft cutter.

handle cutter; haft cutter; tip cutter; cuts solid handles or tips (haft into beed hole of which tang is cemented) for cutlery, taspets, etc., out of bone, horn, ivory, etc., with hand saw or with power-driven circular or hand saw; usually also cuts scales, see scale cutter; sometimes specifically named according to material worked in, *e.g.*, bone handle cutter, buffalo horn handle cutter, bone handle cutter, ivory handle cutter, stag handle cutter; see also handle cutter, pearl; handle cutter, shell; handle cutter, xylonite.

handle cutter, pearl; steel handle cutter; cuts pearl handles on high speed circular saw fed with water for cooling and dust slaying; forms and polishes with abrasive wheels special shapes according to design.

handle cutter, shell; (i) see handle cutter, pearl, (ii) saws, forms and polishes handles of tortoiseshell for cutlery, etc., using machine saw and abrasive wheels.

handle cutter, xylonite; cuts handle blanks from strips of xylonite in slab form, on water fed circular saw; grinds them on carbonium wheel or glazer.

plate presser, horn plate maker, see scale presser.

presser, handle presser; presses three or softened horn handle blanks into required shape between hot dies in hand or power press, and takes off flesh; frequently also softens bone by suspension in boiling water and cuts blanks with saw knife; usually also presses scales, see scale presser.

pressman (celluloid scales), see scale stamper.

scale cutter; or for handle cutter, cutting scales (pieces fastened on each side of tang to form handle) for cutlery, razors, penknives, etc.; *cf.* scale stamper.

scale presser; kern plate maker, plate presser, or for handle presser, pressing combs for cutlery, etc.

scale stamper; pressman (celluloid scales); stamps out scales for cutlery handle, etc., from sheet celluloid, or pieces of bone, horn, etc., by use of hand or power press stamps.

tip cutter, see handle cutter; frequently specifically named according to material worked in, *e.g.*, bone tip cutter, horn tip cutter, ivory tip cutter, pearl tip cutter, shell tip cutter, stag tip cutter, xylonite tip cutter.

618.—OTHER SKILLED WORKERS.

accumulator case maker; cuts accumulator case parts from sheet celluloid, using knife and straight cutters; also does work of accumulator case cementer (619) *g.v.*

bag olap maker; makes ornamental fittings of ivory, tortoiseshell, etc., for use in finishing ladies' hand bags by cutting out sketched design, on ivory, etc., blank, with hand fret saw, or sometimes, by means of treadsle.

ball maker, celluloid ball maker; (i) attends and feeds a machine in which sheet celluloid (xylonite, etc.) is pressed into shape of a hemisphere which, with another, is afterwards joined with liquid celluloid by cementer (619) *g.v.* to make complete balls; (ii) attends and feeds a machine in which celluloid is blown into spherical die in a semi-liquid state, and dried by heat.

bone brush drilller; borer (bone brushes); drills holes in handles of bone brushes, ready for insertion of bristles, using power drill.

bone brush fashioner, bone brush profiler; bone handle maker; finishes off rough bone tooth brush shapes to required size, with hand file; is usually engaged on special orders; *cf.* profiler (619).

bone brush plaster; roughly fashions lengths of bone by means of hand plane, into flat brush shapes.

bone brush preparer; a bone cutter *g.v.* who cuts rough pieces of bone on a circular saw to length required for toothbrush making.

bone handle bairer, bone handle fitter; files bone baits or handles, scrapes or shaves them to shape and fixes them to blades.

bone handle maker; see bone brush fashioner; *cf.* handle cutter (613).

bone jigger, bone jumper, see bone scorer.

bone sawyer, see cutter, bone.

bone scorer; baw, borer, bone jumper; cuts bone into grooves, or "jumps" in imitation of stag or buck horn; generally uses a small circular saw or rasp.

bone worker; general term for any worker engaged in cutting, turning, polishing, etc., bone articles.

borer (bone brushes), see bone brush drilller.

borer (honey combs and slides); cuts designs in fancy combs and slides, of celluloid, erioloid, etc., by drilling holes with an electric hand drill, for reception of ornamental pieces of glass, stone, etc.

brush fashioner (celluloid), xylonite brush fashioner; finishes corners and edges of rough brush with a file by hand.

buffalo horn worker; general term for any worker engaged in cutting, sawing, staining, polishing, etc., horn (other than stag horn); includes horn cutter, horn opener, etc.

burrgrader (celluloid); profiler; rounds-off teeth of combs and their bands, repairing burrs and other irregularities with a "grale" or file; *cf.* burrgrinder (machine) (619).

celluloid layer (piano keys); scrapes surface of sheet celluloid and of wooden base of piano or organ key-board with an iron toothling tool; glues celluloid on to keyboard by hand, and presses in hand press; *cf.* ivory layer.

comb maker (bone, horn, etc.); general term for any worker engaged in cutting, grinding, polishing, etc., combs or horn or ivory. tortoiseshell; includes saw knife cutter, setter, comb drier (619), comb duster (619), comb grinder (619), comb circle cutter (619), polisher (619) *g.v.*

color (erioloid); one quarter of a set of presses in which erioloid dough or articles made of erioloid are cooled under pressure to prevent warping; inserts dough or articles in presses, which he operates, and removes them when cooled.

cutter, bone cutter; bone sawyer; removes joint knuckles and cuts animal bone (usually shin bones) into desired shapes, *e.g.* blanks for tooth brushes, on a power-driven band or circular saw, ready for fashioner.

cutter, bone disc; a bone cutter *g.v.* who cuts rough bone discs on a power-driven band or circular saw ready for bone disc turner (612) *g.v.* cutter (celluloid collars, etc.); places sheets of celluloid in guillotine by hand and, by pulling lever, cuts out shapes of collars and cuffs; *cf.* collar cutter (rubber) (608).

cutter, horn; cuts horn with a hand saw, or on circular saw into sizes suitable for making into required articles; may also finish articles, *e.g.* cutlery handles, *cf.* handle cutter (613); sometimes specifically designated, *e.g.* buck bone cutter, buffalo horn cutter, stag horn cutter, cutler, ivory; ivory block-out, ivory shaver, ivory masher; cuts ivory tusks into slabs on a circular saw; *cf.* handle cutter (613).

cutter, ivory nut, see cutter, vegetable ivory.

cutter, ivory piano key; ivory piano key cutter; cuts black ivory into thin strips on a circular saw, and bleaches strips, when necessary, *cf.* bleacher (619).

cutter, pearl; (1) *shell cutter*; cuts mother of pearl (along the natural curve of shell, to prevent subsequent splitting) into required sections or shapes on high speed circular saw supplied with water for cooling and dust allaying; (2) *pearl splitter*; *pearl cutter*; cuts mother of pearl into and dresses it into suitable form for stringing; work seldom performed in this country.

cutter, shell; see *cutter, pearl*, or *cutter, tortoiseshell*.

cutter, sawy knife; cuts horn (other than stag horn) sections longitudinally, with a hand sawy knife, into sizes suitable for scale pressing, or for doing plates, combs, etc.

cutter, tortoiseshell; shell cutter; cuts tortoiseshell into required shapes and sizes with a fret saw or with a circular saw.

cutting, vegetable ivory; ivory saw cutter; cuts vegetable ivory into required sizes and shapes with a hand saw or with circular saw.

cutting, whalebone; cuts softened whalebone into lengths of required thickness with spokeshave or circular saw; usually does work of whalebone porter (619) *q.v.*

cutting, xylophone; cuts articles of xylophone to shape with a knife, or with a press and guillotine.

fashioner; see *bone brush fashioner* or *brush fashioner* (celluloid).

filterer, filter man, filter machinist (celluloid); puts celluloid dough in filter press and controls press by means of levers to squeeze out dirt and foreign matter.

finisher; a tooth brush worker, *q.v.* who (1) polishes brush frames on felt buff with whitening; (2) sets bristles by means of resin; (3) trims bristles on a trimming machine.

fitter, handle fitter; (1) scores and shapes cutlery handles by means of glass paper, wheels, or saws; (2) carves fittings, or other grooved ornamentations, by hand or on a lathe, on handles of table carvers, fruit knives, etc., made of ivory, bone, etc.; may also polish them on buffs or rollers; see *handle polisher* (619); sometimes specially named according to material worked, *e.g.* ivory fitter.

grainer (celluloid); see *burginizer*.

guillotine hand; cuts up into required sizes, sheets of celluloid, mica, ebonite, etc., with an ordinary printer's guillotine, operated by hand.

hackler (whalebone brusher); draws by hand side strips of whalebone repeatedly through a buckle, a type of comb, to sort them into lengths for brushmaking.

horn opener; opens a section of horn by cutting it longitudinally with saw, warms it in stove and flattens it out for comb making in a press.

horn worker; general term for any worker engaged in cutting, pressing, turning, polishing, etc., of horn articles; includes horn cutter, horn opener, prasser (613), horn turner (612), horn polisher (619) *q.v.*

ivory artist; vegetable ivory artist; (1) paints decorative work on ivory or vegetable ivory (corozo nut); (2) see *ivory carver* and *ivory engraver*.

ivory bleacher; bleaches ivory by soaking tubs of ivory in hydrogen peroxide; is usually also an ivory turner (612) *q.v.*

ivory block-out; see *cutting, ivory*.

ivory carver; ivory artist; carves ivory articles, with hand or machine tools *e.g.* handles, fittings to bags, bottles, etc., *cf.* *chiseler*.

ivory engraver; ivory artist; engraves designs or carves in relief, with delicate hand tools upon ivory.

ivory layer; (piano key); shivers edges of ivory with a plane where joint is made between head and tail of ivory keys; fits and glues pieces

of ivory (cut in shape of piano keys) on to a board which is then passed on to ivory piano key cutter *q.v.*

ivory matcher; ivory sorter; sorts out, matches for colour, and marks for cutting, ivory tubs, before manufacturing; sorts slabs, bundle blanks, piano key scales for colour marking, etc.

ivory piano key maker; see *cutting, ivory piano key*.

ivory polisher; scrapes ivory keys with a plane and scraper, cleans them with fine glass paper, and polishes them with methylated spirits and whitening.

ivory rounder; takes rough edges off corners of ivory key pieces with a file and polishes edges of ivory with a piece of felt, before key pieces are glued on to keyboard.

ivory sawyer; saws ivory into required sizes with a hand saw or power-driven hand saw.

ivory shiver, ivory slabber; see *cutting, ivory*.

ivory slipper; glues piece of ivory, called a slip, on to front of board, from which keys are cut; is usually a *q.v.* *cf.* *layer*.

ivory sorter; see *ivory matcher*.

ivory worker; general term for any worker engaged in cutting, sawing, turning, etc., ivory articles; often works interchangeably, *e.g.* cuts, hails, and cuts knife handles from blocks of ivory; includes ivory turner (612), ivory handle cutter (613), ivory cutter, ivory bleacher, ivory carver, ivory engraver, ivory layer, ivory matcher, ivory polisher, ivory rounder, ivory sawyer, ivory slipper *q.v.*

locker-over (piano keys); examines finished keys, before they leave factory, to see if they are up to standard quality; wipes keys and sandpapers out scratches; returns faulty keys to workshop concerned; sometimes specially named if operating in ivory or celluloid, *e.g.* celluloid locker-over, ivory locker-over.

machinist (celluloid); general term for any worker operating a rolling, slicing, extruding, etc., machine; see *roller, slicer, tube shop man*.

maker-up (celluloid combs, etc.); places cotton base on celluloid sheets, applies adhesive, turns over edges of celluloid and places in press to stick down turned edges.

maniculate maker; (1) more usual, cuts a metal plate, binds thereon layers of mica splittings into a sheet, brush (on) on bellows to bind layers, hardens and presses; (2) feeds a mixing and crushing machine with mica and binding composition, which is pressed while hot, into sheets; operates levers to start, and stop machine.

maniculate washer maker; cuts manicate sheets into squares, on circular saw or band guillotine, and reduces them to washers by turning them on lathe.

maniculate worker; general term for any worker engaged in making manicate articles by cutting, shaping, pressing, turning, etc.

mother of pearl worker; pearl worker; general term for any worker engaged in cutting, grinding, polishing or finishing-off mother of pearl articles, *cf.* *pearl carver, pearl cutter, pearl grinder, pearl polisher* (619) *q.v.*

parasol tip maker; see *umbrella tip maker*.

pearl box maker; cuts, grinds and polishes pieces of mother of pearl, before gluing against mechanically driven saw, grinding wheel and buff, respectively, and cements pieces together in a framework of metal, wood or other material.

pearl button maker; shapes mother of pearl buttons by cutting, turning and grinding button blanks in lathe to form holes and recesses; holds tools against revolving blank, applies abrasive or polishing composition, starts and stops lathe by means of hand levers.

pearl card case maker, or for pearl box maker.

pearl carver (hand); piercer (mother of pearl); marks, by hand, designs, flutes, etc., on mother of pearl and carves, by hand, with special tool.

pearl carver (machine); guides motion of pearl articles on revolving carbide wheels or steel cutters of varying pattern, either by dry method, or by using water as a dust allover and cooling agent.

pearl dryer; duster; mother of pearl, and articles made therefrom; first prepares pearl by immersing it in solution of ammonia and silver nitrate for about eighteen hours; then thoroughly washes it in running cold water to rid surface of ammonia and nitrate; finally, immerses pearl in vat containing dye, not necessarily aniline.

pearl fitter; ornaments mother of pearl articles by fitting; as for handle fitter.

pearl grinder; grinds mother of pearl articles, after they have been cut to pattern, by pressing them against mechanically driven carbide wheels or against an anvil stone, generally using water for cooling and dust allaying; operates lever to start or stop grinding wheel.

pearl handle borer; borer mother of pearl handles or scales, for cutlery and other articles, with a power drill, in readiness for fixing of blades, etc.

pearl shaver; holds shell against revolving blade of power-driven machine and shaves off brown hack in very small particles until back is a white and even surface.

pearl splitter; see *cutting, pearl*.

pearl worker; see *mother of pearl worker, or cutter, pearl*.

placer (mother of pearl); see *pearl carver (hand)*.

planing machinist (celluloid); see *slicer (celluloid)*.

polisher (piano keys); see *ivory polisher (piano keys)*.

rod machine hand (celluloid); attends and feeds machine which extrudes dough in forced through a die to make rods or tubes.

roller (celluloid); roller attendant, roller machinist; workman (celluloid); passes celluloid dough through steel rolls (hot or cold) to make it homogeneous, producing sheets or thin blocks; may "figure" xylophone, if required, by rolling together sheets or masses of different colours to produce patterns resembling ivory, agate, tortoiseshell, onyx, etc.

sawyer (whalebone); cuts strips of whalebone to length by pressing them against mechanically-driven hand saw; operates machine saw by means of hand lever.

setter (glass combs and slides); (1) sets brilliant stones, etc., in frame combs and slides of celluloid, ebonite, etc.; heats stones, etc., on stove, picks them up with electrically-heated rod, drops them into prepared holes and presses stones, etc., in by means of metal cap (1) sets up, or thumb, (2) sets up of straighten bent or mis-shapen teeth in combs.

shell worker; general term for any operative engaged in cutting, carving, or grinding mother of pearl or tortoiseshell articles, *cf.* *tortoiseshell presser, pearl grinder, q.v.*

slicer (celluloid); slicing machinist; machinist (celluloid); planing machine; operates planing or slicing machine, to cut celluloid, etc., into sheets; sets machine to gauge according to thickness of sheet required; also weighs material after it has been sliced.

solution maker (celluloid); dissolves nitro-cellulose or acetone-cellulose (used) with a solvent to make varnishes, enamels, or coatings used for covering croquet balls, etc.

splicer; joins together two pieces of bone, by sawing or skiving ends splineside and sticking them together with a cement solution.

tooth brush maker; **tooth brush worker**; general terms sometimes applied to workers employed interchangeably on different processes of tooth brush making, e.g., cutter (bone brush making), bone brush proper, bone brush finisher, bone brush planer, bone brush drill, finisher, etc.

tortoiseshell assembler and finisher, **tortoiseshell mounter**; assembles component parts of tortoiseshell articles, e.g., boxes, cigarette cases, and faxes hinges, tooth brush handles, etc., and mounts monograms, etc., by hand, using pins and screws.

tortoiseshell presser; heats the natural tortoiseshell in hot salt water and wraps it in wet rags; places it between hot iron tops or molds, and presses it into sheets or into required shapes by means of dies; if it is to be used in making articles of thick tortoiseshell, cements several layers together with a transparent adhesive before pressing.

tortoiseshell worker; general term for worker engaged in any process of making tortoiseshell articles, e.g., tortoiseshell assembler, tortoiseshell presser, polisher (tortoiseshell) (619) g.v.

trapping machinist; operates and controls a machine which draws out, smooths and shapes tubular lengths of bone, horn, celluloid, and similar materials; rounds off and points crocheted hooks, shoe horns, knitting needles, and other articles of bone, tube shop man (celluloid); **workshaper** (celluloid); operates tube and rod extruding machines, which squeeze and extrude xylonite, etc., through dies, forming rods or tubes used for making cycle pumps, handle bars, etc.; sets dies and controls and regulates machine by means of screws and levers.

umbrella tip maker; **porcelain tip maker**; makes, by turning out of bone, wood or ivory or by moulding from casein, ornamental tips for ribs of umbrellas, parasols, etc.

vegetable ivory engraver; engraves or carves designs, images, etc., in vegetable ivory with delicate hand tools.

whalebone sorter; sorts, for size and colour, whalebone according to purposes for which it is to be used, e.g., cutter (whalebone).

whalebone splitter; splits out whalebone to required thickness, by passing it under rollers feeding knives of splitting machine; operates starting and stopping levers and fits cutting knives.

whalebone worker; general term for any worker engaged in preparation and dressing of whalebone; includes whalebone cutter, sawyer, whalebone sorter, whalebone splitter, whalebone finisher (619), cleaner (619).

xylonite comb maker; (i) makes xylonite combs throughout, by stamping, cutting, profiling, scoring, polishing, etc., by machine; (ii) general term for any worker engaged in stamping, cutting, profiling, scoring, polishing, etc., xylonite in manufacture of combs therewith; includes comb cutter, comb polisher, cropper, sander (619) g.v.

xylonite worker; general term for any person engaged in making articles from xylonite.

619.—OTHER WORKERS.

accumulator case bender, **battery case bender**; bends celluloid sheet into shape of case by warming sheet to soften it, and bending it round block.

accumulator case cementer, **battery case cementer**; a cementer, g.v., who joins parts of celluloid case cut by accumulator case maker (618) g.v.

bleacher, **bone bleacher**; **stock bleacher**; bleaches cut pieces of bone, ivory, etc., by immersing them in tubs of tepid water containing hydrogen peroxide or other bleaching solution; cf. ivory bleacher (618).

bone brush tub man; a bone bleacher, g.v., who boils and bleaches bone brush handles; smooths handles in revolving tub, "rumbler," of water and whitening; boils in copper containing bleaching agent and allows to cool overnight, sometimes steaks boiler fire.

bone sander; removes rough surfaces from bone article on power-driven pumice stone grindstone, or on glassers covered with emery.

bone stainer; dyes; gives bone articles a colour finish by dipping them, by hand, in vats containing dye and heating acid respectively.

buffer; (i) see polisher, or sand paperer; (ii) (celluloid collars) passes collars and cuffs through rollers bound with many thicknesses of cotton and coated with gloss producing solution.

buffer, comb, see polisher, comb.

burgrailer (machine); **comb grailer**, **machine grailer** (celluloid); a machine grinder, g.v., who rounds off teeth of combs and their bases on a machine, removing "burrs" and irregularities; for hand worker, see burgrailer (618).

buttonholer (celluloid); (i) **metal buttonholer**; places celluloid collars in a buttonhole machine, and pulls lever to stamp in and fix metal rims to buttonholes; (ii) in button trade, pierces holes in celluloid buttons; cf. drill.

button mottier; dyes; colours or stains sheet celluloid or erinoid used in button making; positions stencils, and working trigger of compressed air spray, directs liquid colour upon sheets; changes stencils and replenishes spray container as necessary.

button worker; general term applied to workers employed interchangeably in button making, e.g., as turner (button) (618), drill (619), polisher (619) g.v. or, in making mother of pearl on erinoid buttons.

celluloid collar maker; general term covering workers in manufacture of celluloid collars and cuffs, including cutter (618), maker-up (618), buffer, shaper, buttonholer, g.v.

cement (celluloid); **jointer**; joins, using hand brush, component parts of celluloid articles with liquid celluloid, e.g., action of celluloid in any-necotone, acetone, and methylated spirits.

clatter (celluloid); rounds off and smooths teeth of combs on a calico mop charged with emery powder and water, or with powdered pumice.

cleanser (celluloid); sheet cleanser; rubs over surface sheets with cloth dipped in naptha to remove dusty film, etc.; cf. washer.

cleanser (whalebone); washes whalebone with hand brush or under mechanically driven revolving brush; removes hair from fins with hand knife.

comb drill; holds comb, after grinding process, against revolving cloth dolly, fed with sand and water to smooth away burrs, etc.

comb fluter (horn, ivory, tortoiseshell); **comb quiller**; a machine grinder, g.v., who grinds a longitudinal groove along roots of teeth of comb, thus forming a fluting at back of comb.

comb grailer, see burgrailer.

comb grinder (bone, horn, etc.); a machine grinder, g.v., who grinds sides and edges of comb.

comb quiller, see comb fluter.

comb setter-in; heats and presses into place outside teeth of comb, by placing in mould of small hand press.

cropper (celluloid comb), see twinner.

cutter, **comb**, may be either cutter, comb circle or twinner, g.v.

cutter, **comb circle**; **comb cutter**; cuts out teeth of more expensive combs, on a circular saw; sometimes also sets saw.

cutter, **comb twin**, see twinner.

driller; drills holes in smooth erinoid, gimbals, etc., button shapes, in semi-automatic drilling machines; fixes

shapes in machine, sets machine and stops it to change drills, to re-set, to feed, etc., cf. buttonholer.

drying room hand (erinoid), assists in room where casein is dried and cooled, carrying, stacking and attending to process.

drying room worker (celluloid), **layer-out**; lays out sheets of celluloid, after they have been sliced, to remove volatile solvents, in heated drying rooms.

dull finisher, see scourer.

dyeer, see bone stainer or button mottier.

fancier, see stamper.

flattener (celluloid), see scourer.

flouter, see layer.

flyer-out (celluloid), see stamper.

graver; cuts slots in backs of toothbrush stocks, along lines of handle holes by pressing blocks against circular saw, or number of parallel saws; sometimes also cuts slots with hand saw.

handle glasser; glasses, polishes, etc., cutlery handles of bone, ivory, etc., on wooden wheels, or glassers, having leather rims coated with glue and fine emery powder.

jointer, see cementer.

layer (celluloid collars); **flouter**; lays sheets of celluloid alternately with cotton fabric; pastes them together, places them in steam press which waxes material.

layer-out (celluloid), see drying-room worker.

machine grinder (celluloid), **machine grailer**; grinds sheets of xylonite or other similar material by holding against a pumice grindstone or by feeding into a special grinding machine; also grinds articles made of xylonite, etc., such as points of knitting and crochet needle, grooves in nail file, and any bevel edge, point, or hollow in any article; cf. burgrailer (machine).

metal, **buttonholer**, see buttonholer (celluloid).

moulder, see shaper (celluloid).

madguard maker (celluloid); (i) blanks and stamps out madguard parts on a press; (ii) assembles and fits together component parts of madguards.

pearl buffer, **pearl dolly**, see polisher, mother of pearl.

pearl glazer; removes marks, left by grinding on carburendum wheels, from mother of pearl articles by pressing them against a leather faced glazer, dressed with fine emery and glue, and used without water or grease; operates lever to start or stop action of pearl polisher.

pearl rumbler, mother of pearl rumbler; places mother of pearl articles with wet or dry pumice in a revolving barrel or rumbler; controls motion of machine by levers and removes articles when polished.

pluton worker; **teledron press operator**, **teledron stamper**; rounds hot teledrons (pluton), a cellulose compound, in a press; cleans off burred surfaces and polishes finished article.

polisher; polishes articles of bone, erinoid, tortoiseshell, etc., by holding them against a power-driven linen or calico mop smeared with Tripoli grease composition; sometimes specially named according to article polished or material worked in, e.g., bone brush polisher, bone polisher, billiard ball polisher, button polisher, horn polisher, tortoiseshell polisher.

polisher, celluloid; (i) **sheet celluloid**; imparts a high polish to celluloid sheets by pressing them between heated polished plates, placed in a hydraulic press; (ii) (celluloid goods) polishes finished celluloid articles by smearing them with a polishing paste of pumice, etc., and by holding them against a calico mop power-driven at high speed.

polisher, comb; **comb buffer**; a polisher, g.v., who polishes combs of celluloid, erinoid, etc., on a power-driven calico mop, either dry, or dressed with applications of rotten stone and oil.

polisher, handle; a polisher *g.v.* who polishes cutlery handles (bone, xylonite, ivory or metal) on a leather or felt dolly wheel.

polisher, mother of pearl; *pearl polisher*; *pearl buffer*, *pearl dresser*; a polisher *g.v.* who polishes mother of pearl articles with a polishing paste, containing rotten stone putty powder, or vitriol, by hand, or on a power-driven revolving canvas mop; sometimes does work of pearl planer *g.v.*

press hand (celluloid, etc.), *see* stamper.
pressman, hydraulic pressman (celluloid, etc.); (i) (*also* *celluloid*) takes sheets of xylonite, etc., after they have been rolled, places them together, and presses them, by hydraulic pressure, into a thick homogeneous block or mass; (ii) (*celluloid goods*) *see* stamper.

profiler (bone brush making); shapes sides of bone handles for tooth brushes by means of profiling machine, operating handle and lever of machine to bring bone stock in contact with cutting tool; for hand worker, *see* bone brush profiler (618).

profiler (celluloid); shapes strips of celluloid (xylonite, etc.), to correct curves and grooves to form shaped top of comb, tooth brush, etc., on a profiling machine.

radisher; removes rough edges from articles of xylonite, etc., with a knife, before it is secured and polished.

sander; a sander *g.v.* using a sand rubber or revolving barrel containing sand.

sandpaperer (celluloid, etc.); *buffer*, a sander *g.v.* using a sandpaper covered disc, drum or band.

sawyer; saws up bone, horn, celluloid, etc., to convenient sizes and shapes on a power-driven hand saw, in preparation for more skilled operations.

scooter (celluloid, etc.); *shell finisher*, *finisher*; removes rough surface on finished articles of celluloid, erioid, etc., before final polishing, using a sand-covered disc, a disc rotating with sandpaper, a power-driven pumice-stone wheel, an endless band of sandpaper, or in a rubber, or revolving barrel, containing sand; *cf.* sandpaperer and sander.

shaper (celluloid); moulder; (i) places shapable articles on a plate worked by steam to soften them, and shapes them by pressing into moulds by hand or in press; (ii) (*celluloid colours*) holds collar for a few seconds round steam heated block to soften and bend it to desired shape.

sorter (celluloid); examines and grades erioid sheets; blocks, rods or other forms as received from manufacturer.

sorter, scrap sorter (celluloid); sorts and grades scrap celluloid for re-working by pot shop man (148) *g.v.*

sprayer (celluloid); sprays celluloid in liquid form on to articles which are required to have a coating of celluloid, by means of a compressed air spray.

stainer (celluloid); stains celluloid articles by dipping in baths of aniline dyes dissolved in acetone, alcohol, or similar solvents.

stamper (celluloid); *fancier*, *fly-out* (celluloid), *press hand* (celluloid), *pressman* (celluloid goods); inserts sheets of celluloid in power-driven press fitted with cutters; pulls lever; controls valve by which steam alternately heats and cools water cooled before and after pressing.

stitcher (celluloid); (i) sews together by machine component parts of celluloid articles to make various kinds of receptacles; (ii) stitches in power sewing machine sheets of celluloid to fabric or leather for boots, side-screens of motor cars, etc.; finishes by hand sewing.

stock bleacher, *see* bleacher.

straightener (eroid), *panose* sheets, rods or tubes, made of erioid, through a set of rolls to straighten them.

straightener (whalebone); feeds whalebone to rollers of straightening machine; operates machine by levers and handles straightened whalebone, stripper (celluloid), takes or strips off thin celluloid articles from mould on which they are pressed by shaper or moulder.

swifter (celluloid comb); cleans and smooths surfaces between teeth of celluloid combs, cut by comb twinner, by pressing comb by hand against small cutting edge rotating on a power machine.

talandrom press operator, talandrom worker, *see* piston worker.

trimmer (whalebone brush); trims ends of whalebone lengths, for use in whalebone brushmaking, in hand operating guilottes.

twinner, comb twinner (celluloid); comb *facis* cutter, *cropper* (celluloid comb); attends a machine in which two combs are cut out of each blank, with teeth interlocked; places blank in position in machine and operates machine by means of lever.

washer (celluloid sheet); places cut sheets in slotted frames and immerses them in successive baths; *cf.* washer (149).

whalebone finisher; scrapes, with hand knife, polishes and sandpapers, by hand, cut lengths of whalebone to round off and finish for use.

xylonite collar maker, *see* celluloid collar maker.

Sub-Order 3. — Workers in Other Materials.

631.—FOREMEN AND OVER-LOOKERS.

head miller (linoleum, etc.); in charge of linoleum cork mill; directs cork grinders (639) *g.v.*; starts and stops series of breaking, disintegrating, scalping, milling and dressing machines, maintains smooth running by adjusting speed of machines and converters, does running repairs and is responsible for condition of finally cleaned and ground cork.

632.—FEATHER DRESSERS AND DYERS.

box maker (feather); general term applicable to any worker engaged in making feather boxes, including feather box curler, layer-up (638), sewer (638), feather box steamer, and box trimmer *g.v.*

box twister (feather); foister and steamer (feather box); takes one end of seven chain of feathers forming box, and hooks one end over an attachment on a small wheel; turns handle, causing wheel to revolve; passes hand rapidly up and down revolving box, giving a slight twist to feathers, and at same time freeing fronds and stuffing them out; usually also steams box by means of boiling kettle fitted with long stem; *cf.* box steamer.

curler, feather; receives previously steamed feathers, either singly or sewn together, or receives feather box for curling; draws fronds, and does (i.e. fronds, not fully grown) bend, straight, and blunt curling knife; also assembles and wires feathers to form sprays, and covers wiring by binding round strip fabric and gluing down end of strip; often also does work of feather steamer *g.v.*

curler, feather box; ostrich feather curler, *see* for curler, feather.

dye, black (feather); a specialised feather dyer *g.v.* solely engaged on dyeing feathers black; mixes and bleeds special materials so as to obtain most brilliant black dye possible; varies treatment according to

properties of dye and strength of feathers in batch to be dyed, taking care to make fronds stand out thickly, and not to let feathers be thinned during process.

dye, colour (feather); a feather dyer *g.v.* who dyes feathers in various colours; duties generally similar to those of black dye, except that dye materials used are different.

dye, feather; dyes feathers to pattern, sometimes producing spot or shot effects on feather; carefully chooses, mixes, or blends dyes, having regard to action of various dyes on feathers; heats dye in mixing vat, and at required temperature, immerses one feather for testing purposes, watches and times process; takes feather out of dye, washes it, dips it into trough containing starch, rubs it in farin to remove moisture and to stiffen fronds, i.e., fine, and dries it in drying frame, to immerse entire batch, with such modifications in above process as may be necessary to obtain exact shade required; hangs feathers on hooks attached to revolving cylinder, which beats them lightly against a board to remove superfluous starch; sometimes polishes parts of feathers, so that they may or may not take up dye, or otherwise varies treatment.

feather beater; beats feathers on a board by hand to remove moisture and starchy substances after dyeing, where machinery is used, work is usually done by feather dyer *g.v.*

feather bleacher; mixes bleaching solution according to requirements of particular kind of feathers to be treated and immerses feathers in solution; removes them and dries in drying room; rubs them in farin, if necessary; sometimes does work of feather dyer *g.v.*

feather cleaner, ostrich feather cleaner, *see* feather washer.

feather dresser; general term applied to worker engaged on any process used in connection with feather dressing, and including cleaner, curler, twister, *g.v.*

feather maker, ostrich feather maker; general terms applied to any worker engaged on preparation of feathers for use in connection with articles of dress, including feather curler, feather dyer, feather bleacher, feather trimmer, feather washer, *g.v.*
feather stringer; removes pith from base of feather with a knife; cuts away any dye, i.e., frond, not fully grown, ties together two or three feathers in a group; fastens several groups in a row at one end of string to facilitate handling during processes of washing, bleaching, dyeing, etc.

feather washer, ostrich feather washer; feather cleaner, ostrich feather cleaner; (i) (preliminary) places feathers in revolving washing machine filled with water containing soap or washing powder; removes feathers when thoroughly washed and places them in revolving dryer; takes feathers from dryer, and hangs them in hot chamber to dry off; (ii) (*after drying*) when feathers are dry from dye, dips them in a mixture of soap and water, pulls them through the soaked hands and places them in tank of water to soak for several hours before putting them in drying room.
feather worker, plumassier; general terms for workers engaged in bleaching, cleaning, curling, dressing or dyeing feathers; *cf.* feather worker (638).

plumassier maker; makes small plumes or cigarettes by twisting, by hand, steep uncured tips of feathers over steam until feather is twisted all the way down.

steamer, box; feather box steamer; receives box from box twister *g.v.* and allows jet of steam to play on it at any desired points, by control-

ling direction of steam; dries hose by passing it over steam pipes, repeats process after each repetition of winding operation; sometimes also does work of feather steamer *q.v.* steamer, feather; allows jet of steam, direction of which she controls, to play upon feather; with other hand, passes feather as required, by pressing and bending it.
twister and steamer (feather hose), see lion twister.

633.—DRAWERS AND BRUSH MAKERS.

artist's brush maker; camel hair brush maker, camel hair pencil maker, hair pencil maker, hair pen maker; makes brush throughout—combing, sorting, and mixing hairs; binds with thread and fixes into ferrule or quill with shingles or canvas; camel hair brush maker, camel hair pencil maker, camel hair pen maker, see artist's brush maker.
bone brush maker; a drawer *q.v.* making tooth or other brushes with bone backs or handles; *cf.* tooth brush maker (618).
bottle brush maker; a wire brush maker *q.v.* making spiral brushes for cleaning bottles.
bristle drawing hand, see drawer.
camel hair brush maker, camel hair pencil maker, see artist's brush maker.
carpet broom maker, carpet brush maker; a pan hand *q.v.* who fills broom stock with whisk or stiff bristles or fibre.
copper stock hand, see painting brush maker.
cycle brush maker; a wire brush maker *q.v.* making wire brushes for cleaning bicycles.
drafter, see drawer; *cf.* drafter (638).
drawer, drawing hand; bristle drawing hand, drafter; inserts bristles, etc., in prepared holes in brush, and fastens them therein with wire wound round base of bristles and laced at back of brush.
drawer, hose; makes hose brushes for use in water, by passing wire through hole in wooden stock, and hose through loop of wire; tightens wire, then doubling hose and drawing it into a knot.
fibre broom maker; a pan hand *q.v.* using tufts of fibre.
filler, machine filler, machine borer's plate filler; machine brush head, machine brush orderer; attends to machine which fills holes in back of brush with bristles; feeds machine with bristles and wire, positions brush stock, and pulls lever causing bristles to be pressed and stepped automatically in stock; sometimes specifically designated according to material used, *e.g.*, brush filler, fibre filler.
fine tool maker; makes decorators' and grainers' brushes throughout, sorting and dressing hair, binding it together, and setting it in ferrule with fine glue or cement.
flat hand; mason brush maker, mason hand, soiled stock hand, nailed stock maker, whitewash hand; makes flat brushes, *e.g.*, whitewash brushes, stone mason brush maker, arranges bristles round stock, wire handles or metal strip tightly over all and secures by nailing; *cf.* painting brush maker.
fine brush maker, see wire brush maker.
glue and paste brush maker; makes brushes in which bristles are inserted in ferrule by a paper wrapping, which is removed after bristles are inserted; work usually done by painting brush maker *q.v.*
grainer's brush maker; a fine tool maker *q.v.* who makes special brushes used by painters for staining, mottling, over-graining, etc.
hair pan hand, hair broom maker; a pan hand *q.v.* using bristles, or a mixture of horse hair and bristles.
hair pencil maker, hair pen maker, see artist's brush maker.

ivory brush maker; a drawer *q.v.* making hair brushes and other fine brushes with ivory backs.
machine brush hand; (i) see filler; (ii) see mill machine brush maker.
machine brush stapler, see filler.
machine drawing hand; a drawer *q.v.* who feeds and operates a machine in which brushes are made by drawing metal; keeps machine fed with bristles and inserts and removes brush blank at each operation.
machine soale brush maker; a machine drawing hand *q.v.* who makes special brushes of wire, instead of bristles, by drawing method, to be used for setting castings or for removing scale (incrustation) from boilers.
mason hand, mason brush maker, see flat hand.
mill machine brush maker; machine brush hand; a pan hand *q.v.* or a drawer *q.v.* who makes special types of brushes for use in machinery such as textile printing, flour milling, etc.) either by pan method or by drawing method.
nailed stock hand, nailed stock maker, see flat hand.
painting brush maker, paint brush hand, paint brush maker, painter hand, paint hand; copper stock hand; affixes bristles of painting brushes to handles by resin or cement; binds them tightly, by hand or machinery, with wire or glued string; and/or frames bristles (or hair) and stock; sometimes sorts bristles into lengths, as for hair hand (638), before binding; sometimes also does work of flat hand *q.v.*
pan hand; dips knot or tuft of whisk, hair, fibre, hair, etc., into pitch, binds end with wire, re-dips in pitch and inserts in wooden stock.
sash tool maker; makes small round paint brushes with one tuft or knot of bristle secured to handle by metal or string binding.
scale brush maker; makes, as for drawer, special wire brushes, used for fettling castings or for removing scale (incrustation) from boilers.
scratch brush maker, see wire brush maker.
shaving brush maker; makes shaving brushes, by inserting thick tufts of hair, carefully sorted and dressed, in metal ferrules, or in bone or ivory holders, and securing them with cement.
soiled brush maker, as for fine tool maker.
stapling brush maker; a fine tool maker *q.v.* who sets knots by "pan" method into flat boards for painter's stippling brushes.
tube brush maker, as for bottle brush maker.
varnish brush maker; makes round, oval or flat brushes for use in varnish or enamel work, by binding bristles to handle, by wire or glued string.
whisk maker, whisk broom hand, whisk pan hand; (i) a pan hand *q.v.* who makes small whisk clothes brushes; (ii) a drawer *q.v.* who makes whisk brushes.
whitewash hand, see flat hand.
wire brush maker; (i) fine brush maker; makes spiral brushes, the material (hair, whisk, bristle, etc.) being held tightly between two or more wires twisted together which form the axis of the spiral; (ii) scratch brush maker; makes brushes by a drawing process (see drawer) in which wire is substituted for bristles.

638.—OTHER SKILLED WORKERS.

agate splitter, see stone splitter.
amber turner; turns on lathe, and sets into suitable sizes and forms amber and imitation amber; turns into beads, and drills for stringing, amber used in jewellery; uses automatic lathe, or semi-automatic lathe and hand tools, according to individual skill and type of work involved.

amber worker; cuts, drills, and polishes, by hand, or by machine, amber for use in necklaces, brooches, etc.
bass comb; a bass dresser *q.v.* who is engaged solely on combing bass; *cf.* oiler.
bass dresser; hackles bass by drawing it across a buckle, composed of several rows of coarsely set steel teeth, which straightens bass and removes tangles; cuts bass into lengths by means of hand knife or by mechanically-driven cutting machine, makes different grades finally straightens bass by drawing it across fine-toothed "bass comb," and ties up into bunches with cord; if necessary, dyes bass in boiler or vat of dye before backing; in some firms does not backle.
black ornament maker, black ornament worker; a gem cutter *q.v.* who cuts and grinds jet to make jet ornaments and jewellery.
block printer; printer (floorcloth, etc.); spreads paint or colour, which has been prepared by colour mixer (162) *q.v.*, on a flat sheet, ink, or coloured wooden blocks by lightly impressing these sheets upon them; unpresses blocks to prepared on length of floor cloth (about 4 feet) stretched on a bench, using guide or clamps to ensure accuracy in placing blocks; if necessary, to give additional pressure, uses hand-manipulated screw press.
bowl cake maker; calender bowl cake maker, mangle bowl cake maker; lays cotton in a circular cake and puts it under a power press to form it into round-shaped cakes, which are afterwards assembled into "bowls" or "rolls."
bowl press man, bowl maker (soften bowls); calender bowl press man; assembles bowl cakes in heavy hydraulic press, and operates press to press cakes together, to drive metal shaft through, and to fix metal ends so to complete bowl, or roller, ready for turning, grinding and buffing.
buff-lantheer; a diamond polisher *q.v.* who cuts small facets on stone.
bristle comb; a hair hand *q.v.* engaged only in combing bristles on coarse hand comb; *cf.* oiler.
bristle dresser, see hair hand.
calender (and mangle) bowl cake maker, see bowl cake maker.
calender (and mangle) bowl press man, see bowl press man.
calender man, see linoleum calender attendant.
charcoal burner; wood coiler; burns timber in a muffle, or closed furnace, which reacts it, to make charcoal, without allowing complete combustion; sometimes works in a wood or plantation when usually timber cut to suitable uses is specially stacked in form of a cone and overlaid with earth and turf; controls rate of combustion by regulating inlet of air; *cf.* wood distiller (145).
cleaver (precious stones); applies blunt steel knife to line previously scratched with diamond or harder stone on precious stone (set in wax), and splits stone by hitting knife with small mallet; sometimes specifically designated, *e.g.*, diamond cleaver.
comber (brush making); a bass comber or bristle comber *q.v.*
cork burner; places slab of cork upon a grid over an open fire, and heats them until rough fibre is removed and cracks sealed; cleans pores of burnt cork by throwing cold water thereon; brushes off superfluous cork; slices fire.
cork collar; ties up raw cork in bales with hoop iron.
cork dockar; shortens pieces of cork either with hand knife or hand-operated guillotine; *cf.* cutter, cork (hand).
cork machinist, see cutter, cork (machine); *cf.* cork machinist (638).

cork notcher; cuts cork into squares and shapes small enough to fit different cutting machines, using hand notching knife fitted with adjustable gauge; is usually also a cork cutter *q.v.*

cork rounder, *see* cutter, cork (hand).

cutter, cork (machine).

cork sorter; sorts out cork sheets or finished corks according to size, shape, and quality, relying only on personal judgment.

cork turner; makes articles of cork (or cork composition) by shaping them on a lathe; as for turner (486).

cutter, cameo shell cutter; cuts, carves, and engraves suitable designs in shell (generally head images), as used for mounting in brooches, rings, scarf pins, etc.

cutter, coral; coral grinder, madrepore cutter, madrepore grinder; cuts, grinds, and polishes various formations of coral, beads, ornaments, etc., using automatic lathe, or semi-automatic lathe and hand tools, according to individual skill and type of work involved.

cutter, cork; cork rounder; (i) (hand) cuts cork wood squares by hand, using knife fitted with adjustable gauge; also required sizes and shapes for bottle corks, etc.; sometimes also does work of cork decker, cork notcher *q.v.*; (ii) (machine) cork machinist; cuts bottle corks, etc. out of squares of cork wood in a lathe; presses cutting tool against revolving cork until cork is cut to desired size by foreman; starts and stops lathe by hand lever; is usually also a cork notcher *q.v.*

cutter, diamond; fine diamond received from cleaver, or sawyer, in revolving chuck, and, by means of diamond set in handle, roughs out conical surfaces ready for faceting by diamond polisher *q.v.*; *see* also brillianter, and squarer.

cutter, gem cutter, precious stone cutter; gem grinder, grinder lapidary; forms gem of precious stone to required shape either by cleaver (see cleaver), by cutting or by rubbing on edge of copper or lead "laps," i.e., discs, with constant application of lubricant and abrasive to stone and disc, by hand; turns handle or works treadle to drive disc; presses stone against disc in cutting, etc., or, small, fine cements it in a pencil-like support; polishes stone similarly, using rotten stone instead of abrasive; sometimes specially named according to gem cut, e.g., amethyst cutter, malachite cutter, sapphire cutter, opal cutter, oriental stone cutter, pebble cutter, ruby cutter, sapphire cutter, serpentine cutter, spar and fluor spar cutter, lapis cutter, turquoise cutter; sometimes does work of stone slitter *q.v.*

cutter madrepore, *see* cutter coral.

cutter, quill pen; as for tooth-pick maker (393); *obsolescent*.

cutter, serpentine, *see* serpentine worker.

designer and transferer, designer (floorcloth); designs and draws out on paper patterns for linoleum and oil cloth; paints patterns to scale or to exact size, in colours suitable for floorcloth or linoleum production, also does work of transferer *q.v.*

diamond cleaner; cleans finished stone in warm diluted nitric and sulphuric acid; washes stone in water, then in spirit, and dries with polishing cloth.

diamond die driller; diamond wire driller; taps holes in diamond dies used for drawing small gauge wires; works in holder, with splitter, drilling, or tapping, diamond, and secures in machine over diamond to be drilled; starts and stops machine by lever, and feeds point of tapping diamond with oil and diamond paste.

diamond mill cleaner; *skiff* (three) cleaner or polisher; renovates worn surface of cast iron discs on which

diamonds are polished by applying series of sandstone rubbers, coarse at first, then fine.

diamond polisher, diamond dresser; dresser; puts facets (usually 56) on diamonds, recovered from diamond cutter, *q.v.*, by resting it upon rapidly revolving cast iron disc on which is placed cutting medium of diamond dust made into paste with olive oil; in some cases forms only first 16 facets, remainder being added by finisher *q.v.*

diamond sawyer; sawyer; places diamond in chuck, and saws along lines, marked out by works manager, by means of a rapidly revolving disc of phosphor bronze to which a cutting edge of diamond dust and olive oil is applied.

diamond sorter; sorts or grades diamonds of equal quality into sizes, weighing on delicate balance.

diamond wire driller, *see* diamond die driller.

die dresser, die polisher; *see* a diamond die driller *q.v.* who, using a drilling diamond tool, re-cuts and enlarges, i.e., renews, worn diamonds due to use of larger size.

drafter (horse hair); (i) horse hair drafter, sewer; washes horse hair, sorts it, and distinguishes from bristle, *see* hair brush with soap in hot solution of soda and water; dries hair in hot air chamber, and throws hair over a huckle, drawing hair through the coarse steel teeth to straighten it, levels root ends of hair, and places them in carding machine composed of fine steel teeth; grades hair into lengths, starting with longest hair, by dragging hairs of equal length from the machine; bunches the various lengths and ties up with cord; (ii) *see* line drafter; (iii) *see* also drawer (535).

drawer-off; *pusher-off*; cuts cork lengths to required thickness either on circular saw or with hand knife fitted with adjustable gauge.

dresser, *see* diamond polisher.

dresser (brushmaking); general term sometimes applied to *bam* dresser, *fine* drafter, hair hand *q.v.* and also drafter *q.v.*

engine comb hand, bristle engine comb hand; a hair sorter *q.v.* engaged only on machine combing; regulates and feeds comb which brings together root ends of bristles and takes out rough ends; *obsolescent*.

examiner (brush); examines visually completed brushes for defects in material used or in workmanship, before boxing.

fancy finisher; shapes wooden stock of fancy brushes with file, knife, or sandpaper; gives back to brush after it has been drawn, and finishes edges.

fancy trimmer; cuts ends of bristles in tooth brushes, with scissors, to give a serrated or other shaped finish.

feather scraper; scrapes pith from ribs of feathers in order to render them more pliable, by (i) drawing each feather between two small revolving scrapers, worked by a treadle machine; (ii) scraping ribs of feathers by hand, with a scraping of glass.

feather worker; general term for any worker engaged in laying-up department, including layer-up, knetter, wrier and paperer, sewer, machinist *q.v.*; also as stretcher down *q.v.* or in otherwise working feathers for any purpose; *cf.* feather worker (635).

fine drafter, fibre dresser; drafter (horse hair); sorts fibre and throws out badly coloured strands; straightens and cleans fibre by drawing it over a huckle (coarse one and, leaving ragged ends toothed comb); levels fibre at both ends, and places levelled ends in carding machine composed of several rows of fine steel teeth; from varying lengths of loose ends, draws off equal lengths of fibre, and ties them into bundles with cord; if necessary, dyes fibre in a boiler or dye vat before backing.

finisher (brooms and brushes); shapes brush back with band saw, spoke-shave, and draw-knife; sandpapers and finishes generally, glues it, and sometimes also sews it to brush; places backed brush in vice to secure glazing.

finishing machine hand; a finisher (brooms and brushes) *q.v.* operating shaving and sandpapering machines only.

float maker (fishing); (i) mole, cuss and pieces together cork or wood fishing line floats, using hand cutting and smoothing tools; sometimes drills floats, hand or machine drill, and inserts quill; (ii) female, reservoir fronds from feathers, trims to shape and paints, using knife and paint brush, to make quill fishing line floats.

grainar, table balise grainar; attends table balise graining machine assisted by buck tender (539) *q.v.*; places roll balise, recuts and dresses it, and trowels (635) *q.v.*, in position in graining machine; feeds balise to graining rollers, delivery roller, etc.; operates machine by hand levers.

grinder, cameo; grinds and finishes, on a lathe, engraved reliefs, after cutting by cameo cutter *q.v.* and fits them into standard sized gauge, by means of hand tools for subsequent fitting into jewellery; *obsolescent*.

grinder, coral, *see* cutter, coral.

grinder, madrepore, *see* cutter, coral.

grinder, gem grinder, *see* cutter, gem; sometimes specifically designated, e.g. californium grinder, carbuncle grinder, cat's eye grinder, kaiser grinder, jet grinder, malachite grinder, onyx grinder, pebble grinder.

hair hand, hair dresser, hair mixer, hair sorter, bristle dresser; dresses bristles, i.e., hog hair, badger hair, or whale whiskers (as distinct from hair, *see* drafter); combs and cleans bristle by dragging it across a coarse comb; grades bristle, places it in layers, and mixes grades by again drawing bunches, each containing different layers, across vertical toothed comb; passes bristle over a sieve to separate root ends from top ends, and sorts it into lengths by selecting longest lengths and removing them from bunch between thumb and knife; sorts out various thicknesses of hair, *see* dragging bristles over an engine comb, spaces between teeth of which vary; ties up root end of engine bristles, may also wash and stone bristles, *cf.* washer (638).

hand troweller; troweller, troweller. trowler; spreads mixture of boiled oil and colour, by hand, with trowel and stiff brush over surface of cloth, canvas, oressian, in manufacture of floor cloth, oilcloth, table balise, or leather cloth; *see* also machine troweller (539).

hanger; attaches rolls of linoleum and oilcloth to rollers on gears which are situated above roofs of "stores" (large buildings heated to 100°-120°F.), where they are left for several days to dry and harden.

hanger (leather cloth); arranges wet leather cloth, in lengths of about 150 yards, after it has been soaked or backed, for drying in hot room, taking care that wet surfaces do not touch.

horse hair drafter, *see* drafter (horse hair).

inlayer of marble; a gem cutter, *q.v.* who also cuts and cements marble-like Jasper to form inlays, vases, boxes, etc.

jet ornament maker, jet worker; a gem cutter *q.v.* who cuts and grinds jet for black or jet ornaments and jewellery.

knot picking machinist, knot picking machine hand; operates hand machine which selects quantities of material (bristle, hair, etc.) required for any size "knots," in broom and brush trade.

knitter; knots additional lengths of fronds to each side of feather and snaps off loose ends close to knot with shears, or cuts off part of fronds from one feather and milles them with those of another feather to make artificial combinations of black and white, or variegated feathers; sometimes cuts off outside half of fronds on two feathers and transposes cut fronds by knitting; may slit feather down centre of ribs and sew it on to half of another feather similarly slit.

kreus worker, *see* **squarer**.

lapidary, *see* **cutler**, *gem*.

layer-up, feather layer-up (feather heavy) receives (1) pairs of feathers, which have been cut up by forewoman (631) *q.v.*; scrapes path from ribs with a piece of glass, or for feather scraper; makes diagonal cuts in ribs, so that cut in rib of one feather fits into corresponding cut in rib of another feather; reverses, fits pieces together and sews round and through joint with needle and thread; sometimes also does work of knitter *q.v.* or does wiring and papering, sewing or machining.

life belt maker (cork), life buoy maker (cork); (i) parts cork, reverses and shapes cork slabs to make life belts, and covers them with case of canvas; sews them into place with palm and needle; (ii) cuts blocks of cork and inserts them in series of canvas pockets in belt; may sew into place with palm and needle, but this is not done by machines (419).

linoleum calender attendant, **linoleum calenderer**; **calender man**, **roller floor hand**; attends calender machine which spreads cork composition uponessian; regulates composition thickness by adjusting roller lever or screws; regulates roller temperature by steam cocks; ensures that composition passes correctly through machine.

machinist, feather; receives rack of feathers from stretcher down *q.v.* and passes it under double needles of treadle sewing machine, which sew round ribs of feathers; keeps feathers in position during sewing and takes care that lengths of feather are sewn evenly together; passes feathers to him twister *q.v.*

mangle bowl cake maker, *see* **bowl cake maker**.

modeller; carries out with hand engraving tools designs of modallion in wax or other soft substance, from which subsequently plaster impression for metal cast is taken; is sometimes also a designer.

modeller; models and prepares any plaster work, papier mâché, or other modelling required in film studio; in engineering works makes models from which iron patterns are made; sometimes specifically designated, *e.g.* statues modeller, **slit table cover printer**; a printer *q.v.* engaged in printing oil table covers, or table bases.

pearl stringer; measures for size and matches for colour by eye pearls of a necklace or pendant strings in proper sequence, gradates with gauge, and weighs on delicate balance, and fits clasp, by hand.

plasterer; term sometimes applied to any worker in bass, *e.g.* bass dresser, bass pan hand *q.v.*; plaster is a form of bass.

plaster cast maker; makes plaster casts, for use in reproduction plaster coating, by running plaster-of-Paris into a case or mould containing a model of object to be cast.

plaster image maker, *see* **plasterer** (shop hand); *cf.* **plaster image maker** (574).

plasterer (shop hand), plaster modeller, plaster model maker; plaster image maker; makes models and effigies in plaster of Paris by hand, using fine moulding tools, when necessary, repetition work is carried out by working upon models obtained from casts.

polisher, **gem polisher**; polishes, with fine powders, rouge, etc., on revolving copper disc, finished gems before, and sometimes after, setting. **printer** (polisher) or hand-floorcloth, etc.; sometimes specifically designated, *e.g.*, floorcloth printer, house painter; (i) operates, by belt levers, switch, etc., a rotary machine which prints patterns on oilcloth or linoleum by means of engraved or cut rollers fed with various oil colours; places rollers in correct sequence in machine, fills colour troughs, guides linoleum and through various colour rollers and on to final winding-on roller; (ii) attends flat type linoleum, etc., printing machine, or for (1) (i) *see* block printer; (iv) turns hand wheel, causing rollers to revolve in troughs of paint to small hand machine for printing cheap oilcloth; guides end of floorcloth to rollers and maintains paint supply in troughs.

publisher, *see* **drawers-off**.
purifier, feather; weighs cut feathers and empties them into three or four machines which he attends; controls valves which admit steam among feathers to sterilise them; removes feathers when process is complete; records weight of feathers passing through machines.

putter-in; inspects linoleum after laying and cuts and inserts missing pieces; uncalls whole line in stems heated press and feeds to mechanically driven drum for winding into rolls.

roller, floor hand, *see* **linoleum calender attendant**.

sawyer, *see* **diamond Sawyer**.
tachy (shiv) cleaner, polisher, *see* **diamond mill cleaner**.

serpentine worker; **serpentine cutter**; cuts serpentine (hard rock found in Cornwall) into paper weights, namkin rings, and other fancy articles.

setter-up, *see* **verstealer**.

sewer, feather; (i) sews together a number of feathers of various colours and sizes, selected and grouped by forewoman (631) *q.v.*, to form sprays; (ii) sews feather bass, after twisting and turning, on to fabric support by sewing down rib of bass with running stitch; places a number of bass side by side on fabric; places a lining of felt or similar material against fabric support, and puts a further layer of fabric on to that to form a back; sews edges of back over lining to cover all over of fabric on which he is stitched; sews down lining by stitching it to back.

sorter (brush making); may be either a bass dresser, a hair hand or fibre dresser *q.v.*, sometimes specifically designated, *e.g.*, hair sorter, hair sorter apax and floor apax ornament maker, ornament turner, or fur cutter, *gem*, **squarer**; **kreus worker**; a diamond polisher *q.v.* who cuts large facets on the stone.

stone slitter; **apax slitter**; slits stones or apaxes by passing them over a revolving thin steel tip which he feeds constantly with rough diamond dust and oil and drives by treadle; *cf.* **cutler**, *gem*.

stretcher-down (feathers); prepares parts of feathers for machinist *q.v.* by pressing ribs between pins lengthwise along a long rack, and spreading and stretching fronds between pins on either side; arranges feather pieces so that, where necessary, ends should overlap.

table base painter, or for hand troweller.

toothpick maker (quill); cuts and parts toothpicks from quill barrels, using hand knife, dresses and points quill toothpicks, by hand-operated quillstone; *shalecent*.
transferer (linoleum, &c.); places patterns prepared by designer and transferer or by designer, on either flat block or roller, usually wooden, and traces patterns thereon with special knife, for use of block cutter (608) *q.v.*

trowler (table base), *see* **hand troweller**.

trimmer (brooms and brushes), **bristle trimmer**; trims by hand with shears or scissors, irregularities in length of bristles, etc., in brush stocks after filling.

trimming machine band; a trimmer *q.v.* who feeds and operates a bristle trimming machine.

troweller, **trowler**, *see* **hand troweller**.
verstealer; **setter-up**; sets or embeds diamond in solder, contained in a holder, with corner which has to be ground off to form facet exposed ready for polisher or finisher *q.v.*

wax doll maker; casts bust of doll by pouring molten wax into two moulds each representing one half of bust; when casts are cast joins them together by melting and sealing edges; when joints are set, scrapes off mould marks and roughnesses with sharp knife.

wax figure cleaner; cleans up wax models used for display purposes by washing them with very hot water, soda and soap; retouches complexion, etc., with colour as necessary.

wax modeller, **wax figure maker**; makes wax models with modelling tools and scrapers or by casting in moulds; ensures them to give them a more life-like appearance.

writer and **paperer** (feathers); (i) pierces bottom of rib of feather with an awl; passes wire through hole and turns ends down on each side, parallel; with cutting line of rib cut or breaks fabric binding over rib and winds it on wire to form support or continuation of rib; (ii) twists wire round end of rib and binds as described, above.
wood collier, *see* **charcoal burner**.

639.—OTHER WORKERS.

backer (linoleum, &c.); a machine troweller *q.v.* engaged in spreading paint only as a back of linoleum, i.e., not separately applying linoleum adhesive.

back tender; avoids grainer or primer (floorcloth) (638) *q.v.*, engaged on rotary printing machine; regulates cloth as it passes through machine and does any manual unskilled work, as directed.

bass cutter, *see* **bass trimmer**.

bass dyer; colours bass, used in brush-making, by soaking it and boiling it in dyeing vat.

bass hackler, **bass heckler**, **bass rougher**; draws bass across a hackle to remove tangles in preparation for dressing; *see* **bass dresser** (638); occupation unknown as bass is usually imported already hackled or is hackled by **bass dresser**.

bass mixer; mixes bass on foot as required prior to dressing; usually done by **bass dresser** (638) *q.v.*

bass trimmer, **bass dyer**; cuts bass to length, required for brush, using hand knife or guillotine operated by a hand lever.

thead and **bugle stringer**; strings beads and bugles for making bead necklaces etc.; sometimes first ornaments plain beads by attaching gold wire, using pins and hand tools, hand painting, etc.

beater; beats feathers on a board, by hand or by machinery, to remove dirt and slurry substance after drying.

bleacher, **stock bleacher**; bleaches bass and similar fibres, for making into brooms and brushes, by immersing them in bleaching solution and removing them when operation is completed.

brake binder, *see* **machine troweller**.

bristle baker; bakes an oven in which washed brush bristles are dried.

bristle cleaner, *see* **washer**.

bristle dressing machine hand, **bristle mixing machine operator**; feeds and watches for smooth working, a automatic machine which mixes and cleans bristles.

and "beams-up," i.e., feeds material to winding-on roller; where adhesive is applied, repeats spreading operation on reverse side of fabric; starts and stops machine by hand levers; opens and closes cocks to regulate paint supply, etc.; see also hand troweller (635).

mill hand (carbon), see mixer, carbon.

mixer (brushmaking); a box mixer or bristle mixer *q.v.*, or rarely hair mixer, of hair band (633).

mixer, carbon; see **mill hand** (carbon); crushes retort carbon into dust in a mill and, attends and feeds mixing pans wherein crushed carbon is mixed with binding liquid prior to being moulded into blocks, rods, etc., for use in dynamite, etc.

mixer, linoleum, see colour blender and dresser.

mixer, cork mixer, **deub mixer**, **linoleum mixer**, **ground cork**, **linoleum cement**, and **colour**, by machine fed by charger (linoleum mixing) *q.v.*, producing a "cement" which is spread upon canvas or jute in the manufacture of linoleum; adjusts roller temperature by steam cocks and oil machine.

motor brush maker, as for carbon brush maker.

moulder's black maker, see founder's black maker

oil haira maker; a machine troweller *q.v.* engaged in making oil baine by spreading a thickened oil paste upon fabric.

oil cover dresser, see machine troweller.

paint brush finisher, **paint brush stamper**, **paint brush trimmer**; performs, after brushes are made, such operations as cleaning handles, trimming bristles, stamping size, name, etc., boxing, papering, labelling, etc.

painter (finishing coats); paints, with small brush, bands of light oil colour round cork or wooden floors.

parquet layer; **layer**; *q.v.*; arranges strips of oak linoleum for parquet inlay in patterns to represent wood floorings.

peat moss mixer worker; general term for any worker engaged in cleaning, sorting, drying, and baling peat moss (used as litter for animals); cf. **peat moss worker** (436).

plate holder (leather cloth), **plaster**; see colour spreader and assistant.

pointing hand; straightening hand; straightens naturally curved bristles, before or after filling into bundles of brushes, by bending with string and steaming.

pole carrier, **pole catcher** (linoleum), see banger's mate.

polisher (brushes); (i) polishes varnish, or decorates in any way, the brush after it has been shaped; (ii) see also horse brush polisher (639).

pressman; presses loose granular coloured composition, in patterns for granular inlay, on canvas or jute in a hydraulic press, to squeeze them solid and attach to canvas or jute; presses loose sheets of linoleum, built in a block for parquet inlay, in order to squeeze them solidly together for cutting into strips by guillotine; presses parquet pattern arranged by parquet layer *q.v.* on to canvas or jute so as to attach pattern thereto.

pumice man, see rubber.

punching machine filer, **punching machine worker**; attends an automatic punching machine, which punches holes in back of brush for insertion of bristles; positions stocks in machine and pulls lever operating punch.

putty (finishing coats); promotes, with putty knife, putty into indentions in wooden or cork finishing coats, to ensure water-tightness.

quill cutter; general term covering cutter, quill pen (638), float cap maker, toothpick maker (quill) (636) *q.v.*

quill rubber (feather dressing); polishes or smooths quills of feathers by hand with pumice or sand paper.

rubber; **pumice man**; rubs painted surface of oilcloth, to make smooth, by means of rotary rollers in which are fixed pumice stones, only carried out on heavy linoleum.

scrap grinder; feeds scraps of waste linoleum into grinding machine to be used again in linoleum making.

seasoner hand (linoleum, etc.); controls cocks, levers, etc., of machine finally mixing linoleum mixture, and oils machine as necessary.

seasoner attendant; **charger**, **discharger** (linoleum seasoning); seasons (linoleum in long stave; attaches linoleum to wire and turns hand roller, draws length of linoleum into stave; with knife and straight edge cuts linoleum when its length fills stave; regulates heat of chamber by steam cocks, guided by thermometer; withdraws seasoned linoleum by wire and hand roller.

shakes-up hand; (i) a dresser *q.v.* who brushes and shakes up by hand brush and broom bristles, etc., in the finished bundle so that ends do not present an uneven surface; (ii) sprays bristles for special finish, with root ends and points together in equal proportions; thus produces a stiffer brush than if roots only are in stock.

slaver, **bristle slaver**, **slaving hand**; passes bristles over a stone to separate root ends from top ends in process of arranging bristles all one way; usually done by hair hand (638) *q.v.*

spreader, **spreading machine attendant**, see machine troweller.

stamper (brooms and brushes); stamps same of maker, quality, size, etc., of brush, on the stock or handle.

stamper (leather cloth); (i) stamps particulars of quality, trade mark, etc., on back of pieces; (ii) see **grinder**.

stained filler; pours blended granular coloured linoleum composition, for granular inlay, through pattern stencil on to jute or canvas, pulling lever is govern flow of composition; changes stencil and use different composition as necessary, pulls lever or otherwise starts machine to which he feeds material for annealing.

stone handler, see washer

stove worker; drying stove hand, **hot room hand**; removes finished floor doct goods from stove, or hot room, and rolls strips of linoleum on rollers.

straightening hand, see pointing hand.

straw hand spinner, **straw rope maker** (for corse), **straw rope spinner**, see hay band spinner.

straw envelope maker; attends and feeds machine making straw envelopes for covering wine bottles, etc.; places bottoms of jute in machine, threads jute through guides, etc. starts machine by hand lever, and feeds straw, by hand, so that it is twisted up and bound with jute; rare occupation.

straw worker (targets); makes straw targets by intertwining rush, straw, etc., on stick foundation to form back and main body of targets; superimposes rushes, straw, etc., smoothly over sticks to form smooth face of targets.

brusher; common finisher; flares back of brush to cover wiring of drawn bristles with glue and brass nails or screws.

tank cleaner (floor cloth); a general labourer who cleans out oil tanks, etc., in floor cloth mill.

trimmer, see cloth cutter.

varnisher (oilcloth, etc.); operates varnishing machine which puts a glossy finish on surface of printed or plain oilcloth; guides end of linoleum over bars, etc., of machine to rollers revolving in varnish trough; guides end of varnished linoleum to winding-on roller, operates machine by hand, etc., maintains varnish supply in trough.

varnisher (brushes), **brush varnisher**; varnishes brush stocks, heads, or backs.

washer; (i) washes loose horse or goat hair in hot water, containing soap and soda to cleanse hair and remove grease; (ii) bristle cleaner, stone handler; "stones" bristles, i.e., grinds down root ends, by rubbing them on a leather-covered stone; ties up bristles and places them in hot air chamber to dry, usually done by hair band (638) *q.v.* in small factories.

ORDER XX.—WORKERS IN MIXED OR UNDEFINED MATERIALS (not elsewhere enumerated).

Sub-Order I.—Makers of Musical Instruments (not Piano, etc., Case Makers).

642.—ACTION MAKERS, FITTERS AND ASSEMBLERS.

action assembler; takes completed sections of piano action, *e.g.* butts, from covering department and screws them down on to action beam; and screws down dampers to damper rail; action is then ready for action finisher (pianos) *q.v.*

action finisher (concertinas), see action maker (concertinas).

action finisher (pianos); receives piano action from action assembler *q.v.* and takes "travel" or bias from working parts, i.e. makes them work true, looses or tightens setting of hammers by screwing or unscrewing parts; bends spring wire in bulks with his fingers, and finishes action generally, i.e. satisfies himself that it works properly, and is ready for use in piano making; cf. finisher (pianos) (655).

action fitter (pipe organ building); an organ builder (639) *q.v.* who screws, bolts and connects together, keyboxes, drill stops, and other component parts of organ actions, i.e. all mechanism between keys and pipes; sometimes also makes one or more parts himself; in new work, bolts down, couples up and rivets parts together, taking care to place and to space them correctly; in fixing up old work, examines old action and notes parts requiring renewal; makes, or directs to be made by other workmen, new parts required and fits together old and new parts; work sometimes involves soldering and soldering of pipes; in most factories is usually known as an organ builder *q.v.*

action maker; general term covering all workers engaged in any process of making or assembling piano or organ actions or parts thereof.

action maker, bottom (player pianos); makes main bellows of player pianos, glues them (flexible rubber canvas) on to sides of bellows, which are usually made with top and bottom of ply wood; makes reserve bellows for certain types of player pianos; fixes pedals and controls.

action maker (concertinas); action finisher (concertinas); assembles keys, levers, springs, pallets, and bellows to make complete action; places keys in holes bored in body and screws them into position; places levers in position, inserting springs and pallets under levers, screwing whole together where necessary; screws bellows to body of instrument.

action maker, French (pianos); an action maker *q.v.* fitting up actions working on a French principle.

action maker, top (player pianos); fits pneumatics (small bellows, one to each note) and connects up all pneumatic action in player pianos; fits music-roll winding gear.

action part maker (pianos); general term for workers who make wooden, wire and felt parts of piano actions by hand or by machine, including check maker, damper maker, lifter maker, small work maker, etc.

checker (pianos); connects with wire, by machine, two small wooden parts of piano action known as checks or piano levers; places wooden checks and wire in position in machine, and operates levers which set in motion mechanism making point.

check maker; cuts out of wood the two parts of a check used in check actions; connects the two parts with wire, see checker.

damper maker (pianos); cuts felt in shank, by hand, and glues it on to small pieces of wood (called damper woods) to make dampers for pianos.

lifter maker (pianos); cuts and shapes lifters, or pilots, from wood in machine room, and covers them with felt.

player assembler (player pianos);

assembles manufactured parts of pneumatic interior player action, and makes them into complete actions, using screw drivers and other hand tools, and, if necessary, glue, in readiness for action fitter, etc.; see action maker, bottom (player pianos) and action maker, top (player pianos).

regulator, action regulator (pianos);

makes final adjustments of action, after piano has left hands of finisher (pianos) (648) g.; brings keys into exact alignment, and makes space between keys and key-board correct and uniform; by tightening or loosening screws which hold each key in position; regulates balance of keys by adjusting screws at either end of spring affecting key balance; examines position of hammers, and adjusts position of relative levers and couplings to correct the position of any hammer that may be too far advanced; strikes notes in turn, to ensure that hammers fall back on to rest after striking strings; remedies faulty action by snooding, examining, pivoting parts, and easing their action where necessary, or by shortening levers, etc.; regulates, i.e. adjusts, dampers in same way, goes over whole mechanism in detail, making adjustments necessary to make it work with perfect ease and correctness, is usually a promoted finisher (pianos) (648) g.; sometimes also acts as toner (643) g.

small work maker, small worker (pianos, organs); an action part maker, g. who cuts small pieces of wood, by machine, to required shape, for use as piano or organ actions, and hammers holes in them with machine drill; sometimes also makes other small parts (wooden or metal) of piano or organ actions, by hand or by machine.

643.—PIANO TUNERS.

chipper-up; carries out first stage of tuning strings of pianos when partly finished; tunes strings into scales, with an ordinary scale key, but does not tune strings up to pitch; usually a learner or apprentice to piano tuning.

toner; a highly skilled tuner, g., who tunes and tones pianos, to ensure evenness of tone and perfect pitch, by pricking felted hammer heads to render them more sensitive.

tuner, piano tuner; (i) fits wires on to root pins; tunes and adjusts to required pitch by turning brass pins with tuning key, pliers and hammer, thus tightening or loosening wires; eases squeaking or sticking wooden parts by smoothing with graphite; (ii) is employed by manufacturers or retailers, or works on his own account, travelling about, and tuning and regulating (as in factory) pianos in private houses, concert rooms, etc.

645.—OTHER SKILLED WORKERS.

accordion maker, or for concertina maker.

edjstater (gramophones); adjusts position of worm-drive of gramophone motor with a watchmaker's (or other) screw driver, starts motor, and listens whether it is running silently and efficiently; if not, re-adjusts worm-drive until it is in exactly right position, and motor is running perfectly.

assembler, case assembler (gramophones); places zinc template on board forming inside top of gramophone case, marks, with pencil, size and position of holes to be drilled therein; drills holes, either by hand or, more usually, by drilling machine; inserts motor in case; pulls four corner screws of motor through holes drilled for them; puts on rivet heads and washers, and screws these on corner rivets, thus securing motor to motor spindle (over which record is placed) in vertical position; puts on turn table, and makes it run true by tightening, if necessary, corner rivets.

assembler, motor (gramophones); see gramophone fitter.

finisher-up (gramophone records);

solders metal backs to masters, to form solid plate for use in moulds.

finisher maker; (i) either hammer, measure, saws off and shapes neck by planing, spokeshaving, sand-

papering; checks and saws out wood to form body joint or flat scroll; cuts to shape and smooths with plane and rasp; chisels key, for larger holes, into neck and cuts groove for insertion of metal cross piece to indicate fingering; planes ends of piece of steam-bent wood for lapping, and glues ends together to form a hoop for sides of banjo body, finishes it with sandpaper, etc.; planes and sands back of volume together, to make arched back, and presses them to shape in a dry-beated metal hand press or mould; shapes, with hand tools, wooden support for arched back, glues veneer to this, and glues support to sides; ornaments body by cutting veneer or other inlay and inlaying; for processes, see cabinet maker (473) (ii) ordinary bunter, receives metal body, complete, from brass finisher (224) g., and lines it with steam-bent wood, which can be leaping and glues ends together to form a hoop, pushes hoop so formed into metal body when glue has set; makes neck of banjo, as for other banjo, and connects neck with metal body, usually by boring hole in wooden lining to correspond with hole in wooden shell, inserting wooden stick therein and screwing it into position; is usually a specialised cabinet maker (473) g.

bellows fitter (reed organs, etc.); fits bellows into reed organs with screws, etc.; sometimes also makes bellows.

bellows hand, bellows maker (pipe organs); an organ builder, g. engaged in making bellows for pipe organs; makes top and bottom frame-work of wood, with ordinary cabinet-maker's tools; cuts and fits leather valves and bellows, connecting them to top and bottom by cementing, gluing, etc.; varies or stains perle, as necessary; in some cases, glues a piece of cane to wood inside bellows to keep out damp, great care is needed in wood work, to make joints perfectly sound, and in leather work, to cut leather perfectly true and cement it strongly, so strain on bellows is great; is most factories, is usually known as an organ builder, g.

bellows maker (reed organs, harmoniums, etc.); cuts wood to required dimensions with hand tools, and glues and screws pieces together to form frame of bellows; fits leather, tooth (rubberised canvas) or other material to frame.

bellows mender; replaces worn or defective bellows or other parts of bellows with new material, which he screws, nails, or glues on to frame-work.

concertina maker; general term covering all workers engaged in making concertinas, e.g. action maker (342), bellows maker (348), body maker (460), finisher (480), pan maker (493), reed frame maker (278), reed maker, g.

drum maker; if shell is of wood, recovers wood, for shell, which has been steam-bent and rolled up, places it on shell and screws it with steel scraper; cuts wood to required length, planes ends where they are to overlap and secures laps with glue, and sometimes with nails; if shell is of brass, recovers shell, already prepared by coppermith (257) g.; pianos and small wooden hoops so that they exactly fit over shell, and fits them on, drills holes in hoops (to receive cords) with brace and bit, and chisels holes with a hot power, to harden them, or screws on metal fittings to receive cords; coats inside of drum with varnish, or then cuts it round hoop and leaves it to dry; when it has dried stiff, presses hoop and vellum over shell, and tightens vellum with cords or screws.

drum stick maker; for side drums, turns, or shaves, drum sticks complete from ebony, partridge, or labwood, for bass drums, recovers a half of felt (for drum stick head) ready made, or makes it himself, by gluing together several layers of thick hard felt into a rough ball, and turns it to shape of drum stick, based on a lathe; borer hole in centre, and cuts groove for insertion of stick; turns a lining of wood or metal, for hole, and fits stick into lining by gluing, wedging, or cementing according to material used; shapes stick, if necessary, on lathe. examiner (gramophones), gramophone examiner; gramophone fitter; examines gramophones and records at various stages of manufacture, to detect defects in material or workmanship.

felt maker (pianos), see hammer coverer.

finisher (harmoniums); fits bellows into case, fits pan, i.e. reed wind chest, with pallets, i.e. mechanism fitted under reed to control passage of wind, steams, and reads by screwing them in, and regulates them; fits pan on top of bellows; faces together remaining ends of case after mechanism has been fitted in case; has specialised knowledge of particular type of instrument on which he is working, and can make delicate adjustments therein.

finisher (pianos), piano finisher; (i) receives action parts in bundles and assembles them into complete actions, as for action assembler (642); (ii) receives actions ready assembled; screws assembled action into piano case over keys, chiselling, filing and otherwise trimming piano frame and/or action beam to fit; makes action fit exactly into frame, so that proper contact is made between action and keys; cuts hammer shanks, if necessary, to correct length, with a small hand saw, and glues hammers into action; adjusts setting of action parts roughly and approximately to frame, by unscrewing wooden screw heads, which hold action to frame, part of connecting and adjusting mechanism; prepares piano for final process of adjustment, e.g. regulator (642); is sometimes known as action finisher, but must be distinguished from action finisher (669) g.

finisher (key-ways); places individual keys on key frame, and regulates and adjusts each key with plane to ensure evenness and correct spacing.

finisher (wood wind instruments); (i) where work is sectionalised, receives instrument, after it has been moulded by moulder, g., and polished, and removes any padding material that may be left by pulling threads

through key bearings; files pads (made by other workers) with shells or sewing wax, and screws in springs; fits keys, matted by instrument, g.s., into instrument by inserting bearing pins into their pivots; cuts cork stops with hand knife, in order to fit and adjust them; (i) where work is not self-evident, receives wooden or ebony parts of instrument, which have been roughly bored, and turned by other workers, also receives keys; fits keys to wooden or ebony parts and brings instrument to condition ready for use.

fitter, fitter-up (harpist): receives hangers, hanger-pins, etc., complete, with body and neck fitted together, and polished; also receives keys, i.e. paper, for scroll, tail piece, peg and bridge, vellum, screws, and other attachments for tightening, vellum, and strings; completes instrument, precise operations varying according to particular type of instrument; usually soaks vellum in water to soften it, stretches it over body and tightens it; e.g. drum maker; drills holes for tail piece and inserts it, cuts wire to lengths, files it to shape, and presses it into grooves cut by hanger maker g.s. to indicate fingering; hovers key holes in scroll, fits keys therein, and screws them and screw-plates to scroll; strings harp.

fitter, matrix (gramophone); **gramophone matrix fitter**; takes matrix, i.e. a metal disc, on which depressions in original wax record, have been reproduced in relief, and stamps out hole in centre, by putting a circular guide-line, half over centre, and reposition part underneath, and clamping whole and screwing down in a hand press to pierce round hole in centre; takes matrix and fits it in a shallow circular bed or trough, called a mould, taking care that hole in matrix fits on to hard raised centre of mould; places a metal rim on outer edge of matrix and secures it to matrix and to mould with a number of screws set round edge.

fitter-up (brass wind instruments), **fix maker** (brass wind instruments).

frama maker (piano), **see** marker-off (piano).

frama worker, iron frama worker (piano); prepares cast iron frame of piano for bronzing or gilding, by filling up uneven surface of casting with iron "filler" (iron cement), and applying one or two coats of body paint to give it a smooth surface.

glockenspiel maker; saws steel bars to required length with a hand or machine saw; sets up lathe or drilling machine, and drills holes in bars, ready for insertion of screws in mounting; files ends or back of bar with a hand file, to reduce length or thickness, thereby altering pitch of note (tuning); strikes bar with a wooden hammer, and compares note given out with that of a standard glockenspiel; continues tuning until note is in perfect accord with standard; saws and files cross, and screws pieces together to form a wooden frame; mounts glockenspiel, by screwing down tuned bars of metal in correct arrangement for scales.

gramophone fitter, gramophone erector, mechanic (gramophone), **erector assembler** (gramophone); mechanician and sound-boxes of gramophones, ready for putting into cases.

gramophone maker; general term for any worker engaged in making or assembling component parts of gramophones.

gramophone soundbox examiner, gramophone soundbox tester; turns soundbox over in hands, and looks for bad turning or planing or other faults in workmanship, or for faults in assembling; if any such defects are observable, puts soundbox on an instrument, and plays a standard record; listens carefully to playing of

record, with special reference to detection of overtones (a common fault), etc.; if there are no overtones, etc., passes soundbox to gramophone soundbox fitter, as for gramophone fitter.

gramophone soundbox maker; general term covering nailers (300), turners (250), drillers (200), metal polishers (200), metal platers (250), and assemblers g.s., engaged in making or performing one or more operations upon gramophone soundboxes, or parts thereof.

gramophone tester, see examiner (gramophone).

hammer coverer (piano); **felt maker** (piano); covers piano hammers by gluing on prepared strips of felt, graduated in thickness according to position of hammers in piano action; either covers and trims each hammer head separately, or more usually puts a number of hammer heads together in a clamp, on bench; coats them with glue; covers them with a sheet of felt and cuts hammers apart again, unless this is done by cutter-up (649) g.s.; tapers felt, if necessary, by planing.

hammer finisher; performs any or all of operations involved in finishing hammers after they have been covered by hammer coverer g.s.; includes trimmer, shaver (649) g.s., engaged in sand (649), machine hand (495), hole borer (486), paper hand (499) g.s. **hammer maker** (piano); makes wooden portions of hammers by hand and wood-shaping machine; tapers off, with a sharp knife or chisel, ends (or cuts) felt covering; sometimes performs all operations of hammer coverer and hammer finisher g.s.

harp maker; general term covering any workers, other than polishers (478) and graders (489) g.s., engaged in making either wooden or metal parts of harps, if a wood-worker, is usually a specialised cabinet maker (473) g.s. who cuts and shapes wood, with saws, planes, chisels, gouges, and other cabinet maker's tools, to make wooden frame of harp; in repair work, cuts away defective parts and makes fresh parts, and glues or screws fresh parts into position; if a metal worker, may be a brass finisher (234) g.s. or any other machine tool worker; ordinarily, he drills and clamps together double plates, and screws in movable steel connecting rods; screws this entire apparatus, which controls pitch of strings, into position on harp.

inside band, general inside band (pipe organ); an organ builder g.s. engaged in workshop where organ builders specialise in different branches; makes and fits up action controls, soundboard and similar work appertaining to inside of pipe organ, or distinct from organ case making or specialised work, such as wooden pipe making; in most factories, is usually known as an organ builder g.s.

instrument maker; general term for any person engaged in making musical instruments; usually either a wood wind instrument maker g.s. or a brass musical instrument maker g.s. but occasionally combines both occupations.

key and action maker (barrel organ); tempers small steel points by beating, on gas apparatus; drills, by hand, specified holes in wooden levers; inserts and adjusts steel pins in levers, taking care to make them even; drills, by hand, holes at top of lever into which iron or steel legs are fitted; glues calf skin to hammer, and screws hammer on to other end of steel leg.

key maker, metal key maker (wood wind musical instruments); (i) takes wire of German silver, and forges it, cold, to as near shape and size of keys as possible; files it, and rubs it with emery, to bring it to shape of finished pattern; rubs on cup, made by other workers, on which finisher (wood wind instruments) g.s. after-

wards files pad; (ii) in lower-grade work, receives rough casting of key, which he hammers, finally, and hards it, then files, etc., and solders on cup, as described above.

maker, maker and fitter (brass wind instruments), **brass instrument maker, brass musical instrument maker**; **fitter-up** (brass wind instruments); receives brass tubes (cup, bent), bells, i.e. bell-shaped ends of tubes, and valves; bends lead in furnace to melt it, plugs ends of tubes, pours molten lead into tubes, and allows it to set; puts tubes, filled with lead, in holes in body, and bends them to approximate shape required; works tubes by hand or with cross-bars, into iron blocks, placed in position to shape them; smooths heads with small hammers; heats tubes and runs off lead, receives fine and coarse abrasions from tubes by rubbing them through holes; saws tubes to required lengths; fits tubes together, and joins them with solder and blow-pipe; places valves in position, and solders connecting rods; connects valve tubes to main instrument tubes; cuts brass sheet to required shape, and shapes it, by filing and by rubbing over sand, to make fange of stay; cuts brass wire rod to required lengths for stays, and solders on tubes and sets protection caps, used for strengthening exposed parts of instrument.

maker (wood wind instruments); **in scroll workshop**, combines work of setting-up, mounting and finishing, which would be sections of larger shops; takes wooden parts, which have been roughly shaped and bored by other workers, and bores holes in them for notes; then mounts and finishes instruments; e.g. mounter and finisher (wood wind instruments), **marker-off** (piano); **frame worker**; carries bridges, i.e. beams between which strings are stretched, by hand, with chisels, and fits bridge pins; fixes iron frame in position on soundboard; marks division of pins to form holes, and drills holes for wood pins in wood pin plank, either with an ordinary hand drill or with an electric hand pistol drill.

mechanic (gramophones), **see** gramophone fitter.

mounter (wood wind instruments); receives wooden or ebony sections or joints of body of instrument, which have been roughly, bored and turned by other workers; also receives keys (not completed), saddles, lengths of pivot tube and pillars, etc.; screws pillars into sections of body; sets up drills on lathe, and pierces therewith pillars for insertion of pivots; notches keys, either by drilling on lathe or by hand filing; fits pivot tube by cutting and filing down ends, or by reaming in lathe and fits and centres ends of pivot tube in instrument to match spaces between pillars; cuts away pieces from wooden or ebony sections of body of instrument, with small chisels, gouges, etc., to make room for other work.

mounter and finisher (wood wind instruments); combines work of mounter and of finisher (wood wind instruments) g.s.

music maker (barrel organ); shapes certain parts of roller in a machine, and, reading from musical score, interprets music for barrel organ by pressing levers which cause pins to be made in roller, ready for insertion of steel pins, work requires great accuracy and a competent knowledge of mechanics.

organ builder (pipe organ); general term for any worker capable of performing all duties in processes of organ building, including action fitter (pipe organ) (648), bellows maker, general inside hand, inside band, organ erector, organ fitter, organ maker, organ maker and fitter up actions of organs i.e. all mechanism connecting keys with pipes such as touch boxes,

connections from touch boxes to keys, coupling chests, intermediate, primary actions; receives specifications from foreman and orders wood from timber yard, prepares drawings, if necessary, and marks out on paper all large cutting, planing and boring work to be done in machine shop; contracts parts of organ actions from prepared timber, with saws, chisels, plane, hand drills, and other hand tools; sometimes also uses machine fret saw or small hand saw; cuts, to size, leather parts and fittings and glues them on; makes, in case way, small subsidiary parts and assembles on, stings or varnishes action parts; joints, rivets, couples up, and adjusts parts until all connections are working smoothly; frequently also (1) makes organ case (by sawing, planing, chiselling, screwing and jointing) and ornaments it with simple carving; (2) constructs wooden pipes, to specified dimensions, by cutting out and joining up sides, marking and cutting out orifices and inserting cross-pieces above languid, in small workshops, makes, with assistance, organ throughout, including organ case, and also assists in tuning and in voicing; in large workshops, often specialises in one or more processes of manufacture, organ architect (pipe organs); an organ builder *g.v.* who, with other workers to assist him, is sent from factory to erect organ in situ; in each case, in position, 'lays down sound boards and bellows; sets up pipes and connects action and key work by bolting, screwing and otherwise securing parts which have been previously fitted together in factory and do not require further adaptation; in most factories, is usually known as an organ builder *g.v.*

organ finisher, see tuner and regulator (pipe organs)

organ fitter (pipe organs); an organ builder *g.v.* who fits together, in factory, parts of pipe organs, which are usually made by other craftsmen; sometimes makes, wholly or partly, one or more parts himself, using fret-saw, hand-saw or lathe; fits parts by riveting, jointing, gluing on leather strips, varnishing, adapting by chiselling, etc., using a hammer, saw, chisel, file, square and other hand tools; in most factories, is usually known as an organ builder *g.v.*

percussion instrument maker; general term for any person engaged in any process of making percussion instruments, including drum maker, glockenspiel maker *g.v.*, piano (bowed organ); inserts, with plane and pressing machine worked by treadle, steel pins in positions marked by music marker *g.v.* on revolving cylinder or roller of barrel organ.

plaster maker (brass musical instruments), see valve maker.

player fitter (player pianos); fits pneumatic actions (top and bottom) into player pianos; cuts parts to receive rails, pushes rubber tubes into position, and links up with top and bottom action by screwing and clamping.

player mechanic (player pianos); general term for any person who makes and assembles parts of player pianos, including player assembler (649), player fitter, bottom action maker (642) and top action maker (642) *g.v.*

pneumatic hand (player pianos); makes, by hand, from rubberised cloth, wood, and leather, with glue, "pneumatics" (small bellows, one for each note) to be fitted in player pianos by top action maker (649) *g.v.*

preparer (bowed organ), *s.v.* roller, or revolving cylinder, of barrel organ and key frame action into organ case; examines and adjusts eccentric change-tune machine to ensure that various tunes marked on barrel are correctly divided, and that pins work correctly with key points.

presser, record; piano man (gramophone, etc., records); picks up piece of thermoplastic composition, cut to appropriate size by rollerman *g.v.*, and weighs it to ensure that it is of exact weight required; places it on a steam-heated table and rolls it until it becomes plastic and heated evenly and to correct temperature, under influence of heat of table, selects correct label from a supply before him, and places it over centre portion of mould, into which matrix, *s.v.*, a wooden disc, has been fitted by matrix fitter *g.v.*; secures label with a metal pin; scrapes up all heated composition with a metal scraper, and puts it on matrix; superimposes another matrix, into which he has also fitted a label; places these two matrices, in juxtaposition, in hydraulic press, which he acts in motion with a lever; when composition has been pressed out to shape of record, removes it from mould, tapping, mould sharply on table to loosen record.

reed board fitter (reed organs); a reed board *g.v.* specialising in fitting of reed boards in large shop where work is sectionalised, or a partially skilled workman, not fully qualified as a finisher, engaged in fitting reed boards, glass stems to pallets, cups, pallets, with stems attached, into grooves in reed board, and screws reed board into position in case of reed organ.

reed maker (concertinas); concertina tuner, cuts strip of steel, with hand tools, roughly to size of reed tongue, files tongue to exact shape and size required, and screws it in; tests reed in a tester, *s.v.*, an instrument resembling a concertina, comparing sound of each reed with that of a standard reed, combines filing tongue and testing reed metal it is true to pitch.

reed maker (harmoniums, etc.); screws in small tongue of sheet metal, which nearly fills aperture in metal holder, so that one end of tongue is free to vibrate, tunes reed by scraping its open end.

reed maker (musical instruments); makes reeds for wind instruments, *e.g.* melodians, flutes, piccolos, etc., either in metal, by drilling and screwing stamped metal tongue to stamped metal reed block, or soldering them together, or in cane by cutting with hand tools, and binding with treated cotton and cement.

reed maker (pipe organs); assembles parts of reeds, metal tongues, wooden wedge and shalloet, fixes tongue firmly in cylindrical metal shalloet by means of wedges, so that when open and of shalloet is blown, vibration of free end of tongue emits required tone.

regulator (organs), see tuner and regulator (pipe organs).

regulator (player pianos); checks and adjusts pneumatic work and mechanical action of player piano.

repairer (pianos and organs); effects small repairs to pianos or organs, *e.g.* applies new felt coverings to hammers of pianos; repolishes, restrings and sometimes tunes pianos; or carries out small repairs to reeds and bellows of harmonium or organ.

repasser and finisher (barrel organs); plays organ after revolving cylinder has been pinned, see pinner, to see that it is in order; corrects any false notes, by adjusting mechanism, or if position of pins is faulty, returns instrument to be re-pinned.

rollerman, roller mill hand (gramophone records); adjusts valves, *i.e.* screws, to regulate heat of hot and cold (not cold) rolls; watches temperatures constantly and keeps rolls at correct temperature throughout rolling operations; adjusts interval between rolls by means of screws; throws between rolls, with a sweep or shovel, material in powdered form, which is supplied to him by labourers, or throws in broken records, which are pulverised between rolls; material

is reduced to plastic consistency, and adheres to cool roll in form of a continuous sheet; sets a fixed knife in position, which scrapes sheet of plastic material, *i.e.* composition, off roll, throws composition, without breaking it, on to a long metal table, where it is cut up by labourers into approximately equal quantities, each enough for one record.

soundboard hand, soundboard maker (organs); an organ builder *g.v.* engaged in making soundboards for pipe organs; receives instructions respecting the number and type of pipes that are to be fitted over the soundboard, inspects organ action, and spaces out soundboard by measuring and marking accordingly; drills, files and shapes (usually with hand tools only) holes in soundboard which allow wind to pass to pipes; makes air and shape of holes to correspond with position and requirement of each particular pipe, and with organ action working in conjunction therewith; in most factories is usually known as an organ builder *g.v.*; cf. soundboard hand (pianos) (658).

stringer (pianos), also piano strings to length, with hand clippers; screws in wrest pins, and stretches piano strings thereto.

tambourine maker; takes a piece of steam-bent wood, and saws it to required length; bows holes, for insertion of jingles, with hand brace and bit; planes ends and glues them together to form shell of tambourine, seals cuff area, to soften it; when it has dried to proper condition, stretches it over shell and nails it thereto with small brass nails; places jingles in position in holes bored for them.

tester (brass wind instruments); tuner (brass wind instruments); tests instrument by playing scales and chords, and judging whether notes are true or not; if instrument fails to pass test, returns it to be dismantled, with a view to defect being remedied.

tester (wood wind instruments); tuner (wood wind instruments); tests instrument by playing scales and chords, and judging whether notes are true or not; if any note is false, scrapes a sharp hole, making that particular area, holes having been made slightly smaller than eventually necessary to allow for expansion.

tuner (pipe organs), see voicer (pipe organs).

trimmer (piano hammers); trims, with a chisel, rough edges of piano hammers after they have been covered with felt.

tuner (brass and wood wind instruments); (1) see tester (brass wind instruments), (2) see tester (wood wind instruments).

tuner, concertina, see reed maker (concertinas).

tuner (pipe organs); tunes, *i.e.* varies pitch of, organ pipes, (1) metal pipes, bands metal tuning slot at top of pipe so that gap made by slot is increased in length from top of pipe to raise pitch or decreased to lower pitch of pipe; makes small changes in pitch by slight opening or closing top of pipe by means of conical wedge and hammer; (2) wooden pipes, drives in stop in top of pipe to raise pitch or pulls it out slightly to lower pitch of note.

tuner (reed organ), see voicer and tuner (reed organ).

tuner and regulator (pipe organs); organ finisher, regulator; a tuner *g.v.* who also regulates strength of tone of organ pipe by blowing, tuning, by altering size of crumple, in preparation required for great exactness; in case of metal pipes, either cuts or scrapes away metal from rim of hole at foot of pipe (to give more wind), or taps and works metal (to give less wind); in case of wooden pipes, either enlarges hole by chiselling, or narrows

it by adding a strip of wood of appropriate size, and screwing it or gluing it on.

typinal maker, or for drum maker
valve maker (brass musical instruments); piston maker: (i) sets up drilling machine, and bores holes in brass tubes for pump; (ii) moving pistons, of valve, taking care to get holes in exactly right position; if necessary, finishes holes by filing; drills, file in, and secures in position, with blowpipe and silver solder, cross tubes into holes previously bored in body of valve pump; bends connecting tubes, through which wind passes from valve to main tubes of instrument; bores holes in piston, i.e. outside case of valve, to correspond with connecting tubes, and solders connecting tubes to piston; also solders several pistons together, with blow-pipe and silver solder; packs soldered parts in vitriol to remove flux; tramps surplus ends from cross tubes filed in pump, and also ends of connecting tubes protruding inside pump; turns and grinds pump into shape on a lathe, to make them work smoothly together; smooths parts of valve by applying them to a revolving stick and mop, coated with pumice and oil, and fitted into a lathe, sets up lathe, in all cases where lathe is used; (iii) a less skilled worker, who grinds all valve parts but not fitting them together.

voicer, flue voicer (pipe organs); Jener (pipe organs); voicer, i.e. varies tone of organ pipes (varying in length from a few inches to thirty feet), by inserting and pressing into position, and adjusting at correct angle, a projecting tongue in top of orifice, known as a languet, using a hand tool called a languet file; serrates and cuts notches in edge of lip in small aperture of windway, thereby making comb, to split up and regulate wind; files and bends lip, as may be necessary, to control size and angle of opening; files off superfluous material from projecting ears at orifice, to bring them to correct length; from time to time trues all pipes on a voicing machine, i.e. a kind of small organ used for testing purposes; cf. reed voicer.

voicer and tuner, reed voicer (reed organs, etc.); tuner (reed organs); cuts tongue of reed out of a thin slice of brass with a sharp guillotine; files it to required thickness; puts it upon an arc-shaped stand, and rubs it to required curved shape with a hand tool; cements a piece of piano foil on tip of reed tongue and a circular piece of lead foil on top of file; fits tongue into place on body, or chassis, of reed against V-shaped wind opening; inserts whole in a metal tube, which he fits into foot of metal pipe; voices reed, i.e. varies its tone, sliding a metal rod along tongue of reed, allowing more or less space, as may be required, for tongue to vibrate; uses voicing machine, a kind of small organ used for testing purposes; if reed is then found to be faulty, files, cuts, re-makes, and re-voices various parts until defect is removed; cf. flue voicer.

wood wind instrument maker; general term for any person engaged in any process of making flutes, clarinets, or other wind instruments of wood, including reeders, flute makers (486), tuner (487), keymaker, and moulder and finisher, etc.; sometimes specifically designated according to instrument made, e.g., bassoon maker, clarinet maker, cor anglais maker, saphote maker, flute maker, sboe maker, piccolo maker; uses rosewood to approximate length for making xylophone notes, chisels and planes it to shape, flattening base and rounding side of wood to be struck by hammer, in form of an arc; cuts off ends of notes to shorten them, or chips, planes, etc., notes to reduce thickness,

thickly tuning them; length and thickness required depend on varying properties of wood treated; bores holes for cords or gut binding; saws and planes wood for frame and screws pistons together to make a complete frame; bunches straw, and lays it in frame or inserts rubber supports; binds wooden frames, in proper order, to straw and frame, or threads cords through rubber supports and binds to frame.

648.—OTHER WORKERS.

action filar (pianos); files, by hand, metal standards, i.e. part of piano actions, to clean them in preparation for nickelling.

action screw-down (pianos); screws down parts of piano actions which are to be screwed to action rail, ready for action assembler (642) q.v.

brusher, action brusher; a coverer q.v. who inserts a small piece of felt, i.e. bushing cloth, in hole in action part already bored by borer (688) q.v., and also substitutes of part quilt and frictionless, secures it with glue and cuts off superfluous material.

centrar (piano actions); puts pins into bepper, and places wooden parts in another part of machine which automatically drives pins into wooden parts and places them in correct position for centring.

coverer (piano actions); glues felt or cloth on to levers on other wooden parts of piano actions, to reduce friction, with a small hand tool; cf. busher.

cutt-up (piano hammers); a learner or apprentice who separates hammer heads after they have been covered with felt by hammer coverer q.v., for which purpose they are ranged in a close, in close juxtaposition, and apart, by hand, felt covering hammer heads, or pushes felt-covered hammer heads up to small power-driven band knife.

edge grinder, edger, see polisher (gramophone records).

finishing boy (pianos); fits pedal work in upright pianos; puts glue sticks and rockers into place using chisels, screws, etc.; drills holes in piano keys, either with a hand drill or with an automatic machine drill (set up by skilled worker); inserts lead in holes so drilled, to make keys balance.

grinder (gramophone, etc., records); puts raw materials, from which gramophone records are made, into a machine, which automatically grinds and mixes them, in readiness for rollerman (648) q.v.

ironer-up (piano hammers); irons felt after it has been glued on to hammers, by moving hammers over gas-heated iron or steel surface, by hand.

jackal cleaner (phonograph records); see mould wiper.

mould wiper (phonograph records); jacked cleaner; wiper out, after each impression, cylindrical moulds used by pressman (667) q.v. in forming phonograph records.

pedaller, pedalling maker (pianos); screws iron or brass feet to bottom board, i.e. the stile, and to rockers; makes rocker sticks by sawing, to length, and rounding, with files, sandpaper, etc.; puts in springs and pedals with screws.

polisher (gramophone records); edge grinder, edger; places a record (which leaves mould and matrix with rough edges) between clamps, and keeps clamps tightly closed upon it by pressing a foot lever; switches on power, causing record to revolve at slow speed; brings edge of revolving record into contact with an abrasive, which smooths and polishes it, is usually also a tester (gramophone records) q.v.

record boy, record girl (gramophone, etc., records); carries records from plate to place in works.

shaker (piano hammers); files shaft, or stem, of hammer, with glue, into prepared hole in hammer.

stitching hand (piano hammers); feeds machine with felt-covered hammer head, and fits coil of wire on holder in machine, which automatically draws wire forward, cuts it, and rivets it through felt into hammer head to secure felt on head.

tester (gramophone records); (i) examines records to see if they are scratched, cracked, or clipped, and if labels are intact and correctly placed; rejects any records that are faulty, and affixes new labels, if necessary; polishes records, by hand, with flannelette; is usually also a polisher (gramophone records) q.v.; (ii) plays records, and notes faults in tone or in registering.

Sub-Order 2. — Makers of Vehicles (see also under Metal Workers and Wood Workers).

662.—REPAIRERS OF RAILWAY WAGONS AND MINE TRAMS AND TRUCKS.

colliery corve mender or repairer, colliery tram mender or repairer, colliery tub mender or repairer, corve, corve repairer, hutch mender, hutch repairer, pit box mender, tub repairer, tub mender, tub repairer; keeps hatches, trams, tubs or corves, used for moving coal at colliery, in repair; cuts bolts and rivets, with chisel or oxy-acetylene flame, and removes broken or bent wood and iron parts; makes, adapts and refits new parts, bolting and riveting as required, using hand tools.

wagon repairer, railway wagon repairer; (i) keeps railway wagons in repair by replacing broken parts of woodwork and bolting in new wood; (ii) refits bent or broken steel or iron parts; cf. fitter (210), joiner (476).

668.—OTHER SKILLED WORKERS.

aeroplane builder, aeroplane constructor (operative), aeroplane stretcher, aircraft mechanic, aviation mechanic; assembles parts of aeroplane or alrship, made in various specialist shops, and fits them together, making necessary adjustments, with hand and machine tools, e.g. plane, file, drill, lathe, hammer, screwdriver, etc.

cutter (perambulators, etc.); cuts cloth, leather cloth, or leather to shape, with knife, shears, or machine, for hoods, aprons, cushions, etc., of perambulators, and makes fitting usual flange card or sheet metal patterns; cf. cutter (403).

fitter-up, perambulator fitter-up; perambulator assembler, perambulator fitter; builds up chassis and frame of perambulator by bolting and riveting together previously prepared parts (sometimes done by specialist maker-up, perambulator assembler); fits wheels to hubs, screwing on bushes and fitting ball bearings in some cases; slings body to frame with leather straps or springs; fits hood and handles with bolts and screws; screws down door by special fitting on body for safety belt, apron, etc. frame assembler, hood frame assembler, perambulator hood frame assembler; assembles parts of frame for hoods of perambulators, etc., to make complete frame; threads frame through seats in hood, cf. hood coverer; rivets hinges by cold hand or machine riveting.

hood coverer (perambulator); (i) stitches hood cover to hood frame by hand; (ii) often also makes hoods, with sewing machine, for folding perambulators, in which hood is shipped on to hood frame rods.

hood maker, baby car, see perambulator hood and apron maker.
hood maker, basketette, see for perambulator hood and apron maker.
hood maker, Cape cart, a hood maker (carriage) g.e. who specialises in making large hoods known as Cape cart hoods.

hood maker (carriages, etc.); (i) a coach smith (190) g.e. who makes and fits together wooden and metal frames and fittings that support hood or canopy; (ii) a coach trimmer (594) g.e. who cuts and finishes material (canvas, cloth, or leather) of which hood or canopy is made.

hood maker, mail cart, see perambulator hood and apron maker.

hood maker, motor car, as for hood maker (carriages).

hydraulic pressman (solid tyre), see tyre pressman.

paneller (carriage, motor bodies, etc.); cuts and fits panels into side of coach or motor body, using saw, chisel, file, screwdriver, etc.

perambulator assembler, perambulator fitter, see fitter-up.

perambulator hood and apron maker, perambulator hood maker; baby car hood maker, motor car hood maker; cuts out leather cloth, and lining material, puts together and sews up seams by power machine to make hood covers and aprons for perambulators, motorcars, etc.; sews covers on to frames by hand, work sometimes sectionalised; of cutters, hood coverer, machinist (419).

perambulator maker; general term for any workers engaged in making perambulators, etc., e.g. body maker (475) or, junior (476), fitter (419), perambulator assembler, g.e., perambulator mounter, a fitter-up or assembler g.e. who screws fittings to underside of body and slings body to chassis, as received from body maker and perambulator smith respectively, with leather strips or metal springs; when handle is not part of chassis, screws handles to body and fits wooden, china or xylonite cross-pieces with bolts and nuts.

running repairer (railway cars); carries out minor mechanical repairs to tramway cars, such as can be done without prolonged withdrawal from service; executes such repairs generally by replacement of worn or damaged parts; is usually a skilled fitter (210) g.e.

steelplate body builder, as for aeroplane builder.

tyre pressman; hydraulic pressman (solid rubber tyres); fixes solid tyres on to wheel rim of lorries, motor buses, etc., by placing tyre (on the steel foundation) in a hydraulic press where the steel foundation is forced on to the wheel rim; may secure by means of belt-wagon builder, wagon erector, wagonwright, railway wagon builder, builds, with strong hand wood and necessary ironwork, body of railway wagon which is mounted on steel undercarriage, cuts and shapes wood to size with various hand and machine tools; fits and assembles joint and screws with metal bars etc. bolting together where necessary; sometimes also makes wooden underframe where wagon is entirely of wood; cf. wood wagon builder (476).

wagon examiner, wagon inspector (railway wagons); examines and checks finished work on railway wagons; inspects old stock and indicates by marks thereon what repairs they require; renders written report in subordinated form.

wing coverer (aeroplane); stretches strips of prepared linen over the wing frame and secures by connecting with dope, a waterproof adhesive, and by hand stitching with needle and thread.

659.—OTHER WORKERS.

bogie cleaner (railway rolling stock), under-frame cleaner, removes accumulated grease and dirt, with a hand brush, from bogies and underframe of railway rolling stock, preparatory to repair.

booth attendant, booth hand (rolling stock); wheels trolleys carrying dismantled parts of axle boxes, etc., to tanks of water and steam, used for resurfacing cut and groove; closes door of chamber, sweeps spooly into tank by means of electric hoist and opens and closes valves for admission of water and steam to tank; or assists watch driver (353) to take articles to be cleaned, may also swirl articles on removal with water from hose.

breaker - up (railway wagons), demolishes railway wagons by unscrewing, removing bolts, etc., or breaking up by force, when necessary, with hammer and chisel, sorts out parts that are suitable for re-use.

carriage works labourer, coach builder's labourer, coach labourer; does general unskilled work in carriage or coach building works; fetches and carries material, holds up work, hands tools, etc.

dress guard layer (cycles); lines cord through holes in rear mudguard and bulb fitting to form dress guard on rear wheels of Indian bicycles; sometimes does fancy knotting in more elaborate designs.

rubber tyre worker (perambulators); general term for workers fitting rubber tyres, solid or pneumatic, to wheels of perambulators, bath chairs and similar vehicles, including solid tyre fitter, pneumatic tyre fitter g.e.

tyre fitter, rubber tyre fitter; general term for workers fitting solid or pneumatic tyres to motor lorries, cycles, aeroplanes, and other similar vehicles; for pneumatic tyre, its outer cover over wheel rim, inserts inner tube, adjusts valve, connects fitting of outer cover to an inflating pump or power-driven pump and pressure gauge; for solid tyre, fits solid or canvas rubber tyre to rim with special rubber cement; twists together ends of wire, in winding tyre; cf. tyre pressman (558); sometimes specifically designated, e.g. cushion tyre fitter, cycle tyre fitter, motor tyre fitter, solid tyre fitter, pneumatic tyre fitter.

underframe cleaner (railway rolling stock), see bogie cleaner.

wagon works labourer (rolling stock), as for carriage works labourer.

Sub-Order 3. — Builders of Ships and Boats (see also Under Metal Workers and Wood Workers).

662.—SHIPWRIGHTS (MATERIAL NOT STATED).

fairer, see shipwright.

ship repairer; a shipwright g.e. wholly or principally engaged in ship repairing.

shipwright; fairer; one of a gang of skilled men who lay down keel blocks; fair, i.e. lines off and keeps in proper form, each part of steel framework of ship to line of design, using wooden ribbons, and directs frame and beam erections (222) g.e. engaged in this work; superintends laying of launchways and launching; lays decks, and generally fits out ship; sometimes also superintends erection and maintenance of staging used by workmen.

shorer (shipyard); a shipwright g.e. who, in big shipyards, specialises in the shoring up of ships on shipways in dock; directs work of shipyard labourers (663); rarely used; cf. shorer (shipbuilding) (499).

668.—OTHER SKILLED WORKERS.

lines-off; assistant loftsmen; a shipwright (662) g.e. who indicates work to be done by marks on structural work already erected on ship; loftsmen, assistant, see lines-off; loftsmen, loftsmen and scriver, see scriver.

marker-off; shorer; marks off, from working templates on frame of ship, positions of ship plates and rivet holes for guidance of ship platers (222) g.e.; cf. lines-off.

rigger, ship rigger, ship's rigger; shipping block maker; tackle maker; erects ship masts and derricks; takes over duties of ship's crew when ship reaches port and seamen are paid off; moves ship about in dock, from one dock to another, or into dry dock for painting, repairs, etc.; splices hemp and wire, tranning and standing rigging, boat falls, mooring and gangway ropes, etc.

scrivener, scriver-in; loftsmen, loftsmen and scriver; lays off from plates on wooden floor, specially laid down for the job in hand, outlines of ship frames and plates, scrives in outlines with sharp scriving tool; also, in certain cases, prepares iron outlines on floor, makes templates for use of platers, usually done by pattern maker (489); marks off Plimsoll line, draught markings on bows and stern; also paints in area limits where necessary, cf. rigger, the shearer, etc. (see shorer).

stager, stage rigger; erects staging on which workmen stand to work, except uprights or gunwale stagings which are erected by shipwright (662) g.e. or in steadings by carpenter (474) g.e. hangs some stagings from beams by chains, or builds others outside ship on uprights fixed in ground and tied together by cross beams and chains, tackle maker, shipping tackle maker, see rigger.

wayman; a shipwright (662) g.e. or a plate-layer (577) g.e. who prepares and lays launching ways for ship about to be launched; prepares wooden blocks, and also, if by hand cradles on which are fixed wedges; places cradles under keel of ship, so that ship can be raised for launching by driving in wedges with sledge hammer.

twire applier; a ship rigger g.e. who cuts off wire with hammer and chisel, and fits, and splices wire rope in ship or boat construction, using piece.

669.—OTHER WORKERS.

dry dock labourer; does general labouring work (not ship repairing) at dry docks; cf. ship rigger's labourer, fitter (shipbuilding); prepares, by cutting, and places in position strips of tarred or other waterproof oakum splices (shipbuilding); rolls strands of oakum to requisite diameter for insertion by caulker (482) in crevices in wood.

rigger's labourer, asfiter, asfitterman, asfiter's labourer, asfiter gang labourer; shipyard labourer; does any general labouring work about shipyard, fetching and carrying tools, material, assisting skilled workmen, etc.; assists generally in lifting and placing in position heavy gear, sometimes assists rigger (662) g.e. in moving and mooring ships at yard jolly.

ship breaker, ship dismantler; demolishes old ships, narrowing bolts of plates and timber, and unfastening plated joints with saws; sorts and stacks metal, timber, etc., ready for cartage.

shipyard labourer, see rigger's labourer.

shore gang labourer, shore gang man; does general labouring work about yard apart from dry docks or penstocks in ship repairing yards, e.g. assisting ship's rigger (663) g.e.

shorer (shipbuilding): a labourer who fits shores (wooden props) under and to sides of ship, either in dry dock or on slip way under direction of shipwright (662).

slip labourer, slipway labourer: a labourer who works on slips up which ships are hauled for examination, repainting, repairs, etc.; hauls on and fastens ropes, masts and adjusts shoring blocks and props, etc.

Sub-Order 4.—Other Workers.

681.—FOREMEN AND OVERLOOKERS.

foreman (cheeseboard making, leather and strawboard making), cuts up strawboards and paper for cheeseboards on hand gauging; sometimes also operates, by means of a lever, a blocking press, similar to that used by gold beater (537) *q.v.*, for decorating cheese or background boards with gold leaf; superintends female cheeseboard makers (685) *q.v.* and is responsible for work of leather and strawboard workshop generally.

working foreman (tobacco pipes, not clay), sets up and repairs machines used by pipe makers (255) *q.v.* in any process of tobacco pipe making, other than of clay; also supervises and directs workers.

682.—SURGICAL OR DENTAL INSTRUMENT MAKERS.

blunt worker; makes forceps, stethoscopes, pliers, and other dental or surgical instruments which have not a cutting edge, bards and tempers any piece of steel and shapes it; sometimes also forges it, but may receive it ready cut to proper length, machines instrument by turning, cutting, drilling, screwing, tapping, grinding, and fits and finishes it with files and other hand tools, if necessary; passes to polisher (258) *q.v.* for polishing, assembles parts and screws them together to form complete instruments.

dental instrument maker, hospital instrument maker, surgical instrument maker; general terms for any worker engaged in making dental or surgical instruments, *e.g.* blunt worker, surgical cutter (255) *q.v.*

683.—SURGICAL APPLIANCE AND ARTIFICIAL LIMB MAKERS.

acoustic instrument maker; deaf instrument maker, ear trumpet maker, hearing trumpet maker; general term for any worker engaged in making ear trumpets or other instruments used by deaf persons; cuts sheet metal to shape, with shears or knife, sometimes also uses lathe and drilling machines, and various tools, in shaping metal parts; heats sheet metal round a mould with a hammer, and sometimes also heats it to form trumpet; cuts and shapes, if necessary, on lathe and drilling machines, vulcanite or other parts, but these are usually supplied ready-made and finished, fits together metal and vulcanite or other parts, with hand tools, work various gaskets according to type of instrument, but in many cases makes them of telephone rubber (300) *q.v.*

anatomical machinist; sews together with sewing machine, parts of anatomical appliances, *e.g.* trusses, surgical belts, coverings for irons.

artificial limb maker; hollows out, with hand-cutting tools, wooden parts of artificial limbs; makes joints and fixes them with small pins; covers parts of limbs by gluing on leather sheets; fits in special "Bowden" wires to movable joints to enable wearer to operate them; assembles and fits together all parts of limb.

deaf instrument maker, *see* acoustic instrument maker.

deformity worker, *see* orthopaedic instrument maker.

ear trumpet maker, hearing trumpet maker, *see* acoustic instrument maker.

orthopaedic instrument fitter; instructs orthopaedic instrument maker *q.v.* as to measurements of instruments, and is responsible for correct fitting of instruments; often consults with surgeon and receives instructions as to measuring and fitting; often also examines and measures deformed person for instruments where it is not essential that this should be done by surgeon.

orthopaedic instrument maker, orthopaedic mechanician, orthopaedic steel worker; deformity worker, sepioid mechanic; receives measurements and instructions from orthopaedic instrument fitter *q.v.*; forges steel bar or strip, if necessary, by hammering it on bench fitted with a vice, to make rods of appliance or to make racks, if these are required; hammers rod or strip to shape; fits it up on a lathe, *e.g.* turning, drilling, screwing, cutting, shaping, or by scraping or filing; attaches small parts and assembles parts to form complete instrument; hardens and tempers instrument, passes to polisher (258) *q.v.*; sometimes pads instruments, by wrapping them with felt and stitching on a leather cover, by machine; sometimes makes splints, by backing on limb, or by dissolving celluloid in acetone and applying this in coats alternately with several layers of gauze, the whole setting firmly to form splint; is able to shape instruments to fit and support deformities of hip, spine, limb, etc.

respirator maker; makes frames of respirators from wire and stampel metal, and sews inlets thereon.

split maker; (i) planes and cuts wood for wooden parts of splints, on woodworking machines; sandpapers parts, by hand, and screws them together, sometimes first dovetailing them, by hand; (ii) makes splints, for stock of metal, but does not make to specification; stamps out metal parts in a power press, forges joints and hardens and tempers them; sometimes turns parts of splints.

surgical appliance maker; general term for any worker engaged in making surgical appliances; includes wood workers, leather workers, and steel workers.

surgical belt maker; an anatomical machinist *q.v.* who sews anatomical or surgical belts by machine or by hand.

surgical mechanic; (i) *see* orthopaedic instrument maker; (ii) general term covering workers in surgical appliance trade, including orthopaedic instrument maker, splint maker, blunt worker (682), and sometimes also surgical instrument maker (682) *q.v.*

truss coverer; a surgical belt maker *q.v.* engaged in sewing, by machine or by hand, leather or fabric covers of hernia trusses.

truss maker; makes surgical trusses, belts; cuts steel strip, drills and reeds; covers with padding of wool or hair and leather or cotton fabric; *cf.* truss coverer.

684.—DENTAL MECHANICS.

adapter (artificial teeth); a dental mechanic *q.v.* making alterations in new plates returned to adjustment; may also utilise old materials in building new dental work; obsolescent.

dental mechanic, dentist's mechanic, mechanical dentist; sets artificial teeth in rubber to correspond with a cast moulded in plaster from wax impression of patient's mouth; encases the set in plaster in a metal case, and vulcanises it by steam pressure; polishes vulcanised set on wheel with emery paste; makes sets of gold or dental alloy by brazing, with blow-pipe, the porcelain teeth on to the metal plate after setting up in plaster cast, which keeps them in position during brazing process.

685.—OTHER SKILLED WORKERS.

album-maker (photographic plates, slides and paper); covers plates, films or paper, before coating proper, with a mixture containing albumen, as a basis for coating emulsion; processes *or for* color (photographic plates).

arrow featherer; cuts three shins in neck end of arrow, *i.e.* end which fits on bowstring, and sticks portion of feather in each, with glue, trims each feather when done to ensure that arrow will fly true.

artificial flower maker; (i) (*fabric flower making*); receives petals, stamens and seeds ready mounted on stem, also fabric, in strip and in sheet form, wire and other materials, and pattern of flower to be made; makes up flowers from materials by either of following methods: (a) threads petals over wire stem in correct sequence as regards size and standing; threads on stamens and passes centre of stamens and petals, binds strip fabric round covered wire stem under stamens and petals, down end of binding; (b) arranges, binds and passes petals without threading them round stem; sometimes also makes stems by twisting strip material round wire in form of spiral and passing down end of material, sometimes cuts to shape and pastes in position pieces of coloured cotton wool, as additions to centres and petals; (ii) makes fabric flowers of inferior quality by sticking petals on to wire stalk with paste and gophering iron; often also makes paper flowers; (iii) (*paper flower making*) uses; assembles paper petals to correct form and binds them with thin wire on to a stiffer wire forming stalk; also binds, with wire, leaves made by leaf stucker *q.v.*

artificial fly maker, artificial fly dresser; fly dresser; sorts out feathers, wools, and tinsels of bright colour and ties them together in the form of fly, or round a fish hook, thereby concealing it.

artist (fans); *see* fan painter.

bagatelle board maker, *as for* billiard table maker.

bait maker, artificial bait maker; (this metal bait) cuts out, with shears, rough shape of bait from sheet metal and files to shape; pierces it with anawl and binds hooks thereon to with gut; (lead or shanked metal bait) receives bait, cast and stamped by caster or slinger *q.v.* and files to finish it, binding it to hook with gut, (rubber bait) cuts rubber to shape, by hand, and inserts and threads hooks; (pointed leather, etc., bait) cuts, by hand, leather or similar material in shape of a fish, binds it to hook with gut or waxed silk and adds other decorations, *e.g.* bunches of coloured wool, by cutting up and bunching and binding it to shank of hook with gut or silk; in all cases, may also paint bait.

battledore maker; bends wood to shape of a bat by steaming it and by pressing with wedges, or procures wood ready bent; makes and affixes handle, stretches vellum, skin, etc., on either side of bat, and secures it firmly at side

billiard table maker; general term for any person engaged in one or more of various processes of billiard table making, e.g. billiard table fitter, billiard table fitter-up, fitter-up (billiard tables) *q.v.*

blind fitter, blind fixer, window blind fixer; takes measurements for size of blind required; sets out and trims material prior to machining by blind maker *q.v.*; fixes exterior blinds, when made, by securing special boxing, to receive them, at top of shop front, with iron stays or bolts driven into brick or stone work; fixes interior blinds by screwing special fittings on inside of window frames, and attaching cords to blinds.

blind maker; makes interior and exterior blinds throughout to required design, shape, and dimensions; (i) prepares boxing for exterior blinds, by nailing or screwing together wood prepared for purpose; work sometimes done by carpenter (474), cabinet maker (473), joiner (473), or upholsterer (504) *q.v.*; (ii) a machinist (419) *q.v.* who makes up material, by sewing machine, into blinds.

blind maker, shop; a blind maker *q.v.* who attaches at one corner blind, which has been made to required size, to roller at one end and to wood beam at other end; screws iron supports on to beam.

block lapper, block wrapper; wraps, or covers with felt, blocks used for polishing plate glass.

boiler and steam-pipe fitter, see *corroter*.

borer, brass borer, machine borer, brass boring band, brass boring machines; brass drill, brass drilling band, brass drilling machine, drill (broove and borer), and hand machinist (broove and borer); borer bores in stocks or blocks of any kind of brass, whether made of wood, bone, xylocote or ironwood, with a lathe or a boring machine; sets up machine, together with template; places stock in position under template for boring and switches power on or off as required; *cf.* *borer* (496).

borer, wide (tobacco pipes, not clay); bores slit at end of mouthpiece, by holding it against a drilling tool on a horizontal drilling machine.

box maker (wooden fixture boxes); makes fixture boxes with wooden bottoms and lids, and cardboard sides; receives wooden parts for bottoms and lids, already cut to size, cuts sides and round bottom pieces, and secures them at edges and corners, by gluing strong linen strip thereon, makes lid in same way; covers with cloth, which he glues on; rubs cloth down firmly to obtain even surface; *cf.* *frame maker (wooden fixture boxes)*.

brailer (flexible tubing), or for braider (cables) (319), covering rubber tubing with cotton.

buff and glazer maker, glazer maker; makes throughout white, buff and glaziers (307) and polishers (232) in tool and cutlery trade, by cutting wood, arranging it cross-grained in layers, or by building it up in sections arranged radially, rimming it with leather, and facing it with glue and emery.

buff coverer, see *map maker, leather burner-off, mantle burner-off, incandescent mantle burner-off, mantle burning-girl (gas)*; (i) (upright mantle), *see* *newcomer*; (ii) (inverted mantle) receives impregnated mantles in sets on metal grids so that bodies of mantle

hang through grids; places a number of grids on bed of mantle by burning machine so that each mantle is beneath a gas jet; pulls lever which depresses the burners so that flames are inserted downwards into mantles, to burn away thread; when cool, removes mantles for seasoning.

carbon tissue maker (photographic); weighs out gelatine, and soaks it until correct consistency is obtained; weighs out pigment according to known formula, and mixes them with gelatine, matching mixture to required colour; coats carbon tissue with this mixture, as for *coater (photographic paper)*.

carpet bag maker; cuts out pieces of cloth; stitches them together by palm and needle method; *cf.* *palm and needle hand* (417); sews on leather or metal fittings to make complete carpet bag.

catgut maker, see *gut drawer*.

catgut spinner, see *gut spinner*.

centraman (printer's roller); printer's roller coverer; has charge of set of mould galleys in which printer's roller spindles are covered with composition, *see* *composition maker* (356); screws circular cap on each end of spindle, and pushes spindle into cylinder of mould gun, assisted by roller (printer's roller) (360); pumps composition into mould gun and when full, admits cold water to water jacket round gun; when composition is set, unscrews cap and slides covered roller spindle from mould gun.

checker (penholders); examiner (penholders); scrutinizes finished penholders for defects.

cheese board maker; draught board maker; (i) (scale operators) cuts out and trims pieces of leather on a small power-driven saw; glues pieces together and places them under weights, where they are allowed to remain for a long period; mounts pieces of leather on a wooden base; squares sides of cheese-board by planing; cuts out pieces of wood for border frame, and glues or screws them on; sometimes also draws part or uses or presses, also other decorative work; usually also makes cribbage boards, by processes generally similar to those used in making chess boards, and boxes for holding chessmen, draughts, dominoes, etc.; *cf.* *wood box maker* (477); (ii) (jewel case operators) pastes a paper "face" on a strawboard base, by hand, with a brush and paste, or cuts cloth for padding and leather for covering and pastes leather over padding on a strawboard base; outlines squares, and disengages joints between leather pieces with thin strips of gilding, which she lays on board with a hand roller, containing a supply of liquid gilt which flows out as roller is pushed over leather.

cigarette holder maker; makes cigarette holders or mouthpieces from vulcanite, horn, bone, metal, etc., by turning on lathe.

coater, boiler, see *corroter*.

coater, celluloid coater (photographic films); or for *coater (photographic films)*; except that film-coating machine is narrower than paper-coating machine.

coater, emulsion; general term for *coater (photographic paper)*, *coater (photographic films)*, and *coater (photographic plates)* *q.v.*

coater, paper coater (photographic paper); adjusts speed of rollers, governing flow of emulsion, by turning a regulating screw; adjusts tension of rollers which distribute emulsion in coating machine, to ensure that emulsion is spread to required thickness; moves lever to start machine; guides end of paper through various rollers; watches paper as it runs

through machine, and regulates rollers, taps, brakes, etc., if coating does not go on satisfactorily.

coater, plate coater, dry plate coater (photographic plates); turns tap to regulate flow of emulsion, turns governing screw to regulate speed of rollers if machine raises or reduces beat of emulsion by turning on or off of supply of heat; sometimes places plates, edge to edge, on travelling band which carries them through machine, unless this is done by feeder.

colourer (artificial flowers), *see* *shade-coverer, boiler coverer, boiler and steam-pipe coverer, pipe and boiler coverer, steam-pipe coverer, boiler and steam-pipe fitter, boiler coater, boiler hanger, logger, pipe logger*; mixes wet paste of non-conducting material (asbestos, silicate of cotton, etc.) and spreads with a trowel over outer surface of boilers, steam-pipes, etc., to prevent radiation of heat when dry; may wrap lengths of heat-resisting fabric round pipes; secures covering either by wrapping wire netting round it or by including wire netting with the composition as reinforcement; screws brass or copper bands into position round pipes to support them; paints pipes or boiler after covering.

coverer, box coverer (wooden fixture boxes); receives box and lid from frame maker *q.v.*; turns end corner of strawboard lid, already cut and scored, glues strips of linen round corners to secure them; cuts paper for inside lining and cloth for outside covering and pastes paper inside and glues cloth on outside; and usually also screws on handles, hinges, and plates; *cf.* *coverer (cardboard fixture boxes)*.

coverer, bust; receives bust from bust fitter (369) *q.v.* and (i) sews together, on a sewing-machine, parts of covers cut out by foreman (30) *q.v.* from cover, which it has been sewn together by machine, over bust; pads bust with cotton wool or other padding; draws cover tightly over padded bust, leaving no wrinkles, and sews up cover by hand.

coverer, case (brass, jewel, pipe, etc., cases); covers, by pasting or gluing, exterior of brass, jewel, pipe, or other similar cases with pieces of leather or leather substitute, previously cut to shape by foreman or enter; sometimes specifically designated by kind of case, e.g. *brass case coverer, case case coverer, camera case coverer, jewel case coverer, pipe case coverer*.

coverer, pipe, as for *corroter, boiler*.

coverer, printer's roller, see *centraman (printer's roller)*.

coverer and liner, case (brass, jewel, pipe, etc., cases); combines operations of *brass case coverer, camera case coverer*, sometimes specifically designated, e.g. *jewel case coverer and liner, pipe case coverer and liner*.

cricket ball center maker, see *quilt maker (cricket balls)*.

cricket ball maker, cricket ball sewer; cuts sections of leather to shape by hand, or receives sections ready cut by machine, sews two quarters together, on outer side of ball, thus making half-covers; fits these halves over quilt or centre as received from quilt maker *q.v.*; sews together halves on outer side of ball, using curved or bent needles; clamps ball in a beaded cup press to depress external seams; *cf.* *tennis ball sewer*.

cricket glove maker; general term for any worker engaged in manufacture of cricket gloves, e.g. *center (dill), machinist (dill)*, and *table band (cricket gloves)* *q.v.*

cricket pad maker, cricket leg guard maker; cuts prepared and dyed leather, cane stiffeners, and padding to size, and stitches them together to form pads or leg guards.

cutter-out (work basket lining); cuts cardboard to shape for lining work baskets, using rule and hand knife; pierces cardboard with stilette, or a large awl, to make holes for reception of buttons when basket lid is being lined by work basket liner *q.v.*; measures up and cuts satin, with scissors, for lining basket, passes basket, cardboard, and fabric to work box liner *q.v.*

cycle saddle repairer; cuts out old rivets and removes worn leather and/or broken springs; refits new parts and old rivets, by machine, into place; may also rewire drive and old enamel and prepare saddle frame for re-enamelling or re-plating.

designer (soft toys); sketches, with paper and pencil, designs for soft toys of new shapes or colours, makes new toy throughout as a pattern; is often done by proprietor or manager of establishment.

diamond setter (diamond tool making); *see* diamond tool maker, *c.f.* diamond setter (jewellery trade) (184).

diamond setter, glazier's; examines diamond, which is usually smaller than that used by shaped diamond tool setter *q.v.*, and, judging by experience, selects best cutting edge; drills a piece of wire, inserts diamond therein, with cutting edge uppermost, and, seeing it in position by pressing metal on side of wire, trims setting with a file, taking care to leave cutting edge exposed, file or turns off end of wire; polishes cutting edge of diamond; inserts diamond, in setting so prepared, in a wooden handle so that exposed edge is in correct position for use in stone cutting; solders setting and diamond in position; finally polishes tool, when complete; in shape where work is subdivided, performs one or more of above operations, *e.g.* polishing, setting.

diamond tool maker; *diamond setter* (diamond tool making); (i) (abrasive wheel dressing); makes tools containing diamonds used for dressing abrasive wheels; mounts diamond in any way that may be most suitable; either drills hole in end of a steel bar, on a drilling machine; makes two saws, one right angles, across hole; inserts diamond in hole; presses peaks of metal, formed by saw cuts, on to diamond with pinners or other hand tools and braces metal setting of diamond, or drills hole in copper rod on a drilling machine; inserts diamond in hole, and secures diamond in position by punching metal round diamond with punches and a hammer to form a setting; (ii) general term for makers of diamond tools, including glazier's diamond setter, and shaped diamond tool setter *q.v.*

diamond tool setter, shaped; prepares steel holder to receive diamond, which is usually larger than that used by glazier's diamond setter *q.v.* and which he receives from polisher *q.v.*; method of preparation includes drilling of holes in holder, cutting of slots, or otherwise preparing a bed; works at bench fitted with a vice, using lutes and similar materials; sets diamond in holder, and fixes it in position either by making and inserting small wedges, or by forming small beads of metal round diamond, or in some other way; finally braces metal setting; sometimes does by glazier's diamond setter *q.v.*

dipper; *see* dyer (raffia, grasses, etc.). **doll maker**; fixes eyes in position with glue or other adhesive, or, for marionette eyes, or eyes which shut, fixes eyes on to bent wire pivot and gives mechanism into position inside head; sews stuffed fabric parts, received from doll stuffer *q.v.*, to parts made of china, wax, or other material through holes in shoulder provided

for the purpose, sometimes makes up and fits on wig.

doll wigger; makes up, arranges, and glues hair on heads of dolls.

domino maker; cuts domino blanks with small circular saw, hooding wood against page; cuts base and covers in similar manner; prints spots by feeding blanks into printing machine, altering die from time to time; inserts a black wooden or bone back to white base or wooden front with a brass rivet in a riveting machine.

draught board maker; *see* chess board maker.

driller (holes and brushes); brush driller, brush drilling hand, brush drilling machine, *see* borer.

dry plate maker (photographic plates, etc.); mixes gelatine, silver salts, etc., in solution, according to formula, to form emulsion for coating photographic plates, etc.; also special plates, *c.f.* coater (photographic plates).

dry plate worker; general term for any worker engaged in producing photographic plates, including glass worker (185), coater, racker (189), plate cutter (188), etc., *q.v.*

dyer (raffia, grasses, etc.); *dipper*; stokes fire under vats to keep dye liquor boiling; immerses raffia in dye liquor, or in case of grasses, holds bunch of grass in liquor, stirs liquor containing raffia, from time to time, to ensure even dyeing; judges when raffia or grass is dyed to match pattern; takes raffia or grass from dye liquor and hangs it up to drain; suspends it on hooks attached to an endless band, which carry it into drying machine; stokes boiler of drying machine.

dyer (photographic plates, film, etc.); *film thinner* (photographic films); immerses photographic plate or film, by hand, in a dish containing dye or stain solution, to make it more sensitive to red or yellow light, as required in certain processes.

examiner (penholders); *see* checker.

examiner (photographic plates, etc.); *plate examiner*, *paper examiner*; examines finished photographic plates, films, papers, etc., for defects, *e.g.* air bubbles, uneven distribution of coating.

factory hand (spools goods); general term for anyone employed interchangeably in a specific factory, *e.g.* in covering tennis balls or wrapping them up, in trimming feathers for shuttlecocks or in making shuttlecocks, etc.

fan maker (bady's); receives feathers in heaps, or lots, ready graded in sizes and quality, and curried, from feather dresser (182) *q.v.*, and gives them with great care on to ivory or bone mounts of fan, using small brush; presses down feathers until they adhere firmly to mount.

fan painter; *artist* (fans); paints decorative designs upon feathers and upon ivory or bone framework of fans; sometimes also, if employed by dressmaker, paints designs upon textile fabrics.

feather trimmer (shuttlecocks); a factory hand *q.v.* who cuts feathers for shuttlecocks in a particular way, as required to ensure correct balance and flight of shuttlecock.

ferrule fitter (fishing rods); pares end of fishing rod to fit ferrule; fits ferrule on rod and hammers it all round to make it grip; drills hole through ferrule and rod, inserts metal pin and rivets it home; work sometimes done by fishing rod maker and fitter (fishing rods) *q.v.*

filar (tobacco pipes, not clay); files mouthpiece, by hand, to give final shape, taking care that it is correctly balanced.

film assembler (film producing); arranges, ready for film joiner *q.v.*, lengths of film of separately photographed scenes in sequence according

to "book" of the production; cuts away rejected or faulty sections.

film joiner (film producing); joins ends of assembled new films, received from film assembler *q.v.*, or repairs damaged films by carefully overlapping and applying transparent adhesive solution.

film repairer (film producing); repairs torn or scratched films by cutting out spoiled length and inserting new film, sometimes done by film joiner *q.v.*; affixes new slotted edging to worn film.

film stainer (photographic films, etc.; *see* dyer (photographic plates, film, etc.)).

finisher, case (brush, jewel, pipe, etc., cases); completes decoration of brush, jewel, pipe and other similar cases; puts on gold lining by transfer, or brush, glues on metal mouthpiece, etc.; sometimes specifically designated according to kind of case, *e.g.* pipe case finisher.

finisher (fishing rods), rod finisher, fishing rod finisher; fishing rod polisher, moulder, polisher; reserves sections of fishing rod from fishing rod maker *q.v.*; binds polepiece or metal runners to rod, by hand, with thread; also binds rod in various places to give extra strength, varnishes whole rod, by hand.

finisher (soft toys); sews up soft toys, by hand, after they have been stuffed by stuffer *q.v.*; decorates them with paint or with coloured stitches; sews on ears, eyes, tails or other parts.

finisher (tobacco pipes, not clay); second mopper; a mopper *q.v.* who polishes pipe bowls, after staining.

fish hook tier; binds fish hook on to a short looped length of catgut with silk thread; applies varnish to joint with a brush and hangs to dry.

fishing reel maker; makes wood, wood and brass, or aluminium reel throughout; turns wood or metal parts of reels on a lathe; fits parts together, by fitting, and mounts brasswork.

fishing rod examiner; examines finished rods to detect faults in material or in workmanship.

fishing rod maker; (i) (some rods) splits lengths of cane by cutting with hand knife, into six wedge-shaped portions; glues, fits and glues together strips to form hexagonal rod, and binds with silk thread to dry; (ii) (other rods), formed to length of section of fishing rod and sections it, by fine planing, sandpapering or filing, to give balance and strength; files ends of sections to receive ferrules for socket joints and makes ferrules by cutting length of thin metal tubing with hand metal saw or machine cutter; shapes rod by cutting, grooving, abrading, etc. on a lathe; inserts and secures ferrules on ends of sections; binds sections with silk threads at intervals along section and attaches metal runner to handle; varnishes rod and binding; makes butt; (iii) winding and glueing strips of sheet cork round butt sections of rod, (b) turning solid cork to form cylinder and boring hole through length of cork large enough to admit cane rod; glues cut sections of cork on to rod and inserts other metal fittings; (iv) (wood—other than cane) receives rods trapped, *i.e.* roughly turned, and performs one or more of the various operations described above.

fitter, billiard table; **fitter-up** (billiard table); **billiard table fitter-up**; *Assemblage* (billiard table) (North of England); takes component parts, already completed, and erects and bolting parts into position; lays supports for slate bed, and lays bed, cutting and smoothing slate, if required, and using a spirit level to get a perfectly level surface; stretches, puts on, and marks cloth; puts on cushions, and

screws on pockets; often also fits up entire billiard saloon, and installs marking boards, cue racks, and overhead lighting; often also executes repairs to billiard tables and to billiard saloons, e.g. sews up rents in cloths, cuts or stuffs cushions, cuts out and sews on leather for pockets, cuts and smooths into beads round pockets, is usually a cabinet maker (473) g.v. who has been trained for fitting up by passing through the different workshops, e.g. frame making, slate masonry, brass finishing, cushion making.

fitter, bawler fitter (tobacco pipes, not clay): (i) (hand) puts mouth piece or bowl in shape, and sets lathe in motion; applies and guides tool, by hand, while mouthpiece or bowl revolves in lathe, thus drilling hole in stem of bowl and turning rebels in bowl end of mouthpiece; when mouthpiece is of composition or amber, makes mouthpiece from solid block by cutting with special care and drilling throughout; fits mouthpiece in bowl of pipe; (ii) (machine) holds bowl or mouthpiece against revolving tool, but does not cut out mouthpieces from solid block; other operations as for hand worker.

fitter, case (brush, jewel, pipe, etc., cases): glues, tacks, or otherwise fits metal fittings to interior and exterior of brush, jewel, pipe, and other similar cases; sometimes specifically designated, e.g. brush case fitter, jewel case fitter, pipe case fitter.

fitter (fishing rods): cuts and fits the two parts of ferrule sockets, on a lathe, and grooves ends of rod sections to receive ferrule.

fixer-up (billiard tables) (North of England), see fitter, billiard table.

fly book maker (fishing tackle): cuts pieces of leather, oiled silk, etc., into shape of pocket-book; turns in edges and secures by sewing in lining; stitches in squares of dannel, etc., on which artificial fishing flies may be hooked; stitches elastic or other bands to keep book elastic or other.

fly dresser, see artificial fly maker.

frame maker (wooden fixtures boxes): receives sets of frames, and glues pieces of wood, top and bottom of strawboard, ready cut to size by another worker, and nails them together, leaving lid unattached.

fraser (tobacco pipes, not clay): levels brass stem and mouthpiece, fitted together, by holding them against a revolving carbide disc, to bring them to same diameter, carefully shaping stem and mouthpiece about joint.

furnished line maker (fishing tackle): ties on hook and float to gut, and pinches-on split shot by means of pliers; winds line round spool; attaches swivels and artificial bait.

gimp hook tier (fishing tackle): a fish hook tier g.v. who ties hook on to gimp, i.e. wire wound silk, for heavy gimp fishing, etc.

glaser maker: (i) see map maker, leather; (ii) see buff and glaser maker.

gluer (lead pencil making): receives halves of sticks of pencils with edges ready glued by wood worker (lead pencil making) (489) g.v.; fits in leads and closes them together to form complete pencils.

gold club maker: receives gold club head, already turned by wood turner (489) g.v.; cuts off, with band saw, projections on head left by lathe. Drills, by machine, hole in gold club head to admit shaft; files club head to obtain correct lie; lathe makes holes in club head with noawl or similar tool; pours molten lead into hole through edge flange; screws on metal butt for end of club head; planes, files and sandpapers end of shaft until shot fits tightly on shaft; glues in shaft; sandpapers club by filing and sandpapering shaft, to get correct poise; sometimes also varnishes and polishes shaft; binds grip

on handle of club, and then binds with leather, securing them with tacks while waxed string on end of binding, to cover it, cf. gold club forger (199).

gut drawer, gut maker; catgut maker, thames maker; splits and cleanses animal gut, usually lamb's gut for strings of musical instruments; first cuts gut into thin strips with knife and then cuts, i.e. cleanses gut by pulling at narrow edge of special tool and between tool and thumb so that superfluous matter is squeezed out, strips membrane in potash and draws it over thumb, which ensures circular section and regulates size of strands; in hot drying rooms may secure length of gut to supports in bench and pulls gut to stretch it, giving it a slight twist in so doing; sometimes also does work of gut spinner g.v.

gut finisher: receives gut string from gut spinner g.v. and further twists it by means of pegs and hand wheel, while still wet; polishes and smooths surface of string by rubbing it with a leather hand pad, string under tension in drying room still dry.

gut hook tier (fishing tackle): a fish hook tier g.v. who ties fish hooks on silk worm gut.

gut spinner; catgut spinner: selects with care gut strands prepared by gut drawer g.v. and fastens a number (varying from four for a violin string to four hundred for a half inch gut band) of these thin strands while still wet on a frame to two pegs; inserts one peg into geared spindle and turns wheel by hand to twist or spin strands into a string or band.

hair hook tier: a fish hook tier g.v. who ties fish hooks on to horse hair for finnet, e.g. rearch, etc., fishing. hand machinist (scoops and brushes). see horser.

hatched stick maker: bends wood to shape of hockey stick blade by drawing it and forcing it into required shape with clamps; cuts it in two, and splits it down centre, to form four blades; glues pieces of cane together, turns them on lathe, and cuts them to shape and size of handle; glues and glues handle to blade; sandpapers and polishes the whole; and binds waxed hemp round handle with a foot or power lathe.

jockey-up (lead pencil making): places a clamp, and screws down clamp to make gluing secure; removes pencils when clamping is complete.

jug-saw puzzle maker, see wood puzzle cutter.

kite maker: (i) cuts fabric, from patterns, into shapes for kites, sometimes also designs patterns, having regard to lifting power of various types and sizes of kites; cuts out boxes in fabric or makes other provision for attaching fabric to frame; steams bamboo to straighten it, and sometimes joints lengths of bamboo, to form ribs (fishing rods); (ii) receives fabric from machinist (489) g.v. and wooden or cane strips from sawyer (481) or kite maker (i); if necessary, steams strips and bends them to shape for framework of kite; tacks fabric to frame, with hammer and tacks; in case of large kites, steams bamboo ribs in hem of fabric and binds fabric, where necessary, to framework.

lagger: (i) see overcover, boiler; (ii) covers refrigerating plant, by same process as that used by leather coverer g.v. to exclude heat from plant.

lagger, boiler; pipe lagger, see overcover, boiler.

lamp shade maker: binds lamp shade frame, with thread or other material; stretches material over frame, and stitches or glues it

to frame; sews on beads or other trimmings; cf. lamp shade maker (448) (459), lamp shade maker (paper) (558).

lead pencil maker: pencils will swivel; general term for any worker engaged in manufacture of lead pencils, including machine hand (lead pencils) (509), mill hand (lead pencils) (509), wood worker (lead pencils) (486), gluer, jockey-up and polisher (lead pencils) (490) g.v.

leaf worker, leaf maker (artificial flowers): (i) makes leaves and petals throughout by folding and putting by hand, stamped-out pieces of material, and fixing them with wire; (ii) general term for the sectionalized workers in artificial leaf making, e.g. mounter, plucker and stoker, veiner (588) and wazer (593) g.v.

liner, cabinet case: receives cabinet case or show, made by cabinet case maker (479) g.v., and takes out shelves, partitions, brackets, etc. made by cabinet case fitter (473) g.v., therefrom; removes any irregularities from wooden surfaces with a chisel; assembles and glues in padding, and also lining material, i.e. velvet, plush, satin, or other textile fabric, or paper, and cuts it to best advantage; coats inside of cabinet case with paste or glue, and inserts and presses down first bark piece and then side pieces of lining, lines shelves, partitions and struts in same way; if has lid, cuts out piece of cardboard for inside of lid, lays a quantity of cotton wool thereon, covers it with satin, and glues cardboard inside lid.

linar, case (brush, jewel, pipe, etc., cases): lines, by gluing or pasting, interiors of brush, jewel, pipe and other similar cases with velvet, plush, silk, etc., using as little as possible, so as not to saturate padding or fabric; sometimes glues cotton wool for padding on to supports inside case, taking care to discontinue cotton wool at cavity; sometimes specifically designated, e.g. brush case liner, jewel case liner, pipe case liner.

liner, table: table and cabinet liner; lines tables, bureaux, etc., with textile material or with leather, leatherette, hain, etc.; operations similar to those performed by cabinet case liner g.v., but work must be higher finish, e.g. glazing down more smoothly and fitting better; sometimes also decorates leather border of hanging, (i) by pressing metal dies round border to produce an impressed design, (ii) by gliding sprinkles brickdust on a block of stone to prevent gold leaf adhering, and lays gold leaf thereon; cuts gold leaf into small pieces; beats metal die on a gas ring, and picks up gold leaf, piece by piece, on bottom of die, and presses on leather lining, leaving gold leaf thereon; wipes die with a cloth to collect surplus gold; same worker sometimes also cuts and glues leather linings for bookcase shelves.

liner, work basket: receives work basket, cuts it out to size and shape required, carves, cuts to size and patterned, for top piece, and binds it; lines work basket by inserting cardboard over bottom and sides of basket, and stretching and sewing down satin thereon; in lining lid, glues up piece of cardboard on inside of lid, superimposes cotton wool for padding, stretches satin lining over and fastens by placing buttons over holes in cardboard and stitching them to basket, arranges folds in satin lining during stitching; makes and attaches, by sewing, satin pouches or other trimmings.

liner, work box, as for liner, work basket except for making of lid, which is made by cutting out piece of cardboard to size of lid, laying a quantity of cotton wool thereon, covering it with satin and gluing cardboard inside lid.

luggage maker (for bonnets); rolls up, in small bottles, fancy paper caps or masks, mottoes, trinkets, etc., for enclosing in body of hat boxes (cosmetics); lyasher (root toy); fastens movable limbs of soft toy animals, to body, with wire

machine worker (fishing rods); general term for any worker engaged on machine work, laths, etc., in making of fishing rods; traps wood for rods, i.e., turns it from the square to red form; also does any lath work in connection with ferns.

maker-up (fishing rods), see finisher (fishing rods).

map globe maker; makes globe frames of wood and cardboard; applies plaster of Paris and varnishes in laths against a gauge to requisite dimensions.

marker-off, see template maker.

meerschaum enameller (tobacco pipes); soaks meerschaum in warm spermaceti, and waxes it over with lac wax to obtain a polish.

meerschaum pipe maker (tobacco pipes); shapes block of meerschaum roughly by hand; soaks it in water, and chips it into shape of pipe; turns it on lathe; files it with superfine green, may also soak in spermaceti and wax it, see meerschaum enameller.

modeller (shipbuilding); makes, by hand, wax models of ships' hulls for use in experimental tanks.

model maker, ship model maker, model yacht maker; makes, with various hand tools and machine lathes, detailed models to scale of ships and their fittings; work usually done by skilled cabinet makers, joiners, pattern makers, watch makers, etc.

mop maker; (i) (male) performs, interchangeably, any of the heavier operations in connection with making of mops, e.g., stamping out cloth mop shapes on stamping machine, riveting together cloth shapes on riveting machine, attaching leather washer at each side of mop; (ii) (female) employed, interchangeably, on any of the lighter work in connection with mop making, e.g., assembling stamped shapes for riveting to form calico mops, tapering and shaping compressed felt for jeweller's finger mops, by holding it against revolving tool on a lathe, gluing mops to wooden handles or bases, threading cotton or worsted thread, by hand, through holes in wooden core and in twisting wire round thread to form brush mops; sometimes specifically designated, e.g., calico mop maker, jeweller's mop maker, polishing mop maker, rat mop maker.

mop maker, leather; *buff smoother, glazer*; makes; recovers wooden centre ready turned; beats glue and spreads it evenly upon surface to be covered, cuts chamois, sheepskin, or other leather to correct size, rubs glue into cut strip, and presses upon glue-covered surface of wooden centre; banishes wooden parts, which must be carefully selected and accurately placed, through leather into wooden centre, to tighten wood and leather and to hold glued covering securely in position.

tmopper (tobacco pipes, not clay); holds pipe bowl against revolving calico mop, covered with polish, before and after staining; cf. mopper, hard and finisher.

tmopper, hard; first mopper (tobacco pipes, not clay); mopper; e.g., who polishes pipe bowls, by holding them against revolving mop, before staining.

tmopper, second, see finisher (tobacco pipes, not clay).

mounter (artificial flowers), artificial flower mounter; prepares; recovers flowers and leaves, wire, sheet fabric, strip fabric (for binding), paste, etc., and patterns of spray to be mounted; makes up sprays from these materials, varying methods as required in each particular case; parties end of triangular piece of fabric over a

length of wire, bends wire to shape of ellipse and gathers up bunched fabric with needle and thread, to form artificial leaves; arranges a number of flowers and smaller leaves along stalk of larger leaf so made, selecting flowers and leaves so as to reproduce pattern as nearly as possible; binds strip fabric round wire stalks to form one main stalk, passing down strip as it is rolled.

painter (artificial flowers), leaf and fern painter; (i) paints natural leaves by hand; (ii) *see* shander paper maker, cyanotype; architect's photographic paper maker, engineer's photographic paper maker; weighs or measures out, according to formula, constituents of ferro-cyanide solution, with which paper used for making blue prints, etc., for architect's or engineer's drawings, is sensitized; mixes constituents in a vat or other receptacle to form solution; places rolls of paper in supports in machine; guides and rolls to first rollers and so through machine; turns screws to adjust speed of rollers and thereby regulate flow of solution to paper; catches end of paper as it comes off heated roll on which it has been dried, after which it is on a reel and engages reel in automatic feeding attachment of machine; cf. coater.

pattern maker (artificial flowers); an artificial flower maker e.g., making sample flowers or inventing new designs.

pencil mill worker, see lead pencil maker.

photo frame coverer; stretches and glues or tacks cloth, leather, velvet, paper, etc., over padded photograph frame; sometimes specifically designated according to material, e.g. photo frame plush coverer.

photo frame maker, photograph frame maker; makes photograph frame from pieces of wood, which he saws, by hand or machine, and shapes with chisels, gouges, and other tools; fastens pieces together, with glue or iron wire to make complete frame; cuts out leatherette, velvet, or other material and glues it on to frame; cuts glue to fit frame.

piquetter, see mounter (artificial flowers).

pipe maker (tobacco pipes, not clay); general term for any worker engaged in any process of pipe making, including fitter, finisher, filer, line fitter (669), punnier (669), stainer (668), mopper, wire borer e.g.

pipe, repainer (tobacco pipes); is usually fitter (tobacco pipes) e.g., having a general knowledge of pipe-making, who specialises in repairing pipes, principally by fitting new mouthpieces and replacing burnt bowls, selects required part, of approximately correct shape and size, from stock and adapts it by turning, filing, drilling, etc., or a combination of cuts composition or amber mouthpieces from solid block, e.g. fitter (tobacco pipes); sometimes also cuts out new wooden pieces, and glues them to broken ones, or cuts out metal bands to fit them in, cf. band maker (688).

plate dryer (photographic); is in charge of hot air drying room where coated photographic plates are placed to dry; regulates taps and valves governing volume and temperature of air which is allowed to pass through drying rooms to dry plates after coating.

polisher (fishing rods), fishing rod polisher, see finisher (fishing rods).

polisher (for shaped diamond tools); mounts diamond in holder called a dop, which, in turn, is held in a tool, suitably adjusted, so that portion of diamond to be shaped or polished comes in contact with a dop, charged with diamond dust and revolving at a high speed; decides how

much stone must be removed, and angle of clearance from cutting edge, etc.; cf. polisher (686), diamond polisher (693).

powder puff maker; sews together two circular pieces of down-covered goose skin, as received from carter (542) e.g., over a padding of cotton wool to make powder puff; also sews on ribbon or other trimming.

puller-up (artificial flowers); works at bench on which a hundred or more cotton threads are arranged in parallel to dry after having been passed through a trough of liquid starch; sets up apparatus by threading each thread from its bobbin under roller in starch trough and through holes in two sets of reeds on bench; when starched thread is dry, pulls up each thread and stretches over an additional part of bench through a third reed; change parallel threads in position by means of a number of wooden rods placed across and fastened together in pairs, i.e., one rod above and one below threads, by means of spiral springs; seed maker, who has cut threads with knife, between each pair of clamping rods, assists him to place rods on laths; when seeds, berries, etc., have been made by seed-maker by dipping, unclamps rods and makes up bundles of seeds, etc., tying them together with thin wire; may also box seeds, etc.

quilt maker, quiltar (cricket balls); cricket ball centre maker; wraps warped thread, by hand, round a cork to make quilt, or core, of cricket ball, taking care that thread is evenly distributed; when large enough places quilt in cup, equal to half weight of cricket ball, sunk in a bench, and strikes it with a hammer or mallet to harden it; while hammering, turns quilt round from time to time.

racquet finisher, tennis racquet finisher; binds tennis racquet frame, by hand, with silk or gut where it joins handle, work usually done by racket stringer e.g.; cuts leather and tacks strip round rim at end of handle; sometimes also polishes racquet; cf. polisher (498).

racquet maker; turns handle on a lathe, glues it on to racquet frame, and clamps the whole in a frame to dry; trues and smooths racquet with knives, rasps, and files; drills holes and cuts grooves for gut; drives screw through sides of frame and handle; and clamps in a cup, with sand-paper, sometimes also strings, polishes, and finishes racquet, see racquet stringer, tennis racquet polisher (498), and racquet finisher; sometimes specifically designated according to type of racquet, e.g., tennis racquet maker, racket racquet maker.

racquet stringer, badminton racquet stringer, squash racquet stringer, tennis racquet stringer; punches holes in frame of racquet with an awl, and threads gut through holes, beginning with the longitudinal strings; tightens these strings, beginning at centre and working towards sides; decides when correct tightness is reached by repeatedly vibrating strings, and noting their pitch or tone, taking care that tension is not unequal at different points; threads horizontal strings, and makes them tight as possible; watches frame of racquet while stringing, and, if it shows signs of warping, adjusts tension of gut accordingly; binds frame where it joins handle of racquet with tape, or silk thread, sometimes also varnishes frame and strings and polishes frame, but usually passes to tennis racquet polisher (498) e.g.

racquet string maker, as for gut drawer.

razor case maker; general term covering all makers of razor cases, including cabinet case maker (473), fancy leather worker (568), razor case maker (proper maché) (558) e.g.,

rocking horse maker; builds together wooden parts of child's rocking horse, and carves it into semblance of a horse; paints it in colours; glues or nails on mane, tail, etc.; cuts out and marks on leather harness fittings; sets

up horse on rockers.
saddle maker, saddle worker (cycles and motor cycles); uts and dresses leather for bicycle or motor bicycle saddles, blocks to shape; fits together, rivets, and adjusts parts of saddle.
salmon fly maker, or for artificial fly hooks

synonym, mantle; gas mantle

seasoner; in each second mantle seasoner; (ii) (upright mantle) burner-off, mantle burner-off, mantle burner-off, mantle burner-off, mantle burner-off girl; (iii) (suspend mantles, in arts of & to 25, by loose under gas jets or burning off machine; brings lighted jets in touch with mantles and allows flame to burn down mantle from top; in single gas jet or flexible tubing inside each mantle and slowly withdraws flame; allows mantles to cool and removes mantles, one by one, to adjacent seasoning machine and suspends by legs; (iv) (inverted mantle) gas jets and operates covers, causing gas flames to move upwards inside mantle; (v) (inverted mantle) places grids of burned-off mantles on supports in seasoning machine, operates cover which causes gas flames to move downwards inside mantles, and a tap which regulates pressure of gas and heat of flame; watches operation through green screen and stops process of shrinkage when shrinking ceases; when cool removes grids for dipping.

used maker (artificial flowers); makes artificial seeds, small berries, stamens, and flower umbels, by hand, from wood, paper, or papier mâché, and paints them by dipping or with a brush; takes small pieces of wood, prepared by pulper-up q.v., and splits them by twoen each pair of clamped rods, leaving short pieces sticking out stiffly on each side of rods; prepares paste, made of gum, farina, and color (e.g. potato flour), and stamens and color matter, unless this is done by manager, and pours it in a long shallow isetal trough; dips ends of threads, still clamped between rods, in trough of paste, and stands them on rack to dry; re-dips ends of threads many times; allows threads to dry; has paste has formed thereon resembling article, e.g. stamens, seed, berry, which is being imitated; finally varnishes berries, by dipping in

shades (artificial flowers, etc.), flower
shades, leaf shades; colours,
painter (artificial flowers); mixes
colours with spirit until desired shade
is obtained; paints a number of petals
or leaves with matt or basic tint,
using a brush; when this has dried,
applies second tint, and continues
process; also paints on veins of
leaves or markings on petals; some-
times makes veins with a plaque,
i.e. stencil; work sometimes done by
hand and sometimes by machine.

shuttlecock maker; a factory hand p.p. who cuts corks, and bores holes therein, stamps out leather covers by placing cutter on a sheet of leather upon a sliding table, and sliding both under an automatic power press; sews on leather covers, and sticks in feathers, securing them with glue; weighs and measures cork, leather, feathers, etc., during and after manufacture, to see that they comply with requirements of Badminton Association.

spectacle case maker; (ii) controls and feeds machine which automatically moulds spectacle cases from specially prepared paper sheets; (iii) cuts out, by hand, cardboard nose and bridge; it round to required shape and glues it; cuts out leather or leatherette

cover, by hand and glues it on to case; (fis) a case coverer and liner g.v. who works upon spectacle cases, spinner (musical instrument strings), see string coverer.

spout maker (miller's); a millwright (212) g.v. or a carpenter or mill-jolner (474) g.v. who makes and repairs wooden and/or metal spouts, used for conveying grain, flour, or meal, from one department to another; is responsible for seeing that spout valves, slides, etc., are in proper position and for uninterrupted flow of flour through spouts; cf. *millwright* (468)

sprayer (artificial flowers and leaves).
fills container of spraying apparatus
with basic colour; pulls trigger, set-
ting apparatus to medium, and sprays
leaves or petals therewith; fills con-
tainer with second — or — and sprays
edge or other part of leaves or petals
therewith; places leaf or petal in
position so that colour shall fall upon
it at correct angle, and in correct
quantity; work sometimes done by
shades p.v.: cf. sprayer (1889).

sticker, leaf sticker (artificial leaves);
wires (artificial flowers); lays wire
along back of leaf, and sticks leaf to
it with paste and a thin strip of fab-
ric; rolls protruding end of wire in
strip fabric to form stalk of leaf.

stiffener (artificial flowers); stiffen material, before it is cut, by dipping it in starchy liquid or by painting it with preparation of starch, mixed with water, e.g., starch, linseed oil, glycerine, etc., for stiffening medium, boiling them if necessary, and taking care to get stiffening agent to exactly right consistency and strength; hooks material to be stiffened on pins placed round edge of material, exposing back of material for stiffening; backing lining velvet, or similar material, pasted on kind of gauze, with starch, on back of material to strengthen it; in stiffening lawn, dip it in boiling water, wrings it out, and hangs it up to dry.

hooker (whips), whip stoker; (iv) (steel lined whips) cuts canvas on circular saw for whip handles of required length, straightens them by hand and puts into wood-turning machine which tapers them to the ends, then down middle and grooves them by machine, inserts steel wire into groove, and glues split parts together by hand, binding them temporarily with rubber bands; until set; removes cotton basting, planes smooth when set; (vi) (whalebone lined whips) beats square section strip of whalebone and pulls or bends it into round shape; squares it up and tapers it with a plane; waxes and binds with dex (too) by hand; splits long canes and shapes them with a four V-shaped strip by hand with a knife; waxes ends and places round whalebone contour in place with string; pieces stock in cording machine rod, assisted by a hor. covers stock with fine whip cord with seven lps; finishes; fixes cord with seven lps.

string *veer*, musical string
coverer; musical string - maker,
spinner (musical instrument string);
string maker (covered string); secure
end of metal, gut or silk string; secure
covered, also end of covering wire,
on hook of twisting machine; place
covering wire in a reel and secure
other end of string on another hook,
making string taut; switches on
power so that hooks revolve and
covering wire is spun spirally upon
gut or metal string; stops machine
when gut covering wire at end of
string.

string coverer (piano), covered string maker; piano string maker; covers steel piano wires, by machine, after even have been put on ends by eye maker (STB) p.v., with copper wire of various thicknesses graduated according to tensile strain required, from steel wire on to machine and feeds machine with correct wire.

tetrting maker (gut), gut string
maker: musical string maker;
general terms covering makers of
gut strings for musical instruments,
including gut drawer, gut spinner,
gut finisher.

string maker, musical: (i) see **string maker (wire, for musical instruments);** (ii) see **string maker (gut);** (iii) see **string coverer, musical.**
string maker, piano, see string

coverer (paizo).
 telefon maker (uina for musical in-

[illegible]

stuffer, doll; runs sawdust, or other stuffing, tightly, in body or limbs of dolls, with a rammer, i.e. a short wooden stick, and sews up body, limbs, etc., by hand, with needle and thread.

stuffer (soft toys); silk covers, sewn by machinist (419) g.v., with flock, vegetable down, or other packing, by hand, and presses it tight with a stuffing rod, moulding shape with hands to resemble animal, etc., to be represented.

*surgical gut maker, surgical gut worker, surgical string maker, or for gut dealer.

<p>batting gloves; puts layer of tow, or substitute, between front and lining of wicket-keeping gloves; or pads back of wicket-keeping or batting gloves; sews on fastenings.</p>	<p>batting gloves; puts layer of tow, or substitute, between front and lining of wicket-keeping gloves; or pads back of wicket-keeping or batting gloves; sews on fastenings.</p>
---	---

tackle tier (fishing tackle); ties bait and hooks, or hooks only, on to gut and lunds with silk; waxes silk in binding it by rubbing wax on silk; exercises great care in tying and arrangement of hooks and bait to regulate strength of pull; poorer quality tackle is prepared by furnished line maker s.e.

target maker; makes archery targets or toy targets, either of straw, by binding it and forming it into rolls in shape of target, or of cork or wood, by turning on lathe; paints bull's eye and coloured concentric rings on target.

template maker; (II) marker-off; makes patterns or templates by nailing laid together to required shape and size, for marking off plates in shipbuilding, etc.; (III) cuts wood, tin plate or other sheet metal to shape, according to drawings supplied, for use in cutting out copper, brass, etc., articles, or in marking off plates; cf. plaster (2225).

tennis ball coverer; (i) smears glue on rubber balls, and works it into rubber with hands; when rubber is worked to correct state, presses on felt cover; clips off overlapping or ragged scraps of felt; sometimes also does work of tennis ball coverer.

tennis ball sewer, tennis ball
stitcher; receives ball, from tennis ball
corer g.p., with seams already stuck
down, and stitches seams with needle
and thread, taking care not to pierce
rubber with needle; places ball in a
heated cup press, where two halves
of cup enclose ball, and moves lever
to operate press; applies steam jet
to ball to remove ridge left by seam.

plates, etc.), a skilled workman employed on routine tests of finished photographic plates, under direction of a specialized chemist; exposes plates to light of standard illuminating power and at a specified distance from plate; prepares developing and fixing solutions, and develops and fixes plate; examines developed and fixed plate to see that it conforms to requirements as regards appearance, evenness of tone, etc., and reports

tester (printers' rollers); places rollers when trimmed by trimmer (688) on small V-shaped tentles and examines them for correct alignment, smoothness of surface, etc.

+tharize maker, see gut drawer.

theoretical property maker; constructs animals, furniture, architectural fittings and other stage properties of wood or sometimes of paper miche; if working in wood, marks out shape of object with pencil; cuts out parts with hand saw or circular saw, and nails, screws or glues parts together; if working in paper mache, pours water and paper paste into a plaster of Paris mould, and drops small pieces of paper into paste, or uses paper mache powder to make required composition; turns out casting, so formed, when it is dry enough; sometimes also makes mould, cf. papier mache hand (558).

thene maker (whips); braids cotton, by machine, or to strips of calico to form separate thens; uses a machine to whip handles; cf. whip thong maker (348), and whip braider.

toe cornerer; covers handles of togs used by furriers, etc., by winding them round by hand with asbestos or other heat insulating material.

toy maker, see general term for any person engaged in making soft dolls, animals, etc., including designer, cutter (403), machinist (419), stuffer, finisher, lyner, etc.; often also makes tea caddies, hot water bottle covers, etc.

whip braider; places bobbins, filled alternately with cotton and gut, in braiding machine; suspends stock over centre of machine and attaches weight to end of stock to pull down slowly as braiding proceeds; fixes ends of cotton and gut to whip stock; pulls lever to set machine in motion; if cotton or gut breaks under strain, repairs it by hand.

whip finisher; fixes brass or white metal mounts on whip handles by means of heated powdered resin, and nails them in position with small tacks; draws on stitched leather sheath, and fixes it on handle by glueing; cleans up and polishes whip ready for packing.

whip maker; general term for workers engaged in making and assembling whips, including whip stuffer, whip braider, whip finisher, paper-on (whips) (689), whip handle stitcher (348), and whip handle coverer (355) q.v.

wire (artificial flowers); (i) see stickler (artificial leaves); (ii) see artificial flower maker (paper flower making).

twoed puzzle cutter; figures puzzle maker; cuts figure puzzles with jig or fret saw; sometimes stencils outline, or draws outline freehand in pencil, on back of puzzle, to guide him in cutting outline, but often cuts puzzle without first marking it in any way.

work basket fitter; affixes metal catches and fastenings, by screwing, clamping, or luting, on interior and exterior of a hat's work basket.

work box fitter, as for work basket fitter.

wreath maker (artificial flowers), artificial wreath maker; (i) an artificial flower maker q.v. who makes up wreaths or sprays of artificial flowers; (ii) builds up, usually on wire foundation prepared by wire frame maker (278), funeral wreaths of artificial flowers, leaves, grasses, etc.

689... OTHER WORKERS.

assembler (trouser presses); screws together wooden lengths and metal cross pieces of trouser press; screws on press-screws, and trouser stitching apparatus; puts two or more sheets of cardboard between bottom and top, and screws up.

baft painter; paints with bright colour, by hand, metal imitations of baft made by baft maker (688) q.v.

bobbins tip fixer (textile machinery); fixes metal tips or shields on wooden or paper miche bobbins, by hand or with a power or hand press, to prevent friction on spindle.

bust fitter; receives bust from bust maker (558) q.v., and wooden plasters, cut to shape, from a saw mill; chooses plasters of suitable age and size and nicks them into bust.

button borer, see button driller.

button bottomer; takes off rough parts, levels back and front of button blank, and reduces it to uniform thickness; fits blank into chuck of a small lathe; starts lathe by hand lever, and presses a cutting edge against blank by hand; removes turned blank and repeats operations.

button burrisher, see button polisher.

button cleaner; button dipper; cleans vegetable, ivory and mother of pearl button blanks, by dipping them in vats of chemicals and wiping them dry, in preparation for polishing.

button cleaner; finishes backs of metal buttons, made in two parts, to front, and classes them up by hand or in a press machine.

button cutter; cuts button moulds or blanks from various materials by hand or by means of automatic cutting machine; for metal or celluloid buttons, places sheets of metal or celluloid under an automatic or hand-worked stamping machine fitted with dies; operates machine by hand or by means of hand lever; removes cut blanks by hand; for composition, vegetable, ivory or pearl buttons, cuts button blanks by means of mechanically-driven tubular saw, operated by means of hand lever; holds sheet composition or other material against revolving saw edge, and cuts each blank separately.

+button dipper, see button cleaner.

button driller; button lover, button holder, button piercer; makes holes in buttons by inserting button in a chuck under the automatic drilling machine, operated by means of hand lever; removes drilled button and places fresh button in chuck; occasionally drills button with hand drill, the blank being fixed in a chuck.

button faker-out, button finisher, see button polisher.

button borer (button making), see button driller.

button maker; general term for workers who assemble previously prepared parts of buttons.

button maker, linen; operates machine for making linen buttons; feeds machine with linen discs and metal rings and depresses levers governing mechanism joining linen and metal.

button piercer, see button driller.

button polisher; button burrisher, button faker-out, button finisher; holds button, either in hand or in hole chuck, against revolving mop; feeds mop with wet or dry polishing composition.

button raiser, as for button stamper.

button shaker; fixes shank, i.e. part of button sewn to fabric, on button, by placing shank in a chuck in top half of press, and button rest in bottom half of press, and operating lever by hand, causing shank to be pressed into back of button; removes completed button.

button sorter; examines buttons and rejects faulty work; sorts buttons according to size and quality.

button stamper; stamps design on button mould or blank by hand or power press; places blank in bottom half of press; fits die in top half of hand lever, or by turning a hand screw; removes stamped button from press.

carrier-off (photographic plates, etc.), see putter-up.

cleaner (photographic plates, etc.), glass cleaner; glass washer; places glass plates, where they are coated with emulsion, on travelling band of machine, which carries them past brushes revolving in water or in

cleaning solution, e.g. soda and water; switches machine on or off as required.

collector, glass collector (photographic plates, etc.); collects plates from coating machine, places them in racks, and carries racks and plates to drying room; removes racks of dried plates for packing.

dipper, mantle dipper, gas mantle dipper, incandescent mantle dipper; dips soot-soaked mantles in a colloidal solution and places in colloidal dipping oven to dry, so that mantles assume a flexible protective coating.

doll dresser; receives body and limbs from doll stuffer (688) q.v. and doll's clothes from machinist (419) q.v.; sews limbs to body of doll by hand, with needle and thread, and attaches doll's clothes by fitting them, and sewing them in position.

factory band (diamond tools); assists diamond tool maker (688) q.v., files, solders, screws, and does other less skilled work in connection with diamond tool making.

feeder; putter-up (photographic plates); puts glass plates on travelling-band of plate coating machine.

film cutter (photographic films), film splitter; (i) cuts rolls of celluloid film at back of cutting machine, switches machine on or off as required, and regulates speed of machine; regulates amount of film thrown forward to be cut by adjusting film support; (ii) cuts film to required dimensions in small hand guillotine.

film spooler (photographic films); places spool, which is to receive film, on spindle of machine; places film, and paper covering it, accurately at point indicated by mark on machine; slips end of covering paper into slit in spool; moves switch or lever to set in motion machine, which automatically winds film and covering paper round spool.

fine finisher (ebonize pipes, not day); holds mouthpiece against revolving felt-covered disc covering roll; is often done by polisher (wood pipe) (690).

freighter maker; (i) makes up bundles of chips, sticks, shavings, etc., and wires or ties them together; sometimes also dips them in combustible materials; (ii) feeds runners of machine which makes sawdust with groove and compresses it into cakes; stacks cakes on racks to dry; when cakes are dried, cuts them on circular saw into prescribed sizes.

fy paper maker; (i) passes papers, which are ready cut to shape and size required, through a slit in gumming apparatus, where they are automatically gummed on both sides, and pulls them through on other side; (ii) torn loosely applied to cover all persons employed in fy paper factory, including those engaged in folding up or rolling paper, boxing or packing it, stamping out tin plates to be used in making containers, and in fitting together parts of tin containers round a roll of fy paper and passing and off roll through a slit in one of sides.

glass examiner (photographic plates); examines glass plates, for defects, after they have been washed and before they are coated with emulsion.

glass washer (photographic plates), see cleaner.

roffer (artificial flowers); curls edge and presses petals into shape with hand roller, a gas or electric heated iron of special shape.

impregnator (incandescent mantles); soaks mantles in solution and passes through rollers to abstract surplus fluid.

ink pad maker, ink pad worker; stamping pad maker; covers small slab of wood with linen; stuffs with cotton wool or similar material, between wood and linen; secures the whole, and soaks pad in ink; fixes pad in tin box.

ironer (artificial flowers); (1) polishes artificial leaves, grasses, petals, etc., with hot iron; (2) irons natural ferns after they have been dyed by shadder (688) g.v.

mangle maker, gas mangle maker, incandescent mangle maker; general terms for any worker engaged in any process of gas mangle making, e.g. burner-off (688), seamer (688), dipper, impregator, sewer (419) g.v.

mould maker (artificial flowers); feeds mould or jig with cotton wool, which is caught up by a spindle revolving horizontally in mould, breaks off wool when enough has been caught up, and applies paste with a brush to wool, revolves on spindle, thus shaping and compressing it to form artificial fruit, berries, etc.; pulls a lever which releases moulded wool, and withdraws mould and wool from revolving spindle; takes wool from mould.

mounter, puzzle mounter; pastes puzzle picture on face of puzzle, with brush and paste, and packs puzzle; often does other unskilled work in factory during slack periods.

oller (printer's rollers), dips mop in oil and rubs up and down inside surfaces of cylinders of mould gun, *see* centremen (688), to ensure that composition will not adhere to mould on cooling; assists centremen in charging mould guns, carrying spindles, etc.

paper-on (whips); passes paper on prepared cane handle of whip by hand; *cf.* whip stocker (688).

preserver (artificial flowers); covers natural grasses, flowers, etc., with preservative varnish or paint by dipping, spraying, etc.

printer-on (photographic plates), *see* feeder.

putter-up (photographic plates); carries-off; carries racks of coated plates from coating machines to drying room.

racker (photographic plates); takes coated plates out of coating machine and places them in racks to dry.

reeler (photographic films), as for reeler (photographic paper), except that machine is smaller and rolls shorter than those used in paper reeling.

reeler (photographic paper); receives paper as it comes from drying room; guides end of roll of paper through feeding machine; lays paper round a beam or spindle, and clamps this in position in machine; switches on power to set machine in motion; watches reeling carefully, and regulates speed of running of rollers to adjust tension on paper as it is being rolled.

sock cutler, sock maker; cuts out socks of cork, felt, leather, etc., for insertion in boots and shoes, by machine press and cutting, etc., by hand or power shaver; sometimes specifically designated, e.g. cork sock maker.

sorter (photographic plates, etc.); sorts out different kinds and thicknesses of glass, etc., on arrival at factory, before they receive treatment of any kind.

sprayer (artificial flowers and leaves); spreads a length of fabric on bench; fills container of spraying apparatus with basic colour, which is made mixed; pulls trigger, setting apparatus in motion, and sprays fabric with basic colour; fills container with second colour and sprays fabric there-with diagonally at intervals, in narrow stripes, so that shading effect is produced in petals, etc., when cut from fabric; *cf.* sprayer (688).

stamping pad maker, *see* ink pad maker.

stripper (printer's rollers); strips worn composition from metal spindles of printer's rollers with small hand knife; wipes spindles

clean, ready for painter (printer's rollers) (692) and centremen (688) g.v.

syringe cottoner; hands cotton, by hand, round plungers of syringes, usually also boxes and wraps up syringes.

tag maker (paper fasteners); performs one or more of following operations: cuts thin sheet brass into strips, by turning handle of small hand cutting machine; cuts strips on same machine into pieces suitable for stamping; stamps pieces to channel-shaped section in a stamping machine worked by foot treadle, *cf.* stamper (284), cuts cord to short lengths with scissors or hand knife; inserts and of cord into channel-shaped sections of brass strip and closes sections by pressing foot treadle of stamp which bends over and fastens such sections; sometimes also makes boot laces in same way, *cf.* boot lace tapper (426).

tipper (penholders); places steel tips or holders on pen sticks.

trimmer (printer's rollers); trims rough ends of composition rollers after covering by centremen (688) g.v. and prior to examination by tester (688) g.v.

vulnar, vulnar and marker (artificial leaves); lights gas warming bed of sheets a leaf, from tray of out leaf-shaped, and places it in brass reining mould, places mould in bed of machine; turns wheel which causes press to descend upon mould and so vein leaf; reverses wheel to raise press; takes out veined leaf, puts in another leaf, and repeats process.

waxer (artificial flowers); stiffens, by hand, finished artificial flowers by dipping them in warm wax; sometimes also dips them in chemicals to make them waterproof.

wool charger (surgical appliances); packs wool into padded instrument cases, or into padded parts of surgical appliances, and sews up casing, as required, to make complete.

ORDER XXI.—PERSONS EMPLOYED ON GAS, WATER AND ELECTRICITY UNDERTAKINGS (not elsewhere enumerated).

690.—MANAGERS.

assistant engineer (waterworks); in provinces performs duties described under district engineer (waterworks) g.v.

chief assistant engineer; sees that estimates for new and repair work are accurately compiled, that plans and specifications are prepared, that stations and sub-stations are properly and adequately equipped, etc.; from time to time goes to inspect new or repair work in hand; supervises work of resident engineers at sub-stations; works under instructions from and in close and constant collaboration with chief engineer g.v.; assists chief engineer generally, and takes his place when he is absent.

chief engineer; engineer, head engineer, water engineer (waterworks), superintending engineer, superintendent; is responsible to board of directors (or to committee of local authority) for technical side of electricity or waterworks undertaking, including development work and equipment of stations; causes plans, estimates and specifications for new and repair work to be prepared; gives technical advice to resident engineers, mains engineer g.v. and other subordinated officials; in undertakings where chief assistant engineer g.v. is not employed, supervises work of resident engineers,

mains engineer, etc.; visits new or repair work in progress, and sub-stations; in small undertakings often also acts as general manager g.v. *conveyancer* (electricity supply), *see* consumer's engineer.

consumer's engineer, consumer's installation engineer (electricity supply); consumer, installation engineer, service engineer; a technical engineer who interviews prospective consumers and points out advantages of electric light or power and advises them as to installation, etc.; takes measurements and gives estimate of cost; when such work has been carried out, examines work after completion to ensure that it meets customers' requirements; investigates complaints; collaborates with sales department and sometimes in small undertakings, takes charge of that department; *cf.* sales engineer.

distribution engineer (gas works); in charge of distribution department of gas company; is responsible for preparation of plans for laying of mains, opening up of new districts, maintenance of meters, pipes, mains, burners, cookers, street lamps, etc.

district engineer (waterworks); (London) in charge of water distribution in a district; is responsible to chief engineer g.v. for water mains and plant in his district, also (except at stations where a resident engineer g.v. is in charge) for filtration and pumping; usually a qualified civil engineer; outside London, corresponding officer is more usually called assistant engineer g.v.

engineer, superintending engineer (waterworks); *see* chief engineer; (in waterworks) also visits pumping stations, reservoirs and filter beds from time to time.

gas engineer (gasworks); a technical engineer responsible for efficient working of gasworks and for upkeep of plant therein; approves plans and estimates for new and repair work; orders repairs to be executed where necessary; sometimes responsible for payment of wages to manual workers; in small works often combines duties with those of general manager g.v.

head engineer (waterworks), *see* chief engineer.

installation engineer (electricity supply), *see* consumer's engineer.

mains engineer, mains superintendent (electricity supply); a technical engineer responsible to chief engineer g.v. or chief assistant engineer g.v. for the whole network of mains from power station to consumers' premises; issues orders for minor repairs on his own responsibility, or, when expenditure is likely to be considerable, submits estimates to chief or chief assistant engineer; superintends execution of all repairs; also supervises new work according to plans and specifications supplied by chief engineer.

mains surveyor (electricity supply); surveys mains and is responsible for records and charts of entire distributing system between power station and consumers; prepares plans for extension of mains.

manager, general manager; has general administrative (and sometimes also technical) control of the whole undertaking for supply of gas, water, or electricity, subject to approval of board of directors, or of committee of local authority in matters of policy, or where a large expenditure is involved; submits reports to directors or committee regarding new works or extensions or improvement of plant, increase or reduction of staff, staff promotions, alterations in scale of charges; in smaller undertakings, where term is chiefly used, is often also chief engineer g.v. and sometimes also secretary (590) g.v.

meter superintendent, meter engineer (electricity supply); responsible for efficient organisation and working of meter department; supervises allocation of work and issues orders to meter fitters (309) g.v.; ensures that work is promptly and efficiently performed; acts in co-operation with sales department and with consumer's engineer g.v.

resident engineer (electricity supply); station engineer, station superintendent, works engineer, works superintendent; a technical engineer who either resides at a station or is temporarily available when required, in order that uninterrupted supply of electricity may be maintained at all times; rectifies small faults in running of generators and plant, or instructs repair gang to effect repairs; meanwhile orders, if necessary, isolation of generator and starting of reserve to maintain supply; where considerable expense is involved, reports to chief or chief assistant engineer g.v. before undertaking extensive repairs.

resident engineer (waterworks); resides at waterworks and is in charge of all staff employed thereat; responsible to chief engineer g.v. or to assistant or chief engineer g.v. for general maintenance of his station, for pumping, filtration and storage of water and for minor repairs to plant, as larger stations, where pumping and other machinery is installed, are usually a technical engineer; at smaller stations, particularly those where there are only filter beds, has position approximately to that of foreman (602) g.v.

resident engineer, assistant (electricity supply); takes place of resident engineer g.v. during night shift, or when resident engineer is absent; duties are generally similar to those of resident engineer g.v. except that extensive repairs would not be undertaken without sanction of resident engineer.

sales engineer, sales superintendent (electricity supply); a technical engineer in charge of sales department; may also be in charge of a demonstration station, which may or may not carry out contracts for installation, etc.; interviews customers and gives advice as to use of electrical appliances, and recommends type most suitable for customers' requirements; may also be consumer's engineer g.v.

service engineer (electricity supply); see consumer's engineer.

station engineer, station superintendent (electricity supply); see resident engineer (electricity supply).

station engineer, assistant, or for resident engineer, assistant (electricity supply);

superintendent (waterworks), see chief engineer.

water engineer, see chief engineer, works engineer, works superintendent, see resident engineer (electricity supply).

691.—CHARGE AND SHIFT ENGINEERS.

boiler house engineer, boiler house superintendent (electricity supply); in charge of steam raising plant; watches pressure gauges to ensure that correct steam pressure is maintained; supervises stokers and sees that fires are regularly fed and that ashes are properly disposed of; supervises minor repairs under general direction of resident engineer (600) g.v. or assistant resident engineer (600) g.v.; usually works during day shift only, corresponding duties during night shift being taken by boiler house shift engineer g.v. **boiler house shift engineer (electricity supply);** in charge of boiler house during shift; sees that plant is running correctly and that steam pressure is maintained, duties

generally similar to those of boiler-house engineer g.v., except that he would not without authority undertake, or order to be undertaken, any but slight repairs.

charge engineer, see shift engineer.

charge hand (electricity supply); a turbine or engine driver who is directly responsible to charge engineer for operation of turbine plant, and controls and supervises all other drivers; an occasional grade only.

distributing station engineer (electricity supply); is responsible for mains in streets, and for their regular inspection, testing, maintenance and repair.

engineer, engineer-in-charge (electricity supply); usually indicates shift engineer g.v.

shift engineer (electricity supply); charge engineer, engineer-in-charge; has charge of engines and dynamo-electric machinery in power station during shift, and is responsible to resident engineer or manager (600) g.v. for efficient running of plant during his shift; superintends repairs or cleaning of machines temporarily out of gear; is in charge of switchboard attendants (604), cleaners (600), stokers (601), etc. g.v.; in larger undertakings, work is shared by boiler house shift engineer g.v.

street lighting engineer (electricity supply); is responsible to mains engineer (600) g.v. for maintenance of lamps, for change of current or of circuits, etc., and for street lighting generally; visits districts from time to time to ensure that lighting arrangements are satisfactory; superintends work of public lighting foreman (602) g.v.

sub-station engineer (electricity supply); maintains uninterrupted supply of electricity from sub-station; isolates faulty generators and switches in spare machine; carries out repairs necessary; keeps log giving output of motors and demands upon them; reports faults to resident engineer (600) or chief engineer (600) g.v. duties somewhat similar to those of resident engineer (600).

turbo house superintendent; a shift engineer g.v. in turbo house, who watches machinery and ensures that motors are carrying their proper load.

work lighting engineer (electricity supply); is responsible for efficient running of electricity generating plant for supplying lighting for large factory or works; superintends work of men firing boilers, tending steam turbines, dynamos, transformers, boiler feed pumps, switchboards and similar machinery or apparatus.

692.—INSPECTORS AND FOREMEN.

boiler house foreman (electricity supply); supervises running and repair staff employed on steam raising plant; sees that work of stokers (601) g.v. is properly performed and that correct steam pressure is maintained; is responsible to boiler house engineer (601) or to resident engineer (600) g.v.; is usually employed only by larger undertakings.

box inspector, box cleaner (electricity supply); crawler, wander, draft attendant; inspects, cleans, and reports defects in distributing cable-beds and manholes in streets and roadways; ladies out any water that has entered cable-box or man-hole; reports presence of gas escaping from adjacent gas mains; cleans joints; sometimes also paints connections red, blue or black (indicating positive, negative or neutral); scrapes dirt from ledge of cable-box or man-hole and greases ledge to make joint round lid watertight; reports subsidence of pavement near cable-box or man-hole, or defective gables. **box inspector, caulker, see box inspector.**

coal foreman, coal inspector (gas works); supervises unloading of trucks or barges of coal by labourers, and filling of coal stores, keeps record of coal received and stored; judges condition of interior of coal stack from time to time by touching an iron rod thrust into stack; orders stack to be dismantled if red is hot to shrieve risk of fire.

coke inspector (gas works); investigates complaints from consumers as to quantity and quality of coke supplied.

distributing station inspector (electricity supply); sub-station inspector; a higher grade sub-station attendant in charge of one sub-station attendant (604) g.v. at a sub-station; usually a promoted fitter of long service; sometimes also carries out experiments on switchboards under instructions from resident or chief engineer (600) g.v.

district foreman; (i) (gas) controls all workmen dealing with supply of gas from mains to the consumers' premises; is responsible for completion of work in accordance with orders received from office, visits work from time to time to ensure that it is being done satisfactorily; decides if overtime is required and certifies overtime worked, if any; supervises and controls work of pressure men (600) g.v.; in case of leakage conducts tests with special indicator inserted into holes made in ground; **(ii)** (water) responsible to district superintendent or assistant engineer (600) g.v. for maintenance and regulation of supply of water in a district and acts generally as assistant to district superintendent; supervises men employed on pumps and filtration beds and, in particular, superintendent turncocks, turncocks and assistant turncocks (608) g.v.; **(iii)** (electricity) supervises workmen employed in a district; usually in charge of navvies engaged on excavating work, directs their work and is responsible that excavations are properly protected by barriers and lights as a safeguard against accidents.

district inspector, district superintendent (gas works); ORDINANCE prospectus consumers for orders; measures up and gives estimate of cost of installation of new fittings; reports particulars of orders obtained to office, whence are issued necessary orders to district foreman g.v.; visits consumer and examines new work to ensure that it gives satisfaction; is usually a technical man.

district superintendent, superintendent of district (waterworks); supervises work of district foreman and reports to district engineer (600) g.v. on distribution and supply of water in his area; visits stations from time to time for general inspection purposes.

engine room foreman (electricity supply); in charge of engine room staff; sees that they attend regularly and punctually and that they perform their duties properly, arranges turns of duty; superintends any minor repairs or tests of bow plant; usually responsible to resident engineer (600) g.v.; sometimes also performs duties of boiler-house foreman g.v.

filter bed foreman, filter ganger (waterworks); in charge of filter bed cleaners (609) g.v. and of sand washers (606) g.v. engaged in cleaning out filter beds and in washing sand removed therefrom; sees that workers attend punctually and regularly and work diligently, and that work is properly done; arranges duties; sanctions overtime, if necessary; responsible to resident engineer (600) g.v. or to district foreman g.v.

first coal store man; (London term) see fittings inspector.

fittings inspector, stove fittings inspector; (London term); first coal store man (London), gas fitter inspector; inspects gas fittings and appliances

supplied by gas companies, on receipt of complaint from consumer, and reports as to removal or repair. usually arranges stove or other fitting and effects minor repairs on the spot, is usually a district fitter (235) g.v. fittings fitter, inspector of fittings (waterworks); inspects cisterns, taps, and other fittings on consumer's premises to see that they are in good working order and in some districts to see that they are of standard or approved type or quality; if fittings are faulty either does minor repairs or serves notice on consumer to have fittings repaired or to have proper fittings installed; in some districts is also a waste inspector g.v.

flushing inspector (waterworks); supervises on behalf of water company, flushing operations undertaken by corporation workers, fixes meter to hydrant, takes readings and makes record of quantity of water used; often deals by turncock (508) g.v.

gasometer examiner, gas holder examiner; inspects gas holders, sees to greasing of rollers, guide wheels, etc., adjusts gas necessary and reports on their condition.

gas stove inspector, see fittings inspector.

griller inspector (gas works); a fittings inspector g.v. who specialises in dealing with grilling appliances.

inspector (electricity supply, waterworks, gas works); general term for any person employed as inspector of works, mains, plants, fittings, etc., or of any section or district; "inspection" may imply varying degrees of skill, technical knowledge or responsibility, may involve anything from superficial examination by sight only to application of various tests and may be of a routine nature or designed to detect some fault or irregularity; may or may not have one or more assistants or subordinates; usually further designated according to article inspected or nature of inspection, e.g. inspector of gas works, fittings inspector, waste inspector g.v.

inspector of lampfitters, see lighting superintendent.

inspector of new plumbing work (waterworks); inspects new plumbing work during construction and on completion; duties as for inspector of fittings g.v.

installation inspector, installation superintendent (electricity supply); *erection inspector*; arranges position of current supplies; supervises fixing of hired meters; inspects and tests new or old installations on consumer's premises for supply of light or power, and makes final connection; attends to enquiries and complaints as to meter readings, pressure, and to location of "earth" fault; and takes particulars in connection with change of occupancy; cf. consumer's installation engineer (500).

lamp inspector (gas works); inspects street gas lamps for damages to glass, mantles, by-passes, etc., and reports defects; duties sometimes performed by lampfitter (560) g.v.

lighting superintendent, street lighting inspector (gas works); inspector of lampfitters; controls street lamp lighting staff; is responsible for maintenance of lamps; and arranges for lighting and extinguishing lamps at times fixed by local authority, while different parts of area to satisfy himself lighting arrangements (including self-lighting automatic) are adequate and satisfactory and in accordance with requirements of local authority; cf. public lighting foreman (electricity supply).

*main pipe foreman, main layer foreman (gas works); supervises and directs work of main layers (575) g.v.; sees that mains are laid in accordance with plans; decides whether overtime is necessary and issues orders accordingly; prepares notices for dispatch to local authority indicating position

and area of pavement or roadway disturbed in laying of gas mains; orders materials and implements from store; mains foreman (electricity supply); foreman of street works, mains inspector, superintends laying, painting, and maintenance of all kinds of services from main or station to consumer's premises; directs and supervises work of main layers, examiners, etc.; responsible to mains engineer (580) g.v. for work according to plan.

mains inspector (electricity supply); (i) see mains foreman; (ii) see road inspector.

manhole girth attendant, see box inspector.

manila maintenance foreman (gas works); is in charge of manila maintenance fitters (596) g.v., and arranges areas to be assigned to each.

meter inspector (electricity supply); inspects meters at consumer's premises with standard meter or lamp to ensure that meter is registering correctly; affixes standard meter or lamp to service meter and counts revolutions made by revolving disc in a given time and checks against known number of revolutions per minute for a given volume; reports to meter department, meter superintendent (580) g.v. or consumer's engineer (500) g.v. cases in which meter is defective or improperly fixed.

meter inspector (waterworks); inspects meters of street and private mains; attends to automatic volume-registering apparatus, renews ink supply and chart paper on drum of apparatus.

motor cleaner, motor inspector (electricity supply); examines motors and starting apparatus let out on hire to motorists or other power users; inspects motors in operation to see that they are running smoothly; renews brushes if necessary and cleans commutators; carries out minor repairs, reports faulty motors to consumer's engineer (500) g.v.

night inspector (waterworks); tests water mains; inspects water pipes for leakage by night (when listening tests are easier, owing to stillness) using a water meter or a stethoscope; duties similar to those of waste inspector g.v. except that no notice to house visitations made at all.

oil gas foreman, oil gas ganger (gas works); superintends and directs the work of a shift of oil gas makers (568) g.v.; inspects plant; maintains correct calorific quality of gas by reading calorimeters and instructing shiftmen to adjust plant accordingly; supervises starting up or closing down of plant or part of plant; keeps time sheets.

overhead line inspector, overhead power inspector (electricity supply); patrols overhead high-tension cables at regular intervals examining insulators, looking for sag or broken or damaged wires, particularly on lines along which there is any complaint, or, after a storm, etc.; does all minor repairs and reports all other defects; also instructs gang as to suitable repair.

paving and extension inspector (waterworks); superintends re-laying of trenches which have been opened for laying of new mains or extensions, and replacement or renewal of paving; in London duties performed by district foreman g.v.

public lighting foreman (electricity supply); responsible to street lighting engineer (581) g.v. for installation and maintenance of street lighting; supervises work of public lighting attendants (508) g.v.; sees that subordinates attend regularly and punctually and do work efficiently; arranges duties and provides substitute for one who is absent.

pumping station foreman, foreman of pumping station (waterworks); in charge of pumping station; is responsible for maintenance of pumping plant, and supervises work of engine

drivers (580), stokers (551), engine cleaners (580), coal wheelers (580), etc. g.v. employed on plant keeps engine pumping plant ready for any emergency.

purifier foreman (gas works); decides when iron oxide in purifier box needs re-vivifying; orders purifier man (599) g.v. to empty box and to spread oxide with shovels, to expose it to air; which chemist considers that re-vivification is complete, superintends purifier man in re-filling purifier box with oxide thus re-vivified, directs purifier man generally, and sees to their punctual and regular attendance; watches pressure gauges, and regulates valve to alter station of burner; also directs and supervises work of scrubber man (598) g.v.

reservoir inspector, inspector of reservoirs (waterworks); water inspector; inspects reservoirs to see that they are clean and in good repair, and reports defects.

retort house foreman, retort house ganger (gas works); stove foreman; in charge of a shift of gas makers (583) g.v. in retort house, directs charging and drawing of retorts, and cleaning of assenon pipes, etc.; responsible to engineer in charge for quality of gas produced and for condition of retorts, furnaces, flues, assenon pipes and hydraulic mains, according to report of gas tester (595) g.v. on temperature and gas analysis, regulates admission of secondary air to retort bench by opening of sliding small doors, times period of carbonising.

river foreman (waterworks); in charge of workmen engaged on supply-river, patrols banks over a given stretch; reports any damage to river banks, sluices, etc., or presence of run of timber or any other objects, e.g. animal carcasses, likely to cause pollution; also notes height of water measured on depth gauges; consults with corresponding officers of conservancy boards.

road inspector (electricity supply); main inspector; inspects openings in ground, made by another authority for construction or repair of gas or water mains, etc., to see that electric mains are not damaged; reports to mains engineer (500) g.v.; also reports any faulty box covers or grates that he may notice.

sanitary inspector (waterworks); inspects sources of water supply to prevent pollution; an infrequent grade; duties similar to those of river foreman g.v.

service inspector, see installation inspector (electricity supply).

stages foreman (gas works), see retort house foreman.

street works, foreman of (electricity supply), see mains foreman.

sub-station inspector (electricity supply), see distributing station inspector.

superintendent of shipping supplies (Liverpool); superintendent, in co-operation with port authority, arranges for supply of water to be carried on ships; in London, duties performed by district superintendent g.v.

superintendent of turncocks (waterworks); instructs turncocks and assistant turncocks (595) g.v. to increase or reduce supply of water when new premises have been connected or when a works has been closed, etc.; gives directions to turncocks to cut off water supply when a serious leakage is reported; regulates water pressure when water is wanted at high pressure by fire brigade; directs turncocks generally, arranging turns of duty, replacing absentees, etc.; in London, duties normally done by district foreman g.v.

waste foreman (waterworks); in control of a number of waste inspectors g.v.; sees that they attend regularly and punctually and perform their duties efficiently; responsible to waste superintendent g.v.

waste inspector, waste meter inspector, waste water inspector (waterworks); is responsible, under direction of waste foreman, etc., for detection of waste by consumers, of leakages in mains, and waste of water generally, by various devices; sometimes allows because waste meter to mains at installation at street and detects waste by abnormal readings; if leakage is suspected in area tested, makes house to house visitation and examines by sight only taps, fittings and cisterns on consumer's premises; if any leakage is found, either executes minor repairs (e.g., repairs washer on tap) or prepares and serves on consumer a notice to have leakage prevented within specified time, revokes consumer's premises in due course to see if repairs have been executed; sometimes tests water pipes in course of suspected leakage by placing stethoscope on pipe and listening to flow of water therein; cf. night inspector.

waste superintendent, superintendent of waste water inspectors (waterworks); responsible for efficient working of waste department; issues orders to waste foreman, g. and through them to waste inspectors; allocates duties; usually a promoted foreman and not a technical waterworks engineer.

water gas foreman, water gas ganger, in charge of a gang or shift of water gas makers (1963) g.w., and is responsible for punctual attendance and efficient working; directs and supervises operations; usually a promoted water gas maker, who often himself works with gang; water inspector (waterworks), see reservoir inspector.

693.—GAS STOKERS.

carboniser, carbonising man, see charger.

charger, retort charger; carboniser, carbonising man; (i) general terms for men charging retorts and furnaces either by hand or machine; (ii) in small works where charging machines are not installed, is a front man g.w. or a scoop driver g.w. who fills retorts with small coal by hand with a scoop.

charging machine driver; retort charge driver; a retort charger g.w. who periodically charges retorts with crushed coal by moving levers of a retort charging machine.

discharger (gas works), see retort drawer.

freeman (generators); attends to fires of generators that heat retorts.

front man; a retort charger g.w. who, with assistance of one other front man lifts scoop of coal up to mouth of retort with an iron bar (called a bridle); see also scoop driver; this operation is now being superseded, except in small works, by mechanical means of retort charging.

gas house man, gas maker (1963) g.w., gas maker; general term for any man working in gas house.

gas maker (coal gas), gas maker; (i) in very small works does whole operation of gas making, which includes operations of charging and discharging retorts, supervising ascension pipes regulating supply of "secondary" air to enable producer gas to burn, opening and shutting retort doors, and possibly coke quenching, etc.; (ii) in gas house man.

machine driver (gas works), machine man; in charge of any type of machine used for charging and/or discharging retorts at gas works; sets machinery in motion by moving a lever; usually also oils and cleans machinery as required.

retort charge driver, see charging machine driver.

retort drawer (gas works); discharger; forces coke out of retorts with mechanical ram (compressed air, hydraulic, or electrical); controls machine by levers; usually done by machine driver g.w. employed alternately to charging and in drawing.

retort man (gas works); general term for any man working in retort house doing work of retort charger or discharger, angler (1939), lad cleaner (1909), opener and closer (1909), hydraulic main attendant (1909), etc.

scoop driver; a retort charger g.w. who co-operates with "front men" g.w. in lifting scoop of coal up to mouth of retort; balances and guides scoop when lifted, pushes it into retort, empties it by turning it over, and removes it for fresh charge; operation now being superseded, except in small works, by mechanical means of retort charging.

stoker, gas stoker; one of a gang of men stationed at back of retorts and working in conjunction with machine driver g.w.; opens retort doors and doors of furnace at back of retorts and pushes hopper into position so that, as coke emerges from retort, it falls into hopper and thence into furnace; pokes coke with iron rod to quieten its passage into furnace; shuts retort doors when charging and drawing process is complete; shuts furnace door when furnace is stoked, allowing rest of coke to fall into conveyor or into wheel barrows.

stopper man (gas works); a gas stoker g.w. working in retort house where projector chargers are used, who holds a stopper against open end of retort, furthest from machine, to prevent coal projected by machine from falling out at back of retort.

topman (vertical retorts); (i) continuous process, controls by hand lower rate of flow of crushed coal from hoppers above vertical retorts; (ii) discontinuous process, opens door at top of vertical retort, fills retort with coal from hopper by moving a lever, and closes door.

698.—OTHER SKILLED WORKERS.

ammoniacal liquor extractor; draws off, by opening valves, ammoniacal liquor from time to time from scrubbing plant; runs in fresh water; may also draw off liquor from condenser; usually done by scrubber man g.w.

tare lamp assistant, arc lamp cleaner, arc lamp trimmer; periodically removes carbons, overhauls, cleans, trims, and renews globes of arc lamps; patrols circuits at switching on time and attends to faulty lamps, including other than arc lamps.

thruer fitter (gas works); lighting fitter; fits assemblies parts and burners for lighting purposes in houses, street lamps, etc.; usually done by gas fitter (1935) g.w.

bettyer (gas works); slang term for workman doing same work as another on opposite shift.

condenser attendant (gas works); watches pressure gauges on gas condenser plant; opens and shuts valves to ensure proper functioning.

filter bed attendant, filter bed valuer (waterworks); watches level of water in filter bed and opens and closes valves of valves, as required, to regulate supply of water to filter bed; if water is low, reports to filter bed foreman (1902) g.w. in case bed should need cleaning; if water is high, operates valves in consultation with pumping engineer (1909) g.w.; reports faulty valves to foreman or fitter (1902) g.w. on maintenance staff.

gas maker (oil gas and water gas), see chapman (oil gas); of water gas maker (1903).

gas tester (gas works); recorder attendant, tester (gas works); removes dried recorder chains or chains, showing water evaporated, steam pressure, water temperature, etc., from plant and sends to engineer; tests producer gas as it leaves producers, tests waste gases as they leave flues from retort house, and

reads temperature of retorts on pyrometer to ensure that producer gas is heating retorts correctly; draws sample of producer gas from main and analyses roughly a fixed volume of it, dissolving carbon dioxide in potash solution, and carbon monoxide (most important constituent) in special caustic soda solution; in similar way analyses sample of waste gases testing for oxygen (by dissolving in it pyrogallol) and carbon dioxide (by dissolving it in potash solution); reports results of tests to foreman who regulates supply of air to producers (primary) and to retort bench (secondary) air.

gauge keeper (waterworks); has charge of, and takes readings from, pressure and depth gauges.

governor house attendant (gas works); attends to proper weighting of station governors which control supply and pressure of gas to each district.

lighting fitter (gas works), see burner fitter.

mantis maintenance fitter, district maintenance man (gas works); (i) replaces broken mantles in street lamps and cleans fittings to which mantle is attached; (ii) calls periodically (or when requested) to inspect gas mantles on private premises, and replaces damaged mantles.

oil gas maker, oil gas man, oil gas operator, see stage man (oil gas).

pipe tester (waterworks); a fitter who, by means of specially constructed apparatus, subjects pipes in mains to hydraulic pressure much in excess of that to which they are normally subjected; works under strict instructions of district superintendent (1909) or district foreman (1902) g.w.

pressure man (gas works); attends to pressure recorders which are fitted at certain points to gas mains and are enclosed in iron pit; opens grate of pit to gain access to recording clock; removes squared paper from dial and replaces with new sheet; winds up clock, cleans pit and cleans grate.

public lighting attendant (electricity supply); street light attendant, street light cleaner; patrols circuits at switching on time and gives attention to faulty lamps other than arc lamps, for which see arc lamp assistant; reports to street lighting engineer (1901) through foreman (1902) g.w.

purifier attendant (gas works); controls rate and direction of flow of gas into, and out of, purifying sheds, by means of valves; makes tests at various points, e.g., with lead acetate paper (for presence of hydrogen sulphide); supervises work of purifier man (1909) g.w.

recorder attendant (electricity supply); makes periodic record of readings of instruments on switchboards from which readings are calculated output, load, etc.; sometimes done by switchboard attendant (1904) g.w.; see also stage man.

reservoir keeper, reservoir bailiff (waterworks); has charge of reservoir and grounds; keeps grounds clean and tidy; excludes trespassers; usually living on premises.

scrubber man, scrubbing man, scrubber bed attendant (gas works); watches pressure gauge of scrubbers i.e., towers of broken coke over which water trickles or rotary washers used to remove last traces of ammoniacal, benzol and naphthalene from gas; opens and closes valves and taps as directed, to draw off liquor and admit fresh water; sometimes also cleans feed and all other pipes connected with scrubbers, with an iron rod or similar last traces of ammoniacal, benzol and naphthalene of purifier attendant and tower man (1909) g.w.; makes repeated tests at different points of condensing and

purifying plant by inserting measuring rod to ascertain depth of tar accumulation, or lead acetate paper to detect presence of hydrogen sulphide; may set pumps in action as required, etc.

sluice man (waterworks); see waterman.

sluice valve repairer (waterworks); repairs sluice valves.

springs gauger (waterworks); gauges flow of water in supply springs by reading and noting depth of supply springs on marked measuring poles or boards erected in them; reports to appropriate gauge station.

stageman (oil gas); oil worker, oil gas operator, oil gas man; works on sloping over and around oil gas plant; controls by opening and closing valves flow of steam to generator, of oil and gas products from generator to carburizer, and of carburized water gas into superheater; controls outflow of carburized water gas (or oil gas) from plant.

street light attendant, street light cleaner; see public lighting attendants.

syphon attendant, syphon man, syphon pump, district syphon pump (gas works); pumps out condensed liquor from sections of gas main into which liquor drains from pipe owing to suitable slight inclination of mains; uncovers manhole, sets up small hand pump, opens valve connecting pump with main and pumps out liquor; takes round pump on cart or trolley.

tester (gas works); see gas tester.

turncock (gas works); turns off gas supply from main to houses, etc., when unoccupied, or for other reasons; turns supply on again when required; (see London term).

turncock (waterworks); controls supply of water in street mains; turns off water supply in case of leakage; visits consumer's premises, on request, to turn off supply; in some districts is present at flushing operations to record length of time operations are in progress and so to calculate charges due; sometimes also accompanies fire brigade to regulate water supply at high pressure; sometimes also accompanies waste inspector (692) g.v. to turn water supply off and on.

turncock's assistant, assistant turncock (waterworks); accompanies turncock g.v.; usually carries tools; deputises for turncock if and when necessary; usually a youth under training.

valve man (gas works); controls valves leading from gas main (containing purified coal gas) to gas holders; also controls, by means of valves, outlets from gas holders to distribution mains; reads and records temperature and pressure, and make of gas, as shown by station meters, and quantity of gas sent out from gas holders, usually also in charge of "boosting" plant pumps, when these are used for maintaining adequate pressure in gas mains over a large area.

valveman, valve valve man (waterworks); see waterman.

washer, washer attendant, washer man (gas works); keeps mechanical washers clean by scraping out tar, etc., deposited by gas in passing through them.

waterman, (waterworks); sluice man, valveman, water valve man; controls sluices or valves by which water is let into and out of reservoirs.

works keeper (waterworks); has charge of, and keeps clean, waterworks premises, e.g., pumping stations and grounds, residing on premises; often same as gate keeper (692) g.v.; may be reservoir keeper g.v.

ason pipes leading from retort up to hydraulic main along which gas passes, by scraping away condensed coal tar deposited there, with long rod with circular scraper or auger.

ash plant attendant, ash hopper, ash hopper man; controls by means of levers automatic hoppers, conveyor plant which conveys coal, or other fuel, from stack to furnace hoppers, and removes ashes from furnace and conveys them to ash tip; also and generally plant and sees that it runs smoothly.

augurer, see ascension pipe man.

barrow man (gas works); wheels coal, coke, breeze and other material about works, e.g., wheels iron ore from pumps to revivifying house, and wheels it back to purifiers when revivified.

bogey man (gas works); see coke man.

bottom man (vertical retorts) (gas works); controls by means of levers discharging apparatus at bottom of vertical retort, and so regulates speed of coke leaving retort.

breaker man, coal breaker, coal breaker attendant (gas works); coal crusher driver, coal gas man; controls by means of levers crushing machine for crushing coal before carbonisation in retorts; if machine is driven by engine, starts and stops engine by levers and oils it as required; in some gas works, also works in same way bucket elevator, which picks up crushed coal and tips it into hoppers from which charging machine is filled; responsible for proper distribution of coal to hoppers; if, coal elevator attendant; may also assist in tipping of trucks or wagons carrying coal to crushing plant.

breeze forker, breeze loader, see coke filler.

breeze picker, see coke picker.

breeze plant attendant, see breeze washer.

breeze washer (gas works); breeze plant attendant; controls, by means of levers, breeze washing plant, which deals with "pan" breeze (breeze recovered from gas producer furnaces), oils plant and watches it to ensure that it runs properly.

braker, busser-in, see furnace filler.

chain man (waterworks); carries measuring chain, theodolite and level; and generally assists and deputises for chainman (690) g.v. in taking levels, etc., for new works or for reconstruction and repair of existing works.

checker, coal (electricity, gas works); checks weight of coal received on weighbridges, records weight, and makes up returns of coal received and sent to furnaces or to stock.

cinder holstman (gas works); breeze elevator man; controls, by means of levers, power-driven elevator which lifts breeze to screens or to loading hoppers; oils and cleans bearings and generally watches machinery for proper working.

cleaner (electricity supply), boiler house cleaner, engine-room cleaner, engine cleaner, sub-station cleaner; cleans and sweeps up floors; cleans plant, blows dust out of electrical plant with compressed air, under supervision; cleans mess room, offices, etc.

cleaner (gas works); cleans mechanical plant with oily waste in so far as this is not done by drivers or attendants of each machine or apparatus.

cleaner, filter-bed cleaner (waterworks); filter-bed labourer; cleans filter bed, under direction of filter bed foreman (692) g.v.; either shovels sand (or other filtering material) which has become slimy or dirty into barrows, wheels it away, and tips it on a heap, ready to be washed; brings it back when it has been washed, and spreads it on filter bed (or spreads fresh filtering material, in place of that removed), or operates by means of levers a mechanical cleaner (a small

electric motor constructed to pick up, wash, and replace filtering material); guides motor by steering gear, oils and cleans it.

cleaner, flue (gas works); removes dust with rake as it accumulates in flues conveying heating gas round retort settings.

cleaner, lamp (gas works); cleans street lamps at regular intervals; may also clean fittings and replace broken lanterns; see mantle maintenance fitter; in small areas sometimes done by lampfighter (688) g.v. during daylight hours.

cleaner, leading (electricity supply); a leading hand among a number of cleaners g.v. whom he directs while he himself works with them; responsible to engine room foreman (692) g.v.

cleaner, line (gas works); removes coal or coke spilt from wagons, etc., from railway lines, crossings, and points.

cleaner, retort (gas works); see scourer.

cleaner, stove (gas works); cleans stove, sent in for repair; may also clean cookers in private houses on contract, etc.

clinker man (gas works), water gas clinkerer; removes clinker and ashes from producer gas furnace with long iron bar.

clinker picker, see coke picker.

coal borderer (gas works); builds up containing wall of coal stock with large shovel of coal; whitewashes these bunks, as precaution against theft.

coal crusher driver, coal gear man (gas works); see breaker man.

coal handler, coal labourer (electricity supply); coal wheeler; unloads and stacks coal with a hand shovel and barrow.

coal man (gas works); as for coal handler.

coke baker (gas works); coke porter; carries sacks of coke on his back from coke fillers to carts or vans for distribution.

coke breaker attendant, as for breaker man (coals).

coke drawer, see coke raker.

coke filler, coke forker (gas works); breeze forker, breeze loader; (i) fills small wagons with coke after it has been quenched by coke quencher g.v., using a coke fork; (ii) releases gun, showing end of coke, and shovels coke from coke tip into sack with coke fork; or may hold sack open while other worker shovels coke in.

coke handling plant attendant (gas works); a conveyor attendant g.v. who, at signal from coke hold labourer g.v., moves lever, setting in motion a crane of conveyor plant which conveys full coke wagon automatically to coke tip; similarly at signal from coke tipper, sets conveyor plant in motion to bring back empty wagon to coke hold to be refilled; may also operate cocks of water spray, which quenches coke as it is conveyed.

coke labourer (gas works); responsible for cleanliness and order of coke storage ground, using coke fork and broom; does any labouring jobs in or around storage ground.

coke hold labourer, coke hole labourer (gas works); coke pit men, pitman (gas works); does unskilled labouring work in coke hold or hole, i.e., floor below retort house into which coke falls on being raked out from retorts; clears drains and gangways with coke fork; assists coke quencher g.v. generally.

coke loader; loads coke into barges, railway wagons, carts, etc., for conveyance in bulk; forks coke into sacks and carries sacks to wagons, etc. or forks direct in wagons.

699—OTHER WORKERS.

ascension pipe man (gas works); augurer, pipe cleaner, pipe opener, pipe truer; keeps clean sides of ascen-

coke man (oil, gas or water gas works); *boiler man*: fills coke boggies with coke *fork* from stack and pushes them on to lift for transmission to charging floor; may also discharge coke on charging floor.

coke mounds man (gas works), see *stacker, coke*.

coke picker; breeze picker, cinker picker (in small works) picks out coke from ashes, which have been raked out from floor of producer, gas furnace, see further under *charging head* sub. (in large works) tips ash into hopper of machine which automatically separates various sizes of coke and breeze from ashes.

coke pit man (gas works), see *coke hold labourer*.

coke porter (gas works), see *coke hucker*.

coke quencher, coke quencher attendant (gas works); *coke skip shoveller, coke skip waterman*: connects metal skip of coke, ejected from retort, to chain attached to telpower motor; quenches coke by dashing a bucket of water, or directing hose, on it; quenches any coke that does not fall into skip, and shovels it into skip in small works may also do work of fire raker *q.v.*

coke raker (gas works); *coke drawer*, rakes coke out of retort, after carbonisation, with a long iron fire-rake.

cocker-in (gas works), see *furnace filler*.

coke runner (gas works); follows trucks of coke which are hauled by wire rope up incline to gantry, and tips coke into coke heap below.

coke skip attendant (gas works), see *coke quencher attendant*.

coke tipper, coke tipman (gas works); tips contents of small wagons of coke coming from retort house on to coke tips, or into ships, barges, or railway trucks; when wagons are controlled from central engine room of haulage system, *signaller, engine room attendant* he electric bell or otherwise, that wagons are empty and ready for return to retort house.

conduit warden (waterworks); *ferman*: has general oversight over conduits; patrols them to watch for and report any damage to walls or source of pollution; regulates flow and height of water in conduit by opening or closing sluices.

conveyor attendant, conveyor man, conveyor operator (gas works or electricity supply); operates by means of levers, belt or bucket conveyor used for conveying coal, coke, or ashes from one part of works to another; oils, greases and cleans bearings of plant and sees that it works smoothly; usually keeps record of weight of material conveyed; in small works also runs coal, etc. heap at intervals to enable bucket to pick it up, or shovels material on to head of conveyor; often further designated, *e.g.*, *coke conveyor attendant, coal conveyor man*.

cooling tower attendant (electricity supply); *reservoir attendant, water attendant*: regulates water supply to cooling towers in power house, (by means of which steam is condensed), either by means of pumps (which he oils, greases and cleans) or by turning valves or taps.

door cleaner, door opener (gas works); *lid cleaner, lid opener, opener and closer*: opens with long iron rod doors of retorts when carbonising process is finished, ready for discharging coke; applies torch to quite small amount of gas remaining in retort; pushes rod up ascension pipes to dislodge any tar or obstruction; chips away tar on inside of lid and face of mouthpiece; usually also shuts doors, see *door shutter*, works in conjunction with machine driver *q.v.*

door shutter (gas works); *lid backer, lid opener, lid shifter*: shuts with long iron rod metal doors of retort after they have been charged; sometimes done by door cleaner *q.v.*

electric light attendant (electricity supply); *fault attendant, fault hand, fault man, fuse hand*: one of "stand by" staff, to go out at short notice to consumers' premises to renew fuses, and make good any faults; responsible to installation inspector (692) *q.v.* and works under his direction.

elevator attendant, coal (gas works and electricity supply); *hopper filler* (gas works); a conveyor attendant *q.v.* who attends to bucket elevator used for raising coal, *e.g.*, from weighing room to top of crushing machine; *cf.* breaker man.

elevator man, breeze (gas works), see *clinker hoistman*.

hopper filler (gas works); *hopper filler*: starts and stops by means of lever elevator which carries coke up from coke tip to hopper over producer gas furnaces; oils, greases and cleans bearings.

fault attendant, fault hand, fault man (electricity supply), see *electric light attendant*.

fender boy (gas works); whitewashes fenders in front of retort lids to prevent tar from adhering.

filter-bed labourer, filter labourer (waterworks); either a groundman *q.v.* or a filter-bed cleaner *q.v.*

fire raker (gas works); tends and cleans fires of gas producers, raking out ashes and clinker; in small works also does work of coke quencher *q.v.*

furnace filler (gas works); *bunker, burner, cocker-in, gas producer attendant*: feeds and attends to gas producer furnace, adding coke as required, either by hand with operating lever or more usually by operating lever of coke charging machine.

furnace poker-in (gas works); *poker furnace* in which producer gas is made, with iron bar, through holes in side, to stimulate combustion; usually also a furnace filler *q.v.*

fuse hand (electric supply), see *electric light attendant*.

gas house labourer (gas works); general term for any man doing unskilled work in retort house.

gas labourer (gas works); *gas works labourer*: general term for unskilled labourers employed in manufacture or purification of coal-gas.

gas lighter (gas works); *lighter, extinguisher*, and keeps gas lamps clean in a gas works plant; *cf.* *lightkeeper* (399).

gas producer attendant (gas works), see *furnace filler*.

greaser; oiler, oiler and greaser (electricity, water, or gas supply); oils and greases machinery, particularly any machines, gearing, etc., which have no engine man in constant attendance, either by applying oil or grease with a piece of waste, or, in case of automatic oiling systems, by filling oil cups from can; often also cleans machinery; *cf.* *cleaner* sometimes specifically designated, *e.g.*, *retort house greaser*.

groundman (waterworks); removes silt from turbid water; in winter, breaks ice when water in filter-beds is frozen; often done by filter-bed cleaner *q.v.*

handyman (gas works and waterworks); semi-skilled man engaged in maintenance and repair of waterworks plant and machinery, or in keeping charging machines, in retort house of gas works, in running order.

hopper filler (gas works), see *elevator attendant, coal or elevator man, coke*.

hydraulic main attendant, hydraulic main man (gas works); *feyman*, works on top of retort benches and keeps hydraulic mains clean by screwing caps or plates at heads of bridge pipes and cleaning with iron rod any pipes choked with tar; is responsible to retort house foreman (692) *q.v.* for keeping ends of ascension pipes sealed, *i.e.*, under level of water in hydraulic main; inspects

gauges of a governor showing vacuum on top of water seal and regulates depths of water seal by admitting water or hanging weights on governor; cleans governor, and sweeps gangways, bed over retort, top of mains, etc.

index reader (gas works), see *meter reader* (gas works).

lamp boy (gas works); cleans, fills with oil and generally attends to lamps on railway points and crossings in works.

bestman (waterworks), see *conduit warden*.

laverman, coke (gas works); *as for conveyor attendant*.

lid backer, lid closer, lid shutter (gas works), see *door shutter*.

lid cleaner, lid opener (gas works), see *door cleaner*.

lid man (gas works); a door opener *q.v.* or a door shutter *q.v.*

lime man (water gas); prepares lime, by breaking it up with a shovel, to be used for purification of water gas.

lineman (waterworks); is responsible for maintenance of aqueducts and pipe lines; sees that ground is kept clean and that gates and fences are in order; *cf.* *walkmen* (waterworks).

meter man, meter reader (electricity supply); takes readings of meters on consumers' premises, for gas is calculating charge for supply of current, reports suspected faulty meters, or damage to meters, etc., to meter inspector (692) *q.v.*; often employed at times in clerical way, in office, in intervals between quarterly readings.

meter reader (gas works); *meter reader*; (1) reads and notes dial of station meter at gas works at fixed intervals, and also notes temperature and pressure of atmosphere at time of reading; (2) reads gas meters at consumers' premises, notes quantity consumed in his own record book and on consumer's card; collects coin from slot meters and pays rebate (if any) to consumer.

meter reader, meter state taker (waterworks); *as for meter man* (electricity supply).

notice server (waterworks); personally serves notices of cutting off supply to defaulting customers.

oddman (gas works), *as for gas labourer*.

oiler (gas works), *oiler and greaser* (electricity supply), see *greaser*.

opener and closer (gas works), see *door cleaner*.

pan cleaner, panner-out (gas works); removes ashes and clinker from water pans after retort furnaces by raking them out from pan or by shovelling.

pipe cleaner, pipe opener, pipe triser (gas works), see *ascension pipe man*.

pipe jumper (gas works); an ascension pipe man *q.v.* who works on top of retort beds, untwisting linked connections, and making connections thereto with a long bar.

pitman (gas works), see *coke hold labourer*.

pluggier-up (gas works); plugs furnace feeding mouth with coke breeze to prevent gas from escaping, in substitution for lid or door.

pot boy (gas works); performs odd jobs in connection with laying and jointing of district mains; keeps hut in which jointing materials, *e.g.*, lead, implements, etc., are stored, in clean and tidy condition; notes quantities of materials used, and reports to foreman main layer (504) *q.v.* when stocks are low; cleans spades, picks and other tools, and reports any damage or breakages to foreman; adds fuel to fire on which lead melting pots are placed and informs main layer when molten lead is ready for use.

purifier leveller (gas works); *spreader*; a purifier man *q.v.* who levels or spreads run oxide with a long rake, as it is tipped into purifier chambers; tests depth of oxide against mark on rake to ascertain when correct quantity has been tipped in.

purifier man, purifier labourer, purification man (gas works); one of a gang of men who takes hand from gas purifier chambers and opens doors at bottom to let spent run oxide to fall out; removes spent oxide, with shovel and barrow, to shed for exposure to air, turns it over from time to time to assist re-oxidation, and subsequently returns it and tips on to purifier grids for further use; works under supervision of purifier foreman (192) *q.v.*; in small works, works under purifier attendant (193) *q.v.* and may even do his work.

quandah (gas works), *see* coke quandah.

rake driver (gas works); withdraws coke from single-ended retorts with long rake.

reservoir attendant (electricity supply), *see* cooling tower attendant.

reservoir attendant (waterworks); patrols reservoirs and regulates by means of valves the water level and out of reservoirs; where reservoir adjoins pumping station and is supplied therefrom reports state of water supply to engineer in charge of pumps and acts in conjunction with him; removes leaves and other refuse from water with a pole and bucket; in small undertakings, sometimes also acts as groundman *q.v.*

retort house man (gas works); general term for any man employed in retort house of gas works, including retort charger (163), machine driver (165), accession pipe man, hydraulic main attendant *q.v.*

retort labourer (gas works); a general labourer in retort house, sweeps up coal and dust on "stage" of retort house, wheels out clinker and dumps it, and performs any unskilled work in or about retort house.

river gratesman (waterworks), *see* weed gratesman.

rope runner (gas works); (i) attends to and operates rope systems by which small tubs of coal or coke are moved from place to place in gas works; (ii) couples and uncouples wagons on works railway, operates point levers and assists locomotive driver generally.

runner-away (gas works), *runner-off*; pushes wagons of coal on narrow-gauge line, from wharf siding.

sand washer (waterworks); spreads out dirty filtering material, which has been removed from filter beds by filter bed cleaners *q.v.* with a shovel and washes it by squirting water on it from a hose, or by feeding it to machines which clean it automatically.

scourer, retort scourer (gas works); retort cleaner; ships off deposited gas carbon from sides of retorts when it gets too thick, using a long-handled, chisel-pointed tool.

smoke-jack (gas works), *see* stackman.

softening and filter attendant (waterworks); water softening tanks machine, which feeds purified lime to water to be softened as it runs along open channel to filter beds, and supervises mechanical filters through which water passes, after being softened, to remove excess of lime.

spreader (gas works), *see* purifier leveller.

spreader, coal (gas works); spreads coal evenly on stack with shovel or fork, so that stack does not exceed given height.

spreader, coke (gas works); (i) *see* stacker, coke; (ii) a coke quandah *q.v.* who also throws coke to back of retort house with coke fork.

stacker, coal (gas works); carries on back, or moves on trolley, bags or stacks of coal from weighing room to stack.

stacker, coke (gas works); coke rounds man, coke spreader, coke trimmer; shovels coke into stacks in yard when brought from retort house. **stackman** (gas works); smoke-jack; cleans and generally attends to flues of retort house; takes out dust with long iron rod.

stackman (gas works); general term for any man working in retort house on a stage above producer gas furnaces and coke quenching floor; *cf.* stage-man (all gas) (166).

strainer washer (waterworks); removes leaves and other refuse from strainer at mouth of inflow pipe to filter beds; if strainer is very dirty, steps flow of water, removes strainer and scrubs it with a brush before replacing it.

subway man (gas works); examines gas main in brick subway under public roads and reports defects in main and in subway.

tallyman, brass, coal or coke (gas works), *see* weigher.

tank man (gas works), *see* tower man. **tar and liquor plant attendant**, *see* tower man.

topman (not on vertical retorts), *see* hydraulic main attendant; *cf.* top-man (vertical retorts) (193).

tower man, tar tower attendant (gas works); tank man, tar and liquor plant attendant; attends to condenser towers through which gas is passed for cooling purposes, to expedite deposition of tar, which falls into seal pots and thence runs over into settling tanks; ascertains depth of tar accumulation by inserting measuring rod into valve; sets small pump going when necessary to pump tar into tanks; keeps seal pots clean and ensures that pipes to seal pots and from them to settling tanks are free from obstructions.

trimmer, coal trimmer (electricity supply); (i) unloads, stacks, and trims coal by hand; (ii) notes all riddlings and amass stacks generally.

trimmer, ash (electricity supply); rakes out ashes from furnaces on to firing floor (i.e., in front of boiler); in small undertakings, sometimes also acts as ash wheeler *q.v.*

trimmer, coal (gas works); spreads coal evenly with a shovel as it is delivered on stack by conveyor for storage; shifts coal with shovel to facilitate its delivery by gravitation on to belt of conveyor; shovels into barrow coal split from charging machine in retort house and wheels away to stack.

trimmer, coke, *see* stacker, coke (gas works).

trolleyman (gas works), *see* wheeler, coke.

trucker (gas works); operates by means of lever mechanical tipping devices attached to trucks and discharges contents where desired.

valve boy (gas works); stands on top of retort benches to open and close valves admitting gas from retorts into exhausters at a signal from retort house foreman (193).

valve labourer (gas works); oils and greases valves on district mains.

walkman (waterworks); patrol supply-rivers, reservoirs, conduits, aqueducts, etc., to detect leakage or other defects; makes provisional repairs and reports to manager; usually trambler designated, *cf.* aqueduct walkman, conduit walkman, reservoir walkman, or river walkman; *see* also line-man (waterworks); *cf.* pipe ranger (576).

water attendant (electricity supply), *see* cooling tower attendant.

waterman (gas works), *see* coke quenching.

water softener (waterworks), *cf.* for softening and filter attendant.

water softening plant attendant (electricity supply), empties tank by opening valves for large clean plant by hand with brush or mop, and, if necessary, scales or scrapes parts which have become encrusted; opens valves or taps to admit water and allows it to flow freely through tank to flush it; fills tank with water by closing outlet and throws in prescribed quantity of chemical (usually lime).

weed gratesman (waterworks); river gratesman; keeps from grates, in supply-rivers and conduits, free of weeds and rubbish; uses hand or a brush on a long pole.

weighbridgeman (gas works); weighs all coal and coke on weighbridges; records tare, gross and net weights of all trucks; fills up all forms and records required.

weigher (gas works); breeds, coal or coke fallows; weighs and records weights of all coal received or sent from works, of coal sent to retort house, of coke sent out from retort house, of coke used for various purposes at works, of coke sold, of coke produced, used and sold, etc.

wheeler, ash (gas, electricity and water works); shovels ashes, raked out from furnace into barrow or truck and pushes them out of boiler house and tips on to ash tip.

wheeler, brass, *see* wheeler, coke.

wheeler, coal (gas works); fills with hand shovel small tubs of coal, and wheels them from weighing room to crushing machine, or from crushing machine to retort house, or elsewhere from place to place as may be required; tips coal from tubs at end of journey.

wheeler, coal (electricity supply), *see* coal bender.

wheeler, coke (gas works); breeds wheeler, freighter, pushes small wagons or barrows of coke (which are sometimes also filled with hand shovel) from retort house and tips contents on coke tip, or otherwise loads and wheels coke from place to place, as required.

ORDER XXII.—PERSONS EMPLOYED IN TRANSPORT AND COMMUNICATION.

Sub-Order I.—Railway Workers.

700.—RAILWAY—OFFICIALS, STATION MASTERS, YARD MASTERS, PASSENGER AND GOODS AGENTS.

agent, assistant goods; assists goods agent *q.v.* and takes his place when he is absent; sometimes also acts as goods traffic carman *q.v.*

agent, coal depot; a goods agent or a mineral agent *q.v.* who deals with coal traffic only.

agent, depot, *see* agent, goods.

agent, district canvassing; a district inspector *q.v.* who supervises and directs canvassers *q.v.* in a district, and who is responsible to goods agent *q.v.* for efficiency of canvassing arrangements therein.

agent, district goods; *as for* agent, goods, but is in charge of all goods stations or depots in a district.

agent, district passenger; *as for* agent, mineral, but is in charge of all stations or depots, where main traffic is mineral traffic, within a district. **agent, district passenger**; under control of passenger manager or of district passenger manager *q.v.*, circulates a definite railway district by means of advertising bills, etc., approaches churches etc., offering special rates for outings and otherwise increases passenger traffic in his district.

agent, goods; depot agent, goods superintendent, traffic agent; has entire charge of a railway goods station or depot, controlling staff, directing district canvassing agents g.v. and supervising generally work of canvassers, goods foreman (706), checkers (706), officers (706), loaders (706), etc. g.v.

agent, mineral; mineral traffic agent; mineral trains superintendent; as for agent, goods, but duties confined to mineral traffic.

agent, passenger; has charge of clerical staff in booking office, parcels office, left luggage office, lost property office, etc., at a large passenger station.

agent, receiving office; is in charge of a railway company's town receiving office; is responsible for seeing that parcels, etc., received at office, are labelled and prepared for despatch, and sent promptly to station, also for collection of charges thereon.

agent, station; a passenger agent g.v. who represents and guards interests of a railway company at a station of another company to which his own company has only running powers.

agent, traffic, see agent, goods.

canvasser, traffic canvasser; outdoor representative, locomotive traffic solicitor; calls on commercial firms and others offering and explaining traffic facilities and trying to secure their custom; reports to goods agent g.v., if canvassing for goods traffic, or to passenger agent g.v., if canvassing for passenger traffic; sometimes specifically designated, e.g. goods traffic canvasser.

chief foreman; head foreman, superior foreman; is employed in large goods shed or depot; acts under instruction of yard master, goods agent or of goods inspector g.v. according to size of depot; supervises number of working foremen, cf. goods foreman (706), and is responsible for co-ordination and efficiency of carriage arrangements; precise duties vary according to goods handled in depot.

chief of police; police superintendent; is responsible for efficient surveillance of railway company's stations, yards and depots, to prevent pilfering, etc.; directs and supervises police inspectors g.v. and railway police generally; consults with chief legal adviser as to prosecution of offenders.

collector of dues; calls on customers and collects freightage, demurrage and other dues owing to a railway company.

controller, chief; control master; is in supreme charge of control office, controlling drivers (703), guards (702), shunters (704), porters (706) g.v., etc., engaged in working traffic over a specified area; issues instructions, etc., to train controllers g.v.

controller, rolling stock; is in charge of rolling stock of a railway; arranges its distribution, and keeps records of its whereabouts; is responsible for its upkeep and repair.

controller, train controller; train dispatcher; is one of a number of controlling officers who, under direction of chief controller g.v., take charge, in turn, of work in traffic control office and who control engine men (701), guards (703), goods porters (706) g.v., etc., working over a specified area; or who are employed in regulating trains or guards over an area from a point other than a control office.

control master, see controller, chief.

depot master, see yard master.

detective; keeps watch on railway company's property for pilfering, thefts of luggage, etc.; follows movements of suspected persons; works in plain clothes under direction of police inspector g.v.

engine arranger; a running foreman g.v. who allocates engines to their respective services, generally for a week in advance; has schedules of duties posted in engine shed.

examiner, chief special; chief tickets examiner, chief travelling examiner, see inspector, chief tickets (travelling).

examiner, load, see inspector, load, excess luggage weigher, district; a travelling excess inspector, cf. inspector, travelling, who supervises work of excess luggage collectors (706) g.v. at stations in a specified district.

foreman, capstan; directs and supervises capstan men (706) g.v. at large goods depot, is responsible to goods agent g.v. for prompt moving of goods wagons to and from loading platforms in depot.

foreman, cattle; directs and supervises cattlemen (706) or goods porters (706) g.v. at a cattle depot, in loading and unloading of cattle (chiefly) or goods into and out of trucks.

foreman, checker; supervises and directs work of checkers (706) g.v. in goods station or depot.

foreman, grain; has charge of railway grain warehouse; controls and directs work of loaders, checkers (706) g.v. etc.

foreman, loco; locomotive foreman, locomotive yard foreman; running shed foreman, shed foreman; controls staff of locomotive engine shed or yard; arranges and supervises work of engine cleaning and preparation of engines for drivers, despatch of engines at times scheduled, arranging staff rosters, etc.; personally supervises engine shed work.

foreman, meat; is in charge of gang of meat pitchers (706) g.v. at railway meat depot; directs loading and unloading of wagons.

foreman, repair; directs repairs (706) g.v. at a goods depot and is responsible for their work.

foreman, running; employed in large engine sheds with other running foremen, under control of locomotive or running shed foreman g.v. to carry out latter's instructions; employed on shifts in common with lower grade engine shed workers but as distinct from running shed foreman.

foreman, running shed, see foreman, loco.

foreman, searcher; supervises and directs a number of searchers and tracers (706) g.v.

foreman, shed, see foreman, loco.

foreman, shunter; directs shunters (706) g.v. and is responsible for their work.

foreman, stock; a foreman in warehouse wherein railway company stores goods for customers; supervises goods porters (706) g.v. and ensures that arrangements for storing are carried out; checks goods received and is responsible for despatch of goods or delivery into vans in correct quantities, etc., to firms direct or to their clients.

foreman, traffic; general term covering such supervisory officials as yard inspector, station inspector, cattle foreman g.v.; obsolete.

head foreman, see chief foreman.

inspector, advertising; a head office inspector g.v., or, if stationed in one town, a station inspector g.v. who examines advertising spaces on rolling stock and premises of a railway company for purpose of checking duplication and overdone (time expired positions); takes note of vacant spaces; arranges replacement of defaced or soiled advertisements, etc.; deals with all kinds of advertisements, cf. billposting inspector.

inspector, assistant; general term for an official who assists an inspector and replaces him in case of absence; for duties, see inspectors defined under this code number.

inspector, baggage; a station inspector g.v. who supervises transfer of passenger's baggage from train to taxi, or vice versa, at sea-port station.

inspector, ballast; makes periodical examinations of ballast on permanent way in a district; orders where necessary; inspects ballasting operations.

inspector, bill posting; travels a district to see that bills, etc., announcing traffic arrangements, are properly posted, and kept up to date; inspects generally supervises work of bill-posting porters (706) g.v.

inspector, brake; is responsible for periodical inspection of brakes of railway rolling stock in a particular district, reporting for repair where necessary.

inspector, bridge; examines bridges periodically; reports damage or strain; supervises repair operations; inspects and passes work of bridge contractors.

inspector, cab; supervises cab ranks of large passenger stations; sees that regulations are observed, and that drivers have permits to stand on railway premises.

inspector, canvassing; a head office inspector at a district inspector g.v. who examines work of canvassing staff in a defined district; receives returns of orders and general reports from goods agent g.v.

inspector, carriage and wagon; a station inspector is responsible for maintenance efficiency of rolling stock within his district; sees that wagons, etc., are properly constructed and maintained in repair; orders repairs where necessary; on some lines, also does work of carriage cleaning inspector g.v.; graded as district inspector g.v.

inspector, carriage cleaning; a head office inspector or a district inspector g.v. who examines passenger rolling stock after cleaning, and is responsible for efficiency of cleaning arrangements in one or more railway districts; work sometimes done by carriage and wagon inspector g.v.

inspector, cattle; a district inspector g.v. who inspects cattle consigned by rail, and makes reports on their condition, with a view to examining claims which may be made; generally supervises cattle traffic, cf. cattle foreman.

inspector, chain; examines periodically chains used in a definite district; sees that they receive proper care; arranges replacement of worn or defective chains.

inspector, chief goods; a head office inspector g.v. who supervises work of goods inspectors, reporting to goods manager g.v.

inspector, chief ironwork; supervises and is in charge of iron and steel work inspectors g.v.

inspector, chief tickets (travelling); chief special examiner, chief tickets examiner, chief travelling examiner; directs and supervises travelling ticket inspectors g.v.; arranges their terms of duty and is responsible for efficient performance of duties.

inspector, coal; a head office inspector or a district inspector g.v. who examines and reports on arrangements for getting, storing, etc., coal supplies, etc., for a railway system, or district thereof.

inspector, crane; makes periodical examinations of cranes, arranges for repair where necessary; is generally attached to a district.

inspector, demurrage; makes records of delays in clearance of goods stored, or of private rolling stock, for purpose of charging demurrage.

inspector, district; general inspector; an inspector in any department whose duties cover a district, i.e. a defined area less than that of an entire railway or railway division, but covering more than one station, yard, depot, siding, etc.; usually

combines work of two or more specifically designated inspectors, e.g., train inspector, carriage and wagon inspector *q.v.*, according to type of district control.

Inspector, district goods; a district inspector *q.v.* who examines work of all goods stations and depôts in a defined area working under district goods manager *q.v.*

Inspector, district travelling; an inspector *q.v.*, in any department whose duties are confined to one district of a railway.

Inspector, dynamometer car; takes records, e.g. power of draw-bar pull from engine, effect of faulty track, by reading and dynamometer car, attached to engine for purpose of measuring speed, acceleration, power developed, etc.

Inspector, fish; a parcels inspector *q.v.* wholly or mainly engaged in connection with fish traffic; examines fish consignments by rail and again on arrival and records condition so as to be able to report in case of claims for damages against company; generally supervises working of fish traffic.

Inspector, front area; a station inspector *q.v.* who is responsible for regulation of staff working in area in station yard.

Inspector, gas; inspects gas producing plants, filling arrangements, tanks, and everything connected with railway company's gas supply; reports defects necessitating repair.

Inspector, general; (i) see inspector, head office; (ii) see inspector, district.

Inspector, goods depôt; goods station inspector; a yard master *q.v.* responsible for goods agent for supervision of general working of a goods depôt in shed or yard, or both.

Inspector, goods train; a head office inspector or a district inspector *q.v.* who examines goods trains before departure, to see that all is in readiness for journey, when this is not done by lead inspector *q.v.*

Inspector, goods yard; a yard inspector *q.v.* who exercises general supervision over staff and working of a large goods yard.

Inspector, guards; a head office inspector *q.v.* who supervises work of guards (705) *q.v.* in a particular district, e.g. by taking charge of surprise visits; examines guards' journals, inspects equipment, etc.

Inspector, head office; general inspector; an inspector at any department located at head office and exercising his functions over an entire railway or division of railway, as distinguished from district inspector, station inspector *q.v.*

Inspector, hydraulic; examines periodically all hydraulic cranes, lifts, etc., in a particular district, arranging for repairs where necessary.

Inspector, iron and steel work; examines and reports on condition of iron and steel structures belonging to railway.

Inspector, lighting; a head office inspector *q.v.* who examines and reports on lighting arrangements of railway rolling stock or railway premises.

Inspector, load; load examiner; a district inspector or yard inspector *q.v.*, according to how stationed, who inspects loaded trucks or wagons at a railway depôt or goods yard, to see that loading has been properly performed, and that vehicles are fit for journey; uses loading gauge where necessary; sees that shunting and reporing are securely stabled.

Inspector, looking; makes periodical examinations of interlocking signalling and points gear.

Inspector, locomotive; examines locomotive engines in site or more locomotive sheds; notes defects and reports to locomotive superintendent *q.v.*

Inspector, machines; machinery inspector; mechanical inspector, outside machinery inspector; examines mechanical equipment, other than locomotives, such as hoists, cranes, oil buffers, weighing machines, luggage lifts, etc., and arranges for necessary repairs.

Inspector, market; directs goods porters (706), examines (715) *q.v.* or other railway workers working at public market, loading and unloading market produce from or into railway wagons or drays.

Inspector, meat; makes periodical inspections of meat depôts; examines meat on arrival, so as to be able to report in case of claims for damages against company.

Inspector, mechanical; see inspector, machine.

Inspector, meter; examines, periodically, all meters (gas, electricity or water) and arranges for repair or replacement when necessary.

Inspector, mineral; a district inspector or a yard inspector *q.v.* who is responsible for efficient carrying on of mineral traffic in a district or at a particular yard; directs shunters (704) *q.v.* etc., engaged in handling such traffic.

Inspector, new works; inspects and reports on progress of new works under construction by railway company.

Inspector, night; a yard inspector *q.v.* employed on night shift.

Inspector of signalling; a head office inspector or a district inspector *q.v.* who makes periodical examinations of enginesmen, firemen and drivers (701) *q.v.*; tests eyesight, etc.

Inspector, office and booking; periodically visits booking and other offices at railway stations; inspects books and returns and checks tickets in hand.

Inspector of materials; is responsible for inspection of materials supplied to a railway company, and for periodical examination of stocks held, checking quantities, conditions, etc.

Inspector of materials, chief; supervises work of inspectors of materials *q.v.*; receives their reports; makes departmental reports to general superintendent *q.v.*

Inspector, outside machinery; see inspector, machine.

Inspector, painting; arranges for painting of buildings, bridges, signals, etc., when necessary, and is responsible for painting work being done efficiently and at proper time.

Inspector, parcels; supervises staff and working of parcels offices throughout a railway or in district of railway or at a large station.

Inspector, passenger train; examines passenger trains, when made up in yard or sidings, to see that all is in order for proceeding on journey.

Inspector, permanent way; periodically examines and reports to superintendent of works *q.v.*, on a section of permanent way as to condition and need for repair; inspects work being done on section.

Inspector, platform; a station inspector *q.v.* who controls platform staff (for example porters (706) *q.v.* etc.) of a large passenger station; is responsible for smooth working, direction of passengers, clearance of luggage, etc.

Inspector, police; supervises work of a body of railway police.

Inspector, race traffic; a head office inspector *q.v.* specially dealing with traffic to and from race meetings.

Inspector, rail; examines and tests contractors' supplies of rails, passing or rejecting them according to condition.

Inspector, rail motor; makes periodical inspections of rail motor trains, i.e. small trains propelled by self-contained motors, and arranges for repairs or overhaul where necessary.

Inspector, receiving office; makes periodical inspections of railway receiving offices in his district; examines books, accounts, equipment and discusses work generally with clerk in charge.

Inspector, rolling stock; stock inspector; has general control of rolling stock, sees that requests are promptly met, e.g. shobies engines to station yards; examines equipment and is responsible for effective use and supply of rolling stock; reports to superintendent, if at head office, otherwise to district superintendent *q.v.*

Inspector, running department; makes periodical inspections of running sheds and yards of a district; examines general organisation of shed, staffing, etc.; inspects records and discusses work generally with running shed or locomotive foreman *q.v.*

Inspector, sanitary; a head office inspector *q.v.* in civil engineer's department who inspects sanitary arrangements on railway property, i.e. lavatories, urinals, drains, etc., reporting for repairs where necessary.

Inspector, shunting; a yard inspector *q.v.* who supervises all shunting arrangements in large yard or sidings.

Inspector, sidings; walks round, in marshalling yard or sidings, inspecting goods wagons to ensure that they are properly loaded before departure, where this is not done by goods train inspector or lead inspector *q.v.* reports to yard inspector *q.v.*

Inspector, signal; makes periodical inspection of signalling system of a defined district, arranging for repairs where necessary.

Inspector, signal and telegraph; combines duties of signal inspector and of telegraph inspector *q.v.*

Inspector, station; is responsible to stationmaster *q.v.* for general control of traffic on station platforms; directs porters, parcel porters, horse and carriage porters (706), ticket collectors (705) *q.v.*

Inspector, stores; makes periodical inspections of stores at stations or depôts of a district; checks stocks and examines as to condition.

Inspector, telegraph; makes periodical inspections of telegraph offices and signal boxes; sees that instruments, etc., are in working order.

Inspector, timber; inspects all timber supplied for use on railway works in a particular district; examines it as to fitness, correctness of measurements, etc.

Inspector, timber loading; a head office inspector or a district inspector *q.v.* who inspects loading of timber on railway rolling stock, and ensures that loads are properly secured.

Inspector, time bill; a head office inspector *q.v.* who carefully checks new time bills before issue, to ensure that times of trains are correctly given.

Inspector, toll; is responsible to traffic inspector or to district traffic manager *q.v.* for efficient working of company's toll bridges; pays surprise visits to toll houses, receives reports from toll collectors (706) *q.v.*, instructs them, where necessary, regarding working of bridges, and usually receives monies collected.

Inspector, tracing; supervises work of searchers and tracers (706) *q.v.* of a district.

Inspector, traffic; is responsible to district traffic manager *q.v.* for inspection and supervision of traffic working in his district; enquires into and reports on delays, etc., in order to ensure smooth working.

Inspector, train; investigates train delays and is generally responsible for running trains to scheduled time in his district; graded as district inspector *q.v.*

inspector, train wagon, *see* inspector, carriage and wagon.

Inspector, travelling; a head office or a district inspector *q.v.* in any department who travels on goods or passenger trains, as distinguished from one who is normally stationed at head office of railway or district or at a particular station; sometimes specifically designated, *e.g.* goods train travelling inspector, travelling excess inspector, travelling horse inspector, travelling luggage inspector, travelling mineral train inspector, travelling parcels inspector, inspector, travelling tickets; a travelling inspector *q.v.* who boards corridor trains and examines passengers' tickets, as a check on work of travelling tickets collectors and examiners (703) *q.v.*

Inspector, tunnel; makes periodical examination of all tunnels and reports on their condition to superintendent of works *q.v.*

Inspector, wages; *see* inspector, carriage and wagon.

Inspector, weighing machine; periodically examines weighing machines of a district as to correctness and condition, arranging for repairs where necessary.

Inspector, yard or chief yardman; an inspector, usually in goods yard, who directs and supervises staff employed in goods yard or passenger yard of large station.

Inspectress (waiting room); is responsible for regular inspection of women's waiting rooms in a defined district as to cleanliness, efficiency of attendance, etc.

Luggage searcher; an inspector *q.v.*, attached to a district office, who visits stations within his district to trace lost luggage; inspects station receptacles, etc.

Manager, carriage; is responsible to goods manager *q.v.* for efficiency of carriage arrangements of a railway; directs inspectors and other grades engaged in connection with carriage.

Manager, district goods; district goods superintendent; directs goods agents and canvassers *q.v.*; is responsible to goods manager for efficient carrying-on of goods traffic in his district; duties *cf.* for manager, goods; *cf.* manager, divisional goods.

Manager, district passenger; is responsible to passenger manager *q.v.* for efficient working of passenger traffic in a specified district; directs and controls passenger agents, canvassers *q.v.*, etc.; also supervises, or corresponds with, ticket agencies in his district.

Manager, district traffic; combines functions of district superintendent, district passenger and district goods manager *q.v.*

Manager, divisional goods; a goods manager *q.v.* in charge of goods throughout a division of a railway, *i.e.* area larger than a district; *cf.* manager, district goods.

Manager, general; is supreme managing officer of railway to whom secretary, chief accountant, chief mechanical engineer, superintendent, passenger, goods and mineral managers and all other officials and employees of railway are directly or ultimately responsible; is himself responsible to board of directors, advises and consults with them, and carries out policy decided upon by them.

Manager, general traffic; traffic manager, traffic superintendent; combines functions of superintendent, passenger manager, and goods manager *q.v.*

Manager, goods; chief goods manager; is responsible for relations of railway company with trading community; for solicitation of business; for classification of goods traffic; for determination of goods rates and charges and quotation of exceptional rates; for storage and carriage arrangements and for investigation

and settlement of claims arising in connection with goods traffic; directs and controls district goods managers *q.v.*; sometimes is assisted by carriage manager *q.v.*

Manager, mineral; as for manager, goods, but is concerned only with mineral traffic; sometimes is responsible also for distribution of locomotive coal.

Manager, passenger; is responsible for relations of railway company with public, so far as concerns passenger traffic, which includes parcels, milk, fire losses and carriage traffic; for solicitation of business, passenger, parcels etc. traffic; for classification of traffic and quotation of rates; for development of excursion and pleasure party traffic and arranging therefor; for parcels carriage arrangements; for investigation and settlement of claims arising out of passenger and parcels, etc., traffic; directs district passenger managers *q.v.*

Manager, sack and sheet; is in charge of sack and sheet shed departments, where these duties are not separately assumed by sack superintendent and sheet superintendent *q.v.*; supervises issue and return; sees that sacks and sheets are carefully stored, and kept in a state of repair.

Manager, traffic; *see* manager, general traffic.

Outdoor assistant, outside assistant; general terms covering officials of certain rank, *e.g.* running foreman, assistant goods agent *q.v.*, who are on outdoor as distinct from indoor staff.

Outdoor representative; *see* canvasser.

Plan keeper; has charge of plans in civil engineer's or draughtsman's room, in railway office; indexes them and produces them when called on to do so.

Relief supervisor; a district inspector *q.v.*, in any department, responsible for efficiency of arrangements for supplying relief employees of various grades in that department; keeps roster of employees available for relief and issues instructions by which parts vacant by reason of illness, holidays, presence of work, etc., are immediately filled.

Shed master; in charge of smaller locomotive shed than that supervised by shed superintendent *q.v.*, *i.e.* in which there are only a few, if any, locomotive foremen *q.v.*; duties vary between those of shed superintendent and of locomotive foreman, according to size of shed.

Station master; station superintendent; is in charge of passenger railway station; controls and directs work of staff of all grades; is responsible for all motives received, for correctness of stock of tickets, for regular rendering of all reports and returns, and for punctual despatch of trains; often, especially at small stations, also does work of goods agent *q.v.*

Station master, assistant; assists station master *q.v.* and replaces him in case of absence.

Station master, night; relieves station master *q.v.* during night; is responsible for general supervision while on duty, but does not exercise general management and control of station; usually done by station inspector *q.v.*

Station master, relief; a station master *q.v.* who controls no definite station, but is held in readiness to relieve a regular station master where necessary.

Storekeeper, chief; *see* superintendent, stores.

Sub-inspector; (i) an inspector of inferior grade or a foreman of superior grade in any department; (ii) an assistant inspector in civil engineer's department or in signal,

telegraph and electrical department; assists inspector, deputises on particular jobs and replaces him when he is absent.

Sub-inspector, signal and telegraph; as for sub-inspector.

Superintendent, general superintendent, superintendent of this line; is responsible to general manager, or to divisional general manager *q.v.*, for handling of all descriptions of traffic at stations and in yards, and its movement on running lines, for distribution of passenger vehicles, and for traffic statistics; directs district superintendents *q.v.*; as some lines also perform some or all of duties of passenger manager *q.v.*; sometimes specifically designated, *e.g.* day superintendent, night superintendent.

Superintendent, cattle; has administrative control of whole of cattle traffic department of a railway system.

Superintendent, chief stores; *see* superintendent, stores.

Superintendent, district; is responsible to superintendent *q.v.* for efficient performance, within a specified district, of duties delegated to him; controls station masters, yard masters, and other operating staff, controllers, guards (702), signaller (703), shunters (704), porters (706) *q.v.*, etc., within his district; *cf.* superintendent, divisional.

Superintendent, district goods; *see* manager, district goods.

Superintendent, district locomotive; is responsible to locomotive running superintendent *q.v.* for running of locomotives to scheduled time, including coaling, cleaning and shed routine generally, within a specified district; controls shed superintendents, shed masters *q.v.*

Superintendent, divisional; is responsible to superintendent *q.v.* for efficient performance, within a particular division, an area larger than a district, of duties delegated to him by superintendent; as for superintendent; *cf.* superintendent, district.

Superintendent, divisional locomotive; is responsible to locomotive running superintendent *q.v.* for efficient performance, within a particular division, an area larger than a district, of duties delegated to him; as for locomotive running superintendent; *cf.* superintendent, district locomotive.

Superintendent, electrical and telegraph; responsible for effective working of electrical and telegraphic systems throughout line, including electric lighting and maintenance of equipment, *e.g.* telegraph wires, instruments.

Superintendent, fish market; has charge of premises and staff of railway fish market.

Superintendent, goods; *see* agent, goods.

Superintendent, goods shed; goods yard superintendent, (obsolete), *see* yard master.

Superintendent, locomotive running; loco. running superintendent, locomotive superintendent, loco. superintendent; is head, at general or divisional headquarters, of department responsible for engine working for running repairs of locomotives at sheds, and sometimes also for washing, coaling, lighting and greasing of carriages, but not for construction; issues directions to district locomotive and station masters as to divisional locomotive superintendent *q.v.*

Superintendent, mineral trains; *see* agent, mineral.

Superintendent of works, superintendent of way and works; is responsible for maintenance, in good condition, of permanent way; directs permanent way inspectors *q.v.* accordingly.

superintendent, outside machinery; controls and directs staff responsible for care of and repairs to all outside machinery on a railway system, e.g. cranes, hauling apparatus, etc.

superintendent, passenger; combines functions of superintendent, so far as passenger traffic is concerned, and of passenger manager *q.v.*

superintendent, police, *see* chief of police.

superintendent, running shed; shed superintendent; is responsible to locomotive running superintendent, or to divisional locomotive superintendent or to district locomotive superintendent *q.v.* for oversight of locomotive running shed; directs train staff, drivers, firemen (701) *q.v.*, etc., and repair staff, boiler smiths (199), fitters (219) *q.v.*, etc.

superintendent, sack; supervises work of sack department of a rail way system, or a district thereof, sees that proper count is kept, and obtains reports from stations and depots as to state of stock; *cf.* sack and sheet manager.

superintendent, shed; (i) *see* superintendent, running shed; (ii) (obsolete), *see* yard master.

superintendent, sheet; controls and supervises all work in connection with tarpaulin sheets in a district, pays periodical visits to depôts; obtains returns showing stocks and disposal of sheets, etc.; *cf.* sack and sheet manager.

superintendent, signal; signalling superintendent; responsible to civil engineer for effective staffing, equipment and maintenance of signal system throughout railway; *cf.* superintendent, signal and telegraph.

superintendent, signal and telegraph; combines functions of signal superintendent and of telegraph superintendent *q.v.*

superintendent, station; (i) *see* station master; (ii) a goods agent *q.v.* in charge of a goods station.

superintendent, stores; chief store-keeper, chief stores superintendent; is administrative head of stores department of a railway system; controls purchases and issues of stores, including locomotive coal.

superintendent, telegraph; is responsible to civil engineer or to superintendent *q.v.* for effective staffing, equipment and maintenance of telegraphic system throughout railway, *cf.* superintendent, signal and telegraph; superintendent, electrical and telegraph.

superintendent, traffic, *see* manager, general traffic.

superior fireman, *see* chief fireman.

townsman, traffic collector, *see* car-builder.

train despatcher, *see* controller.

train timekeeper; a district inspector *q.v.* who keeps records of times of all trains arriving at, or departing from, a large station, and renders returns to authorities concerned.

yardman, chief, *see* inspector, yard.

yard master; depot master, goods shed superintendent, shed superintendent (obsolete); (i) is responsible for effective working of goods yard; personally or through assistant yard master *q.v.*, directs general foremen (goods), goods porters, checkers, callers-off, loaders (706) and, in particular, directs shunters (704) *q.v.* in breaking up incoming goods trains, marshalling wagons for trains; (ii) sometimes has similar responsibilities in passenger yard, marshalling and breaking up passenger trains.

yard master, assistant; assists yard master *q.v.* in directing marshalling operations in yard.

704.-LOCOMOTIVE ENGINE DRIVERS, FIREMEN, CLEANERS (including Motormen)

chargeman, engine cleaner, cleaner chargeman, cleaner shed chargeman; *see* engine cleaner; supervises engine cleaners *q.v.* in railway engine depot, and is responsible to running foreman or to running shed foreman (700) *q.v.* for efficient performance of their duties. cleaner, engine, cleans, with cotton waste, sponge, cloths, etc., paint, brasses and bright steel external parts (fixed and moving) of locomotive on its arrival at shed after a journey; removes dust, ash, etc., and greases steel parts in preparation for next journey.

cleaner, motor (electric railway); an engine cleaner *q.v.* who cleans parts of electric rail locomotive with cotton waste and brush, and dismantles for repair when necessary. cleaner, shed; an engine cleaner *q.v.* who has passed his tests for fireman *q.v.* on a locomotive, and is waiting for a vacancy; will relieve fireman when necessary; *see* fireman.

driver, engine; driver, loco; driver, (work, locomotive), locomotive driver, controls running of engine generally by operating valves, throttle, etc.; keeps look-out for signals; regulates supply of steam to engine according to nature of track, load and time schedule; applies brakes when necessary; supervises work of fireman and assisted by him, oils engine bearings, cleans and trims lamps, applies sand blast when rails are greasy; in conjunction with guard (702) *q.v.*, is responsible for time-keeping of train. driver, auto-car; *see* motor car driver; (i) an engine driver *q.v.* who drives train on rail motor branch line, engine and passenger coach usually being built as a whole; (ii) drives auto-car, or rail motor, used for inspection trips.

driver, electric motor bogie; a motor man *q.v.* who drives an electrically-propelled bogie used for conveying workmen, stores, etc., in connection with repair work.

driver, locomotive; loco. driver (work, locomotive); (i) *see* driver; (ii) more specifically an engine driver *q.v.* who drives a locomotive (steam, electric, petrol or compressed air) used for conveying materials, etc., at works, mines, quarries, docks, etc.

driver, rail motor car, *see* driver, auto-car.

driver, shunting; shunting engine driver; an engine driver *q.v.* in charge of a locomotive engaged in shunting operations in yards or sidings, and not on running lines.

driver, steam motor; *see* driver, auto-car, except that he drives a steam motor car.

engine man; general term to cover either engine driver or fireman *q.v.* engine man, shed; engine shunter.

engine driver *q.v.* as an engine shed employed on shunting engines, turning from one line to another by means of turntable, either manœuvreing them under own steam or pushing them with shunting engine as convenient.

engine-men's mate, shed, *see* fireman, shed.

fireman, engine fireman, locomotive fireman, engine stoker (locomotive), fireman, loco; (i) works on locomotive with driver *q.v.* and feeds furnace by shovelling coal from tender; cleans and brightens fire by raking, or, where oil fuel is used, regulates supply of oil and cleans burners; sees that steam is maintained at correct pressure; assists driver in oiling bearings; fills, cleans and trims lamps; fills sand box with dry sand before starting journey; sometimes takes charge of engine whilst driver is looking out.

fireman, locomotive (works or mines); stoker furnace of works loco-

motive and generally assists locomotive driver *q.v.*; watches for signals from shunters (704), and sometimes assists engine shunter *q.v.* by acting as shunter and pointman; keeps bellers, etc., of locomotive clean.

fireman, shed; shed engine-men's mate; acts as fireman *q.v.* to shed engine-men *q.v.*

fireman, steam motor; acts as fireman *q.v.* to steam motor driver *q.v.*

foreman engine cleaner, *see* charge-

man engine cleaner.

motor man; drives an electric train, by operating control levers and brakes; watches for guard's starting signal and keeps look-out for signals along line; in conjunction with guard, is responsible for time-keeping of train.

pilot, pilot man; (i) an engine driver *q.v.* delegated to drive between two points to pick up goods train at first point and leave it at second; (ii) after breakdown, a competent person (railway official designation) e.g. a guard (702) *q.v.*, who accompanies a train between given points on single line, other line being temporarily out of use, to advise driver of difficulties of road, special signalling arrangements, etc., really derivative badge; no train may travel on such line without pilot; *cf.* pilot guard (702).

stoker, engine stoker (locomotive), *see* fireman.

turner, engine turner, turntable man; acting in conjunction with shed engine man, or shunter, or motor car driver, turns upon which locomotives are turned round, to enable them to be changed from one line to another, or to face in opposite direction from that which they arrived.

turner, shed; turner-in; a turner *q.v.* who operates turntable to allow of motives to run into or out of engine shed.

702.-RAILWAY GUARDS, etc.

acting guard; a porter-guard *q.v.* who acts as guard *q.v.* in case of emergency.

assistant guard; under guard; a goods guard or passenger guard *q.v.* travelling on section of train which is uncoupled from main train at certain point and goes forward as separate train; after train divides, is responsible for control of brakes in his portion of train and for passing-on starting signal to driver (701) *q.v.*; after train divides, takes charge as guard *q.v.* of his portion of train; sometimes specially designated, e.g. assistant goods guard, assistant passenger-guard.

attendant, ballast train, *see* ballast guard.

attendant, carriage; club carriage attendant, club select attendant, smoking attendant, sleeping car attendant, *see* for attendant, train.

tendant, train; attends to passengers' comfort on long-distance expresses, especially night trains; patrols train, answers queries, fills lavatories, etc.; on night trains, prepares sleeping compartments, issues pillows, rugs, etc. to passengers in ordinary compartments; sometimes examines passengers' tickets en route; *see* porter, mainly engaged, *cf.* ticket cutlector (703).

auto car guard, *see* conductor, motor, ballast guard; ballast train attendant, ballast brakeman; a goods guard *q.v.* in charge of a train of trucks conveying ballast for use in repair or permanent way.

brakeman, ballast, goods, mineral, passenger, *see* ballast guard, goods guard, mineral guard, passenger guard, respectively.

branch guard; a goods guard or passenger guard *q.v.* who works on branch line trains; sometimes specially designated, e.g. branch goods guard, branch passenger guard.

carriage guard, *see* passenger guard.

collector guard; a passenger guard g.v. who collects passengers' tickets en route at certain stations on branch lines; sometimes issues voucher fares to passengers without tickets, and collects fares from them.

conductor (electric railways); a passenger guard g.v. on an electric train. conductor, motor; motor car conductor, rail motor guard; conductor; motor guard, auto car guard; a passenger guard g.v. in charge of a small train (generally of one or two coaches, propelled by engine controlled from one of these coaches) employed on local shuttle services; sometimes issues tickets to passengers boarding train en route, and collects fares from them.

electric train conductor, electric train guard; a passenger guard g.v. who accompanies an electric train to coach next to driver; receives bell signals from gatesmen on underground railways; cf. gatesman (electric train). fish guard; a passenger guard g.v. in charge of train of trucks conveying fresh fish from port to London or other inland centres, and travelling under passenger train signalling arrangements.

freight guard, see goods guard.

gatesman (electric train); travels on platform at end of a coach, or pair of coaches, in an electric train and opens and closes gates at stopping stations; gives, or receives, and passes signal when train is ready to proceed.

goods guard; freight guard, goods brakeman; a guard g.v. who works on a goods, haulage or mineral train, whether on main or branch line or in yard or siding; is responsible for seeing that packages or full trucks for foreign lines are delivered or uncoupled at tranship stations; sometimes also does work of train preparer g.v.

guard; in charge of a train (passenger, goods, etc.); examines train before journey is started to ensure that it is in running order; is responsible for keeping records of running times of his train; controls emergency brakes; gives starting signal to driver (701) g.v., and delivers railway correspondence at stopping stations.

mineral guard; mineral brakeman; a goods guard g.v. in charge of mineral train.

motor guard, see conductor, motor.

passenger guard; carriage guard, passenger brakeman; a guard g.v. in charge of a passenger train; sorts luggage and parcels en route to facilitate prompt discharge at stopping stations; sometimes examines and, in some cases, collects passengers' tickets between stations during journey; receives and delivers tickets sometimes also issues tickets to passengers joining train at halts where there is no booking office.

pilot guard; a guard g.v. who pilots trains over portion of line where single line working necessitates, or over bridges under repair.

porter-guard, porter-brakeman; a porter (705) g.v. employed most of his time as guard on local goods or passenger trains, learning guard's duties in preparation for promotion if suitable.

relief guard, spare relief guard; a guard (passenger or goods) g.v. who is available to take place of a guard absent from duty.

sorting guard, parcels sorting guard; a passenger guard g.v. who is specially facilitated to sort parcels en route to facilitate prompt handling at stations.

spare goods guard; a goods guard g.v. available to take place of another guard absent from duty.

train preparer; goes along train in goods yard and sees that wagons are properly coupled before journey; graded as porter-guard g.v. by whom work is sometimes done.

tranship guard; a goods guard g.v. who travels in train with passenger guard where goods from train are to be transhipped, i.e. loaded into vessels or transferred to other lines, etc.; remains with goods until transhipment completed and renders invoice to foreman porter (706) or to station master (700) g.v. under guard, see assistant guard; sometimes specifically designated, e.g. under goods guard, under passenger guard.

703.—SIGNALMEN.

assistant signalman, see underman. assistant signalman, relief, see signalman, relief.

block boy, see signal lad.

bridgeman (railway); directs water traffic through water way, crossed by movable railway bridge, when bridge is open; attaches fasteners to bridge pins to prevent latter from closing; sometimes moves levers which open and close bridge, and if it is also a pedestrian bridge, locks and unlocks gates giving access thereto; sometimes relieves in signal box; graded as signalman or as porter (706) g.v. according to exact nature of duties.

bridge master; a signalman g.v. working in a signal box which controls railway traffic over a swing or movable bridge crossing a waterway; gives signal to bridgeman g.v. to open bridge to allow water traffic to pass; gives signal upon approach of train. charge signalman; is in charge of a signal box in which two or more signalmen are employed; obsolescent; signalmen now generally take charge in turn, in such a box.

learner, signal; (i) a signal lad g.v. working in a signal box, under supervision of signalman g.v., learning duties in preparation for taking over full responsibilities; (ii) a boy sent to School of Signalling to learn signalman's duties before entering signal box; usage confined to one railway, obsolescent.

relief man (signalman), see signalman, relief.

signal lad, signal clerk; block boy, telegraph lad, train booker, train recorder, train register boy; works in signal box under supervision of signalman g.v.; transmits minor telegraph and telegraph messages; records in block book movements of trains into and out of section; at age of 18 is graded as porter (706) or as porter signalman g.v.

signalman (railway); works in a signal box, controlling movements of trains over a section of line; receives and despatches, by telephone or telegraph, messages as to movements of trains; accepts trains, i.e. allows them to enter his section, or refuses them; i.e. keeps signal against them if line not clear; pulls levers to move signals and points along section of line under his charge; is responsible for keeping block book; cf. signal lad.

signalman, district relief, see signalman, relief.

signalman, porter; signal porter; a porter (705) g.v. who performs duties of signalman g.v. in order to learn duties in preparation for promotion to that grade.

signalman, relief; sick relief signalman, spare signalman, travelling signalman; district relief signalman, relief assistant signalman, spare man, special staff man; a signalman g.v. available to take place of an absent signalman, at any signal box in a particular district when not on relief duty, is posted in a busy box, which he has not relieved for a considerable time, to keep in touch with work.

signal porter, see signalman, porter. signal porter, relief; a porter signalman g.v. who takes place of an absent signalman or porter signalman.

spare man, special staff man (signalman), see signalman, relief.

staff man; a signalman g.v. who delivers special staff to engine-driver (701) g.v. on single line, authorising him to travel over next section, and receives from him staff for section just passed; obsolescent.

tabletman (railway); a signalman g.v. who works electrical tablet train block signalling system on single lines; receives tablet from engine driver (701) g.v. for last section, and hands him one to clear him for next section.

telegraph lad (railway signal box), see signal lad. telegraphist, signal (railway); a signalman g.v. who sends and receives telegraph messages in a large signal box; does other work of signalman as necessary.

towerman (railway); train reminder; a signalman g.v. who stands on a tower, bridge, or other vantage point, and gives signals as to movement of trains, especially those being shunted, by flag signalling.

traffic regulator; a signalman g.v. of higher grade, available to go to any signal box in a particular district and to regulate precedence of trains during breakdowns or a delay on line; gives instructions to signalmen working in box; sometimes is permanently posted in a very busy signal box.

train booker, train recorder, train register boy, see signal lad; cf. train recorder (706).

train reminder (railway), see towerman.

tunnelman (railway); a signalman g.v. whose box is at mouth of a tunnel.

underman (signalling), under signalman; assistant signalman; a signalman g.v. who assists another signalman in a box requiring more than one operator.

704.—SHUNTERS, POINTMEN, AND LEVEL CROSSING MEN.

assistant district traffic foreman; supervises running of goods trains in specified area, e.g. section of district covered by district inspector (705) g.v., or in large goods yard, under control of yard master (700) g.v.; in latter case, has rather more responsible duties than yard foreman g.v. backing-out porter; a shunter g.v. who directs, by hand signalling, engine driver (701) g.v. when backing train out of station, siding, or shed.

bank foot man, incline; stands at foot of bank or incline and releases brakes of goods wagons as they reach level; cf. bankman.

bank head man, incline, see brakeman, bank.

bankman; incline man, plane man; a shunter g.v. engaged in shunting operations on a bank (hump) or incline; uncouples trucks on incline so that they descend by own gravity, are steadied by bank brakeman g.v., and are directed into appropriate siding at foot by pointman g.v.

brakeman; a shunter g.v. employed in yard, who applies brakes to stop goods wagons, as necessary, during shunting operations; depresses brake levers, by hand, or by sitting on them, of shunter; work done by goods guard (702) g.v. when travelling.

brakeman, bank; incline brakeman; incline bank head man; stands at top of bank or incline, and applies brakes of goods wagons, before they descend bank, cf. bankman.

branchman (shunter); a shunter g.v. shunting mainly on branch lines, instead of mainly in shunting yards; sometimes travels on goods train from one station siding to another to do shunting where no shunter is kept.

breaker; train receiver; a shunter g.v. responsible to yard foreman (traffic department) g.v. for receiving goods trains on arrival at shunting or marshalling yard, and breaking them up into sections of one or more trucks to be shunted into appropriate sidings, sidings or stages for unloading.

chain horse driver; see chain horse driver.

chain horse lad; slipper boy or lad; assistant about horse driver g.v.; attaches and detaches (slips) chain hook from truck to slacken speed, etc., holds horse when not working; coach worker; coaching shunter; a shunter g.v. shunting passenger train vehicles.

connector, train connector; coupler, hook-on; a shunter g.v. who couples up trucks into sections in goods yards or sidings; or who couples-up passenger coaches and joins up brake connections in readiness for journey.

connector, passenger train; carriage coupler; a connector g.v. who couples-up passenger train vehicles.

coupler; see connector.

coupler, carriage; see connector, passenger train.

crossing keeper, level crossing keeper; gatekeeper, gateman (level crossing); level crossing gateman, level crossing man; in charge of a level crossing on a railway line opening and closing gates by hand-worked mechanism, or by hand, for passage of trains, or for passage of road vehicles and (sometimes) pedestrians. Sometimes also lights, trims and cleans lamps on crossing gates; performs duties of crossing policeman, flag man, signal gateman, or of gatekeeper and pointman g.v.

crossing policeman, crossing watchman; policeman (protecting crossing); a crossing keeper g.v. stationed at a level crossing or at cross road where railway traffic, rail, motor, or canal, is continually passing across a public highway, to warn travellers of approaching traffic and to prevent trespass; is not member of railway police force; cf. policeman (709).

despatch foreman; a yard foreman (traffic department) g.v. responsible for seeing that marshalling proceeds so that trains start at scheduled time, precise formation dependent upon yard organisation.

flagman, train flagman; a crossing keeper g.v. who waves a red flag to warn road travellers of approaching traffic at a level crossing, etc.

foreman (passenger) shunter; a yard foreman g.v. engaged at carriage sidings and stations in making-up and altering composition of passenger trains.

foreman shunter; see yard foreman (traffic department); obsolete.

foreman shunter (coal mines); see traffic shifter (coal mines).

gatekeeper and pointman; pointman and level crossing keeper; a crossing keeper g.v. who also operates, by hand lever, a set of points adjacent to his post, cf. pointman.

gatekeeper, gateman (coal mines); in charge of gates at coal company's railway crossing; opens and closes gates to allow passage of coal trucks, workmen or general public.

gatekeeper, gateman (level crossing); see crossing keeper; cf. gatekeeper, gateman (708).

gateman, relief; a crossing keeper g.v. who takes place of any crossing keeper absent from duty in a specified district.

gateman, signal; gateman and signalman; a crossing keeper g.v. who also operates set of signals, not block signals, at his post.

gatewomans; opens and shuts gates at level crossing to allow road or railway traffic, as case may be, to pass.

ground framan, ground pointman; ground signalman, groundman; outdoor pointman; a pointman g.v. who moves hand levers in the open to work single points or ground signals and points in ground frames.

hose shunter; leading shunter; in charge of a number of shunters g.v. at large goods yard; obsolete.

hook-on; see connector, horseman (shunting), horse pilotman, see shunt horse driver.

incinerator; see bankman.

latcher, loco latcher, lachman, see pointman (or boy) (mines, quarries, works railways, etc.).

leading shunter; see head shunter.

level crossing gateman, level crossing man; see crossing keeper.

marshman; arranges shunting of trucks and wagons in goods yards or sidings to make up trains, or sections thereof, in readiness for journey; if mainly engaged in supervisory duties, is graded as yard foreman, otherwise as shunter g.v.

mineral foreman; a yard foreman g.v. employed at a mineral depot.

planeman; see bankman.

point box man; a pointman g.v. who operates points from box in shunting yard.

point holder; a pointman g.v. working in yards or sidings, who holds back, by moving hand levers, "spring-points" (points which have no locking lever), releasing them when rolling stock being shunted has passed.

points boy, points lad; switch boy, switch lad; puller levers, etc., under instructions of pointman g.v. and latcher, his work.

pointman; switchman; operates set of points or switches in shunting yards or sidings; sometimes gives and receives bell signals, but is not in charge of block points; usually works in pairs. If working ground frame or single point levers, cf. ground framan. Works under cover, in a point box, cf. point box man, where there is an electric valve system of point working and yard signalling, or in large yards, where point levers have been assembled in point box: cf. point holder, point turner.

pointman and level crossing keeper, see gatekeeper and pointman.

pointman (or boy) (mines, quarries, works railways); latcher, lachman, loco latcher, shunter (mines, quarries, etc.); rides on locomotive with driver, couples and uncouples wagons, and alters points on works railway or sidings to control movements of vehicles.

pointman, outdoor; see ground framan.

point turner; a pointman g.v. who operates turn-points, points worked by horizontal arm, instead of usual pullback levers.

policeman (protecting crossing); see crossing policeman.

porter gateman; combines duties of porter (706) and of crossing keeper g.v.; obsolete.

porter, horseman (shunting); combines duties of porter (706) and of shunt horse driver g.v.; obsolete.

porter, mineral; a shunter g.v. employed at a mineral depot; obsolete.

porter, pointman; combines duties of porter (706) and of pointman g.v.; obsolete.

porter shunter, porter yardman; combines duties of porter (706) and of shunter g.v.; obsolete.

regulator, yard regulator; obsolete; see yard foreman (traffic department).

scotcher, scotch lad, scotch spragger; see spragger.

shunter; from setter (obsolete), shunder; couples and uncouples locomotives and empty railway vehicles to enable them to be moved into position or arranged in order (marshalled) in yard or sidings; signals, usually with his arm, movements required to engine driver (704) or to shunt horse

driver g.v. to move vehicles backwards or forward or to stop, as necessary; lifts, with his coupling rod, lever at wagon side to apply brake, as required; marshals and couples-up passenger coaches or goods wagons in readiness for journey; breaks-up trains on arrival at goods depot, or on return to exchange sidings after a journey, and directs shunting of units or sections into appropriate sidings; when employed at passenger stations, couples and uncouples locomotives and horse boxes and shunts horse boxes into and out of sidings, sometimes specifically designated, e.g. carriage and wagon shunter, coaching (i.e. passenger carriage) shunter, dock shunter, freight shunter, goods shunter, passenger shunter, wagon shunter.

shunter and lampman; combines duties of shunter g.v. and lampman (705) g.v.; obsolete; graded as shunter or, alternatively, as lampman, according to work upon which mainly engaged.

shunter, coachman; see coach worker.

shunter, horse; pilot shunter, see shunt horse driver.

shunter (mines, quarries, works railways, etc.) see pointman (mines, quarries, works railways).

shunter, relief; takes place of any shunter g.v. within a prescribed district, who may be absent from duty.

shunter, shed; a shunter g.v. employed in shed to move local wagons about and to arrange in order for despatch; uses a pole to move wagons.

shunter signalman (railway); operates signals in shunting yard or siding as required by shunters g.v.; cf. yard signalman.

shunter, trip; travels with goods train to see shunting work at a small yard or siding where no shunter g.v. is stationed; sometimes does work of goods guard (702) g.v. and is so graded; otherwise graded as shunter.

shunt horse driver; a brakeman g.v. who applies brakes as directed by shunt horse driver g.v.; normally only driver is employed.

shunt horse driver; chain horse driver, horseman (shunting), horse pilotman, horse shunter, pilot shunter, truck horse driver; in charge of horse which draws trucks or coaches into or out of railway sidings or on to branch line during shunting operations; yokes and unyokes horse to and from truck or coach, as necessary; groom and attends to horse where there is no stableman. (725) g.v.

shunt minder, sideman (coal mines); directs shunting arrangements in sidings and branch railway at colliery; cf. leading minder (703).

signalman, yard (railway); controls and operates signals in a goods yard or a passenger coach yard; cf. shunter signalman.

slipper boy or lad; see chain horse lad.

spragger; scotcher, scotch lad, scotch spragger; applies extra brake power to mineral train trucks at top of steep incline by inserting sprags or scotches, i.e. billets of wood, between wheel spokes and axle guards to prevent wheels turning; rides on train to bottom of incline, where he removes sprags; or is similarly employed in shunting yards under direction of shunter; cf. brakeman.

switch boy, switch lad, see points boy.

switch keeper (colliery); a pointman g.v. in a colliery district who operates points to run coal trucks into various coal sidings.

switchman, see pointman.

traffic shifter (coal mines); foreman shunter (coal mines); is responsible for moving of railway wagons to and from railway sidings at screens; supervises pointmen (mines, etc.) and shunters g.v.

train foreman; obsolete; see yard foreman.

train receiver, see breaker.
 train setter; obsolete, see shunter.
 trapper; a pointman *q.v.* employed in coal mining district, who switches or "traps" individual coal trucks or wagons (or groups of trucks or wagons) into different sidings as they are "hit up" by shunting engine driver (701) *q.v.*
 truck horse driver, see shunt horse driver.
 truckman (metal mines); a shunter *q.v.* on surface of iron ore mine, who moves railway wagons about; may also work points, see pointman (mines).
 under shunter; under direction of shunter *q.v.*, couples or uncouples railway vehicles, applies brake to wagons, directs units into sidings and otherwise assists in shunting operations.
 wagon berther; a shunter *q.v.* who detaches trucks and shunts them into required berths in yard for loading or unloading.
 wagon changer; wagon lowerer, wagon runner, wagon shifter; changes wagons when filled at screen or vacker, i.e. runs out full wagons and replaces by empty ones.
 wagon distributor, see wagon sorter.
 wagon lowerer, see wagon changer.
 wagon runner; (1) see wagon changer; (2) name sometimes given to shunter or pointman *q.v.* in ship-building yards.
 wagon shifter, see wagon changer.
 wagon sorter; wagon distributor; a shunter *q.v.* who sorts out and assembles empty wagons in goods yard according to their home stations, ready for return.
 yard foreman (traffic department); (obsolete) foreman shunter, regulator, train foreman, yard regulator; directs work of shunters and of pointmen *q.v.* in passenger or goods marshalling yard, is responsible to yard master, yard inspector (700) *q.v.* for shunting operations generally, and in particular for receipt of trucks at appropriate platforms for loading and unloading, for movement of traffic in yard, and for marshalling trains in readiness for departure from yard; in large sheds above work may be subdivided among two or more yard foremen.
 yard foreman, passenger; a yard foreman *q.v.* who directs work of shunters and pointmen *q.v.* marshalling passenger train vehicles.
 yardman, see shunter.

705.—TICKET COLLECTORS AND EXAMINERS.

chief ticket collector, see foreman ticket collector.
 clerk collector, combines duties of clerk (390) and of ticket collector *q.v.*; obsolete, now graded either as clerk or as collector according to exact nature of duties.
 corridor train collector, see train ticket collector.
 excess collector, excessman; collects excess fares from passengers when travelling, *e.g.* by a route or in a class other than that covered by their tickets; obsolete, now graded as ticket inspector, ticket collector or train ticket collector *q.v.* according to exact nature of his duties.
 foreman ticket collector, foreman ticket examiner; chief ticket collector, head ticket collector, senior ticket collector; controls work of ticket collectors *q.v.* at large stations; arranges rosters etc.; sometimes himself collects tickets.
 gateman (ticket collector), gate ticket examiner, see ticket collector.
 head ticket collector, senior ticket collector, see foreman ticket collector.
 ticket collector, ticket checker, ticket examiner, ticket taker; gateman (ticket collector), gate ticket examiner; collects and examines tickets of passengers leaving arrival

platform; examines and clips tickets of passengers entering departure platform; charges excess fare where due.
 ticket inspector; boards trains and examines passengers' tickets; directs passengers as to route where necessary; collects excess fare where due, or takes particulars of passengers' addresses, etc., for recovery of fares in certain instances.
 toll collector, bridge toll collector; collects tolls from pedestrians, drivers of vehicles, cattle drivers, etc., passing over bridge owned by railway company; renders periodic reports to toll inspector (700) *q.v.*
 train ticket collector, travelling ticket collector, travelling ticket examiner; corridor train collector; collects tickets on corridor trains and excess fares where necessary; is attached to head office or to a district office and is usually rostered to travel regularly with specific trains; under supervision of ticket inspector *q.v.*, makes surprise examinations of passengers' tickets at any station or on any passenger train running in specified district or on main lines.

706.—PORTERS AND LAMPMEN.

auto-carrier driver; electric truck operator; a parcel porter *q.v.* who drives electrically-propelled truck, conveying passengers' luggage at large railway station.
 bankman, horse and carriage, see porter, horse and carriage.
 booking hall inspector; hall inspector; has general supervision of booking hall at large station; directs passengers, etc.; graded as station foreman or as station inspector (740) *q.v.* according to size of station.
 book room assistant, book room attendant; book room porter; an office man *q.v.* who issues ledgers, books, columns of abstracts, returns, invoices, delivery notes, etc., from book room to offices as required, and replaces them when returned; is responsible for general care of book room.
 butter man (goods depot); a goods porter *q.v.* who is mainly engaged in loading and unloading cases of butter at goods station or depot.
 cab controller; a station foreman *q.v.* who sees that cabs keep their proper places on station rank; sometimes also calls cabs for passengers.
 caller, caller-off, caller-out; loads and unloads trucks in goods depot; calls out particulars of incoming and outgoing consignments, from labels on goods, to goods checkers *q.v.*, in preparation for their removal from platform or wagon by goods porters *q.v.*
 capstan man, capstan driver; capstan porter, jigger porter (slag); moves trucks in goods depot by depressing foot lever actuating automatic capstan to which one end of rope is attached, other end being attached to truck.
 carriage searcher; porter searcher; a porter *q.v.* who searches railway carriages after arrival of train at destination; removes newspapers and other articles left behind by passengers, to lost property office.
 cattle man; cattle loader, cattle porter; a goods porter *q.v.* who loads and unloads cattle at railway cattle shed.
 cellarman; a checker *q.v.* who keeps record of goods deposited in cellar warehouse rented by firms on railway company's premises.
 charge checker; a foreman *q.v.* who directs and controls checkers *q.v.* at goods station or depot.
 checker; referencer (obsolete); shipper; checks, by comparing with waybills, incoming consignments as they are unloaded by caller-off and by goods porters *q.v.*; checks weight of each consignment against consignment note as called off; records and

checks numbers or weights of outgoing goods and furnishes records to goods depot office; sometimes also works jigger, i.e. capstan, whilst checking goods into or out of railway warehouse; sometimes specifically designated, *e.g.*, coal checker, goods checker, grain checker.
 checker, fish; a checker *q.v.* wholly or mainly employed in connection with fish traffic; graded as parcel porter *q.v.*
 checker loader; check loader; weighs goods as checked on weights shown in consignment notes; graded as scaleman *q.v.*
 checker, mileage; a checker *q.v.* who is delegated to check goods to be charged on mileage basis.
 checker, milk; a checker *q.v.* wholly or mainly employed in connection with milk traffic; graded as parcel porter *q.v.*
 checker, parcel; a checker *q.v.* wholly or mainly employed in connection with parcel traffic; graded as parcel porter *q.v.*
 checker, railway; a checker *q.v.* who checks loading and unloading of railways, i.e. drays.
 checker, shed; a checker *q.v.* working on platform of goods shed, checking goods into and out of trucks and vans.
 checker, slip; a checker *q.v.* who checks contents of goods wagons with list shown on wagon slip.
 chief number taker; in charge of small staff of number takers *q.v.* at goods depot; is responsible for seeing that records properly kept and for general supervision of work.
 clock room attendant (male), clock room counterman; clock room porter, counter porter, left luggage attendant, left luggage porter, luggage room porter; receives luggage from passengers, issues vouchers, and returns luggage to owners on racks and returns it to owners on production of vouchers; makes returns and hands cash receipts to station master (700) *q.v.* or to cashier (550) *q.v.*; is sometimes assisted by porter *q.v.*
 despatch bag carrier; despatch office porter; a porter *q.v.* who carries letter despatch bags from one department of railway office to another, or between despatch office and trains.
 disinfecter; sprays cattle pens and cattle trucks with disinfectant.
 district relieving man, see porter, relief.
 dockman; (i) a horse and carriage porter *q.v.* at docks, i.e. platforms, where horses and carriages, cattle, etc., are loaded or unloaded at passenger station; (ii) a goods porter *q.v.* employed at seaport docks owned by railway company.
 electric truck operator, see auto-carrier driver.
 excess luggage collector, excess luggage labeller, excess luggage man; excess baggage weigher, excess porter, luggage weigher; casually examines passengers' luggage entering station and weighs it, if necessary, to see if over weight allowed free; collects excess charge where due; issues excess slips; labels luggage and sometimes assists in loading it into guard's van; passes cash receipts, with vouchers, to station master (700) or to cashier (550) *q.v.*
 excess man (parcel), parcel excess man; a parcel porter *q.v.* who weighs parcels in parcel despatch office, and surcharges any that are underpaid.
 fish transit man; attends to fish in transit discharging boxes, baskets, etc., at stations en route; removes ice when necessary, etc.; graded as parcel porter *q.v.*
 foreman, booking hall; a station foreman *q.v.* who supervises porters *q.v.* direct consignments to platforms, etc., in a booking hall or station approach.

foreman, excess luggage; a station foreman *q.v.* who directs and supervises excess luggage collectors *q.v.* and is responsible for efficient performance of their work.

foreman, fish; foreman fish porter; superintends loading and unloading of fish at a railway goods station or fish depot; graded as parcel foreman *q.v.*

foreman, general (goods); goods foreman; directs and supervises goods porters, checkers, callers-off, loaders *q.v.*, etc., at a railway goods station or depot, or section thereof; is responsible for efficient performance of their work.

foreman, horse, carriage, and dogs, H. C. & D. foreman; a station foreman *q.v.* who directs and supervises porters loading and unloading horses, carriages, and dogs at a horse and carriage dock.

foreman horse loader; horse leading foreman; a station foreman *q.v.* in charge of men loading and unloading horses at railway depot or quay.

foreman lampman, lamp-room foreman, foreman lamp-room porter, lamp foreman; a station foreman *q.v.* in charge of lamp-room at large railway passenger station, supervises lampmen *q.v.*; sees that lamps (mainly oil tail lamps) are properly cleaned and trimmed; is responsible for efficient working of lamp-room.

foreman, luggage; a station foreman *q.v.* who directs and supervises luggage porters *q.v.* at a station, or on one platform, or in luggage room, of a station.

foreman, milk; directs and supervises milk checkers and milk porters *q.v.* and other men handling milk traffic at a railway station; graded as parcel foreman *q.v.*

foreman, parcel; foreman parcel porter; directs and supervises parcel porters *q.v.* attached to station parcel office; is responsible to parcels inspector or to station master (700) *q.v.* for expeditious handling of incoming and outgoing parcel traffic.

foreman, parcel post; a parcel foreman *q.v.* in charge of parcel post traffic.

foreman, platform; directs and supervises porters *q.v.* on one particular platform; sees to handling of luggage; directs passengers, etc.; graded as station foreman *q.v.*

foreman, platform and general; a platform foreman *q.v.* who is also engaged, in a supervisory capacity, in general work of station; graded as station foreman *q.v.*

foreman porter (obsolete). *see* foreman, station.

foreman, receiving office; a parcel foreman *q.v.* who supervises work of staff at town railway receiving office, i.e. an office at a distance from station, where goods and parcels are received for despatch by railway.

foreman, station; foreman porter (obsolete); in charge of a link, or number, of porters *q.v.* in one block of work on station premises and occasionally works with them; is responsible to station master (700) or to station inspector (700) *q.v.* for efficiency of his block.

foreman, traffic; (obsolete); now graded as general foreman (goods, locomotive foreman (700) working foreman, or yard foreman (704) *q.v.*, or as foreman in connection with specialised traffic, e.g. fish foreman *q.v.*

foreman, train label board; sees that label boards, showing destinations of trains, are affixed to railway carriages before train starts *q.v.* and stores label boards in cupboard rack at terminals.

foreman, working; part of time directs and supervises goods porters, loaders, shunt horse drivers (704) *q.v.* and other manual workers at goods depot; is responsible to yard foreman (704) for efficient performance of

block of work under his charge, but is employed more than half-time in non-supervisory duties.

ganger in charge of goods gang; a working foreman *q.v.* in charge of gang of labourers working in goods depot.

gongman; a porter *q.v.* who sounds electric gong on platform and in refreshment rooms of station, to warn passengers of approaching arrival or departure of train.

goods brake van cleaner; van attendant, van transfer; sweeps out and cleans goods brake vans after journeys, and sees that vans are kept properly equipped; graded as porter, goods porter *q.v.* at passenger stations and goods stations respectively.

goods labourer, as for porter goods; (obsolete).

hall inspector, see booking hall inspector.

halt attendant; a porter *q.v.* who attends at roadside halt, where there is no proper station staff; collects tickets from passengers alighting; issues tickets as far as junction to passengers entraining; work often done by travelling porter *q.v.*

head parcel porter, *see* leading parcel porter.

head porter, *see* leading porter.

head transfer porter; a leading porter *q.v.* in charge of transfer porters *q.v.* at a section of line; is responsible for proper carrying out of arrangements for transfer of luggage from one station to another station close by.

horse box cleaner; a horse and carriage porter *q.v.* who cleans out horse boxes with shovel and broom; puts in fresh straw, etc.

horse dockman, *see* porter, horse and carriage.

indicator attendant, *see* porter, train indicator.

invoices affixer, invoice attacher; a goods porter *q.v.* who receives invoices of goods despatched from goods office, and places them in small receptacle on side of wagon or truck containing these goods.

invoice detacher; a goods porter *q.v.* who detaches invoices from goods wagons or trucks on arrival at destination, and takes them to delivery office.

invoice man; a checker *q.v.* on delivery side of goods station, who checks goods on arrival with invoices forwarded by sending station.

jigger lad, *as* for porter, jigger.

Kitson and Empire Light attendant, lad; a station lamp man, or lad, *q.v.* who keeps incandescent gas lamps, made on Kitson and Empire system, in good order.

label boy; keeps label cabinet replenished with labels, paste, etc., and assists luggage labeller *q.v.* generally; graded as porter *q.v.*

labeller, carriages; train labeller; a porter *q.v.* detailed to put labels on railway coaches, indicating destination, or on carriage windows, indicating that they are reserved, etc.; also chalks up place of disposal of coach when journey is ended.

labeller, luggage; a porter *q.v.* who pastes labels showing destination on passengers' luggage.

labeller, train, *see* labeller, carriage.

labeller, truck; wagon labeller; *see* porter; a goods porter *q.v.* who attaches labels, showing route and destination, to goods (usually coal) trucks; (obsolete).

lampman, lamp keeper, lamp lad, lamp lighter, porter lampman, station lampman; lamp porter, lamp room porter, lamp trimmer; cleans, fills, trims, lights and extinguishes at specified times, portable lamps used in station, passenger train rear lamps and passenger carriage roof oil lamps, where used; removes lamps on borrow to and from lamp room; at some

stations, performs similar duties in regard to fixed oil or gas lamps, where not done by carriage and wagon department.

lampman and point cleaner; point cleaner and lampman; a porter (grade II) *q.v.*, in small station or depot, who cleans and lights lamps and cleans points along a certain section of permanent way or siding; (obsolete).

lampman, brake; a lamp man *q.v.* engaged in cleaning, trimming, and filling lamps for use on goods brake vans.

lampman, signal; signal cleaner and lighter, signal porter; responsible for cleaning, filling, trimming, lighting and extinguishing of oil signal lamps, arm or disc, on signals or shunt signals at station or depot.

lamp trimmer, *see* lampman.

lavatory attendant; lavatory porter; a porter *q.v.* who cleans floors, wash-basins, urinals and w.c.'s at a railway station, collects fees for use of wash-basins, etc.

leading cloak room attendant; directs and supervises cloak room attendants *q.v.* at a large station, and works with them.

leading lost property office attendant; directs and supervises lost property office attendants *q.v.* at a large station, and works with them.

leading parcel porter; head parcel porter; directs and supervises parcel porters *q.v.* and works with them at a parcel office not large enough to justify employment of a parcel foreman *q.v.*

leading porter; head porter, senior porter; a working foreman *q.v.* in charge of small staff of porters *q.v.* where no station foreman *q.v.* is employed; is responsible to station master (700) *q.v.* for carrying-out of jobs done by staff under him.

left luggage attendant, *see* cloak room attendant.

letter porter, letter carrier, letter messenger, letter office attendant; letter porter, letter sorter; a large railway station or depot, railway correspondence delivered by guards (702) *q.v.* of incoming trains or received from station offices, makes them up into packages, for delivery by porters *q.v.* to various departments or to guards of outgoing trains; small depots both sorts and delivers railway correspondence.

linen attendant, linen room attendant; a porter *q.v.* in charge of linen room at passenger station; issues clean sheets for sleeping berths and towels for use of sleepers of passenger trains; receives soiled sheets, etc., and is responsible for their being sent to laundry; keeps record of linen issued and returned.

load adjuster; a goods porter *q.v.* who adjusts loads on goods wagons where loads have shifted or where they will not pass gauges.

loader; stands in wagon during loading; receives packages of goods from goods porters *q.v.*, stows them securely and conveniently for delivery at stations en route.

loader and stower, luggage; a porter *q.v.* who loads passengers' luggage in guard's or luggage van, and stows it so as to be easy of access at intermediate stations.

loader, cattle, *see* cattle man.

loader, cattle, *see* checker loader.

loader, horse, *see* porter, horse and carriage.

loader, motor wagon; a goods porter *q.v.* who loads goods into road motor wagons at railway goods depot.

loader, timber; a goods porter *q.v.* wholly or mainly engaged in loading or unloading timber, either sawn or round (i.e. train loads); secures timber in place on wagons with chains; sometimes specifically designated, e.g. round timber loader.

loader, warehouse; a goods porter *q.v.* employed in loading or unloading goods, into and from wagons, in a railway company's warehouse.

lead recorder; a checker *q.v.* who records total weights loaded on wagons.
lost luggage attendant, *lost property office attendant*; receives lost property collected from passenger coaches by porters *q.v.* receives correspondence regarding lost luggage and submits suggested replies to station master (700) *q.v.*; issues reclaimed property to rightful owners direct, or forwards it, on owner's request, to some other station; keeps record of lost property received and issued and passes cash receipts to station master.

meat pitcher; a goods porter *q.v.* who handles carcasses at railway meat depot as directed by general foreman (goods) *q.v.*

miner, weighman; records gross weights of railway trucks, containing minerals, as they pass over machine; notes also tare of each wagon and nett weight of contents prior to despatch; if at receiving station, checks weight on arrival with that shown on invoice; graded as weighbridge man *q.v.*

newspaper searcher, *as for carriage searcher*.

number taker; records, for transmission to Railway Clearing House, numbers of privately owned, non-common-car, wagons and of foreign wagons, i.e. belonging to other companies, entering or leaving goods depot.

office man; invoice porter, office porter; receives incoming invoices, advice notes, etc., goes to depot and stamps them with serial numbers, circulates invoices to checkers *q.v.*; after invoices, etc., cleared by clerks (336) *q.v.*, passes them into invoice book, advice book, delivery book, etc., in serial number order and files them for reference; is responsible for custody of invoice books, etc.

parcel sorter; sorts parcels in railway parcels office for despatch according to stations, or for delivery, by carmen (719) *q.v.*

passenger number taker; a porter *q.v.* who records numbers and other particulars of passenger rolling stock belonging to another railway company on its arrival at or departure from a passenger yard.

pillow attendant; a porter *q.v.* who issues pillows to passengers on night trains on payment of a small charge; collects pillows from trains at terminus; may also do work of rug porter *q.v.*

platform man (electric railway); a porter *q.v.* who stands on platform of an electric railway and attends to closing of carriage doors or gates and to marshalling of passengers, e.g. away from entrance to avoid congestion.

point cleaner and lampman, *see* lampman and point cleaner.

porter, railway porter; in passenger department, duties, especially at small stations, are multifarious, but usually include some or all of following: (grade 1) carries passengers' luggage from station entrance to platform or vice versa; labels luggage and puts it in luggage office; removes luggage of arriving passengers from van; calls out destination of train as it approaches station and name of station while train stands therein; shuts carriage doors as train departs; unfastens couplings and brake connections when train has to be divided and couples them up when two or three portions of train have to be united; searches carriages on arrival of train at destination; for luggage and parcels left therein; supplies rugs, pillows and linen to travellers on night trains; loads or unloads parcels, luggage, milk cans, etc., into guard's van, or into special vans or trucks; cleans station platforms, waiting rooms, booking office and other station premises; removes old time tables from train table boards and pastes up new ones,

often also acts as lampman and sometimes as ticket collector (705) *q.v.* and in various other capacities; (grade 1) is engaged chiefly on more responsible work, e.g. issuing tickets at small stations (but does not do clerical work); at large stations does specialised work, e.g. coal porter, train indicator porter *q.v.*; in goods department, at where duties are specialised is usually specified by designated e.g., goods porter, parcel porter, horse and carriage porter *q.v.*, etc.

porter, basin; a goods porter *q.v.* who transfers goods from one truck to another in transferring area (basin) of a large goods depot or junction.

porter, booking; a porter *q.v.* who also acts as booking clerk (390) *q.v.* at small station.

porter, book room, *see* book room assistant.

porter, captain, *see* captain man.

porter, cash box; cash porter; travels with, and carries, special boxes which are used for transport of cash between stations and head office.

porter, cattle, *see* cattle man.

porter, cloak room, *see* cloak room attendant (male).

porter, clothing; assists in clothing or undressing of railway company; cf. porter, equipment.

porter, coal; a porter (grade 1) *q.v.* who fetches coal for fires in waiting-rooms, booking offices, etc., of a railway station.

porter, courier; (1) *see* porter, parcel; (2) *see* cloak room attendant.

porter, despatch office, *see* despatch bag carrier.

porter, equipment; assists in railway equipment stores, cf. porter, clothing.

porter, excess, *see* excess luggage collector.

porter, fish; a railway porter *q.v.* wholly or mainly engaged in loading and unloading fish into and from railway vehicles; cf. fish porter (740) (700).

porter, front door (railways), *see* porter, hall.

porter, goods; a railway porter *q.v.* employed at railway goods stations and depots in loading and unloading goods trucks, sweeping goods yard, cleaning cattle pens and wagons, carrying messages, attaching and detaching truck labels, etc.

porter, grain; a goods porter *q.v.* wholly or mainly engaged in handling grain.

porter, hall; front door porter; attends at entrance of a railway station, assists passengers with luggage, answers enquiries, etc.

porter, horse and carriage; horse box porter; horse and carriage bankman, horse dockman, horse leader; loads and unloads horses, show cattle, and dogs when not sent as parcels; carries, makes cars, theatrical scenery, etc., at passenger station sidings; cleans empty horse boxes, disinfects with sprayer and lime washes for future use; sometimes acts part time as porter or parcel porter *q.v.*

porter, invoice, *see* office man.

porter, lighter; (i) operates lifter, i.e. automatic chain hoist, used for raising or lowering goods to or from street level or from one floor to another in goods warehouse; (ii) *strong*, *see* captain man.

porter, junior; a porter *q.v.* under age of 18.

porter, lamp; lamp room porter, *see* lampman.

porter, lavatory, *see* lavatory attendant.

porter, left luggage, *see* cloak room attendant (male).

porter, letter, *see* letter porter.

porter, lost luggage; lost property office porter (collier); handles lost luggage, graded as porter, lost property office attendant *q.v.*, respectively, when engaged mainly outside, or inside of lost property office.

porter, luggage; attends to passengers' luggage; sorts it out as received from van; helps in loading; wheels it to luggage room, etc.

porter, luggage room, *see* cloak room attendant.

porter, market; a goods porter *q.v.* who works in a railway market, carrying, loading, and unloading goods.

porter, mileage; a goods porter *q.v.* who handles goods charged on a mileage basis, ensuring mileage checker, etc.

porter, milk; a parcel porter *q.v.* wholly or mainly engaged in handling milk churns at a station.

porter, night; a porter *q.v.* employed, in any capacity, regularly on night duty.

porter, office, *see* office man.

porter, parcel; counter porter; meets incoming and outgoing passenger trains to receive and deliver parcels, including milk churns, fish barrels, vegetables and general merchandise sent at passenger train rates, by hand truck or electric trolley; weighs parcels received over counter or unloaded from vans and calls over weights to parcels clerk (336) *q.v.*; places parcels in trucks in readiness for despatch; assists horse or motor parcel vanmen (719, 720) *q.v.* in loading van for town delivery and does other portage work in parcels office under direction of parcels clerk.

porter, parcel delivery; a parcel porter *q.v.* who accompanies a railway delivery van and distributes consigned parcels; takes receipts and collects cash when necessary.

porter, parcel peel; a parcel porter *q.v.* who attends to loading and unloading of G.P.O. parcels vans at a railway station.

porter, post; helps load or unload G.P.O. mail bags.

porter, receiving office; a parcel porter *q.v.* delegated to work in town parcels receiving office; moves and stacks parcels, etc., in office; looks into collecting van.

porter, relief; district relief porter; district relieving man, relief man, spare man porter; a porter *q.v.* attached to a district office, who takes place of porter absent at any station in his district through sickness, holiday, etc., or who helps at any station when traffic is unusually heavy.

porter, rolling stock; a porter (grade 1) *q.v.* who assists rolling stock inspectors (700) *q.v.*, e.g. ramps parts of station sidings, etc., to obtain particulars, number and type, of carriages available.

porter, rug; has charge of and issues rugs to passengers on payment of fee; sometimes also does work of pillow attendant *q.v.*

porter, scrap; a goods porter *q.v.* handling scrap metal.

porter, searcher, *see* carriage searcher.

porter, shop parcel; a parcel porter *q.v.* who receives and issues parcels sent by shops and stores to await call of customers.

porter, spare man, *see* porter, relief.

porter's room attendant; cleans and attends to heating of porter's room at a railway station or depot.

porter, time-bill office; assists in time-bill office; packs up time-bills and notices for despatch to stations, etc.

porter, train indicator; indicator attendant, telegraph man, train indicating board attendant; operates train indicator board, which shows times of departure of trains, stations called at, etc., by altering clocks and/or using chalk and blackboard; may also chalk up details of trains late, etc.

porter, train label board; G.W.R. only, indicator board, showing destinations, in slots on sides of wagons, for carriage before departure of trains; after railways, work done by ticket collector (706) *q.v.*

porter, transfer; transfer man, transship man; (ii) a porter g.v. who takes passengers' luggage from one passenger station to another; (iii) a goods porter g.v. who transfers goods from one train to another for despatch to a station on a different line.

porter, travelling; a parcel porter g.v. who travels in baggage van to sort parcels en route.

porter, weighbridge; see weighbridge man.

porter, yard; yardman; a goods porter g.v. working in a goods yard; loads, unloads and cleans wagons; obsolete.

porter and deliverer; a checker g.v. employed at a small receiving office in towns, e.g. London; receives parcels, issues receipts, assists in loading collection or delivery railway vans.

relief man, obsolescent; see checker.

relief man, see porter, relief.

trepanner, roper, rope splicer; splices hemp ropes to capstan chains in goods depôt; maintains ropes in repair, sometimes also records metal tally numbers of incoming and outgoing foreign ropes, i.e. railway ropes belonging to other railway companies, and arranges for their return to home stations.

rope runner; a lad who, under direction of capstan man g.v., fastens and unfastens rope to and from wagons during shunting.

router, see labeler, truck.

sackman, sack sealer; a goods porter g.v. responsible for care and issue of sacks at a depôt, e.g. in agricultural areas, handling hired-out sacks to farmers and receiving same when returned; counts, stacks and examines sacks for repair; keeps records and returns to sack superintendent (709) g.v.; obsolete.

scaleman, scalesman; weigher.

weighman; weighs goods packages on beam scale on goods platform and calls out weights to checker g.v.; removes packages from scale for disposal by goods porters g.v.

searcher, see tracer.

senior checker; a checker g.v. undertaking more responsible checking of goods loaded or unloaded into or out of railway trucks and into or out of foreign warehouse, i.e. warehouse not belonging to railway company, or a cold storage depôt.

senior porter, see leading porter.

sheet collector, shetter, sheet hand, sheet man; folds and stores tarpaulin sheets removed from wagons.

shipper, see checker.

shunter in indicator cabin; employed at night; stationed in a cabin some distance above point at which shunters (704) g.v. operate, reads numbers on wagons released for shunting and turns an indicator to inform shunters of number of siding or platform to which wagons should be shunted; when not so engaged, does work of porter (grade I or II) g.v.

sidings man, sidings porter; a porter g.v. employed on sidings where goods, e.g. milk, general farm produce, are delivered to farmers, etc., direct from goods wagons; obtains signatures for goods received; chiefly engaged in loading, unloading goods wagons and other work normally done by goods porter g.v.; graded as goods porter who, in country districts, normally does such work.

signal cleaner and lighter, signal lighter, see lampman, signal.

slinger; a goods porter g.v. who fastens rope, chain, or wire sling round goods to be lifted by crane and hooks on to crane; obsolescent.

spare man porter, see porter, relief.

special station platform porter; a leading porter g.v. who performs ordinary work of porter, e.g. carrying passengers' luggage, closing carriage doors, calling out names of

stations, and who also has special duties, e.g. care of waiting rooms, work at loose docks, etc. in a station cleaner; a porter g.v., if employed at passenger station, or a goods porter g.v., if at goods depôt, who scrubs and sweeps floors of offices and waiting rooms, cleans windows, sweeps platforms, etc., on a railway station.

steward; a loader g.v. who works in railway goods station or depôt, stowing goods in order in which they are to be delivered.

telegraph man, see porter, train indicator.

telephone man; a porter g.v. who attends to telephones in railway office or station; sends and receives messages, etc.

timber measurer; measures timber to be transported by rail, and checks results with figures given in consignment notes or invoices.

train recorder; traces and searches for missing packages of incoming goods; makes appropriate entries on invoices when traced or otherwise.

train caller; a porter g.v. whose only duty is to call out destination of a departing train, names of intermediate stopping stations and parts of train allotted to such stations; also calls out name of own station on arrival of trains.

train indenting board attendant, see porter, train indicator.

train recorder, train reporter; a porter g.v. who records scheduled and probable times (if late) of arrival of trains and No. of arrival platform on indicator board at railway station, cf. train recorder (703).

train starter; a porter (grade II) g.v. who is detailed to give starting signal, e.g. rings bell denoting time of departure, on large platform.

transfer man, tranship man, see porter, transfer.

traverse hooker, traverse worker; a porter g.v. who traverses, by hand or by crane, a traverse table, on which locomotives or rolling stock are conveyed laterally from one set of rails to another; usually done by capstan man g.v.; obsolescent.

truckman; a goods porter g.v. who transports goods from one part of goods platform to another on a hand-truck.

van attendant, van washer, see goods brake van cleaner.

van setter; moves drays, by horse if necessary, along goods platforms at night so that they can be loaded in readiness for carriers (719) g.v. to take out on arrival at depôt, and, if placed, loaded drays to facilitate manipulation by carters and to avoid delay in starting delivery round; cf. van setter (720).

wagon and cattle pen cleaner; a goods porter g.v. who washes out and lime washes cattle wagons and pens; cf. disinfecter.

wagon dresser; a loader g.v. or, at small depôt, a goods porter g.v. who trims coal on loaded wagons to prevent its falling off when truck is in motion; obsolescent.

wagon unloader; a goods porter g.v. who unloads goods from trucks in railway company's warehouses.

weighbridge man; weighbridge porter; operates weighbridge; calls out weights to weighbridge clerk (939) g.v. or records weights himself.

weigher, weighman, see scalesman.

welcher, excess luggage; storage weigher, see excess luggage collector.

yardman, see porter, yard.

700—OTHER RAILWAY SERVANTS (not elsewhere enumerated)

ash boy, lad; a shed boy g.v. engaged as ash filler g.v. or assisting ash filler.

ash filler, ash loader, ash man, ash pit labourer, ash pit man; ash cleaner; shovels ashes out of ash pits, in engine shed and yard, on to sides

of pits and thence into wagons ready for removal; also removes grease and dirt from engine pits; in small yards work done by fire dropper g.v.

ashpan man, ashpan raker, see fire dropper.

axle box attendant, axle box cleaner; examines axle boxes, cleans them, and, when necessary, fills or orders to be filled with grease, etc.; reports if axle has been dangerously overheated.

axle oiler, see greaser.

bar boy (engine shed); firebar lad; a shed boy g.v. who assists bar men g.v. in an engine shed or who does work of bar man.

bar man, bar layer, bar setter, fire bar man; examines fire bars, cooled down, after removal from engine fire grates by fire dropper g.v.; replaces those defective with new bars.

boiler filler, see steam raiser.

brasser; a cleaner g.v. whose work is confined to cleaning and polishing brasswork, i.e. handles, etc., of passenger coaches.

brusher, tube, see cleaner, tube.

call boy, caller, caller-up; staff caller; knocks-up staff, e.g. drivers and firemen (701), guards (702) g.v., usually at their houses, in time for their turn for duty as laid down in depot shed, etc., roster; must receive answering call from each man knocked up; sometimes specifically designated, e.g. guard caller; graded as porter (703) g.v. attached to stations, cf. caller (704).

carriage lampman, carriage lighter; is responsible for lighting railway carriage oil or gas lamps, opening roof shutters, applying torch, etc., or operates switch in electric lighting.

carriage filler; an ash filler g.v. who sorts out from ashes good and useful coal and half-burned cinders for reuse, using a hand sieve or automatic riddling screen.

cleaner, boiler, see washer, boiler; cf. boiler scaler (852).

cleaner, carriage, see washer, carriage.

cleaner, fire, see fire dropper.

cleaner, pit, see ash filler.

teleman, road and yard; a labourer who sweeps all roads and yard areas in and around railway depôt or station.

cleaner, tube; tube brusher, tube runner, tube wiper; removes plate from front of engine; cleans tubes which pass through boiler from fire box to smoke box, by working rod from smoke box end to fire box end, thus removing soot and giving fire free draught.

coaler, coal filler, coal man; fuel man; shovels coal from coal stage or from trucks into engine tender; is responsible for proper packing of coal and ensuring that tender contains required amount of coal for journey.

coal picker; collects, with rake and shovel, pieces of coal which have fallen on to permanent way from wagons at places where coal is handled.

coal stacker; a shed labourer g.v. who piles up stores of coal at a railway locomotive depôt by building up with walls of large coal; marks with whitewash brush to prevent pilfering.

constable, railway constable; policeman, railway policeman; a sworn-in policeman, employed by railway company, who keeps order in a railway station and assists in marshalling of queues of passengers in booking hall; sometimes collects tickets.

control reporter; reports to controller (700) g.v., chiefly by telephone, notifying him of the number of goods, wagons, etc., required within a specified area; similarly is in touch with goods depôts, locomotive sheds, etc. drawer, fire, see fire dropper.

enquiry office attendant; train information officer; answers enquiries about passengers about train services, fares, connections, etc., at enquiry office of railway station where copies of all timetables, regulations, etc., are kept.

examiner, brakes; examines brakes of goods wagons and passenger coaches in marshalling yards and sidings, to ensure that they are in working order; reports defects for repair; cf. examiner, carriage.

examiner, carriage; examines train wheels, couplings, brakes, steam heating apparatus, lighting, and train generally, either in station (on road or at terminus) or at depot; reports damage to carriages or trucks and arranges for repair; cf. examiner, brake.

examiner, shoe (electric railway); examines contact shoes which collect current from live rail; ensures that perfect contact with rail is maintained, adjusts, as necessary, by spanner, etc.; sometimes done by motor examiner (electric railway) (308) g.v.

examiner, tool; engine tool examiner, see tool man.

examiner, wheel, fagger, wheel fagger; tests soundness of wheels of passenger coaches during halt at a station, or of goods wagons in a yard or siding, by tapping edges of wheels with long-handled steel hammers; reports immediately if a wheel sounds cracked, so that coach or wagon may be removed from train; also fags axle boxes for heated bearings.

firebar lad, see bar boy (engine shed).

fire carrier, fire lad, see fire lighter.

fire dropper; ash pen man, ash pen roller, fire cleaner, fire dropper; drops live fire by removing loosely fitting slotted bars from fire box and takes ashes and clivings from fire box into ash pit with long metal rake, on arrival of engine at shed after journey, in small sheds also does work of ash filler g.v.; on some railways work done by stoker and occasionally by engine cleaner (701) g.v.

fire lighters; fire carrier, fire lad, fire loader, fire lighter; carries live coals from fire hearth in shed to engine fire box; cleans fire with hand rake periodically; also burns brightly; in small sheds also does work of steam raise g.v.

foreman, carriage shed; carriage foreman, carriage stock foreman; directs and controls carriage cleaners g.v., repairers and other workers at carriage sidings or shed.

fuel boy; a shed boy g.v. employed as coal filler g.v.

fuel man, see cleaner.

gas filler; gas man; fills gas tanks of railway carriages in a siding, or in platform of engine station, by means of flexible piping from gas branch supplies at various points.

gas filler, oil, or for gas filler.

gas foreman; in charge of gas fillers g.v. who work on a siding or station platform; ensures speedy filling so that trains are run to time scheduled.

gas man, see gas filler.

gland packer; packs glands of steam regulator valves and steam valves on engine with greased hemp or asbestos packing to make steam joints steam-tight or water-tight; cf. gland packer (278).

greaser, carriage greaser, wagon greaser; oile oiler; fills axle boxes of rolling stock with lubricating oil or grease as required.

kindler, see fire lighter.

labeller, coal; a track labeller (706) g.v. labelling coal trucks in coal siding ready for sending forward to coal merchants.

ladies' waiting room attendant; in charge of ladies' waiting room and lavatories at passenger station; ensures cleanliness; issues towels, soap, etc.; collects fees and hands to station master (307), to cashier (308), or to leading ladies' waiting room attendant g.v.

leading ladies' waiting room attendant; supervises ladies' waiting room attendants g.v. at large passenger stations; ensures cleanliness of lavatories, renewal of towels, etc., and sometimes also collects fees.

lighter-up, see fire lighter.

police man, railway policeman (not at level crossing), see constable.

point cleaner, point oiler; attends to oiling and cleaning of points on section of railway track, or in sidings or yards.

runner, tube, see cleaner, tube.

sand dryer, sand man; shovels sand from railway trucks into stove or oven in which it is dried, attends to furnace fires during drying; shovels dry sand into bins for use by engine men (701) g.v., in shed or depot; loads dry sand into trucks for removal to small depots having no sand fire.

sergeant (railway police); is in charge of a section of railway police at station or depot.

shed boy; general term for boy under age 18 employed in railway engine shed as ash filler, coal filler, or assisting ash filler, coal filler or bar man g.v., or in other general shed work, cf. ash boy, fuel boy, bar boy.

shed charge man; in charge of a gang of shed labourers g.v. under direction of shed foreman (700); cf. charge man engine cleaner (701).

shed labourer, loco. shed labourer; general terms for any man engaged in labouring work, e.g. ash filler g.v., in railway engine shed.

shear marker; a shear collector (705) g.v. who marks and writes names and numbers on tarpaulin wagon sheets, with brush and paint, and stencils.

slip lad; assists slip checker (706) g.v. by collecting slips, etc.

smoke box lad; removes soot from smoke-boxes of locomotives in an engine shed by scraping and sweeping down; obsolete; work now done by fire dropper or by tube cleaner g.v.

staff caller, see call boy.

steam raiser, boiler filler; is responsible for seeing that fire is lighted under boiler and for filling boiler with water before engine leaves shed; also sees that proper head of steam has been raised by the time driver (701) g.v. takes charge; in small sheds also does work of fire lighter g.v.

sweeper, tube, see cleaner, tube.

swing bridge man; in charge of swing bridge over river or canal, opens bridge to allow water traffic to pass, and closes, when required, to allow train or locomotive to cross; is responsible for securing that section of rails on bridge is in exact alignment with running lines on each side before allowing train or engine to pass.

tapper, wheel tapper, see examiner, wheel.

tool man (engine); engine tool examiner, tool examiner; in charge of tool store and responsible for stock of tools; issues new fire irons, shovels, buckets, hammers, etc., required by engine men (701) g.v. in exchange for damaged or defective tools; records issues and receipts of tools, requisitions tools from appropriate departments; receives key of engine toolshed, containing spanners, oil can, etc., from fireman (701) g.v. after journey and is responsible for its custody until again required.

train information attendant, train information officer, see enquiry officer attendant.

washer, boiler; boiler washer-out; boiler cleaner; runs off water from boiler by removing plugs; floods boiler with clean water to wash it out; removes scales accumulated round plugs by working iron rods to and fro; re-buffs boiler in readiness for next journey.

washer, carriage; carriage cleaner; washes down outside paint of carriages in sidings and passenger yards; sweeps, dusts, cleans windows and brasswork of rolling stock after journey, and generally prepares carriages for next journey.

Sub-Order 2.—Road Transport Workers.

710.—OMNIBUS AND TRAMWAY PROPRIETORS AND MANAGERS.

general manager (omnibus company). omnibus manager; is responsible to directors for administrative control of an omnibus company's working.

general manager (tramway); tramway manager; is in general control of a tramway system, and is responsible to directors or to local authority for efficiency of service.

omnibus manager, see general manager (omnibus company).

superintendent (omnibus), see traffic manager.

traffic manager, traffic superintendent (tramways or omnibus); superintendent (omnibus); is responsible to general manager g.v. for organisation of traffic side of undertaking; controls operating staff, determines and approves time tables, routes, etc., recruits omnibus drivers (720), tram drivers (722), conductors (724), ticket inspectors (714) g.v., and supervises and advises upon establishment of depots to house vehicles; recommends to general manager purchase of new cars in accordance with traffic requirements.

tramway manager, see general manager (tramways).

711.—LIVERY STABLE PROPRIETORS AND MANAGERS.

cab proprietor, job master, livery stable keeper, livery stable proprietor, brake proprietor, carriage master, carriage proprietor, coach master, coach proprietor, fly master, fly proprietor, hack master, wagonette proprietor; hires out horse-drawn vehicles; may drive vehicle himself; may also own petrol driven vehicles for hire; duties as for livery stable manager g.v.

horse lather, horse proprietor; owns horses which he lets out for riding or for draught purposes, by day, week or month.

horse repository keeper; keeps stables to which horses may be brought for sale; arranges sale by private treaty or by auction, on commission; stables private owners' horses.

livery stable manager; men manager, posting yard manager; in charge of livery stables and responsible to cab proprietor or livery stable keeper g.v. for control of staff, safe custody of horses and for safe storage of fodder, litter, etc., used in stables; supervises grooms and stablemen (725) g.v.; ensures that horses are regularly fed and exercised, stalls properly bedded and cleaned; examines sick horses and either (sample ailments) gives medicine himself or calls in veterinary surgeon; lets stabling accommodation; sometimes arranges terms and collects payments for employer.

mews manager, see livery stable manager.

posting master; stage air proprietor, stage carriage proprietor; lets out horses and vehicles for conveyance of passengers and goods in districts where there is no railway communication.

posting yard manager, see livery stable manager.

stage car proprietor, stage carriage proprietor, see posting master.

712.—MOTOR GARAGE PROPRIETORS AND MANAGERS.

motor cab proprietor, motor charabanc proprietor; an owner of motor cabs, motor coaches, etc., which he lets out on hire.

motor garage manager; is responsible to motor garage proprietor *q.v.* for control of motor garage and of staff employed thereat; supervises storage arrangements for private owners cars, letting-out of cars on hire, and execution of repairs to vehicles; in charge of sales, *i.e.* petrol, spares, etc., personally keeps account books, collects monies, pays wages, etc., and renders accounts to proprietor.

motor garage proprietor; owns a motor garage, in which he carries on one or all of the following businesses:

- (i) executing repairs to motor vehicles; (ii) letting out cars on hire; (iii) storage of cars for private owners.

motor hire, motor jobmaster; owns motor vehicles (busses, taxicabs, private cars, etc.) and lets them out on hire, with or without drivers, by day, week, month, etc., at agreed rates, to commercial or private users, *e.g.* (taxi-cabs) to taxi-cab drivers (720) *q.v.*

713.—HAULAGE AND CARTAGE CONTRACTORS AND MANAGERS; MASTER CARTER.

bonded carman, bonded carrier; a cartage contractor *q.v.* licensed by H.M. Customs to cart tobacco, wines, spirits and other dutiable articles, duty being unpaid, from dock, quay or warehouse into bonded warehouse, or from bonded warehouse to ship for re-export; *cf.* bonded carman (719).

cartage assistant superintendent (railway); assists cartage superintendent (railway) *q.v.* and, in his absence, deputises; is responsible for time-keeping of carters (719) *q.v.* and arranges reliefs in cases of absence; supervises cartage traffic at station or depot to prevent delays or congestion.

cartage contractor, carting contractor; master carman; enters into contracts for supply of carts, borses, motor vehicles, men, etc., for cartage purposes.

cartage superintendent (railway); has charge of cartage arrangements at railway station or depot, controls staff, arranges programme of work, etc.

carting agent; a cartage contractor *q.v.* or sub-contractor who provides horses and carts or motor vehicles for transport of materials, etc., at fixed rates or by contract; either men on borses and carts or motor vehicles or hires them from cartage contractor; sometimes sub-lets contracts for carting to other cartage contractors, or receives commission from them on business introduced.

cart proprietor; master carter; owns carts and horses, which he lets out on hire; may be also carting agent or carting contractor *q.v.*

cattle float proprietor; an owner of cattle floats (two-wheeled vehicles specially constructed for conveyance of cattle) which he lets on hire.

dust contractor; a cartage contractor *q.v.* who contracts with local authorities for removal and disposal of rubbish.

forwarding agent; a proprietor of a business for collection of parcels and goods in a defined area for a larger carrier, *e.g.* a railway or steamship company.

furniture remover, removal contractor; undertakes removal of furniture to any part by means of his own conveyance, or by rail.

haulage contractor (employee); enters into contracts for performance of haulage of any description.

mail cart contractor, mail contractor; enters into contract with H.M. Government for conveyance of mails, from place to place, by means of horse-drawn or motor vehicles.

master carman; (i) supervises and directs work of carmen, (719) *q.v.* in employ of railway company or other common carriers, (ii) is cartage contractor.

master carter, see cart proprietor.

railway agent; (i) see railway carting agent; (ii) see railway parcel agent.

railway carting agent, railway carrier (employee); railway agent; undertakes, usually under contract, cartage for a railway company in a defined area.

railway parcel agent; railway agent; undertakes, usually under contract, delivery and collection of parcels for a railway company in a defined area.

removal contractor, see furniture remover.

team driver (own account), team owner; owns team of cart horses, with which he undertakes haulage jobs.

traffic manager, transport manager (for commercial firm); controls all traffic arrangements and transport business in connection with business of a private firm; is responsible for care of vehicles, horses, etc.; supervises and directs work of carters, carmen (719) *q.v.*, boys, etc.; sees that railway consignments notes are correctly made out, and sent with goods.

transport manager; has charge of a transport business on behalf of proprietors, to whom he is responsible for execution of orders, control of staff, supervision of accounts, etc.

truck proprietor; owns horse-drawn or hand trucks, which he lets out on hire.

van proprietor, see cart proprietor.

714.—INSPECTORS AND SUPERINTENDENTS.

accident inspector; enquiry officer; carries out preliminary enquiries on behalf of omnibus, tramway or other undertaking, where accidents to passengers, less or damage to passengers' property, damage to vehicles through collision with company's omnibuses, trams, etc., are reported; sometimes visits scene of accident, makes enquiries of eye witnesses, inspects damaged vehicles, etc., and interviews persons injured, etc., furnishes reports to claims superintendent *q.v.* setting out result of enquiries, expressing opinions as to culpability, or otherwise, of company's servants, and making recommendations as to lines upon which a settlement should be effected.

assistant district inspector, assistant divisional inspector; (i) see assistant district permanent way inspector; (ii) see assistant district traffic inspector.

assistant district permanent way inspector, assistant divisional permanent way inspector; assistant district inspector, divisional district inspector; assists and acts as deputy to district permanent way inspector *q.v.*; inspects tramway tracks in specified districts, reported as defective, and recommends necessary repairs; supervises repair gangs and pays periodic visits to portions of track under repair and surprise visits to night conduit cleaners (729) *q.v.* to ensure efficient working.

assistant district traffic inspector, assistant divisional traffic inspector; assistant district inspector, assistant divisional inspector; assists and acts as deputy to district traffic inspector *q.v.*; supervises traffic regulators *q.v.*; investigates their reports regarding congestion or delays at traffic points and takes necessary steps to remedy defects; is responsible for allocation of vehicles, *e.g.* for football matches, and for preparing special traffic plans for such occasions.

assistant regulator, assistant traffic regulator (tramways, etc.); assists traffic regulator *q.v.* in control of tramway or omnibus services; is stationed at selected traffic points to report upon traffic congestion, delays or late time-keeping, or is stationed at termini, etc., during rush hours to direct and assist conductors (724) *q.v.*; supervises loading and unloading of special cars running on public holidays, for football matches, etc.

trolley inspector, boom inspector (tramways); trolley attendant, trolley car superintendent, or superintendent *q.v.* for periodically inspecting trolleys and trolley bars or booms, at tramway depot, to ensure insulation and perfect running on overhead cable; makes minor adjustments and reports serious defects for repair.

brake inspector, brake attendant, brake examiner (tramways); inspects brakes and brake attachments on trams, at depot every night, to ensure that they are in good working condition; makes minor adjustments on the spot; where more extensive repair or replacement is necessary, reports cars for temporary withdrawal from service.

brake superintendent (tramways); is responsible to rolling stock superintendent *q.v.* for ensuring that brake equipment of trams is maintained in good working condition; supervises brake inspectors *q.v.*; examines and furnishes reports upon brake appliance improvements and inventions used by other undertakings.

car examiner, car inspector (tramways); is responsible to depot superintendent *q.v.* for routine examination of cars on arrival at depot after journeys, applies driver's controls, to test condition, taps wheels and axles with hammer to detect fractures; lubricates bearings, etc.; reports defects for repair to depot foreman (716) or to depot superintendent *q.v.*

chief inspector; controls and supervises work of inspecting staffs on tramway or omnibus systems.

claims inspector; damages assessor; an officer, possessing technical knowledge, who follows up cases reported upon by inspectors *q.v.* where a damage claim has been lodged; examines damaged vehicle or property and reports, giving estimate of damage, to claims superintendent *q.v.*

claims superintendent (tramways, omnibus); in charge of claims department of tramway or omnibus undertaking; is responsible to general manager (710) *q.v.* for supervision of claims inspectors *q.v.*; in consultation, if necessary with company solicitor, settles claims lodged in respect of personal loss or injury by passengers, or of damage, injury, etc., to persons or vehicles through collision or negligence of company's servants.

damages assessor, see claims inspector.

depot inspector (tramways); is responsible to traffic manager (710) *q.v.* for periodically examining tramway depots; suggests organisation improvements to depot foreman (716) or to depot superintendent *q.v.*; allocates cars to depots in accordance with traffic requirements as indicated by car-load statistics; ensures that car examination and cleaning arrangements at depots are efficient.

depot superintendent, district depot superintendent; is in charge of a tramway or omnibus depot, is responsible to traffic manager (710) *q.v.* for control of staff, arranging roster of drivers and conductors' duties as governed by timetables, traffic requirements, etc.; ensures efficient work of car cleaners (730), car examiners *q.v.*; sometimes also controls repair staff *e.g.* fitters (716), electricians (307), where staff not large enough for employment of repairs depot superintendent *q.v.*

district inspector (omnibus), *see* divisional inspector.
 district inspector (trams): (i) *see* district permanent way inspector; (ii) *see* district traffic inspector.

district permanent way inspector, divisional permanent way inspector (trams), district inspector (trams): is responsible to permanent way superintendent *q.v.* for maintenance of section of tramway track in specified district; issues instructions for track repairs and makes recommendations for relaying, if necessary; district inspectors permanent way staff at depots within his district.

district traffic inspector, divisional traffic inspector (trams): district inspector (trams): is responsible to district traffic superintendent *q.v.* for inspection of traffic arrangements in a specified district; recommends to him, in accordance with traffic requirements, augmentation, etc., of certain routes; supervises traffic regulators *q.v.* and issues reports to assistant district traffic inspectors *q.v.* to investigate reports of congestion, etc.

district traffic superintendent, divisional traffic superintendent: is responsible to traffic manager (710) *q.v.* for general supervision of traffic arrangements in a specified area; allocates duties of district traffic inspectors, assistant district traffic inspectors, traffic regulators, assistant regulators *q.v.*; makes arrangements for meeting traffic requirements, distributing vehicles, applying to headquarters for additional quota, etc., as necessary.

divisional inspector (omnibus): district inspector: is responsible for supervision of working of service in a defined division or district.

enquiry officer, *see* accident inspector.

horse inspector; inspector, at stabling depot, horses belonging to omnibus or tramway services, large carting contractors, railway companies, etc.: either before journeys or upon horses' return to depot; inspects horses and for work and prescribes treatment, medicines and food in case of simple ailments; keeps sick horses under observation and orders veterinary treatment where necessary; is sometimes responsible for purchase of new horses and sale of horses unfit for further service.

horse superintendent (not canal); is in charge of horse department of large carriers' business, omnibus or tramway services, and is responsible for control of stable staff, and for welfare of horses.

inspector of patrols (Automobile Association): is in charge of Automobile Association patrols (729) *q.v.* in a certain area, and allocates and superintends their work.

juniper (plough), *see* ticket examiner.

loading observer (omnibus): keeps watch at different points on omnibus routes to see that no overloading takes place; reports any cases that he sees.

loading observer (trams): keeps one particular tramway route under observation; informs authorities as to loading, i.e. number of passengers carried, on that route, and recommends increase or reduction of service, as traffic demands.

material inspector (trams): is responsible to rolling stock superintendent or to permanent way superintendent *q.v.* for examining and testing, before purchase, cars and materials used in tramway services, e.g. rails, spare parts, lubricants; often visits contractors' premises for this purpose, but, in large undertakings, work may be subdivided.

motor car inspector; inspects cars in large motor garages, and sees that they are kept fit for service.

motor inspector, motor examiner (trams): periodically examines tramcar electric motors in a depot, sending them to be overhauled when necessary.

night inspector (omnibus, trams): is in control of traffic department of depot at night; allocates duties to conductors; superintends cab and ticket department, etc.

omnibus inspector; performs, according to turn of duty (which is usually changed weekly), one or other of duties devolving on omnibus inspectors, e.g. ticket inspector, regulator *q.v.*

output assistant (omnibus); books drivers (723) and conductors (724) *q.v.* on and off duty; gives out tickets, boxes, etc., to conductors. parcels superintendent (trams): is in charge of parcels traffic department of tramway undertaking; draws up time-tables for collection and delivery of parcels traffic on tramway routes, generally supervises staff at head parcel office and organises system of district parcels receiving offices; is responsible for collection of charges, payment of fees to collecting agents, payment of wages and for financial side of parcel traffic generally.

permanent way engineer, *see* permanent way superintendent.

permanent way inspector (trams): is attached to district tramway depot and reports to district permanent way inspector *q.v.* upon condition of tramway track in specified area; investigates complaints of drivers (723) *q.v.*, examines state of lines at junctions, recommends repair, etc., supervises repair and relaying gang and reports progress.

permanent way superintendent (trams): permanent way engineer; is responsible to general manager (710) *q.v.* of tramway undertaking for maintenance of permanent way in good condition; issues instructions to district permanent way inspectors *q.v.* as to repairs or relaying track; is in general control of staff of permanent way department and selects higher officials, e.g. district permanent way inspectors, material inspectors *q.v.*

plough inspector, plough examiner; examines ploughs (instruments attached to underframe of trams for pecking up electric current from cables when conduit track system used); makes minor adjustments where necessary; reports to depot superintendent *q.v.* defects of ploughs needing workshop repair, in order that car may be withdrawn from service.

private inspector (omnibus); supervises and controls work of private checkers (729) *q.v.*

punch inspector, punch shop superintendent; checks perforation of ticket punches handed in by omnibus or tram conductors (724) *q.v.* at depots, and examines to see that tickets in working order; himself makes minor adjustments, and sends seriously defective punches to punch shop for repair or renewal of parts.

railway carriage inspector; is responsible to carriage superintendent (713) *q.v.* for efficient working of carriage stock at goods depots, docks, etc. issues instructions regarding correct loading of vehicles, etc., to railway carriage foreman (716), carters, van drivers (719) *q.v.* etc.

regulator, traffic regulator; timekeeper; regulates traffic at busy junctions, centres, or termini, and sees that all tramcars or omnibuses start at scheduled times.

repairs depot superintendent (trams); a technical officer who controls staff of repairers and other workers in repairs depot; is responsible to rolling stock superintendent *q.v.* for efficient repairing of vehicles and for work of

car examiner, brake inspector *q.v.*, etc.; maintains adequate stock of spare parts, tools, etc.

road inspector (omnibus, tramway services); watches (in anti) working of tramcar or omnibus systems within a defined area; notes irregularities in work of drivers and conductors, points out minor faults on spot and reports serious irregularities to headquarters.

rolling stock superintendent; is responsible to general manager (710) *q.v.* for efficient control of department which is charged with purchase and maintenance of rolling stock; orders vehicles of approved specifications as authorised by directors, or (municipal undertakings) by tramway committee, and is responsible for examination before acceptance, in general charge of mechanical equipment at depots wherein vehicles are based, cleaned, examined, repaired; provides efficient inspection and overhaul of vehicles; selects higher officials, e.g. brake superintendent, material inspector *q.v.* in smaller undertakings, is sometimes also responsible for maintenance of electrical equipment of rolling stock.

stores superintendent; is responsible for working of stores department, and for control of staff therein; arranges for purchase of stores.

superintendent (cab, ticket and punch department); is responsible to general manager (710) *q.v.* for proper keeping of conductors' (724) *q.v.* cab ticket and punch records, and payment of cash into bank; controls staff who receive and check ticket boxes and cash handed in by conductors; reports serious cash discrepancies to traffic manager (710) *q.v.* or to general manager for disciplinary action, or, for small amounts, obtains refund from conductors.

ticket examiner, ticket inspector; jumps; searches omnibuses of tramcars to examine passengers' tickets and conductors' records to ensure that conductors are working satisfactorily, and that passengers are not travelling beyond stages for which they have paid.

timekeeper, *see* regulator.

time list maker (omnibus); an omnibus inspector *q.v.* who prepares lists showing times of omnibus services from particular garage, and names of drivers (720) and conductors (724) *q.v.* allotted to each omnibus.

traffic adviser; traffic development superintendent; studies passenger statistics of undertaking and advises traffic manager (710) *q.v.* as to extensions, curtailment, or alteration of services to meet varying needs of public, arising from growth of population, development of new districts, etc.; suggests innovations, e.g. cheap fares, extension of routes; is responsible for advertising facilities (punches, parcels, etc.) offered by undertaking.

traffic assistant (trams); assists traffic manager (710) *q.v.* in indoor or outdoor routine duties; generally in charge of special section of work; sometimes specifically designated, e.g. outdoor traffic assistant.

traffic development superintendent, *see* traffic adviser.

traffic inspector; inspects tramway service traffic, and makes routine reports to his department; inspects passengers' tickets, and checks conductors' tickets and ticket sheets; ascertains that conductors are observing regulations as to clothing, discipline, etc.

trams: inspector; general term for an official who supervises work in one section or another of a tramway service, including ticket inspector, road inspector *q.v.* tramways superintendent; has charge and control of one section or another of a tramway service, e.g. traffic superintendent (719), permanent way superintendent, works superintendent *q.v.*

trolley attendant, trolley examiner, see bar inspector (tramways).

works superintendent; controls and directs works of construction or repair on tramway system.

yard inspector; supervises parking of vehicles, cleaning, etc., in tramway depôt yards or omnibus garages, despatches trams from depôts at scheduled times, and notes when cars return.

715.—HORSE FOREMEN.

horse foreman, farman, horse-keeper; horse manager, stable foreman; in charge of horses and stables of undertakings employing many horses; allot duties to and supervises work of groom, stable boys (725), and also drivers, carmen (719) *q.v.*, etc., where such groom and feed their own horses; looks after sick horses under direction of veterinary surgeon.

horse foreman, deputy; assists horse foreman *q.v.* and takes his place if he is absent.

horse foreman, trace; a horse foreman *q.v.* in charge of trace-horse drivers, to whom he allot duties.

horse manager, stable foreman, see horse foreman.

716.—OTHER ROAD TRANSPORT FOREMEN.

charge hand (tramways); general term applied to any worker placed in charge of other workers, *e.g.* ganger, shed foreman *q.v.*

foreman, carting; in charge of cartage depôt from which carts or vans are sent out on journey; arranges rosters of duties of drivers (719) *q.v.* to suit orders in hand, ensures punctuality, etc.; himself attends to sick horses or calls in veterinary surgeon; in small business, is sometimes also responsible for supervision of stableman (726) *q.v.* and for general cleanliness of vehicle, depôt and approaches thereto.

foreman, sanduit cleaner; directs and supervises conduit cleaning staff attached to district depôt of tramway undertaking employing conduit system; prepares duties roster of conduit cleaners (729) *q.v.* for district; periodically pays visits (usually at night) to section of track being cleaned to ensure speedy and efficient progress and to prevent traffic being impeded.

foreman, depot; in charge of tramway or omnibus depôt where staff employed is not large enough to justify services of depôt superintendent (714) *q.v.*; or for depôt superintendent.

foreman (furniture removals); has charge of removals of furniture, carried out with aid of small body of assistants, and furniture removal van or vans (pantechnicons).

foreman, garage; motor garage foreman; is responsible for care of cars and removal of staff in motor garage; allot duties to drivers (720) *q.v.*; superintends cleaning and repairs; arranges supplies of spirit, oil and accessories.

foreman (omnibus service); directs and supervises operating staff, including washers and cleaners (729) *q.v.*, at omnibus depôt or entire staff (including coachmen) in small garage; arranges weekly roster of omnibus drivers (720), conductors (724) *q.v.*, arranges for spare drivers, etc., and ensures that vehicles start at scheduled times, petrol tanks filled, etc.

foreman, platform (carriers); directs work of checkers (711), loaders (720) *q.v.*, etc., on platform of general carriers' depôt; allocates duties and organises method of loading drays, etc., to ensure prompt handling and despatch of goods.

foreman, railway cartage; is responsible to goods agent (700) *q.v.* for allocation of duties to carriers (719) *q.v.*, attached to railway goods depôt, for time-keeping, etc., for maintaining supply of men and vehicles, and for prompt handling and despatch of goods.

foreman, shed (tramways); is in charge of a shed of a depôt; controls car cleaning and repairing staff, etc.; is responsible to management that general daily and nightly routine is efficiently performed.

foreman, yard; is responsible for parking and setting of vehicles in cartage yard or omnibus company's yard; has charge of setters, cleaners, loaders, etc. (729) *q.v.*; is responsible for allocation of duties, time-keeping and for cleanliness of yard and vehicles.

fixganger (tramways); controls and directs body of labourers working on repairs of permanent way of tramway system.

717.—CHECKERS (Road Transport Workers).

caller-off (carriers); calls off to carriers' checker *q.v.* particulars and weights of goods being loaded or unloaded in common carriers' depôt.

carrier's checker, cartage checker; checks addresses, weights, etc., of goods handled in common carriers' depôt.

718.—COACHMEN AND DRIVERS OF COACHES, CARRIAGES AND HORSE OMNIBUSES.

cabman (horse), see driver, cab (horse).

coachman, see driver, carriage; sometimes specifically designated *e.g.* domestic coachman (private service), traveller's coachman, undertaker's coachman.

driver, ambulance (horse ambulance); drives a horse-drawn ambulance for a hospital, local authority, or Red Cross Society, etc.; besides normal duties of a carriage driver *q.v.* generally assists in carrying patients into and out of ambulance.

driver, cab (horse); cabman (horse), *q.v.*; drives horse-drawn cab for public hire under licence from local authority.

driver, cartage driver; coachman; drives horse-drawn cartage let by lively stable proprietor, or owned privately, is often responsible for care of horse in stable; may also clean cartage when not done by stable boy (725); sometimes specifically designated, *e.g.* omnibus ('bus) driver, hackney carriage driver, horse omnibus driver, pony carriage driver, trap driver, traveller's driver, wagon, etc. driver.

driver, coach; stage coach driver, stage car driver; drives coach drawn by two or more horses, for a private owner, or for carrying passengers, luggage, and, perhaps, mails, in a district where there is no railway communication.

driver, licensed (unlicensed, horse); drives any horse-drawn vehicle licensed to ply for hire.

flyman, see driver, cab (horse).

gig boy, see trap lad.

outgrid; a servant who rides on horse-back, ahead or at side of horse-drawn cartage or coach, generally on ceremonial occasions.

postillion, post-boy, rides near horse of pair of horses drawing coach or cartage where no coachman is used, controlling both horses, generally on ceremonial occasions.

townsby (horse driver); a coachman or carriage driver *q.v.* who drives cartage used by commercial traveller to carry himself and samples on his rounds.

trap lad, trap youth; gig boy; accompanies owner of horse and trap, and minds them in absence of owner; drives trap if required, traveller's assistant, traveller's boy; a traveller's coachman *q.v.* who carries samples for traveller to and from cartage, unless and then up packages of samples, and generally assists traveller.

719.—DRIVERS OF LORRIES, WAGONS, VANS AND CARTS (HORSE). (Compare similar occupational terms in connection with motor-driven vehicles in Code 720.)

bonded cartman; a cartman *q.v.* employed by cartage contractor (713) *q.v.* in conveying dutiable goods from/to bonded warehouse, accompanied by customs watcher; cf. bonded cartman (713).

cartman, leader (Yorkshire); drives horse-drawn vehicle (usually in towns) collecting or delivering goods, for railway company, firm of carriers, or other business firm, recovers horse(s) from stableman (725) *q.v.*, harnesses to vehicle and returns horse(s) on completion of duty; sometimes assists porter (735) *q.v.* in loading, etc., vehicle or himself does portering; is responsible for safe custody of horse and vehicle and for safe delivery of load; obtains signatures for goods delivered and returns signed delivery sheet to yard foreman (716) *q.v.* on return to depôt.

carrier (country); owner of horse (or horses) and cart or van, in which he conveys passengers, goods and produce from villages along a certain route to a market town; cf. transfer.

carrier, market (not porter); a cartman or currier *q.v.* who drives cart used for conveyance of produce to market, or from market to retail.

carrier, railway; a carrier *q.v.* or a lorry driver *q.v.* employed, either by railway company or a local contractor, to collect and distribute goods in area served by railway station.

carrier, rubbish; rubbish carrier; a carrier *q.v.* employed, by local authority or private firm, in carting refuse or rubbish to a destructor, rubbish dump or refuse tip; usually loads or assists in loading his own cart and empties load at end of journey.

carrier, water; water carrier; (i) a carrier *q.v.* who drives vehicle containing tank for carrying water in bulk, till tank, by means of hand-pump or syphon, at source of supply and runs of water, by means of hand-pump, etc., at destination; (ii) see driver, water cart.

cart, cart driver, cartman; leader (Yorkshire); drives carts (usually in rural districts) belonging to cartage and haulage contractors, manufacturers, corporations, producers, etc.; is responsible for safe delivery of goods carted and (often) for care of horse.

carrier, duff; duff amplifier, duff filler; works horse groomed at a coal mine, loading and emptying wagons of "duff" (small coal) on to duff hoppers or into stokehold at steam boilers.

tearier's runner; on behalf of cartage contractor (713) *q.v.*, visits place where cartage operations performed and expedites loading and unloading of vehicles, reports delays, etc., to his firm; sometimes also inspects goods to be carted and estimates number of men and vehicles required for job, at quote for contract.

cattle driver; cattle foot driver; a carrier *q.v.* who drives a foot or crank axled cart with low body in which are transported cattle, horses or other animals; assists in loading and unloading foot, secures animals in front with halter, rope and netting to prevent injury in transit.

collector, bag, see collector, sack.
 collector, sack; a carman g.v. who drives a specially built cart or dray used for collecting empty sacks (brewer's, etc.) from customers; cf. motor steam dray driver (721).
 collector, fat; a carman g.v. who drives cart in which he collects fat (for use in soap making, etc.) from hotels, restaurants, etc.

collector (milk); a van or lorry driver g.v. who collects milk from individuals or groups of farmers and takes it to a central depot or to a railway station.

collector, official; a carrier g.v. employed by firm of cattle official merchants in collecting and removing stable manure from pits in stable yards to railway goods yards, farms, etc.; usually fills own cart, using fork or shovel, and discharges load, at destination, into railway wagon or on to manure heap in field; usually also waters, feeds, etc., own horse.

collector, sack; bag collector; a carman g.v. who drives cart in which he collects empty sacks or bags from customers of his employer.

delivery man; van driver g.v. who delivers purchases to customers' addresses.

drayman; fat driver, rolley man, rully man, wherry driver, wherryman; drives a dray or wherry, a low flat vehicle for transporting heavy bulky material, e.g. beer barrels, stone blocks.

driver, cattle boat, see cattle boat.

driver, fat, see drayman.

driver, lorry (or lorry); lorry man, lorry men; drives a heavy four-wheeled vehicle known as a lorry, or, in the North of England, a lorry.
 driver, mail; mail cart driver, mail van driver; post cart driver; is employed by contractor to carry Royal Mail bags between railway stations and district or head post offices by means of horse-drawn vehicle; in rural areas, collects mail bags on the way from local post offices and conveys to railway station for conveyance by train.

driver, oil tank; drives a horse-drawn oil tank vehicle, usually as roundsman (716), supplying customers with oil or petrol as required, runs off oil from tank tap into measures and fills receptacles on customers' premises; records quantities supplied and usually collects cash payment; renders statement of transactions and pays in cash to cashier (509) upon return to depot.

driver, overhead wagon; tower wagon driver; drives horse-drawn wagon which carries a telescopic tower ladder used for repairing tramway trolley wires; (sometimes acts as labourer to electrician (807) or in depot when not on road).

driver, post cart, see driver, mail.

driver, tower wagon, see driver, overhead wagon.

driver, truck; trolley man, truck man; a carrier g.v. who drives horse-drawn trucks or trolleys, often on temporary light rails or tram lines; is usually employed in drawing trucks from one workshop to another in large works.

driver, van; ton man; drives a horse-drawn van used for collection and delivery of small goods; driver or carman; sometimes specifically designated, e.g. delivery van driver, mail van driver, parcels van driver.

driver, water cart; water carrier, water carrier; drives horse-drawn water cart used for sprinkling roads and flushing drains; fills water tanks at roadside pumps, and switches water flush on and off, as required, during driving.

driver, wherry, see drayman.

duff emptier, duff filler, see carrier, duff.

hauller (not in mines); drives horse-drawn vehicle used for haulage, either on his own account or for an employer.

higgler (carrier); a carrier of goods who also sells articles of all kinds for the best price he can get in the villages he visits.

leader; Yorkshire term; (i) see carrier; (ii) see carman; sometimes specifically designated, e.g. coal leader, timber leader.

lorry man, lorry man, see driver, lorry (or lorry).

porter carman, porter driver; a porter (706) g.v. specially detailed to perform duties of carman g.v.

rolley man, rully man, see drayman.

teamster, teamman, teamster; a carrier g.v. who drives a team of horses attached to a heavy dray, wain or timber cart, drawing a heavy load.

townman; drives horse and van, delivering goods from town shopkeepers to customers in countryside. often sells from van.

traveller (in Wales); a carrier g.v. travelling from village to market town conveying goods and passengers; may sometimes also sell goods.

trolleyman, truck man, see driver, truck.

van man, see driver, van; sometimes specifically designated, e.g. parcels van man, railway parcels van man, ticket vanman (tramway).

wagoner (not farm); drives a horse-drawn heavy four-wheeled vehicle (wagon), largely used for conveying produce or manufactured goods to market or railway station.
 wherryman, see drayman.

720.—DRIVERS OF MOTOR-CARS, OMNIBUSES, VANS AND LORRIES. (Compare similar occupational terms in connection with horse-drawn vehicles in Code 719.)

carrier (country); owner of a motor-van in which he conveys passengers, goods and produce from villages along a certain route to a market town.

chauffeur, chauffanneur; a motor-car driver g.v. usually in private service and wearing uniform; often employed part time in other duties, e.g. carrying messages, parcels, etc., or shopping for his employer, or as gardener or indoor servant.

chauffeur mechanic; a chauffeur g.v. with some knowledge of motor engineering, and able to undertake running repairs.

driver, ambulance (motor); drives motor ambulance for hospital, local authority, or Red Cross society, assists in carrying patients into and out of ambulance; is sometimes also required to keep watch and to answer calls for ambulance.

driver, cab (motor); motor cab driver; drives motor-propelled cab, for public hire, under licence from local authority; cf. driver, taxi-cab.
 driver, car driver (motor); motor car driver; drives light motor-propelled vehicle as distinguished from van, lorry, omnibus or motor coach; cleans and oils car; fills petrol tank; carries out minor adjustments of engine, transmission, etc.; changes tyres, and (if pneumatic) repairs them and pumps up when necessary.

driver, copper van (tramway); a motor driver g.v. who drives motor-van used by bronze coin distributor (729) g.v. on his rounds.

driver, motor driver; general terms applicable to any driver of motor-propelled vehicle, but more generally to drivers of heavier vehicles, e.g. vans, lorries, etc., used for commercial purposes; steers free course on road by turning steering wheel; controls power of engine by hand and foot levers; applies hand or foot brake in emergency; sometimes specifically designated, e.g. electric van driver, mail driver, mail van driver, lorry driver, motor lorry driver, motor wagon driver, petrol lorry driver,

motor van driver, van driver, motor wherry (dray) driver, motor sweeper (road) driver, oil tank driver.
 driver, motor char-a-banc; drives a motor char-a-banc (motor coach), licensed to carry a number of people (usually from 15 to 30), sometimes between regular stages, but more usually on special pleasure trips; sometimes also acts as conductor (724) g.v.

driver, motor relay; motor rully driver; drives motor relay (small motor vehicle) running on light railway or tramway.

driver, motor water-cart; drives water-cart, propelled by internal-combustion engine; waters a specified length of roadway, as directed by road foreman (564) g.v. or other official; controls strength and direction of jets of water; fills tank in water cart with hose from water main.

driver, omnibus driver (motor); motor omnibus driver; drives omnibus, propelled by internal-combustion engine, standing and stopping at specified points on the road and in obedience to bell-signals from the conductor; sometimes specifically designated, e.g. electric omnibus driver, petrol-electric omnibus driver.

driver, overhead wagon (motor); tower wagon driver (motor); as for driver, overhead wagon.

driver, owner (taxi); taxi-owner driver; a taxi-cab driver g.v. who owns (or hires on hire purchase system) cab which he drives.

driver, rail-less car or tram; drives electric vehicle along highways, to convey passengers, each vehicle pursuing free course, i.e. not on rails, and gathering current by trolley from a fixed overhead wire; as for motorcar (tramway) (722).

driver, taxi-cab; cab driver (motor) g.v. whose vehicle is fitted with a taximeter (an automatic apparatus which indicates mileage run and fares paid), hires from passengers for fixed daily charges or is employed at fixed weekly wage; stands with cab at recognized cab-rank, in public thoroughfare or at railway station, awaiting turn to be hired or drives slowly (crawls) along roadways; collects fares and charges from passengers and hands over to employer prescribed amount as recorded by taximeter; term includes owner driver (taxi) g.v.

driver, tower wagon (motor), see driver, overhead wagon (motor).

market carrier (motor); a motor driver g.v. who drives motor van or lorry for the conveyance of produce to market, or from market to retailer.

milk collector; a motor driver g.v. who drives a lorry, collects milk from farmers, and takes it to a depot or railway station.

motor driver assistant; accompanies motor driver g.v.; is generally an efficient driver, and takes place of driver in case of need; assists in loading and unloading lorry or van, cranking-up motor, execution of roadside repairs; is responsible, with driver, for seeing that lorry or van is never left unattended when in use.
 railway carrier (motor); a motor driver g.v. employed, either by railway company or local railway contractor, to collect or distribute goods in area served by railway station.

sack collector (motor); a motor driver g.v. who drives motor vehicle in which he collects empty sacks or bags from customers of his employer; cf. sack collector (719).

721.—DRIVERS OF STEAM WAGONS AND TRACTION ENGINES (not Agricultural).

driver, Motor steam dray; motor steam lorry driver, steam lorry driver; steam wagon driver; drives dray, lorry or wagon (brewer's, timber, etc.) propelled by steam motor.

driver, steam omnibus; drives an omnibus which is propelled by steam generated by flash boiler system and consuming paraffin or similar fuel.
 driver, steam roller; drives, fires, and attends to a steam roller, controls driving wheel and directs roller, so and fro, along surface of road being rolled; shovels coal into boiler fire to maintain required steam pressure, periodically rakes fire to remove clinker and ashes; oils bearings, cleans engine, boiler parts and brasses with cotton waste.

driver, steam wagon, see driver, motor steam drag.
 driver, tractor; motor tractor driver, steam tractor driver, traction engine driver; drives, attends generally to a mechanically-propelled tractor; may also act as steerer and stoker *q.v.*

drawman, steam wagon; feeds fire of steam wagon and assists driver to keep wagon clean; may also act as steerer *q.v.*
 steerer (steam wagon traction engine), motor steerer; is in charge of steering wheel of steam wagon on traction engine; may also act as stoker *q.v.*
 stoker, motor steerer lorry; motor stoker, motor wagon stoker; feeds and cleans fire in engine of steam-propelled lorry or wagon; may also act as steerer *q.v.*

722.—TRAM DRIVERS.

cable tramcar driver; in charge of a car propelled by a uniformly moving underground endless cable; controls gear for connecting and disconnecting car and cable; operates hand brake.
 electric car brakesman; accompanies motorman as driver of tramcar on very steep hills and operates a "slip brake" which grips conduit in centre of rails.

horse tramcar driver; drives horse-drawn tram; operates hand brake.
 motorman (tramways), tramway motorman; runs driver, tramcar driver; drives a tram propelled by electric motors drawing power from overhead wires or road conduit, regulates supply of current by switch handle (controller), and operates hand and magnetic brakes.
 tram driver, tramcar driver; see motorman (tramways); sometimes specially designated, e.g. electric tramcar driver, freight tramcar driver.

723.—VAN BOYS AND VAN GUARDS.

carman's nipper, see van boy.
 cart boy, cartier's boy, cartier's lad, cart minder; minds horses, and generally assists cartier (719) *q.v.*
 cart minder (market); holds heads of market cart horses while driver (719) *q.v.* transacts his business.
 drag boy, drag nipper, dragman's assistant, *as for* van boy.
 guard (carriage), see van boy.
 guard, motor (Post Office); travels on motor vans belonging to Stores Department to guard stores in transit from head office to sub or branch offices; assists in loading and unloading of vans; gets check slip receipt for stores delivered and returns it signed to storekeeper (941) *q.v.*; when not so engaged, assists generally in stores.

lorry boy, lorry boy, lorry nipper, lorry nipper, *as for* van boy.
 mail guard officer, see van guard (mail).

motor lorry driver's assistant, *as for* van boy.
 motor porter; accompanies motor van driver (720) *q.v.* and assists in collection and delivery of goods.

motor portress, *as for* motor porter.
 motor van driver's assistant, *as for* van boy.
 parcels cart lad, parcels van lad; a van boy *q.v.* accompanying a parcels cart or van.

trolley boy, *as for* van boy.
 van boy, van attendant, van guard, van minder; carman's nipper, guard (carriage); travels on tail board or back of cart or van to look after goods therein; feeds and waters horses on the road, helps cartier to load, unload, collect and deliver goods.

van guard, motor van guard (mail); mail guard officer; travels with and guards contents of mail vans.
 wagoner's boy, *as for* cart boy.

724.—OMNIBUS AND TRAM CONDUCTORS.

charabanc conductor, motor car conductor; is conductor to charabanc or large motor car plying for hire; takes fares from and issues tickets to passengers, or examines tickets purchased at ticket office; acts as guide and describes places and buildings of interest in passing.

omnibus conductor, bus conductor (motor or horse); collects fares on an omnibus, issuing tickets marked with amount of fare, and punched against stage for which issued; gives starting and stopping signals to driver (719, 720) *q.v.*; changes boards, etc., showing destination; keeps record of tickets issued, time-keeping of vehicle and details of journeys for inspection by ticket inspector (714) *q.v.*; is responsible for number of passengers permitted by local by-laws or police regulations not being exceeded, and for safety of passengers in boarding and alighting from vehicle.
 omnibus conductor, railway; omnibus guard; in charge of hotel or railway omnibus; sees to loading and unloading of luggage; assists passengers.

tramcar conductor, tramcar guard, tram conductor (cable, electric, freight, horse, steam), *as for* omnibus conductor (motor or horse).

tramcar junior guard; assists passengers to board or to alight from car; signals to driver (722) *q.v.* to start or stop when conductor is collecting fares, etc.; collects fares on upper deck while conductor remains below to prevent overcrowding; assists conductor generally, more particularly during rush hours or when trailer is attached to car.

725.—GROOMS AND HORSE KEEPERS.

collarman; a stableman *q.v.* also in charge of collar room of large public stables; issues horse collars to carters (719) *q.v.* and collects them after the day's work; examines collars for wear and tear and despatches them, as necessary, to saddler's shop for repair.

coll breaker, see horse breaker.
 exercise boy; a stable boy *q.v.*, e.g. at racing stables, who takes out horses for exercise.

groom; horsekeeper, horse man; feeds and waters horses in stable; combs and brushes coats, manes and tails; cleans boots and applies dressing to hoofs; clips horses' coats with clipping machine and trims manes and tails as required; rides or walks horses for exercise when necessary.

groom, domestic; a groom *q.v.* engaged in domestic service; accompanies members of family out riding and sometimes instructs them in riding; usually acts as own stableman *q.v.* and usually is a limited servant; often waits at table and serves as footman (909) *q.v.*; sometimes also assists gardener (913) *q.v.* in light work.

horse boy, see ostler.

horse breaker; coll breaker, horse framer (not *horse*); accustomed to bring horses to reins and saddle, or to being harnessed to vehicles, and inures them to road traffic; for saddle horses, harnesses in weighted saddle and, using long reins, accustoms

horse to obeying words of command, etc., in trotting ring, subsequently rides horse himself until it is perfectly broken in; for vehicle horses, harnesses in light gig with long shafts and drives horse until it is sufficiently used to words of command; completes training in ordinary vehicle and corrects faults, e.g. bucking; cf. rough rider.

horse clipper; trims horses' coats, manes and tails by hand, with a horse clipper as distinct from clamping machines used by stableman *q.v.* etc.; usually works on own account or is employed only at large stud, racing, or hunting stables; usually also does work of horse singer *q.v.*

horse feeder; prepares and gives food to horses in large stables; usually done by groom *q.v.*

horse fitter; a groom *q.v.* skilled in treatment of sick horses; recognizes symptoms of common maladies and prescribes or mixes appropriate remedies.

horsekeeper, horse man, see groom.

horses alinger; sings horses' coats after clipping to remove loose ends and promote even growth and glossiness; usually done by horse clipper *q.v.*

horse trainer (not race horses), see horse trainer.

hooter, see ostler.

livery stable helper; a stable helper *q.v.* employed at livery stables.

napman, see ostler.

ostler; knacker, horseboy, napman; a stableman *q.v.* who feeds, waters and stalls customers' horses in hotel stables, and who has custody of vehicles temporarily left in stable yard, coach house or motor garage; collects fees for stabling horses or vehicles, handing to hotel proprietor monies received; often employed part time in driving hotel omnibuses to and from railway station or at boots (909) *q.v.*

rough rider; a horse breaker *q.v.* who, in addition to other methods of training horses, rides them bare-backed.

sick horse keeper; looks after sick horses, feeds and waters them, and administers medicine; employed, e.g. in large carriage company's stables; work normally done by horse foreman (715) *q.v.*

stable helper, stable boy, stable labourer, very good (livery stables); does odd work in stables, e.g. cleans stables, brings food and water for horses, etc.

stable man, stable keeper; rakes or sweeps out used bedding, etc., from stable stalls, shovels into harrow, wheels to and tips into manure pit; sweeps stalls, runnels and stable yard with hose pipe and sweeps down to remove refuse; throws down, with fork, clean bedding (straw, litter, etc.) from left into stable below and spreads it in stable; cuts chaff for horses by feeding hand or power-driven chaff-cutting machine; cleans stable windows, sweeps stalls and generally cleans stable premises; lime washes stables periodically; sometimes does part of groom's duties, e.g. feeding, watering and cleaning horses.

yardman (livery stables), see stable helper.

726.—OTHER WORKERS.

barrow lender, barrow letter, see barrow truck letter.

bar turner (tramways), see pole shifter.

batb chair attendant, batb chair drawer, batb chair man, batb chair wheeler; chair drawer, chair wheeler; pushes or draws invalid chairs (batb carriage); owns chair, cf. batb chair proprietor, or hires from proprietor for daily payment, or is employed by him at weekly wage; usually stands on recognised rank with chair for hire.

bash chair driver, donkey; leads a donkey which draws a bath (or invalid) chair, plying for hire chiefly in streets of health resorts.

bath chair proprietor, bath chair letter; chair letter, chair proprietor, wheel chair proprietor; owns one or more bath or invalid chairs which he lets out on hire by hour or day.

bath chair proprietor, donkey; a bath chair proprietor, *s.v.* who owns and lets on hire, invalid chairs drawn by donkeys.

bridge company's officer (toll collector); collects tolls from pedestrians, drivers of vehicles, cattle drivers, etc., using a bridge belonging to a private company.

bronzes coin distributor (tramways); accompanies copper van driver (740) *s.v.* to tramway depots, taking supplies of bronze coins for use by conductors (734) *s.v.* in giving change; also collects coins paid in by conductors, from depots, and takes them to bank or to head office and renders statement to tramway cashier (335) *s.v.*; sometimes has arrangement with shops, etc., for taking bronzes or other coins, to save transport to bank or head office.

carriers' labourer; assists in loading and unloading carts, horses, etc., and does odd manual labouring work in yard or garage of master carrier.

chain horse boy; cock horse boy, tip boy, tipper, trace boy, trace horse boy; looks after and leads a horse that helps wagen, barge, horse, with their loads; wherever help is needed; employed by canal companies, haulage contractors, etc.

chair driver, see bath chair attendant.

chair letter, chair proprietor, see bath chair proprietor.

chair wheeler, see bath chair attendant.

check examiner (tramways); examines tram lines at busy traffic points or on sharp curves to ascertain whether check edge on tram rail (which prevents car from leaving metal) is in good condition; reports to district permanent way inspector (714) *s.v.* and recommends repair or renewal of defective portions of rail.

chief licensing tacter (omnibus), see re-licensing man (omnibus).

cleaner; general term for any worker engaged on cleaning of vehicles etc.; their accessories, etc.; sometimes specifically designated, *s.v.* beam cleaner, cab cleaner, engine cleaner, harness cleaner, lamp cleaner, motor cleaner, omnibus cleaner, station cleaner (tramways), tramcar cleaner; usually night workers; *cf.* washer.

cleaner, conduit (tramways); trap cleaner; drains and cleans out dirt and water from conduit boxes which are fixed along route on conduit tramway system.

cleaner, controller (tramways); controller attendant; cleans blades and contacts of tramcar controllers; notices minor faults, and reports larger ones.

cleaner, point (tramways); cleans out dirt from tramway line points with brush and steel rod; oils point bearings.

cleaner, rail (tramways); cleans surface of tramway rails by pushing backwards and forwards a heavy metal burnisher covered with abrasive material.

cleaner, track (tramways); track man (tramways); cleans grooves of tramway rails with specially-shaped tool, which scrapes out dirt, etc., from groove.

cleaner, trap (tramways), see cleaner, conduit (tramways).

cock horse boy, see chain horse boy.

controller attendant (tramways), see cleaner, controller.

donkey driver, donkey keeper, donkey letter; drives donkeys (of which he is often owner) let out on hire for rides at pleasure resorts.

doorman; collects refuse from houses and shops into a cart; assists in unloading cart at depot.

emergency man (tramways); a tramway conductor (734) *s.v.* who is held in readiness to replace anyone of depot cashier's assistants who may be on leave or sick.

farmer of tolls; lessee of tolls, toll collector (constructive); obtains from owners, in return for an agreed rental, right to levy tolls at fixed rates on vehicles, pedestrians, cattle, etc., passing over a bridge or a certain section of road.

flagman (tramways), see signalman (tramways).

garage hand; does unskilled work in motor garage; helps to clean and oil cars and fills their tanks with petrol; cleans garage.

goat carriage driver; leads a goat, or goats, drawing a small carriage plying for hire at pleasure resorts.

grease; file axle boxes of vehicles, such as trams, buses, motors, carts, trucks, with cert grease; file grease-boxes of motors and oils engines.

guide (Automobile Association or Royal Automobile Club), see patrol (Automobile Association or Royal Automobile Club); sometimes specifically designated, *s.v.* cyclist guide, motor guide, motor cyclist guide.

hand truck letter, hand truck proprietor; borrows leader, borrows letter; owns hand trucks or harrons, which he lets out on hire to caterers, etc.

harness room man; has charge of harness room attached to large stables (*s.v.* those of railway company's carriage depot, firm of carriage contractors); issues harness sets to drivers (719) *s.v.* before and collects them after the day's work; hangs sets on pegs; examines sets to ascertain whether replacement or repair of leather or metal parts is necessary; sends defective sets to saddler (344) *s.v.* for repair.

hauler's labourer; assists haulier (719) *s.v.* with loading and unloading in omnibus (omnibus service, tramways); accompanies candidates for employment as drivers, on trial runs; reports as to their suitability to traffic manager (716) *s.v.*; allocates trams to experienced drivers (735) *s.v.* on other prescribed period of training on various routes, himself accompanies each trainee on trial journey and finally reports, as to suitability, to traffic manager.

instructor, technical electrical (tramways); motor demonstrator; takes drivers or other workers through course of instruction in technical side of their work.

lamp and bell attendant (tramways); Night and bell examiner (tramways); examines electric globes, switches, signs, signal lights and electric or other tests of trams on their return to depot, and repairs or replaces faulty parts, etc., is responsible to depot superintendent (734) or to depot foreman (716) *s.v.* for ensuring that cars leave depot with lights and mechanical bells in good working order.

lessee of tolls, see farmer of tolls.

light and bell examiner (tramways), see lamp and bell attendant (tramways).

loader, cart; cartage loader, carrier's van loader, van loader, warehouse loader; assists carter (719) *s.v.* as warehouse, wharf, market, or railway goods depot in loading vans with goods for delivery.

motor demonstrator (tramways), see instructor, technical electrical.

overhead wagon boy (tramways); accompanies emergency overhead wagon, and assists linesman by handing loads, etc.

patrol (Automobile Association or Royal Automobile Club); guide, scout, patrol, or cycle or motor cycle, usually reads over an appointed area, guiding and aiding members of Automobile Association or Royal Automobile Club; or stands at junction of two or

more busy main roads, on point duty; but for his base a way-side cabin containing a telephone, assists in case of breakdown, and if necessary, telephones for assistance from nearest garage; sometimes specifically designated, *s.v.* cyclist patrol, motor cyclist patrol, motor patrol.

petrol man (omnibus); fills petrol tanks of motor omnibuses, and returns empty petrol cans to petrol store, is usually employed part time in sweeping and washing-down garages and approaches.

pitman (tramways); works in sunk pits, cleaning underneath parts of trams in shed or depot.

plough changer, plough shifter (tramways); connects and disconnects plough (instrument which picks up current from conductors) to and from cars at junction of overhead and conduit systems.

post attendant (tramways), see pointman.

point boy (tramways); assists pointman *s.v.* or controls points at small junction.

pointman (tramways); point attendant; controls points or switches on tramway by a lever, or a neighbourhood of switch; often acts as signalman *s.v.*

pole shifter (tramways); bar turner; works at large junction, or terminus, transferring trolley poles of trams from one overhead wire to another, or reversing them for tram to start on return journey; often done by conductor (734) *s.v.*

private checker; stands at point on omnibus route to note number of passengers in passing buses, for guidance of traffic adviser (714) *s.v.*

railway carting agent (not employed); driver, or agent, of lorry or motor van, as outside carrying agent of heavier goods for a railway company; usually owns horse and van, or motor, but sometimes hires from cartage contractor (715) *s.v.*; usually to be found at small railway stations, which companies have no carts; often also carts for private individuals; *cf.* railway carting agent (713).

railway parcel agent (not employer); as for railway carting agent (not employer) but handles lighter goods only.

re-licensing man (omnibus); chief licensing tacter; an experienced motor mechanic and driver who examines omnibuses after annual overhaul in preparation for re-licensing; drives omnibus for short trial, testing starting and brake controls, etc., on return to garage, reports omnibus in running order or returns it, for further overhaul, to repair shops; similarly tests new omnibuses before they are sent for police inspection to obtain licence.

sand dryer (tramways); dries, in oven, sand used on tramcar to prevent slipping on wet or greasy rails; sand is wet sand into oven; rails sand is quicken drying; stokes furnace fire as required; shovels dry sand into wheelbarrow and discharges into hopper for storage; fills, therefore, small bags with dry sand for depositing at other depots or for use by sandman *s.v.*

sandman (tramways); a depot labourer who replenishes sand boxes of tramcars with dry sand; also fetches spare bags of sand and places on cars for use of tram drivers (722) *s.v.*; is specially engaged part time on other labouring jobs.

scout (Automobile Association or Royal Automobile Club), see patrol (Automobile Association or Royal Automobile Club); sometimes specifically designated, *s.v.* cyclist scout, motor cyclist scout, motor scout.

setter, cart; cart shunter, van setter, van shunter; takes horse and van from driver (719) *s.v.* on arrival at carriers' or railway yard, and while driver tests or goes to customer, sets or shunts van against leading or nailing stages, etc.

setter, truck; sets or shunts trucks or
harrow in markets, etc., for con-
venience in loading or unloading.

setter, van, see settler, cart; cf. van
setter (706).

shunter, cart; van shunter, see
setter, cart.

signalman (tramways); fogmen
(tramways); signals, to approuching
trams, at busy tramway junction,
dangerous bend in the road, etc., when
road is clear, by pulling lever of
semaphoric arm signal or by raising
or dipping a flag; at night, sometimes
signals with red or green lamp; also
warns pedestrians or drivers of
vehicles of approaching trams; often
done by pointman (tramways) g.v.

ticket office attendant (tramways);
receives ticket boxes from incoming
conductors (734) g.v. and handing
out ticket boxes to outgoing con-
ductors; places ticket boxes, as
checked by ticket clerk, on shelves in
readiness for making up by clerk for
next day's journey; is responsible to
clerk for keeping boxes on shelves
according to routes, in proper rotation
for re-issue.

tip boy, tipper (tramways), see chain
horse boy.

toll agent (contractor), see *ferret* of
tolls.

toll bar keeper; turnpike gate keeper;
collects tolls for owner of road from
pedestrians, cyclists, drivers of
vehicles, etc., and opens and shuts
toll gate.

trace boy, trace horse boy, see chain
horse boy.

track man (tramways), see cleaner,
truck.

traverse man; operates, by hand
lever, traverse-table (a platform level
with the ground, running on rollers)
on which trams are transferred
laterally from one set of rails to
another, in car changing to facilitate
cleaning, examining, etc.

traverse; travels on loaded dray
or motor lorry with drayman (719) or
motor lorry driver (720) g.v. on
delivery round; discharges barrels at
customers' premises (sometimes
assisted by another traver) by rolling
barrels down sloping runner into
cellar; hauls empty barrels out of
cellar by hand rope and pulls them
on to drays.

turnpike gatekeeper, see toll bar
keeper.

washer; washes down vehicles with
water (from hose or bucket), rugs and
brushes; often further designated
according to kind of vehicle, e.g. cab
washer, car washer, carriage washer,
cart washer, dray washer, lorry
washer, motor car washer, omnibus
washer, tramway washer, truck
washer, van washer; cf. cleaner.

wheelbarrow letter, wheelbarrow
proprietor, see for hand truck letter.

wheel chair proprietor, see bath chair
proprietor.

Sub-Order 3.—Water Trans- port Workers.

730.—SHIP OWNERS, MANAGERS, BROKERS AND AGENTS.

agent, canal, in charge of clerical
and manual staff at a depot on canal;
acts as representative of canal com-
pany over specified area round depot;
directs and supervises crewmen
(731) g.v. and is responsible for
efficiency of conveying arrangements
throughout area; supervises receipt
of merchandise at warehouse and its
despatch by canal; supervises dis-
charge of incoming canal boats and
despatch of cargoes to consignees by
road or rail; collects freight charges.
warehouse dues, etc., from traders;
keeps record of cash received and
paid, and remits sums collected to
company's head office.

agent, packet, or for agent, ship.

agent, river and canal, or for agent,
canal.

agent, ship; shipping agent; (i) (at
port) represents a shipowner or ship-
ping company at a seaport, using
own premises and staff; arranges for
discharge and shipment (including
transshipment) of his company's ships'
cargoes, calling at, or ashore from,
port where he is stationed, and issues
necessary instructions to port or
dock authority, wharfinger (732),
master stowdore (732) g.v., etc.; re-
ceives bills of lading in connection
with outgoing cargoes and conducts
necessary correspondence with
traders; completes ship's papers
(manifest, etc.) in preparation for
her sailing; receives ships' papers
from masters of incoming ships and
sees that consignees have title to
goods, forming part of cargo, claimed
by them; collects freight due to
shipping company, sends the re-
sulting statements periodically or
as required, and remits to them
money collected by him; issues
tickets to passengers who travel on
his company's ships; is sometimes
also responsible for sailing and re-
visiting ships calling at port, and
usually being remunerated on
commission basis; (ii) (inland
town) represents shipowner or
shipping company in an inland
town, using own premises and
staff, in charge of conveying
arrangements in his town and neigh-
bourhood; arranges with port ship-
ping agent or with shipping company
for shipment of cargoes from his dis-
trict; issues and receives bills of
lading and transmits them to ship-
ping company or to port shipping
agent; collects freight from cus-
tomers; issues passenger tickets.

agent, tug company's; represents
tug-owning company at a port; is in
charge of conveying arrangements
and transmits orders for towage to
company which he represents; is
usually stationed at port other than
that where company head office is
situated, usually being remunerated
on commission basis.

broker, ship; acts as intermediary
between sellers and buyers of ships,
using own premises and staff;
negotiates sales of ships, too old for
further service, to ship breaker;
usually combines such work with that
of shipping agent g.v. and of ship
charterer g.v.

charterers, ship; acts as intermediary
between exporters and shippers or
ship masters (738) g.v. in exchanging
charter parties, i.e. agreements for
use of ships in conveying cargoes
from one port to another; prepares
charter parties, for which work
he has expert knowledge of
charter forms and of different types
of vessels; advises exporters, on
whose behalf he is acting, as to
planning of voyage; usually also does
work of shipping agent and/or ship
broker g.v.

731.—HARBOUR, DOCK, CANAL— OFFICIALS; PIER MASTERS.

ballast master, ballast inspector; is
responsible to ballast contractor (732)
g.v. for supervision of ballast heavers
(745) g.v.; sees that ballast is securely
stowed in ships so that it will not
shift during voyage, and, in dis-
charging ballast, supervises shifting
from ship's hold to quay and at
of voyage; sometimes also does work
of ballast contractor.

bank ranger, see inspector, canal.

berthing master; handles shore
matter; master of landing stage, quay
master; has control of landing stage
or quay from which vessels are
moored for discharge of passengers
and cargo; allocates berths for
vessels at landing stage or quay and
issues instructions for movements of
other vessels, if necessary, in case of

larger vessels, attends on landing
stage or quay, and, if needed,
directs landing stages, see (741)
g.v.; superintends embarkation and
disembarkation of passengers' lug-
gage, or of cargo, mails, etc., by
porters and laborers (745) g.v.;
keeps records of vessels berthing at
landing stages or quays, and of
number of passengers, as well as of
quantities of baggage, mails, or
cargo landed on each occasion, and
sends in returns to dock or harbour
authority so that proper dues may be
collected for use of landing stage or
quay.

boarding foreman, boarding officer;
is responsible to harbour or dock
authority for seeing that ship's
papers, etc., are in order before
allowing her to enter dock or
harbour.

buoy agent; is responsible to port
authority for letting of buoys for
mooring vessels, pleasure boats, etc.

buoy master, buoy yard foreman;
is responsible to river, port, or con-
servancy authority, for maintenance
and upkeep of buoys marking
channels leading to or from a
harbour, river, etc.; keeps in con-
dition of buoys and periodically makes
an inspection of all buoys in district;
issues instructions for removal
of buoys, when necessary, for removal
from channel anchorage to dry
yard for repairs, or to repair shops,
and on instruction from marine sur-
veyor g.v., orders new buoys to be
placed in channel to mark channel
alterations, position of wrecks, etc.

canvasser (dock); calls on shipping
companies to represent advantages of
a particular dock or port, and thus
secure necessary trade.

cargo receiver; under supervision of
wharfinger (732) g.v., receives cargo
delivered for shipment from carting
agents, etc., in dock warehouse;
issues instruction as to dis-
posal of cargo in warehouse until
ship is ready to be loaded; supervises
counters-off (749) g.v.; signs carriers'
(719) and lightermen's (735) g.v.
delivery notes in acknowledgment of
receipt of goods, and issues a dock
receipt, whereon he notifies irregu-
larities, e.g. frail containers, shifting
contents, signs of tampering with
packages.

cargo superintendent; is employed by
shipping company to supervise hand-
ling of cargo being loaded and un-
loaded at dock; is responsible to
marine superintendent g.v. for seeing
that cargo is carried, stored, or
expedited, so that vessel is not
delayed in port; issues instructions to
master stowdore (732) g.v. as to dis-
posal of cargo in ship's hold or dock
shed.

chief collector (dock); principal
collector of rates and dues; is respon-
sible to dock, port, or harbour
authority for collection of dues, rates,
or rents owing to them, and directs
and controls collectors g.v. engaged
in this work.

chief traffic manager (dock); is
responsible to dock, port or harbour
authority for regulation of traffic on
their premises, and directs and con-
trols staff engaged in this work.

coal derrick manager, coal derrick
master; is employed by coal con-
tractor or colliery agent at coal
staples on dock or quay used by
vessels for loading or unloading coal;
controls crewmen (735) g.v. and
generally supervises handling of
traffic and coaling operations;
executes coaling orders, allocates
vessels to appropriate derrick and
instructs railway companies as to
number of waggons required in coal
sidings at quay.

collector, harbour dues and rates;
collector of dues, port dues and
rates collector; receiver of dues, ton-
nage dues and rates collector; collects,
on behalf of harbour or port
authority, dues and rates owing from

traders or in respect of vessels using port, e.g. port or harbour dues, dock dues, landing charges, warehouse charges, demurrage, etc.; controls indoor and outdoor staff of rates and dues depots.

collector, toll (canal); collects tolls for canal authority, as lock or toll offices, from masters of vessels passing through canal; keeps records and remits monies collected, with statement of account, to canal company's office; frequently also does work of lock keeper (741) g.v.

collector, tonnage dues and rates; see collector, harbour dues and rates. **comptroller (dock);** controls financial side of dock authority's business; is responsible for collection of dues by collector g.v.; collection of rents for use of dock estate, etc.; payment of wages and dock accounts; supervises banking arrangements and signs cheques on behalf of dock authority or delegates such work to a responsible official; is responsible for keeping of company's share register and for payment of dividends to shareholders; sometimes also acts as registrar (390) g.v.

computer of dues (dock); assesses dues owing by tenders to dock or port authority; fixes dock and warehouse dues in consultation with committee of management of authority; publishes, from time to time, printed list of charges; revises lists of charges periodically, and fixes charges for new commodities not appearing in lists; informs collector of dues g.v. as to variations in assessment or alters time of dues.

dock master, dock superintendent; has general administrative control of a dock and its operation; as for harbour master.

dredging master, dredging superintendent; is responsible to port, dock or harbour authority for carrying-out dredging operations; on instructions received from marine surveyor g.v., orders dredger captain (733) g.v. to dredge channels alongside quays, or to remove banks or shoals impeding channel; instructs dredger captain (733) g.v. to dispose of dredged material at prescribed dumping grounds; controls staff operating dredgers and boppers.

dredging master and marina engineer; a dredging and marina engineer is also responsible for quays, dredgers, and other vessels belonging to dock or harbour authority.

establishment officer (dock); is responsible for engagement and discharge of staff of dock authority, and for compilation and preservation of records concerning such person employed.

examiner, chain; examines and tests in workshop, chains used on derricks, cranes, etc., in loading and unloading vessels; stands at berth along which chain passes or runs, or tests chain with hammer to detect faulty links; marks same with chalk for cutting-out and replacing with new links by smith (190) g.v.; places chains, examined or re-linked, on hydraulic testing machine and sets testing machine in motion to test chain considerably above its required lifting capacity; finally again examines with hammer for faulty links, and returns chain to stores for re-linking.

harbour master, harbour superintendent; port master; in charge of docks, wharves, landing stages, etc., under jurisdiction of port or harbour authority; is responsible for care and upkeep of dock property; controls movement of shipping into and out of port, harbour or dock; decides general policy in connection with quay space appointment.

haven master, as for harbour master; term found only in small harbours.

horse superintendent (canal); is in charge of horses used in towing boats and belonging to canal authority; supervises stablesmen (723) and horse

drivers (719) g.v.; fixes journey stages; makes periodic inspection of horses and stables; is responsible for purchase of fodder, litter, etc., and for sale of stable manure; purchases horses and sells them when no longer fit.

inspector, baggage; is responsible for passengers' baggage being properly put on board or landed; sees that it tallies with list supplied by shipping office, and (in loading) that it is taken to right part of ship.

inspector, ballast; see ballast master.

inspector, ballast ground; superintends men working on ballast ground unloading ballast from railway trucks, barges, etc., or loading it for conveyance to ship's side.

inspector of barges; (i) periodically examines barges to ascertain whether they are sea-worthy and otherwise in good condition, and reports any repairs that may be necessary; (ii) an official of local authority, who inspects barges, and sees that their correct registration, their compliance with regulations, their sanitary condition, and their freedom from infectious diseases.

inspector, boat loading; see inspector, cargo.

inspector, building (docks); inspects, externally and internally, buildings belonging to or occupied by dock authority, and arranges for any repairs, etc., that may be necessary; examines dock warehouses and certifies maximum load for storage on each floor; examines cases of strain in warehouse floors or supports, reported to him.

inspector, canal bank ranger (canal); periodically examines a specified length of canal or canalised river, takes soundings in canal channel, and at quays and landing stages; reports as to general condition of bank, bottom and recommends removal of weeds, cleaning of bottom, dredging, etc.; examines banks and towing paths, reports condition, recommends repair, etc.; investigates complaints as to shallow parts of channel.

inspector, canal lock; periodically examines lock gates, by opening and closing, to ascertain whether appliances work efficiently; inspects lock pit walls, woodwork and ironwork lock gates, notes leakage and defective parts and recommends repair.

inspector, cargo; surveyor of cargoes, boat loading inspector; inspects loaded vessels to see that cargo is properly trimmed i.e. level, and evenly distributed and lashed, or tightly packed, and not liable to shift in heavy weather and thus become a danger to stability of vessel.

inspector of chains, bolts, ropes, etc.; examines cables, chains, bolts, wire ropes, slings and lifting appliances used on dock or canal to test condition; recommends necessary repairs to dock or canal engineer; orders withdrawal of defective chains, etc., and sends to testing department.

inspector, dock; makes periodical visits to various parts of docks to see that work is being properly carried on, and notes irregularities.

inspector of flats; examines feet of "flats" (square-ended, hold-less lighters of shallow draught, used for certain kinds of cargo, e.g. coal, iron ore) belonging to dock, canal or harbour authority; reports defects to dock or canal engineer and recommends necessary repairs.

inspector, outdoor (dock); is responsible for inspection of docks, dock gates, bridges, quays and other outdoor premises and plant belonging to harbour, dock, or port authority; supervises inspector of chains, etc.; dock inspector g.v., albatross duties, receives their reports and recommends repairs to chief engineer.

inspector of shipping; is responsible to dock authority for inspection of ships berthed in dock or harbour to ensure that regulations regarding, e.g. erection of gangways, lighting fires, waste disposal, etc. are observed; patrols docks during loading and unloading operations to ensure that tackle dangerous to public or to dock property is not used; warns unauthorized persons off dock premises.

inspector of stores; stores supervisor; is responsible for maintenance of stores (gear, ropes, chains, lamps, etc.) in good condition.

inspector of timber; is responsible to dock authority for safe stowage of timber unloaded from vessels; supervises placing of timber in timber ponds, sees logs or timber rafts securely lashed together and anchored in pond to prevent damage to timber; supervises erection of timber stands, built up of sawn-up timber; satisfies himself that they will withstand gales.

inspector of tags, etc.; inspects tags, etc., in dock or harbour service, to ensure that they are fit for work and in good condition, and reports if repairs are necessary.

inspector of weighing; periodically inspects weighing machines on dock or premises, testing accuracy by check scales and standard weights; rejects inaccurate machines and rejects and notices keeper of weighing machines and materials g.v.

keeper of cranes; is responsible to dock authority for maintenance of cranes on authority's premises; supervises inspectors of chains, cranes, bolts, etc., and directs work of crane rope shop; albatross crane-men (390) g.v. in accordance with work in hand; orders movement of portable cranes about dock as necessary.

keeper, Trinity buoy; has charge in absence of him, of buoy belonging to Trinity House (lighthouse authority for England and Wales); sees that they are painted as often as required, and that they are always in correct position.

keeper, warehouse; has charge of warehouse belonging to dock authority, and is responsible for goods stored therein; controls and directs warehouse staff.

keeper of weighing machines and materials; has charge of weighing machines and materials (weights, etc.) and weighing machine parts in stores and on dock estate, is responsible to dock authority for ensuring that these are kept efficient and accurate; supervises inspectors of weighing g.v.; keeps records of machines altered and details of their use when rented by master storekeeper (732) g.v.; furnishes to collector of dues g.v. statements of machines and weights tested.

labour master; engages and discharges labour (unskilled or semi-skilled) employed by dock or harbour authority; despatches as required to work on dock estate; in charge of pay office, including payment of labourers and compilation of wage sheet.

landing stage master; see berthing master.

manager, dock and warehouse; is responsible for business arrangements in connection with storage, etc., in warehouses or on dock premises.

manager, traffic (canal); records entry of boats into canal and departure therefrom; issues instructions regulating entry, to avoid congestion; usually keeps map to mark volume of traffic in canal at any given time; observes rate of boats' progress, number of boats berthed at wharves, etc.; in general, facilitates easy progress of canal traffic.

manager, traffic (docks); is responsible to chief traffic manager g.v. for regulation of shipping, rail and road traffic in large dock dock estate, or section thereof; decides time of vessels' entry to suit berthing

accommodation; regulates road and rail traffic to prevent congestion in dock-sidings, quays or roads leading therefrom.
marine superintendent (dock), *marine supervisor (dock),* *marine surveyor (dock),* *marine surveyor and water bailiff; surveying officer;* conducts surveys of banks and channels of dock estate, or of port or harbour; prepares port or harbour charts; directs dredging operations; has charge of buoys, beacons and sometimes of light-houses and lightships showing harbour entrance and marking channels, has charge of dock or harbour authority's craft, i.e. dredgers, tugs, ferries.

master of landing stage, *see* **berthing master.**

pier master, *as for* **berthing master.**

pilot master; superintendent of pilotage, on dock or harbour authority's behalf, has charge of pilotage arrangements giving access to port; arranges pilot roster in accordance with tides and traffic entering and leaving port; keeps pilotage record and forwards salary sheets of pilots (733) *q.v.* to harbour authority.

port master, *see* **harbour master.**

principal receiver of rates and dues, *see* **chief collector (dock).**

quay master, *see* **berthing master, receiver of dues, see collector, harbour dues and rates.**

shore officer, night; combines duties of inspector of shipping, traffic manager (docks) *q.v.* etc., during night when volume of work does not justify attendance of these officials or their deputies; is responsible for supervision of dock quays, wharves and night loading and unloading operations.

stair master, N.E. coast term; a coal derrick master *q.v.* in charge of a coal stair (loading stage specially equipped for loading or unloading of coal); is responsible for care and upkeep of stair.
superintendent of stowage (dock); is responsible to dock or harbour authority for maintenance of docks, and of buildings, engines, cranes, loading and unloading apparatus, tugs, dredgers, and other plant belonging to that authority; directs and controls maintenance staff.
superintendent of pilotage, see **pilot master.**

supervisor, stores, see **inspector of stores.**

surveying officer, see **marine superintendent (dock).**

surveyor of cargoes, see **inspector, cargo.**

traffic agent (canal); represents a canal company in a particular town; solicits and books orders, and makes arrangements for traffic.
water bailiff (dock); a highly qualified technical man employed as harbour master *q.v.* or on harbour master's staff, or as marine surveyor *q.v.*; cf. **water bailiff** (749).

732.—WHARFINGERS AND MASTER STEVEDORES.

agent, wharf; represents shipping company, firm of carriers, or barge owners, on a wharf, and superintends loading of firm's ships, barges, etc.

contractor, ballast (docks); an employer who contracts to supply ballast required for ships, and, in most cases, to carry out actual work of ballasting.

manager, wharf; controls and superintends work being done on wharf; is responsible for care and maintenance of plant, etc.

representative, dock (not for dock company); represents shipowners or a commercial firm and transacts business, as to loading and unloading of vessels for employer at an office on or near docks.

stevedore, master stevedore, superintendent stevedore; an expert in scientific loading of ships; undertakes loading of ships' cargo, with aid of stevedores (743) and dock labourers (745) *q.v.* for a fixed sum; may, however, do similar work directly as employee of shipping company.

stevedore, coal; a master stevedore *q.v.*, specialising in loading ships with coal either as cargo or bunker coal; contracts to load ships on a tonnage basis, and employs coal tipplers and trimmers (744) *q.v.* for this purpose.

wharfinger; runs and sometimes owns a wharf equipped with cranes and other appliances for loading and unloading vessels and fitted for storage; usually a master stevedore *q.v.*; sometimes specifically named, e.g. coal wharfinger.

733.—NAVIGATING OFFICERS AND PILOTS.

captain, see **master;** sometimes specifically designated, e.g. large captain, dredger captain, ferry captain, hopper captain, launch captain.

captain (cable ship); navigation duties and responsibilities as for master on passenger vessel; also, where no cable engineer (300) is carried, is responsible for raising cable from, and lowering it to ocean bed, manipulation of cable on deck, testing and repair or splicing of cable; decides, in consultation with chief electrician (cable ship) (301) *q.v.*, extent of repair operations which can be done at sea.

captain, dredger, see **master, dredger.**

captain, ferry, see **master, ferry.**

commander, see **master.**

master, ship master, ship's master, master mariner; captain, commander; holds master's or master mariner's certificate, issued by Board of Trade; is in supreme command of vessel on voyage, and responsible to owners for its safe navigation; makes daily inspection of work going on in all parts of ship, to see that duties are being properly performed by all hands; in consultation with chief officer or first mate *q.v.*, arranges rota of duties necessary for ship's navigation; takes charge himself from bridge, and issues instructions to quartermaster (735) *q.v.* in case of fog or when ship is otherwise in danger, but does not usually keep a regular watch in other circumstances, at least on large vessels; is responsible for keeping ship's log and certifies its accuracy before it is handed over to Board of Trade on completion of voyage; keeps record of boat drills on passenger vessels; is responsible for custody of ship's papers (manifest, crew's discharge books, and statements of account); superintends and directs work of parser (737) *q.v.*; duties vary according to size of ship and according to number of subordinate officers (mates, pursers, etc.).

master, derrick; in charge of a flat or lighter fitted with derricks as he uses in any part of dock or harbour.

master, dredger; dredger captain; in charge of a dredger and its crew, and is responsible for navigation and dredging operations; does not hold, except rarely, a certificate, *see* **master.**

master, ferry; ferry captain; in charge of and navigates ferry boat which is mechanically propelled; does not hold, except rarely, a certificate, *see* **master.**

master, tug; commander and navigator a tug; usually holds Board of Trade coastwise navigation ticket, or navigating permit issued by river conservancy of similar authority; tows barges, sailing ships, and occasionally all steamships, through narrow waters (e.g. English Channel) or

from open sea, river mouth, outer harbour or roadstead to inner harbour, dock or dry dock, or vice versa; sometimes also tows ships in distress or under repair for long distances in open sea.

mate; officer; holds Board of Trade certificate of competence as first, second, etc., mate, first or second mate often also holds a master's certificate, which still serves as mate or assistant master *q.v.* in navigation and in executive control of vessel; takes watch on bridge in turn with other officers and is responsible for navigation of vessel during his watch, issuing necessary instructions to quartermaster (735) *q.v.*; supervises seamen (735) *q.v.* and sees their duties properly carried out; assists master in warping ship into and out of dock, taking his post at forecastle (if first mate) or at stern (if second mate); sees that hatch allocated to him is properly secured on voyage and supervises opening, when necessary; takes watch, in turn, when crew have been paid-off, during loading and unloading, until from crew signed on, usually specially designated, e.g. first (or chief) mate *q.v.*, second, third, etc., mate or officer, holds Board of Trade certificate.

mate, first; chief mate, chief officer, first officer; duties generally as for mate, but is subordinate only to master *q.v.* and in consultation with him; has special duties, e.g., in consultation with master, arranges rota of duties necessary for navigating ship, takes ship's bearings with sextant, etc.; sets course of ship and alters it, when necessary, in accordance with bearings, etc. taken over duties and responsibilities of master in case of master's death or serious illness.

officer (cable ship); as for mate (or officer) on ordinary vessel, but also assists, taking charge of a particular station, in work of raising, lowering, testing and splicing cable; usually specifically designated, e.g. chief officer of cable ship, second officer, third officer, fourth officer; cf. **captain (cable ship).**

officer of training ship; a master, mate, chief instructor *q.v.*, or junior instructor on a training ship in which boys and cadets are trained in navigation for mercantile marine service.

officer, salvage; general term for officers of a vessel engaged on salvage operations; includes master, mates, engineers (734) *q.v.*, etc.

officer, Trinity House; a master *q.v.* in command of a Trinity House vessel engaged on visits of inspection to light-houses, light-ships, buoys, etc.

pilot; a licensed waterman (738) *q.v.* who is skilled in navigation of some particular stretch of water, such as a river mouth, an entrance to a harbour, or dock, or some narrow and thronged stretch of sea, e.g. Bristol Channel; boards ship from pilot tender at entrance to harbour, etc., and takes over control of navigation from master *q.v.* to dock side, landing stage or harbour mooring, or vice versa; is supplied periodically with river or harbour charts showing depths of water and channels kept open for navigation, is notified of wrecks, shifting buoys, shifting or enlarged sandbanks, etc., and other exceptional dangers to navigation; is often an ex-master and/or has completed pilot apprenticeship; sometimes specially designated, e.g. dock pilot, canal pilot, river pilot.

pilot apprentice; is attached to pilot tender and indoctrinated, by pilotage authority, to learn, under supervision of pilot *q.v.*, navigation of some particular stretch of water, e.g. river, harbour, or dock entrance; must qualify for pilot's certificate; usually a youth qualified as A.B. sea man (735) *q.v.*

skipper; a slang term commonly used for a master *q.v.*, more especially of smaller vessels, *e.g.* schooners, ketches, barges, etc.
 skipper (traveller); in command of a steam trawler, and responsible to owners for its safe navigation; as for master, except that (i) he is not required to and usually does not hold Board of Trade master's certificate and has more limited powers and responsibilities, (ii) directs fishing operations as well as navigation, and is often partly remunerated by share in proceeds of catch.

734.—ENGINEERING OFFICERS.

driver (drifters); an engineer *q.v.* responsible for main and auxiliary engines in a fishing drifter; also stokes fire.

driver of motor, *see* motor driver *men*.

driver, steam dredger; has charge of engines and machinery on steam dredger.

engine driver, engine man; an engineer *q.v.* on small vessels, such as steam fishing drifters.

engineer, marine engineer; a ship's officer who is responsible to chief engineer *q.v.* for running and care of machinery aboardship; has thorough knowledge of engine fitting and mechanics and is responsible for dynamo, hydraulic engines, electric cranes, refrigerating machinery, donkey engines, etc., in addition to engines on main propulsion shaft; must hold Board of Trade certificate appropriate to his grade; watches engine room telegraph for instructions from bridge; watches pressure gauges, and notes, chiefly by sound, smooth running of engine; carries out necessary repairs; takes watches in turn with other engineer officers; keeps log of shaft revolutions, etc.; issues instructions to firemen and trimmers (735) *q.v.*, through chief or leading hands; usually specially designated according to rank, type of ship worked on, or kind of machinery which he controls, *e.g.* second, third, fourth engineers, grab barge engineer, hydraulic engineer, refrigerating engineer.

engineer, chief; first engineer; has complete control of engine-room plant and crew, and is responsible only to master (735) *q.v.*

motor driver, motor man; driver of motor, looks after, or assists engineer in looking after, internal combustion engines of small motor vessel.

735.—PETTY OFFICERS, SEAMEN AND DECK HANDS.

A.B., able-bodied seaman, able seaman; a seaman with three years' approved sea service and in possession of Board of Trade discharge "A," endorsed by Superintendent, Board of Trade; is qualified to perform all duties required of a competent member of a ship's crew, *e.g.* sweeping decks, coiling and splicing ropes, keeping look-out, painting ironwork, tanks, etc.; on small ships, often also does work of quartermaster *q.v.*; is under supervision of boatswain *q.v.*

apprentice; *see* cadet, midshipman; a youth who performs A.B.'s duties as part of training for officer (733) *q.v.*; receives navigation instruction from master (735), or from chief officer (736) *q.v.*

boatswain (bosun, bo'n); is chief uncorrupted petty officer on a merchant ship; has charge of and overhauls boats, sails, rigging ropes and other gear; has complete charge of deck crew (as opposed to engine-room crew), arranges their watches and duties, and is responsible to officers for proper execution of orders; takes command of ship in absence of, or on loss of, officers.

boatswain's mate; deputy to boatswain *q.v.* and takes his place in emergencies, or when he is off duty; works alongside and supervises deck crew in work of cleaning deck, painting ironwork, rope splicing, etc.
 boy, ship's boy; performs light unskilled duties on board ship, such as brass cleaning, rope coiling, etc.
 cadet, *see* apprentice.

carpenter, ship's carpenter; a petty officer *q.v.* who repairs spars, booms, leaders, and deck gear during voyages and repairs and caulkers deck; secures hatch covers, etc.; records soundings of bilge compartments; on sailing ships, has also care of winches and capstans; where a ship's jinner (seagoing) *q.v.* is carried, performs heavier as distinct from lighter and finer repairs.

cassah, cussah; a member of Asiatic crew employed, either as lamp trimmer (on deck) or as storekeeper (737) *q.v.* in steward's department.
 deck boy; a boy *q.v.* employed as a deck hand *q.v.*

deck hand; general term usually applied to A.B.'s and to men who, though not qualified as A.B.'s, are, owing to length of service, paid similar wages; sometimes, however, applied to all men (not officers) employed on deck; duties as for ship's handmen, sailor helmsman, as A.B. *q.v.* performing duties appropriate to quartermaster *q.v.* but not rated as such.

joiner, ship's joiner; exceptional rating, found on some liners only; fine up or repairs, dismounts, ship's cabins or saloons, ship's furniture, cabinet work, skylights on upper deck, and companions; generally performs lighter, finer and more highly finished class of woodwork required about a ship, as opposed to heavier work performed by ship's carpenter *q.v.*; *cf.* ship joiner (shipyard) (474).

lamp trimmer; an A.B. seaman *q.v.* or junior petty officer in charge of oil lamps on board, and responsible to boatswain *q.v.* for keeping them in good condition; cleans, fills and trims lamps and places into position.

leacoy; an Asiatic seaman, strictly speaking a native of India, as distinguished from Malays, Chinese, etc.

mariner, *see* sailor.

masalgee; a member of Asiatic crew, serving under Lascar Agreement; under supervision of deck seaman *q.v.* cleans, trims and fills ship's lamp.

master of hold; a non-navigating petty officer, travels with ship and supervises loading, unloading and stowing of cargo and baggage, and ventilation of holds.

midshipman, *see* apprentice.

ordinary seaman; (i) a deck boy *q.v.* or other youth serving probationary period of three years (without which he cannot qualify as A.B.) and learning duties of a seaman under supervision of boatswain *q.v.*; (ii) an older man who has had sea-going experience, often intermittent, but has never qualified as A.B.; (iii) a seaman who has forfeited his Board of Trade discharge book, or who has lost it without attempting to obtain duplicate copy, hence is no longer recognised as an A.B.

petty officer; general term for leading seamen and uncorrupted officers, *e.g.* boatswain, ship's carpenter *q.v.*

quartermaster; a petty officer *q.v.* subordinate to boatswain *q.v.*, selected from A.B.'s *q.v.* to take charge of ship's steering wheel at sea, under instructions from officer on bridge; watches compass and keeps ship's head on course given by officer; in harbour, guards gangway, giving access to ship, to prevent trespass; runner; a deck hand *q.v.* who, with others of a skeleton crew, is specially employed to take ships on short voyages, such as London to Cardiff or

Antwerp; leaves vessel at port of arrival and receives agreed sum in payment for services.

sailor; mariner; general term for any person employed on a sea-going ship, with following exceptions: (i) usually officers and pilots (733) *q.v.*; (ii) usually officers and crews of tug, harken, ferry boats, dredgers, etc.; (iii) almost invariably skippers and crews of fishing boats; is less commonly applied to engineers (734) *q.v.* and trimmers *q.v.* or stewards, etc. (737) than to boatswains, quartermasters, A.B.'s, ordinary seamen, deck hands and other ratings *q.v.*
 seaman; an A.B. *q.v.* or an ordinary seaman *q.v.*

seaman; an Indian sailor acting as steersman or quartermaster.

sewing, deck; a member of Asiatic crew, serving under Lascar Agreement; as for boatswain, but super- vises Asiatic deck crew only.

tindal (deck); a member of Asiatic crew serving under Lascar Agreement; acts as deputy deck seaman *q.v.*; as for boatswain's mate, has supervises Asiatic crew only; *cf.* tindal (fireman) (736).

topas; an Indian sailor who acts as sweeper or cleaner on board ship.

Trinity House seaman, Trinity House mariner; a seaman *q.v.* or a sailor *q.v.* employed on board a lightship or a vessel belonging to Trinity House (lightship authority for England and Wales).

tug-boy; performs general unskilled minor duties on board a tug-boat.

736.—FIREMEN, TRIMMERS, GREASERS AND DONKEYMEN.

agwalla; an Asiatic seaman serving, under Lascar Agreement, as fireman *q.v.*

cranseman; a donkeyman *q.v.* who attends to engine which works cranes on board ship.

donkeyman; in charge of small auxiliary engine ("donkey" engine) used, mainly when ship is in port, for working winches, pumps and other appliances on board ship, other than main propelling machinery; fills donkey engine boiler with water by hand pump, and lights fire under it; stokes engine furnace and maintains required steam pressure; when donkey engine is not in use (usually when main engines are in steam) acts as greaser *q.v.* and also cleans donkey engine boiler, cleans and oils winches, etc., ready for use when ship is again in port.
 fireman, hopper; a fireman (steam vessels) *q.v.* on liner wherein boiler fires are hopper fed; shovels coal, brought in by trimmer *q.v.*, into hoppers and keeps hoppers replenished.

fireman seaman; a member of Asiatic crew, serving under Lascar Agreement; acts as leading fireman, but supervises Asiatic firemen and coal trimmers *q.v.* or greasers *q.v.*; often engages Asiatic crew.

fireman (steam vessels); stoker; shovels coal (placed in position by trimmer *q.v.* unless fireman does own tramping) into furnace to maintain required boiler steam pressure as shown on steam pressure gauge; rakes fire periodically to remove clinker and ash and thus make fire burn more brightly, rakes cinder and ash from fire box and stands there on one side to cool; assists trimmer in filling baskets with ash, or in wiring them; sweeps stokehold to deck by hand winches and tipping them overboard; on small vessels (barges, tugs, dredgers, fishing boats) often also acts as trimmer or as greaser *q.v.* or is employed on any labouring work when not engaged in firing.

fireman (Trinity House); fireman (steam vessels) *q.v.* on a steamer; Trinity House service (lightship authority for England and Wales).

fuelman; on oil burning ships, regulates by valve, oil flow from fuel tanks through feed pipe to fine jets, through which it is sprayed into furnace under ship's boiler; observes oil flames through glass screen, to ensure oil spray and air blast working efficiently; regulates valve of air blast, if necessary; opens furnace door periodically withdrawing spray momentarily, to clean jets with wire brush end to prevent clogging.

greaser; under supervision of engineer (734) g.v., oils and greases bearings and engine parts, using oil can, grease and cotton waste.

Kodja walla; an Asiatic seaman serving under Lascar Agreement, as coal trimmer g.v.

pentwallah; a member of Asiatic crew, serving under Lascar Agreement, who carries drinking water to agewallas and kodja wallas g.v. periodically, during their spells of duty; usually a kodja walla set aside for this work.

stoker; see firemen (steam vessels).

stoker (drivers); a stoker g.v. who takes alternate watches with driver (drivers) (734) g.v. on long runs, and is generally driver's deputy and second in command.

tiald (fireman); a member of Asiatic crew, acting under Lascar Agreement, acts as deputy to fireman serang g.v. in charge of Asiatic firemen and trimmers only; cf. tiald (deck) (735).

trimmer, coal trimmer; (i) (fishing) fires boilers of small fishing vessel; trims own coal; assists engineer (734) g.v. in keeping engine room clean and in oiling and greasing bearings and engine parts on boats where no greaser g.v. is carried; deputises for engineer when latter is off watch; (ii) (larger boats) as for trimmer (shipping services).

trimmer, coal trimmer (shipping service); shovels or wheels coal within reach of fireman g.v.; assists him in removing ashes and in discharging them overboard; often also helps in keeping engine room clean and in oiling and greasing bearings and engine parts where no greaser g.v. is carried.

winchman; a dockerman g.v. who controls winches, under direction of an engineer.

737.—PURSERS, STEWARDS, AND DOMESTIC STAFF.

baggage master (on board); has charge of baggage in holds and issues it on specified days (baggage days).

cf. baggage master (on shore) (739).

baker; bakes bread, cakes and pastry on liners and other large vessels; on smaller vessels, this is done by cook g.v.

bandady; *bandhady;* a member of Asiatic crew, serving under Lascar Agreement; cooks for Asiatic crew, and is specially qualified in cooking rice and East Indian dishes.

barber; has charge of hairdressing saloon on liner; cf. barber (820).

bar keeper, see steward, bar.

bar man; assists bar steward g.v. in serving refreshments, washing glasses, etc., on, or on large liner, has charge of one of ship's bars under general supervision of bar steward.

bell boy (on ship); waits on officers or passengers in answer to electric call bells.

bandhady, see bandady.

boots; cleans boots of passengers, fetches hot water, and does odd domestic work.

buglers (liners only) sounds call for passengers' meals; helps generally in dining saloon.

bullockman, see cattleman.

butcher; cuts up and dresses meat, poultry, game, etc., for cook g.v.; has care of meat, etc., in safe and cold storage chambers; when lina sheep, etc., are carried on board ship for consumption, kills and dresses animals; also takes charge of cats, dogs or other livestock belonging to

passengers or carried as freight; sometimes specifically designated, e.g. chief butcher, second or third butcher, assistant butcher.

cabin boy, see mess-room boy.

captain's boy; does work of captain's steward g.v. in small vessels, or assists captain's steward in large vessels.

cattleman; bullockman; assists dock labourer (745) g.v. in driving cattle or sheep up gangways on to ship, and in fixing dock pens for their accommodation; feeds and waters cattle, etc., at regular intervals during voyage, and sees that they are securely penned; cleans cattle deck at regular intervals or as required; is usually engaged by exporter (one cattleman for each fifty head of cattle) and does not form part of ship's crew.

chef; is chief cook, cf. cook, on large liner.

clerk, ship's clerk; writer; assists purser g.v. in keeping ship's accounts, passenger lists, wages account, etc., and other clerical work; on large passenger liners, is assisted by assistant clerk g.v.

clerk, assistant (ship's); assistant writer; under supervision of purser or of clerk g.v., does clerical work in connection with ship's accounts, passenger lists, crew's accounts, etc.; employed only on large passenger liners.

clerk, kitchen; on large liner, under direction of chef g.v., keeps accounts of ship's provisions daily and renders accounts to purser g.v.; also assists generally in ship's kitchen under direction of chef; cf. clerk.

conductress, see matron.

cook; prepares meals for crew and passengers (where latter carried), on large passenger liners, where several cooks are carried; often specifically designated, e.g. chief cook (or chef), curry or sauce cook, entree cook, fish cook, roast cook, soup cook, vegetable cook according to dish in which he specialises, cf. cook (900).

cook's boy; palley boy; assists cooks generally, preparing vegetables, etc.

engineer's boy; a boy employed as engineer's steward g.v. or as assistant to engineer's steward.

foreman cattleman; directs and supervises cattleman g.v., is responsible for their work being efficiently performed; attends to injured or sick cattle during voyage, and gives them simple medicines if required; supervises embarkation and disembarkation of cattle, is employed by cattle exporter and does not form part of ship's crew.

galley boy, see cook's boy.

horseman; is in charge of horses carried as cargo on board ship; supervises their feeding and watering and general welfare.

interpreter; answers passengers' enquiries (especially foreign passengers) and gives information regarding ship's routine, ports of call, etc.; translates and explains notices issued by ship's officers, for foreign passengers; conveys and interprets complaints or other communications from foreign passengers to officers; on emigrant ships, must be familiar with dialects spoken by emigrants of those races for which his company especially caters.

kitchen assistant; sculleryman, sculler; assists cook g.v. generally.

chief of washing women.

librarian; *library steward;* is in charge of library and reading rooms on liner; issues books to passengers, advises them as to suitable reading, assists them in searching for information in reference books; places magazines or reading room tables, etc.

lift attendant; works passenger lift between decks on large liner.

linen keeper; is in charge of sheets, pillow cases, towels, table linen, etc., on board a passenger vessel; issues linen to bedrooms stewards and stewardess g.v., as required, and

receives soiled linen from them; hangs soiled linen in readiness for prompt despatch to laundry at destination; keeps records of stock of linen and of despatch and receipt of packages to and from laundry.

master at arms (mercantile marine); patrols ship with a view to the prevention of petty misdemeanours among passengers or crew; obnoxious, but where found (large liners only) is regarded as under instructions from chief steward g.v.

matron; *conductress;* attends to comfort and welfare of children and of unaccompanied women on board large liners, especially of those in third class or steerage, or on emigrant ships; in latter case, is to some extent responsible for their conduct and discipline, is usually a professional nurse, sometimes also does work of chief stewardess g.v.

mess-room boy, mousa, officer's boy, officer's mousa; cabin boy; assists in waiting, cleaning, etc., in officers' mess.

oilman (engine room), see stock-keeper.

pantry boy; fetches and carries pantry stores (meat, milk, tea, sugar, etc.), and, as directed by pantry steward g.v., stores them or issues to cooks and stewards g.v.; assists in issue of crockery to those ratings and in stowing on racks and shelves when returned; assists pantry steward generally.

punkah boy; pulls rope or cord with regular intermittence to swing punkah (piece of cloth attached to a suspended rod), thus producing a current of air in cabins or saloons, when ship is in tropics.

purser; acts as clerk to master (738) g.v. and conducts his correspondence when in port; is responsible for custody of ship's monies and keeps ship's accounts; has custody of crew's discharge books and wages accounts; changes money for passengers; makes any necessary adjustments to passengers' tickets during voyage, takes charge of passengers' valuables; on large ships, especially passenger liners, is assisted by clerks and assistant clerks g.v.

saloon boy; keeps saloon tidy and attends to passengers' wants.

saloon topas; a member of Asiatic crew, serving under Lascar Agreement; keeps lavatories clean and tidy, and in charge of cleaning and sanitary work generally, for Asiatic crew.

sculleryman, scullion, see kitchen assistant.

steward, bar; bar keeper; is in charge of bar and serves passengers with wine, beer, spirits, etc., thereat; makes return to chief steward g.v. periodically or as required, of stocks of wine, etc.

steward, bedroom; cabin steward; makes passengers' beds, replaces soiled bed linen with clean linen obtained from linen-keeper g.v.; keeps passengers' cabins and sleeping berths clean and tidy; serves meals in cabins to sick passengers and waits on passengers in their cabins generally.

steward, captain's; waits on master (733) g.v. at meals, cleans his room and cabin and acts as his servant generally; cf. captain's boy.

steward, chief; is responsible to master (733) g.v. for catering department of ship, for efficient service of meals, and for comfort of officers and passengers generally; orders supplies through victualling superintendent (730) g.v. or (usually on small vessel) direct; has staff of stewards, and sometimes also of stewardesses, cooks, butchers, bakers, g.v. etc., to assist him; supervises their work and (on smaller vessels) engages them; on smaller vessels, sometimes also does work of purser g.v.

steward, engineers', engineers' mess room steward; serves meals in engineers' mess-room; lays and clears tables; makes engineer officers' beds; keeps their cabins clean and tidy and waits upon engineer officers (734) *q.v.* generally; *cf.* steward, mess-room.

steward, library, *see* librarian.

steward, mess room; serves meals in navigating officers' (733) *q.v.* mess-room; lays and clears tables; usually also keeps navigating officers' cabins and saloon clean and tidy, makes their beds and waits upon them generally; *cf.* steward, engineers'.

steward, pantry; is responsible to chief steward *q.v.* for keeping ship's pantry stores (meat, flour, sugar, tea, tinned foods, etc.) and crockery; issues stores to cooks or stewards *q.v.* as required; puts away crockery returned to him on shelves and racks; keeps record of stores received (at beginning of voyage) and of stores issued.

steward, saloon; waiter; arranges and clears tables for meals; waits on passengers travelling first or second class, keeps saloon clean; sometimes specifically designated, *e.g.* first saloon steward, second saloon steward.

steward, stowage; third class steward; combines duties of cabin steward and saloon steward *q.v.* for stowage or third class passengers.

steward (yakki); prepares passengers' meals on pleasure yacht, lays table for meals and clears; waits on passengers; makes beds, keeps cabins clean and tidy and waits on passengers generally.

stewardess; makes beds in, and tidies women's cabins, serves meals therein if women or children passengers are sick, looks after children if mothers are ill and waits upon women and children passengers generally, especially those travelling unaccompanied; if cabin duties are light, sometimes spends part time in repairing bed and table linen and supervision of linen keeper *q.v.* and/or specifically designated, *e.g.* bedroom stewardess, cabin stewardess, first saloon stewardess, second saloon stewardess.

stewardess, bar, *or* for steward, bar, stewardess, chief; is responsible to chief steward *q.v.* for general supervision of stewardesses *q.v.* and for allocation of their duties, where several are carried; arranges generally for attendance on women and children passengers and for their welfare, especially if they are travelling unaccompanied.

stock-keeper, store-keeper; has charge of ship's stores on board ship, receives and issues same and keeps records thereof; is sometimes assisted by assistant storekeepers, whom he supervises; on large ships, is usually specifically designated according to type of goods handled, *e.g.* bar store-keeper (beer, wine, etc.), deck store-keeper, engineer's (or engine room) stock-keeper, storekeeper (also known as oilman), victuals stock-keeper (food, meat, etc.).

stock tongs; a number of Asiatic crew, serving under Lascar Agreement, who attends to livestock (sheep, goats, poultry, etc.) carried for resupplying Asiatic crew; feeds and waters stock and cleans their pens; when not so doing is engaged on cleaning jobs, etc.

water, *see* steward, saloon.

writer, *see* clerk.

writer, assistant, *see* clerk, assistant (ship's).

788. BARGE MEN AND BOAT- MEN.

apprentice (River Thames); a boy learning to navigate vessels on River Thames under indentures of apprenticeship issued by Watermen and Lightermen's Company of London.

barge boy; gives general assistance on river or canal barge, *see* barge boy.

barge man, barges (slang); boat and barge man; a member of crew of river or canal barge, usually either captain or mate (canal barge, etc.) *q.v.*

beachman; assists boat owners in handing trippers into sailing boats, in launching boats, etc., and sometimes himself rows for pleasure party for party or other fee; during winter, does odd jobs about beach, *e.g.* sets lobster pots for fishermen (000) *q.v.*, paints boats for owners. boat and barge man, *see* barge man.

boat hand; general term applied to any member of crew of barge, lighter, canal boat, small fishing boat, etc., other than master or mate, *q.v.*, who renders general assistance at tiller or in body of boat, as directed by master or mate.

boat horse, river, *see* horse driver.

boat-keeper, boat-letter; boat owner; an owner of pleasure boats, which he lets out on hire, on lake, in public park, on river, or in seaside moor; either himself cleats boats and keeps them in repair, launches or pulls them out of water, etc., or directs employees to do so.

boat man; owns rowing boat, which he usually rows himself, licensed by river or harbour authority to ply for hire in waterway, for conveyance of passengers between vessels at anchor as channel and quay, also goods (passengers' luggage, ships' provisions, etc.); accepts other jobs, *e.g.*, conveying to landing stage or quay, mooring ropes thrown-out from vessel against landing stage, rowing-out to vessel on entering harbour and conveying letters or messages to shore for convenience of passengers or crew, conveying pilot (737) *q.v.* to and from ship where no pilot tender is available.

boat man, soldier's, *see* waterman, collier's.

boat man, contract; a boat keeper *q.v.* who contracts for supply of boats for a stated period.

boatman, Customs (i); a boat belonging to Customs service from point to point in port or harbour, conveying Customs officers engaged in boarding ships for Customs examination; or a member of crew of larger boats carrying, sailing, mechanically-propelled belonging to Customs service and used for that purpose; (ii) a boatman *q.v.* owning boat in which he conveys Customs officers about harbour, in way described.

boat man, derrick; member of crew of steam barge fitted with crane for lifting machinery, or other heavy, unwieldy cargo from ship's hold, or vice versa; in addition to ordinary duties of barge man *q.v.*, signals to crane man (736) *q.v.* when to raise or lower crane falls during lifting operations.

boat man, fog; a boatman *q.v.* owning a fogboat, *i.e.* boat used in and about harbours, *e.g.* to convey pilots and tugs for hire, or doing errands or rendering various small services to shipping thither.

boatman labourer (shipbuilding); roofer, raftman; acts as boatman in shipbuilding yard; passes ropes by having cut from coil; goes out to timber pond to gather or select logs, etc.; unloads and secures floating timber, ships' tenders, and other material, after launch of a ship by using a raft in river alongside shipyard, etc.

boat man, pleasure; (i) a boat keeper (rowing or sailing boats, pante, or canoes) on hire; (ii) employed by boat keeper *q.v.* to attend to customers taking out boats on hire; (iii) a boatman, saddie, who, in company with boat; books time boat taken and returned, receives customers' payments, makes return of sums received to boat keeper and remits monies to him or pays into bank, as directed; sometimes accompanies parties on trip, with or without other

boatman, rowing or sailing boat, then or helping them to do so; often acts as boat labourer *q.v.*; in off season, often spends part time in painting and varnishing boats and doing other repairs thereto, under direction of owner.

boat man (shipping service), waits upon boats entering or about to leave port, performing miscellaneous services, taking messages, conveying officers and men, etc.

boat man, Tidy House; rows or sails boat, which conveys stores and relief to light-houses, light-boats, etc., under jurisdiction of Trinity House light-house authority for England and Wales, or which takes buoy masters (731) *q.v.* or workmen to buoys, or is member of crew of larger boat (rowing, sailing, mechanically-propelled) similarly employed.

boat owner, *see* boat keeper.

boat woman; (i) as for labourer, boat (woman); (ii) as for boat keeper.

canal boat boy; cleans boat; assists in driving horse which pulls boat, and does other similar work on canal boat. canal boat man; general term for any man employed on a canal boat; usually includes captain and mate (canal boat, etc.), but may include captain and canal boat boy *q.v.*

canal boatman, *see* horse driver.

captain (river barge, lighter, etc.); skipper (river barge, lighter, etc.); master; in charge of navigation, along rivers and canals, of barge, canal boat, lighter, flat, keel, or other small craft (not sea-going), and is in command of crew of barge, etc., by tiller; often, with help of mate *q.v.*, propels boat with long sweeps (oars) or helps in raising or reefing sail, etc.; stows cargo, and sometimes loads and unloads it; usually does not hold a Board of Trade masters' certificate; *cf.* captain (731) for officer in charge of sea-going barge; *cf.* barge man.

captain, flat; a captain (river barge, lighter, etc.) *q.v.* of a flat (name given in Lancashire and Cheshire to lighter).

carrier (river or canal); a captain (river barge, lighter, etc.) *q.v.* or member of crew of canal boat.

cobbleman; cobbleman; a boatman *q.v.* who rows or sails a small flat-bottomed boat (cobble); distinct term.

dredger, coal (river barge); a labourer employed by coal contractor (710) *q.v.* at coal mouth or riverside wharf where coal is being raised by operation of crane; carries coal; stationed in rowing boat, recovers coal dropped overboard, during loading and unloading of ships, by dredging river bottom with perforated scoop; usually employed part time in sweeping coal and coal dust into heaps on quay.

dredger, dredgeman, dredgeman; member of crew of a dredger and employed part time or for season or deck hand (735) or fireman (736) *q.v.*; also helps in dredging operations, *e.g.* acts as pipe man (747) *q.v.* on sand pump dredger, or passes signal to crane man (730) *q.v.* on crane grab dredger.

ferry boat boy, ferry boy; assists ferry man *q.v.* or himself does work of ferry man on small boat; rows (or helps to row) boat; places gangways in position; moors boat at landing stage; collects fares; on steam or motor ferry boat, assists ferryman in firing boiler, and in controlling, greasing and oiling engine; sometimes specifically designated, *e.g.* steam ferry boy.

ferry boat proprietor; owns one or more ferry boats; usually rows or sails one boat; or for ferryman.

ferry man; plies to and fro across a waterway ferrying persons, livestock, vehicles, etc., in a rowing, sailing, motor or steam-propelled ferry boat, or in a flat-bottomed boat, which is pulled or pushed across waterway by means of rope or chain working on rollers; collects fares or tolls; plies

gangways, if required, from boat to bank or landing stage, during ebb or low water, etc.; moors ferry boat on landing stage with mooring rope, on motor or steam-propelled boats, also controls and fills petrol tanks, stokes furnaces, grasses and oils engines.

flat boy, *flat man*, *flatwater*, and *Chalkie* terms for lighter boy, lighter-man, *q.v.*

float boy, *as for* *float man*.

floatman; a boatman *q.v.* who rows or sails a rectangular boat (a "float") resembling a punt.

foreman lighterman; is responsible to lighter owner for care and management of lighters; instructs lightermen *q.v.* as to disposal of lighters in dock or at quay, arranges for tug to tow lighters from point to point as required, sees that lighters are expeditiously loaded and discharged by dock labourers (745) *q.v.*; marshals lighters alongside dock, quay or vessel for loading and unloading purposes.

freeman (River Thames); a waterman or a lighterman *q.v.* who is a member of Watermen and Lightermen's Company of London, and who has served his full time of apprenticeship on river.

hauler, *boat hauler*; walks along towing path by side of canal or river, and pulls (tugs) boat or barge with a rope; usually done by master or mate of barge *q.v.*

hobblir; *hobblir*, *hobblir*; rows or sculls small boat (in docks or rivers), in which he acts as unlicensed pilot, or does odd jobs.

hobblir to dock pilot; a hobblir *q.v.* who rows dock pilots from point to point as required.

hepper boy; assists on board a hepper; *cf.* *hepperman*.

hepperman, dredge *hepperman*, *hepper bargeman*; member of crew of hepper barge (into which material is discharged from dredger); *as for* *barge man*.

horse boy, *chain*; leads or rides chain horse (i.e. trace or leading horse) where two or more horses are used to tow boat or barge along river or canal; when not so employed, sometimes does any other work on, or in connection with, boat or barge.

horse driver, *hauling horse driver*; *as for* *haulman*, *boat horse rider*, *horse marine*; leads or rides, between prescribed stages, horse which tows barge or boat along canal with a long chain or rope; feeds and waters horse, if required, between stages; returns horse to stable for attention by stableman (725) *q.v.* on completion of journey; at small canal horse depot, acts as own stableman.

hovel, *see* *hobblir*.

boyman; a master *q.v.* or member of crew of a "boy," a large single-decked sailing barge commonly rigged as a stoop.

huffer, *see* *hobblir*.

keelman; *rester*, *keel captain*; *as for* *barge captain*; a "keel" is a flat-bottomed barge used in Yorkshire on waterways with short lock pits.

keelman, *keeler*, *keel boy*, *keel-bully*, *keel duster*; either captain or mate of "keel" (*cf.* *keelman*); often one of captain acts as mate, *as for* *barge man*.

keelchman; a master *q.v.* or member of crew of a keel, a small sailing barge in and about the port of Hull.

labourer, *boat* (boating); hauls boats from bathhouse to water and vice versa; at seaside resorts, hauls, or assists in hauling, boats up beach out of reach of tide, or hauls down beach as tide falls; and, as required by customers; fetches oars, sculls, sails, thwart, rudders, etc., from boat-house or store and returns them thereto after use; often sent out with party to row or sail boat for them, either alone or if with boatman *q.v.* assists generally; seasonally so employed during boating season only; during

off season, either finds other work or is employed in painting, etc., boats and doing minor repairs thereto.

launch boy; assists in miscellaneous duties on a launch or pleasure steamer.

ligger in tunnel (canal boat); propels barges or canal boats through low tunnels by lying on his back on top of barge and pushing barge along by pressing with his feet on roof of tunnel.

life-boatman; member of a life-boat crew (whole-time or part-time occupation); assists in cleaning station, i.e. in washing, polishing and cleaning gear; takes part in practice runs; may undertake station work (watch or look-out) at certain times, *e.g.* bad weather, as determined by life-boat captain; is usually a fisherman (900) *q.v.* or pursues other calling besides that of life-boatman, when a part-time member of crew.

lighter boy; does any odd jobs on lighters, *e.g.* fixing lighter's mooring ropes to quay posts, and unslashing when lighter moves away, and assists lighter captain and other lightermen *q.v.* (if any) generally; often captain's son and acts as mate *q.v.*

lighterman; member of crew of lighter, a large barge like craft used on rivers and sometimes towed round coast; may be a contract man, *i.e.* an ex-servicing barge man who has contracted to an employer to serve 2 years for a contract licence, or a fully apprenticed waterman; assists in navigation and in stowing cargo, *as for* *barge man*.

marine, *horse*, *see* *horse driver*.

mariner (river traffic); general term applicable to any member of deck crew of any type of vessel (steamship, sailing ship, lighter, barge, etc.) navigating river, including captain, mate, barge man, keelman, keelchman *q.v.*

master (river barge, lighter, etc.); *see* *captain* (river barge, lighter, etc.).

mate (on barge or canal boat, not a sailing barge or sea-going steam barge); *as for* *captain* *q.v.* in navigation of barge, lighter, canal boat, flat keel, etc.; takes turn at tiller; if *as for* barge, propels barge along waterway by pressing with long pole or, leads or rides horse drawing barge; moors vessel alongside quay or landing stage and, except on barge, assists in loading or unloading; *cf.* *mate* (735), *barge man*.

mate (female, on canal boat); wife of captain *q.v.* or canal boat; *as for* *mate* (on barge, canal boat, etc.).

purchase man (extra barge hand); a barge man *q.v.* who undertakes short trip on barge as extra hand for an agreed sum; *as for* *mate* (on barge or boat, etc.).

rafter, *raftman*, *see* *boatman labourer* (shipbuilding).

readman; takes charge of barge or barges moored to buoy in barges roads; moors and unmoors barges; may also be in charge of string of (say) seven barges moored one against another from wharf outwards into river.

sand hooker; member of crew of large transporting sand.

sculler; does odd jobs in small boat which he propels and steers about dock, river, etc., with single sail piked from stern of boat.

skipper (river barge, lighter, etc.); *see* *captain* (river barge, lighter, etc.).

stoopman; a master *q.v.* or a member of crew of a stoop (rigger-rigged sailing barge).

trawler (maul); a master or member of crew working on a dredger which keeps a channel clear by trawling. **trawman**; owner of small fishing boat which operates well in bottom for keeping fish alive until landed; lets-out boat on hire to persons fishing for pleasure at sea-side resorts; accompanies fishing party, if desired, and baits boats with live bait kept in well of boat.

waterman; a boatman *q.v.* licensed after 4, 6 or 7 years apprenticeship, to carry passengers and to ply for hire on inland waterways, frequently owning his own boat; usually also licensed as a lighterman; has knowledge of tides, waterways and docks in his district. *cf.* *waterman* (741), dock pilot (735).

waterman, collier; *collier's* boatman; plies for hire between shore and coal boats (colliers) conveying coals and crews, or coal heavers, or fetching mooring cables, etc.

waterman, boatman; boatman *q.v.* who takes pilot out to a vessel in channel or midstream.

wherryman; a master *q.v.* or member of crew of a wherry or sailing barge of light draft used on inland waterways, *e.g.* Norfolk broads.

700.—MARINE AND ENGINEERING SUPERINTENDENTS.

baggage inspector, *baggage master* (on shore); receives outgoing passengers' heavy baggage and ships it; sees to unshipping and despatch of baggage on arrival of ships; *cf.* *baggage master*, *on board* (735).

ship's husband (drifters or trawlers); works on shore, in consultation with owner; arranges berthing of boat, engagement of crew, replacement of missing members of crew, and ordering of stores, gear, and other requirements.

ship's husband (not fishing boats), *see* *superintendent, marine*.

shore purser, *see* *superintendent, victualling*.

steamship superintendent, *see* *superintendent, marine*.

stores manager (shipping company); in general charge of shipping company's stores on shore; directs and supervises storekeepers (941) *q.v.* in charge of sectional stores, *e.g.* catering department stores; is responsible to company for maintaining proper stocks periodically inspects sectional stores and certifies accuracy of storekeepers' annual or periodical stock-taking returns; sometimes also makes contracts for stores, *superintendent captain*, *see* *superintendent, marine*.

superintendent, victualling.

superintendent engineer; marine engineering superintendent; has control, on shore, of shipping company's engineering department; engages sea-going engineering staff; orders necessary repairs to ship's engines or deck appliances, or, if necessary, orders to company's engineering workshops; is responsible for maintenance and repair of dock appliances, if any, owned by company (cranes, hoists, weighing machines, etc.), and, similarly, of mechanical appliances at dry dock.

superintendent, marine; *steamship superintendent*, *superintendent captain*, *ship's husband* (not fishing boats); has charge of all ships in port belonging to a firm; makes arrangements for dry docking, surveying, repairing, and general overhaul of hull, decks, and rigging; supervises shipping and discharge of cargo and coaling of ships; engages or appoints masters and officers, and sees to engagement and discharge of crews, ordering of stores, adjustment of compasses, etc.; frequently also supervises building of new ships, and directs them at intervals while they are being built; sometimes also visits stranded vessel, or vessel damaged by collision, belonging to firm, and decides or advises on repairs and repairs.

superintendent, marine engineering, *see* *superintendent engineer*.

superintendent, outdoor; deputises for marine superintendent *q.v.*; supervises sections of work allocated to him, by marine superintendent, *e.g.* repairing vessel in dry dock, survey ship in port, salvage operations, and assists marine superintendent generally.

superintendent, victualling; providore superintendent, superintendent steward; shore purser, superintendent caterer; in charge of shipping company's catering department on shore, responsible for proper provisioning of company's ships, purchase of food and beverage supplies, cooking utensils, table linen, crockery, plate, glass, cutlery and other catering department stores; arrangements for removal of perishable stores from ship, on their arrival at port; sometimes also engages stewards, waiters and cooks (737) *q.v.* for service on board.

740.—HARBOUR, DOCK AND STEVEDORING FOREMEN.

assistant master stevedore; goes down to each ship's hold, as representative of master stevedore (732) *q.v.*, to ensure that stevedores (743) *q.v.* are storing cargo properly and in positions to facilitate discharge at port or call on voyage as shown in ship's manifest; often engages holdmen and other dock labourers (745) *q.v.* and pays them off at end of engagement, rendering accounts to master stevedore, whom he assists generally.

dock foreman; general term for foreman in charge of body of men engaged on any section of work in docks, usually in connection with loading and unloading ships and conveying goods to or from warehouses; supervises stacking and storing of goods according to marks; rejects goods unfit for storage; includes foreman dock porter, ship foreman *q.v.*

dredging foreman; has charge, under dredger captain (738) or engineer (734) *q.v.*, of men engaged on dredging operations.

foreman dock porter; foreman quay ganger, quay foreman (shipper's) in charge of dock porters (745) *q.v.* engaged in loading and discharging cargo on dock quays or in conveying it on their shoulders in trucks, to and from warehouses, railway wagons, carriers' delivery wagons, etc., and is responsible for efficient performance of their work; usually engages men for job on which he is engaged, at dock rates.

foreman of dry dock; has charge of staff engaged in maintenance of a dry dock, *e.g.* pumping dry, flooding, cleaning, etc.

foreman quay ganger, see foreman dock porter.

foreman ship worker, see ship foreman.

ganger, gangman; (i) slang term for foreman; (ii) directs work of gang of dock labourers (745) *q.v.* under general direction of foreman.

gate foreman, dock gate foreman; lock foreman (dock); prepares duties roster of dock gatemen (749) *q.v.* in accordance with tides; directs and supervises gatemen and is responsible to dock authority for their time keeping and for efficient performance of their work.

goods selector (shipping company); is employed by shipping company to determine, in consultation with ship foreman *q.v.*, in which hold or part of hold different parts of cargo shall be stored; assesses himself that various parts of cargo, to be discharged at each port of call in succession, are so stowed as to be easily accessible for expeditious discharge.

harbour foreman; in charge of a body of men engaged on any work, *e.g.* carrying or stacking goods, road making or repairs, on harbour premises.

leading foreman; supervises work of other foremen working on quays, etc., of dock or harbour.

leading stower; stowage foreman; under instruction of ship foreman *q.v.*, supervises stowers (745) *q.v.* and tells them in which hold, or part of hold, each part of cargo is to be stowed; is responsible for efficient stowing.

lock foreman (docks), see gate foreman.

lottery foreman; of wood sales, sorts wood sales on wharves and in warehouses at docks, into their proper lots, and places them in their respective positions, which are indicated by marks on floor, corresponding with marks and numbers in sale catalogue. Principle measurer; is employed by shipping company or shipping agent (730) *q.v.* to supervise and check work of measurers (749) *q.v.*; sends particulars of measurements to his employer.

quay deputy; a senior dock foreman *q.v.* selected to act as deputy for master stevedore (732) *q.v.* when he is absent.

quay foreman; (i) superintends dock labourers (745) *q.v.* engaging in sweeping and cleaning quays; (ii) (shipper's), see foreman dock porter, triangler, dock sampler (dock company); a dock authority employee who, upon instruction of owner, opens bales, cases, or other packages consigned to him, and lying in dock warehouse; takes out one or more samples representative of bulk of contents; puts samples in sample bags or other receptacles, seals with dock company's seal and labels for identification purposes, sometimes specifically designated, *e.g.*, grain sampler; *cf.* sampler (739).

ship foreman; foreman ship worker; as employed by master stevedore (732) *q.v.* to supervise loading and discharging of vessels; supervises rigging of derricks and falls by ship riggers (745) *q.v.*; allocates stevedores (745) *q.v.* and various classes of dock labourers, *e.g.* hatchmen, railmen, winchmen (745) *q.v.*, to their posts; consults with goods selector *q.v.* (if such is employed) to determine disposal of cargo in hold; engages and discharges dock labourers (745) *q.v.* and makes out their pay tickets for presentation at master stevedore's office.

steamship foreman; is responsible to marine superintendent or to stores manager (739) *q.v.* for supervising re-fitting and conditioning of ship in existing stock. If any, of stores on ship (dock stores, engine room stores, food stores, etc.); orders removal of defective stores and estimates additional stores required to complete preparation for voyage; requisitions such supplies for voyage; requisitions such stores from respective storekeepers (741) *q.v.* of shipping company's shore stores; is responsible for safe delivery of stores on board.

stevedore foreman, see leading dower, transporting foreman (P.L.A.), usually an ex-steamman on dock master's staff in charge of small crew on vessels being transported from berth to dry dock, or vice versa.

waterside foreman; general term for any foreman who directs and supervises a gang of men employed as dock labourers (745) *q.v.*, or in any other capacity, at waterside, includes foreman dock porter, harbour foreman, wharf foreman *q.v.*

wharf foreman, *cf.* dock foreman. wharf foreman, colliery; in charge, at colliery company's wharf, of work of delivering coal into ships' bunkers or holds for export or for carriage coastwise; directs and supervises capstamens (741), rope runners, coal tippers, coal hoist workers (744) *q.v.*

741.—LOCK KEEPERS; BRIDGE, STAGE AND PIER MEN.

berthing man; directs vessel to berth, allocated by berthing master (731) *q.v.*, at quay or in dock; receives mooring rope thrown from vessel and attaches to bollard or mooring post; removes mooring rope from bollard when vessel leaves quay or dock and throws it to dock seaman (737) *q.v.*; puts fender between quay and vessel side to prevent damage.

bridge man, bridge house keeper, bridge master; swingbridge attendant, swingbridge keeper, swingbridge man, swingbridge master; agents and closes swingbridges (for pedestrian and vehicular traffic) over entrance to dock, either by hand or by moving levers in bridge house; is in constant hydraulic or electric contact with attendant on bridge; by hand, when bridge is to be opened for passage of vessels and places chain barrier across roadway, which he removes when bridge has been closed. bridge man, hydraulic; a bridge house man, who opens and closes a swingbridge moved by hydraulic power. bridge turner, canal; as for bridge man, sometimes done by lock man *q.v.* caisson man (dry dock); controls, by means of lever, hydraulic or electric power which slides or rolls caisson (a massive watertight barrier) into position at entrance to dry dock, after vessel has passed into dry dock, prior to pumping-out of water; and similarly raises dock when closed is due to leave; oils and greases bearings, runners, levers, etc., of caisson at regular intervals or as required.

captain man; operates capstan, either by hand (pressing against bar, turning wheel, etc.) or by moving (raising or lowering) capstan cage, or electric or hydraulic power; allows capstan to revolve, drawing wagon, boat, etc., by means of chain or rope, until wagon or other vehicle is in desired position; when wagon is to be run on a terminal or raised up, it is raised by means of capstan; is at rest on table, to prevent it running off; oils and greases capstan and mechanism connected therewith, as required.

ebbm; keeps bridge, which rises and falls with tide (usually across entrance to a dock, harbour, etc.), clear of mud, sand, silt, etc., with shovel, at high tide, opens bridge (by lever operating hydraulic power) to admit vessels into and out of dock or harbour, and closes it after passage of traffic.

floating bridge conductor; turns windlass, round which draw-chains are wound, to open and close sections of floating bridge, as required by traffic; signals, by hand, to incoming pedestrian or vehicular traffic when bridge is to be opened, and places barriers across roadway, removing same after bridge has been opened.

floodgate keeper, floodgate master; floodgate staff, floodgate man, floodgate tender, sluice bridge keeper, sluice bridge master, sluice keeper, sluice master, water runner; has charge of floodgates (sluices) in section of canal or canalised river; turns wheel, actuating cog-wheels on each side of sluice gate, thus raising or lowering gate and admitting water to certain length of canal or river, or shutting-off water therefrom; excessive rainfall, opens or closes floodgate of canal or river, to prevent water to canalise or sluices leading to back-water or non-canalised section of river, to prevent water-level in canal rising over banks; keeps sluices clear of weeds with hand rake. floodgates man, floodgate attendant, floodgate tender; sluice attendant, sluice bridge attendant, sluice bridge man, sluice man, water runner; (i) see floodgate keeper; (ii) assists floodgate keeper *q.v.* when section of canal or canalised river controlled by latter is too large to be controlled by one man.

stead agesteman, see landing stage mate.

jetty man; has charge of jetty authority's property, and assists generally in work on jetty.

landing stage man, landing stage seaman; *cf.* man; receives mooring rope thrown to landing stage from approaching vessel; fastens rope to bollard or mooring post and removes again when vessel leaves quay;

places gangway in position and withdraws it when vessel leaves; cleans, fills, lights and trims oil lamps used on landing stage; hoists stern cone in bad weather; sometimes fills up spare time by odd jobs, e.g. rope splicing, repairing feeders.

landing stage mate; head stowman, mate of landing stage; takes alternate spells of duty with berthing master (731) g.v., usually being on duty during night; deputises for berthing master on other occasions when absent; is usually present at berthing of large vessels to see that fore and aft mooring ropes are properly made fast; directs and supervises landing stage men; other duties as for berthing master.

lock keeper, lock gate keeper, lock master; has charge of a lock, and is responsible for its care and upkeep; attends to opening and shutting of lock gates, or directs assistant engaged in so doing; calls dues; acts also as weir keeper g.v. when lock is near a weir.

lock man, lock attendant, lock gate man, lock tender; general and classed lock gates, under direction of lock keeper g.v.; keeps gates free from weed, etc., cleans machinery and assists lock keeper generally; also as weir attendant g.v. when lock is near a weir.

mate of landing stage, see landing stage mate.

pier head man, pier man, pier servant; works at head of pier, throwing ropes to incoming vessels, making vessels fast, placing landing stages in position, and doing other similar work under direction of pier master (731) g.v.

pier ticket examiner; is stationed at head or foot of gangway whereby passengers pass from boat to pier or vice versa; inspects tickets to ensure that they are available on that day and by that boat.

placeman on pier, placeman tickets to passengers, and performs general clerical duties on steamboat company's pier.

sluice attendant, sluice bridge man, sluice bridge attendant, sluice man, see floodgate man.

sluice bridge keeper, sluice bridge master, sluice keeper, sluice master, see floodgate keeper.

stage man, see landing stage man.

staitman; a landing stage man g.v. employed on a "stait" (*term used mainly on North East Coast, for landing stage whose coal vessels are loaded*); in addition to ordinary duties of landing stage man g.v., also sweeps-up coal dust and pieces of coal dropped during coaling operations and wheels them, in truck or barrow, to loading stocks.

stanch attendant, stanch keeper, stanch man, stanch master; a floodgate man g.v. in charge of floodgate which is shut to accumulate water for flushing a boat over a shallow in a stream.

swing bridge attendant, swing bridge keeper, swing bridge man, swing bridge master, see bridge man.

twentymen (staitmen); passes to seaman (735) g.v., on vessel, end of hose pipe which supplies vessels with fresh water; turns on watercock, reads meter and makes out bill for water supplied; cf. waterman (738).

water runner, see floodgate man.

weir attendant; assists weir keeper g.v. in opening and closing of sluices in weir, and in clearing gates of weeds; sometimes also executes minor repairs to weir, e.g. removes loose stones and replaces broken stones on face of weir.

weir keeper; is responsible to canal company, river authority, or other authority to whom weir belongs, for maintaining weir in good order; himself executes minor repairs or directs execution, and reports more serious defects to company or authority; opens and closes sluices on weir; removes weed, rubbish, etc., accumu-

lations from it and from protecting barriers; often also does work of lock keeper g.v.

740.—LIGHTHOUSEMEN AND CREW OF LIGHTSHIPS.

instructor of lighthouse keepers; instructs men starting work as lighthouse keepers g.v. in regulations as to lighthouse lighting, and maintenance and running repairs to lighthouse machinery; himself first undergoes six months training at Trinity House.

lighthouse keeper; light keeper; is in charge of a lighthouse and its crew; sees that lamp is trimmed at frequent intervals and is kept alight at prescribed times, that lenses are kept clean and lamp mechanism is maintained in order and that fog signals are given when necessary; is responsible for care of stores and of building.

light keeper; (i) see lighthouse keeper; (ii) see lightship.

lightship man; attends to lights and signal warning apparatus, and performs other general duties on lightship.

lightman; either a lightship man g.v. or one of lighthouse crew.

master of lightship; light keeper; is in charge of lightship and crew; sees that lights are kept burning at prescribed times and that fog signals or other warnings are given to passing vessels when required.

mate of lightship; assists master of lightship g.v. and acts for him when he is not on duty.

743.—STEVEDORES.

loader; general term for any person engaged in stowing cargo on any navigable craft (large, small, sea-going or otherwise); takes care to stow cargo in smallest possible space, neatly (to prevent shifting during voyage), uniformly (to avoid giving list to craft), and conveniently (so that cargo may be got out as quickly, especially if vessel to call at several places in succession); term chiefly indicates man loading large, canal boat, or other small craft engaged in inland navigation, coasting or short sea trades; sometimes specifically designated according to type of boat loaded, or place of loading, e.g. boat loader, canal boat loader, dockside loader, slate loader (quay); highest degree of skill required in stowing cargo on large sea-going vessels carrying mixed cargo and vitalising many ports; such work is generally done by stevedores g.v.

stevedore, stower, ship stower; a loader g.v. specially skilled in stowing cargo in ship's holds; is responsible to master stevedores (732) g.v. for proper stowing of cargo; ensures that it is not too tightly packed, that it does not shift during voyage, and that casks, etc., liable to burst or leak, are not so placed as to injure other cargo if any accident occurs, etc.; usually directs two holdswen (745) g.v. and himself assists them in stowing.

744.—COAL BOAT LOADERS AND DISCHARGERS.

bank rider, brakeman (coal drops), see wagon man.

hunker; tips coal from baskets or trucks into coal bins or bunkers as they are lowered by hoist; directs coal chute into bunkers; cf. trapper.

collier; general term for one of coal barge crew, who assists in unloading coal from barge to ship or to quay, includes hunker, trimmer, loader g.v.

discharger, coal boat; general term for any labourer engaged in discharging coal, including coal unloader, coal whipper g.v.; usually uses a crane fitted with a skip.

dog lad; attaches slings or dogs to coal baskets or trucks to enable them to be hoisted in or out of ship's bunkers.

hobblie, coal; a casual worker who assists coal trimmers g.v. in emergency.

hoist worker, coal (staithe); coal derrick labourer; fills containers with coal by shovelling, and attaches them to chain of hoist ready for slinging into ship's hold.

labourer, coal wharf (staithe); works on wharf where coal is discharged or loaded into ships either by hoist or tip; sweeps wharf, supplies coke to cranes, hoists and screwers, etc.

labourer on coal lighter, dock; fills, by shovelling, baskets or metal containers with coal prior to their being lifted by crane from lighter to ship, or trime coal in lighter to enable grabs to pick it up; cf. trimmer.

loader, coal; coal lumpster; one of a team of men engaged in sealing a vessel by carrying it in baskets or other receptacles along gangway to ship and discharging it into holds or bunkers.

trope runner (colliery wharf); under supervision of colliery wharf foreman (746) g.v., is engaged in hauling trucks to and from coal wharves and wharf in loading of ships with coal for export or carriage coastwise; as for trope runner (743).

aboutman, see teamer.

teamer, coal (staithe); in charge of horses which are used to draw trucks of coal under cranes and into tipping sheds.

teamer, coal teamer, coal tipper (staithe); shodstom; stands on coal boat and on to which wagon is run; at a given signal, swings bolts from hinged front or side of wagon, which is then mechanically tilted, causing coal to fall down chute into ship's bunkers.

trapper (staithe), trap lad; (Ym. see term) checks flow of coal from chute to ship's bunkers, by moving a lever which raises end of chute, to prevent coal being broken too small by falling too heavily, or to prevent one part of bunker being heaped up too high.

trimmer, coal trimmer; stands in ship's hold or bunker when she is being loaded with coal as cargo or as bunker coal; as each wagon is emptied down chute into hold by coal tipper g.v. trimmer (level) coal with shovel, so that it lies smooth and will not shift during voyage, causing ship to list; signals to tipper g.v. when ready to receive fresh load; cf. trimmer (736).

unloader, coal; fills baskets, or other receptacles, with coal in ship's hold, and fastens them to rope or chain ready for hoisting to quayside; cf. coal whipper.

twageman, wagon rider; bank rider, brakeman (coal drops); accompanies loaded coal wagons (running alongside wagon or hanging on by hand) down gradient along which wagon descends by gravitation; draws brake bar to check speed when necessary; at incline bottom, sometimes pulls-over point lever to allow wagon to run into coal boat sidings.

whipper, coal; unloads coal, with help of jib-boist (crane fitted with receptacle for coal), from vessels into large, lighter or railway wagon alongside; pulls levers to lower and raise receptacle to and from ship's hold for filling, etc.; at given signal from trimmer g.v., swings filled receptacle into position and discharges coal therefrom into large, lighter, or wagon.

wing man, coal wing man; a coal trimmer g.v. who trims coal in ship's hold round staithe.

745.—OTHER DOCK LABOURERS.

ballast heaver, ballast man, ballast tipper; (i) one of two men, or of gang, either on quay, or, on deck or in ship's hold, engaged in filling with ballast (sand or gravel) hold of ship going from one port to another without cargo ("in ballast"); or on quay, fills hanket or other receptacle with ballast, attaches crane sling thereto, and signals to crane-man or winchman (730) q.v. to hoist and swing it over ship; (ii) on deck or in hold, receives hanket, directs it over hold, tips contents into hold, and trims with shovel, so that it may not shift during voyage; (iii) engaged in discharging ballast, when ship's hold is to be cleared for cargo; or for (i), but operations reversed.

barge emptier, boat emptier; a carrier q.v. engaged in unloading barges, boats or other small vessels.

bobber, fish bobber; (East Coast term) who originates when fish porters were paid 1s. per hour; see **lumper, fish**.

boxman; crutche-man; a dock labourer q.v. who stands on dock quay, or in ship's hold, filling a box or similar receptacle with number of small separate packages; attaches slings to box and, when box is filled, latches it on to crane fall, then signals to hatchman q.v. or to winchman (730) q.v. for removal of packages to hold or quay.

bucketier, grain bucketier; a filler q.v. in dock shed, who fills sacks with grain discharged in bulk from ship, using an iron measure known as a bucket (dram or flat), in readiness for weighing.

carriage worker, general cargo worker; a general worker (as distinct from a specialist, e.g. fish loader, grain bopperman q.v.) assisting in loading or unloading of any cargo.

carrier; runner, **runnerman;** a porter q.v. who carries goods on back, shoulder or beside between quay, ship or warehouse, or about dock premises generally; usually specifically designated according to goods carried, etc., e.g. bag carrier, deal carrier (carrying deal planks), fish bag carrier, fruit carrier, putrop, prop, or pitwood carrier, potato carrier, timber carrier.

crutche-man, see boxman.

deal gangwayman; stands on gangway between ship and wharf or quay, and passes timber from a dock labourer q.v. standing on ship's deck to deal carrier q.v. on wharf or dockman; see labourer.

deckman; one of a team of men who open and shut dock gates by means of capstan; cf. **clough keeper** (749). **filler;** a dock labourer q.v. engaged in any filling operations, e.g. shovelling ballast, grain, in bulk into hankets or other receptacles in ship's hold or on quay in readiness for trucking away by dock labourers or for attaching to crane slings and subsequent tipping, cf. **tipper;** **ladder ballast heaver, grain bucketier** q.v.

fish dockman, fish loader, fish quay man; loads fish boxes on lorries or other vehicles at fish wharves; cf. carrier.

grain hopperman; adjusts position of hopper to emptying buckets or elevator, and moves hopper along rails during process of filling grain from ship into warehouse.

hatchman, hatchunder, hatchwayman; stands by hatch when ship is loading or unloading and signals to winchman (730) or to raiser q.v. when to set winch in motion to raise or lower goods over or into hold, signals to holdman q.v. when goods are about to be raised or lowered; stowages goods, with his hand, as they come within his reach on their way to or from holdman; employed on larger vessels only.

bobber (slang), see labourer; sometimes specifically designated, e.g. fish bobber.

holdman; a dock labourer q.v. working in ship's hold, carrying or wheeling goods to hatchway or from hatchway to stowage and stowing them under his direction; may also detach or attach slings, dogs or hooks of bails to receive goods, lowered into hold by winchman (736) q.v., or to unload goods therefrom.

labourer, dock labourer; dockman, dock porter, hobbler, quaysman; general term for anyone engaged on the various kinds of unskilled work in a dock, such as lumping, carrying or wheeling goods from or to ships, assisting stowage, in loading and unloading of vessels, etc.; when employed permanently by dock authority is called dock board labourer, permanent labourer, registered or "A" list labourer; when employed casually may be a preference or "B" list labourer, who has next claim for employment after permanent men; sometimes specifically designated according to kind of work done, e.g. stowage labourer.

lighter discharger; a dock labourer q.v. unloading goods from lighter to ship in harbour or fairway.

lotter; where goods are sold at dock or wharf (i) separates goods into "lots" corresponding with sale catalogue, taking care that all packages bearing similar mark are placed together; sometimes also makes small opening in package, to expose contents; (ii) separates goods, after sale into "lots" for despatch to purchaser;

(iii) grades incoming merchandise according to quality, e.g. sorts cases of oranges into lots 1 (ripest), and to be sold first, lots 2, 3, 4, etc.

lumper; as for carrier; generally used for men employed casually by stowage.

lumper, fish; bobber, fish bobber (East Coast); fish hobbler, runner; discharges fish from trawlers and drifters to quay; carries fish in "kts" or baskets.

pitwood roller-off; rolls logs of pitwood, from ship to wharf, down an inclined plane.

porter; a dock labourer q.v. who is engaged in carrying or otherwise transporting goods at docks; sometimes specifically designated according to place where employed or to goods carried, etc., e.g. canal porter, canal boat porter, cart porter, contract porter (paid per ton of goods moved), cotton porter, deal porter, dock warehouse porter, fish porter, grain porter, marine porter (carries luggage between train and ship), quay porter, quayside porter, rigger porter, sample porter, ship's porter, stone porter, timber porter, water-side porter, wine porter.

porter, dock, see labourer.

quaysman, see labourer.

rafter, raftman; timber posdman (dock); a dock labourer q.v. who works on timber rafts; receives logs of pitch pine, etc., from ship or barge, and makes up into rafts, by means of staples and chains, to be towed to timber pond in dock for storage.

rail gangwayman; adjusts, and makes secure, a railed gangway, from ship to pier or quayside, for passage of trucks; stands by to brake trucks, when necessary, and help them over points.

raiderman (dock); stands near ship rail during loading and unloading operations and signals to winchman (736) q.v. when to raise or lower goods; stowages, with his hand, goods as they come within reach on their way to and from hatchman q.v.; employed on larger vessels only.

rigger, ship rigger (for working cargo); a specially skilled dock worker employed by master stowage to rig up wire splicing, derricks, deck hoppers, chutes and other gear for loading and unloading ships; dismantles derricks, etc., when loading or unloading completed,

examines wire ropes and other gear from time to time to ensure that it is in working condition.

runner, runnerman; see carrier; sometimes further designated, e.g. corn runner, fish runner, salt runner; a dock labourer q.v. shovelling salt from hold at ship or bails for loading by crane; or filling tubs on land for loading.

shedman; a dock labourer q.v. engaged in sheds of docks or harbours.

ship labourer, ship quay labourer,

ship worker, as for labourer.

ship's discharger, see unloader.

slate picker (quay); a dock labourer q.v. engaged on slate quay, sorting waste from broken slates.

slate unloader (quay); a dock labourer q.v. specialising in carrying slates.

slitter; a dock labourer q.v. who separates, with a wooden slice, bags of nitrate of soda stuck together during voyage.

stecker (steamship); a dock labourer q.v. loading food supplies on steamship for victualling superintendent (738) q.v.

sub-ganger (dock); a working foreman, taking charge, under instructions and general supervision of ganger (740) q.v. of a gang of dock labourers q.v. with whom he also works.

teamer; one of a gang of dock labourers q.v. engaged in loading and unloading cargo which is shipped in bulk, from boats or bakkets; cf. coal teamer (744).

tideman, tide waiter (slate shipping); at each full tide, lowers or warps vessels in and out of small slate shipping harbours or docks, keeps dock gates and premises painted and in repair.

timber posdman (dock); see rafter, tipper; (i) carries or wheels goods (gravel, sand, chalk and other materials) to quayside and tips them down chute into hold of ship lying alongside quay; (ii) as for tipper, coal (744).

transport man, transport worker; general terms, covering all persons engaged in transport, in any capacity; usually implies a dock labourer q.v., but also covers drivers, carriers (710, 720) q.v., etc.

trimmer, ballast; arranges ballast in holds of ships so as correctly to balance weight, and to ensure against shifting on voyage.

trimmer, grain; "trins" grain with shovel in ship's hold, so that it can be easily unloaded by grain suction apparatus; drying, loading, spreads grain with shovels evenly in ship's hold, round stanchions, etc.

unloader, dockloads unloader; ship's discharger; a dock labourer q.v. principally engaged in unloading cargo.

water-side baler; a dock labourer q.v. specially engaged in handling bales of wool or other baled goods at water-side; or in repacking goods in bales for convenience in transport.

740.—OTHER WORKERS (not elsewhere enumerated).

large searcher; a dock police constable q.v. who inspects barges for stolen goods.

blacksmith (on board ship); carries out all smithy work needed in repairs on board ship; or for blacksmith (150).

boat house keeper; lets out rowing and sailing boats, gigs, and canoes on hire from a boat house; rats boats down slips to water, and hauls them up to boat house when not in use; cleans and keeps them in repair; cf. boat keeper (738).

cargo brander, see marker.

chainman; is in charge of chain stores and responsible for care, issue, stowing, etc., of chains, which are used in connection with work of cranes, etc., on quay or wharf, or for work on a

weighbridge man; weighs on weighbridge, records and checks weights of carts, lorries, railway trucks, etc., entering or leaving premises of harbour, dock, etc., company; furnishes weigh slips to carters (719) g.v.; hands in records for use of company's office staff.

weigher, weighing machine keeper, weighman; weighs, in dock shed or on quay, goods before loading into vessel, or after unloading; keeps records of weights (where weight taker g.v. is not employed); and checks quantities of goods weighed against ship's manifest; sometimes weighs weight tickets for tally clerk; sometimes specifically designated, e.g., grain weigher, jetty weigher, pitwood weigher, weighman at coal minis. weight taker; stands by weigher g.v. and, as latter calls out weights of goods, loaded into vessels or unloaded therefrom, records weights of each class of goods.

Sub-Order 4.—Other Workers in Transport and Communication.

750.—EMPLOYERS AND MANAGERS.

air superintendent; is in general control of pilotage arrangements in connection with air transport service, and is responsible for training of air pilots (752) and air navigators (752) g.v. in flying; approves candidates for training as air pilots or navigators, submits them for medical examination and re-examination in accordance with requirements of Air Ministry, and applies for Ministry's license for them when they are deemed to be sufficiently trained as pilots or navigators; supervises pilots and navigators, and prepares their roster of duties; receives their journey log-books after completion of trips, and sees that required records and observations have been properly entered up; provides pilots or navigators, as and when required, and is responsible for maintaining adequate staff of these men.

assistant engineer superintendent (aviation); supervises, under general control of engineer superintendent g.v. foremen and workmen in workshops where flying g.v. are overhauled and repaired, and is responsible for efficient performance of their work; supervises running tests of aero engines in workshops and on aeroplanes in aerodrome hangars, and issues instructions for their overhaul and repair when necessary; accompanies air pilots (759) g.v. on trial trips to test airworthiness of flying machines; assists engineer superintendent in scientific research, and in testing new devices and inventions; undertakes any other duties allocated to him by engineer superintendent, and deputises for him when he is absent.

assistant traffic superintendent (aviation); supervises staff in booking office engaged in weighing passengers, passengers luggage, parcels, goods, etc., and is responsible to traffic superintendent g.v. for seeing that total permitted load is not exceeded; supervises loaders and porters (759) g.v. engaged in loading and discharging aeroplanes; notifies air superintendent g.v. of any special journeys or of other changes in flying plans over various routes, so that necessary pilots (752) g.v. may be provided; assists traffic superintendent generally, and deputises for him in his absence.

engineer superintendent (aviation); ground engineer (aviation); is in general control of mechanical side of air transport services, and is responsible for maintaining aero bodies, engines, planes, rigging, passenger cabins, etc., in good working condition; sees that engine log

books and aircraft log books of each flying machine are kept up-to-date, and that mileage overflights is carried out in accordance with requirements of Air Ministry; is in charge of workshops where machines are overhauled and repaired, and directs and supervises staff employed therein; provides air mechanics (346) g.v. to accompany pilots (752) g.v. on air routes where insufficient provision is made for attending to machines at terminal aerodromes; prepares aeroplanes for inspection by officers of Air Ministry, with a view to issue of certificates of airworthiness; tests new devices and inventions in connection with mechanical side of air transport, and carries out scientific research with a view to effecting improvements in flying machines.

ground engineer (aviation), see engineer superintendent.

traffic officer, traffic superintendent (aviation); is in general control of commercial side of air transport services; plans air routes, and places machines on routes in accordance with requirements of traffic; is responsible for advertising arrangements, and supervises work of canvassers (774) g.v. engaged in obtaining passengers for goods; is responsible for loading of aeroplanes, and for seeing (before aeroplane starts) that permitted load, as stated in license, is not exceeded; is responsible for seeing that Customs, passport and immigration regulations are fully observed.

751.—FOREMEN.

assistant inspector of messengers (Post Office); is in charge of section of telegraph messengers (758) g.v. and is responsible for discipline, time-keeping, and allocation of duties and work.

assistant inspector of postmen (Post Office); in Provinces, carries out any sectional duties assigned to him by inspector of postmen g.v., e.g., supervising (under general control of inspector) postmen (753) g.v. attached to a head office or substation sorting office, in work of defacing and stamping letters, and sorting them into district and street order in readiness for delivery; assists inspector in maintaining punctual and expeditious collections and deliveries of letters, parcels, and telegrams, and in external investigations, under instructions from inspector into complaints regarding postal delays, late deliveries, missing letters, etc.; periodically walks postmen's rounds to check time required for performance of duties, assists inspector of postmen g.v. generally.

assistant supervisor (Post Office telegraphs); supervises a group of telegraphists (755) g.v. and is responsible to supervisor g.v. for work of section.

assistant supervisor (Post Office telephones), as for assistant supervisor (Post Office telegraphs).

foreman porter, see head porter.

head messenger; is responsible for allocation of duties of messengers (758) g.v., in Government offices, banks, insurance offices, and other establishments in which a large number of messengers are employed, and for their time-keeping and discipline; fixes messengers' rounds, so that correspondence, etc., is cleared at regular intervals and is promptly forwarded; is responsible for courteous behaviour of messengers, and keeps time records of messengers and sometimes makes out weekly pay sheet for use of pay office in paying messengers.

head porter (Post Office); foreman porter; (London) supervises work of Post Office porters (759) g.v. in loading and unloading mail bags into and from mail vans or trucks at railway stations or sorting offices; is responsible to overseer (G.P.O.) g.v. for expeditious handling of mail-bags.

head postman; (London) is responsible to overseer (G.P.O.) g.v. for supervision of postmen (753) g.v. at large sorting office; duties as for assistant inspector of postmen but controls smaller staff.

inspector of messengers (Post Office); is in charge of all telegraph messengers (758) g.v. in an area; often done by inspector of postmen g.v. assisted by one or more assistant inspectors of messengers g.v.

inspector of postmen; in Provinces, is responsible to postmaster for control of postmen (753) g.v. in postmaster's district, and for supervision of their work; in consultation with postmaster, prepares roster of postmen's duties; sees that collections and deliveries of letters are carried out punctually and with reasonable speed, in accordance with roster; investigates complaints of postal delays, late deliveries, missing letters, etc., or directs assistant inspector g.v. to investigate complaints, and furnishes reports thereon to postmaster; sometimes visits sub-sorting offices in district to see that work there is being efficiently carried out; sometimes does work of inspector of messengers g.v.

office keeper and inspector (Post Office); acts as head messenger g.v. at Post Office Savings Bank.

overseer (G.P.O.); is responsible to postmaster or superintendent for supervision of sorting clerks and telegraphists (755) g.v. at large post office, and sees that their duties are properly carried out in accordance with roster, and with reasonable expedition; when volume of work demands, applies to postmaster for permission to work overtime or puts in request for extra staff.

overseer of mail bag apparatus (Post Office); is responsible for maintenance, in a state of efficiency, of mail bag apparatus (by which mail bags are dropped from travelling post offices or mail trains, or picked up thereby); travels on mail trains to make periodical inspections of apparatus on sorting carriages attached to mail trains, and reports defects to railway companies for attention; supervises installation of apparatus by side of railway lines, and instructs local staff as to its manipulation by giving demonstrations.

overseer of sorters (Post Office); supervises sorters (753) g.v., allocating duties and dealing with rush periods and emergency work.

sergeant commissioner (Post Office); a member of Corps of Commissioners hired by Post Office, who takes charge of a section of commissionaires (758) g.v. and is responsible for their punctual and regular attendance, for filling vacancies occasioned by illness, or other causes, and for their work and conduct generally.

supervisor, night telephone; a male supervisor g.v. taking night duty at one of the principal telephone exchanges.

supervisor (Post Office); allocates duties of telegraphists (755) or telephonists (755) g.v.; deals with records of sick leave, and routine staff matters; maintains discipline; deals personally with complaints.

752.—AVIATORS.

aerobaut; balloonist; ascends in basket of balloon; by means of valve, allows gas to escape, and thus causes the balloon to descend or lets out ballast, to lighten balloon and cause it to ascend; reads meteorological and other instruments; keeps log, maintaining a continuous record of voyage.

aviator, see pilot.

balloonist, see aerobaut.

cockswain of airships; *navigator* (airships); is responsible for navigation of airships; reads instruments recording altitude, wind velocity, etc.; observes clouds and determines altitude for most favourable airway; steers course and regulates speed by instructions to engineers.

navigator, air navigator; an air pilot *g.v.* specially trained in reading instruments which indicate altitude, wind velocity, etc., and in observation of weather conditions generally for plotting air-liner or aeroplane along most favourable airway; accompanies air pilots in training, and advises them how to manipulate controls so as to keep an even keel under varying weather conditions; takes air-liners on new routes, and maps out courses for air pilots to follow; accompanies air pilots on unusual routes to advise and assist them in navigation of flying machines.

navigator (airships), *see* cockswain of airships.
paces, *aeroplane pilot*, *air pilot*, *aircraft pilot*, *airship pilot*; a holder of Air Ministry's license who pilots flying machine; controls, by hand, direction column or wheel, and moves rudder bar with foot, to determine, by movements of ailerons and rudder, the elevation and direction of flight; opens and closes throttle valve of engine, to control speed and attends generally to running of engine; reads map and compass, and observes features of land or sea traversed (if visible) to see that he is keeping straight course; receives and transmits messages by wireless en route; sometimes also makes meteorological observations en route, records wind directions and velocities, temperatures, etc.; is required to keep log book, recording times, mileage, working of engine and of controls, mishaps or other unusual occurrences, etc.; hands in log book to office of air superintendent (750) *g.v.*

753.—POSTMEN AND POST OFFICE SORTERS.

allowance deliverer; part-time worker who performs duties of postman *g.v.* for less than three hours daily.
assistant head postman; assists head postman (751) *g.v.* in supervision of postmen but otherwise performs the ordinary duties of a postman *g.v.*
auxiliary postman, auxiliary postwoman; performs part-time or seasonal duty as postman *g.v.* during periods of heavy posts, e.g. Christmas time.
auxiliary sorter, or for auxiliary postman.

letter carrier; (i) (G.P.O.) obsolete term, *see* postman; (ii) carries and makes personal delivery of letter or package travelling, on sender's instructions, by tram, rail, ship, etc.
postman, postwoman; *letter carrier* (G.P.O.); delivers letters and parcels to houses, offices, etc.; collects letters from pillar-boxes and conveys them to sorting office; frequently performs primary sorting of letters and parcels (*see* sorter); faces up letters in street order; in rural and smaller urban areas, meets mail trains, and collects and despatches mail bags.

rural postman, a postman g.v. working in rural area, also *trie stree*, etc., in pouch for sale on round; *obsolescent*.

sorter; (London) receives incoming mail bags, breaks seals, opens bags, and sorts contents (letters, parcels, etc.) according to districts for delivery by postman *g.v.* or for despatch to sub-sorting offices where they will be further sorted; sorts outgoing mails, and makes up and seals mail bags labelled for London districts, for provincial towns, for places abroad, etc.; sometimes specifically designated, e.g. *letter sorter*, *parcel sorter*.

754.—WIRELESS OPERATORS.

marconi operator; a wireless operator *g.v.* in employment of Marconi Wireless Telegraph Company.

watcher (radio-telegraphic); *see* wireless watcher.
wireless operator, wireless telegraphist; is in charge of, and responsible for, the efficient working of wireless telegraphic instruments on board ship or at any transmitting or receiving station; receives and decodes incoming, and transmits outgoing, messages; carries out minor repairs and adjustments to installation; holds certificate of proficiency.

wireless telegraph operator (Post Office); operates wireless apparatus to transmit and receive messages.
wireless watcher; *watcher* (radio-telegraphic); assists wireless operator *g.v.*, when latter is off duty, by "listening in" for distress or other signals; is not required, and usually is not competent, to transmit and receive messages, or carry out any adjustments of repairs to installation; frequently is an apprentice learning wireless telegraphy.

755.—OTHER TELEGRAPH OPERATORS.

handotist (G.P.O.); a telegraphist *g.v.* transmitting messages by means of handot machine, whereby varying messages, conveyed by operator's fingers to a key board, are transmitted over wires to receiving office, where message is automatically transcribed in printed characters on revolving paper tape.

cable operator; as for telegraphist, is service of cable telegraph company, operating telegraph instruments by which messages (largely in code or in foreign languages) are transmitted and received, cable to or from distant countries; is often required to spend part of term of service at stations abroad.

counter clerk and telegraphist (Post Office); is employed in London branch post offices to sell stamps, postal orders, etc., and to receive parcels, registered letters, telegrams, etc., to pay out pensions, etc., to transact business connected with the Post Office Savings Bank and telephone service, to issue licences, etc., and to operate telegraphic instruments for transmitting and receiving telegrams.

gellist (G.P.O.); a telegraphist *g.v.* who perforates tape with message by means of a key board, and passes perforated tape through machine ("gell" machine) whereby message is transmitted over wire to receiving office.

news distributor; a telegraphist *g.v.* in the Central Telegraph Office engaged on duty involving correct distribution of press messages received for transmission.

probationary telegraphist; a telegraphist *g.v.* during probationary period of appointment; works under experienced telegraphist while duties are being learned.

relay clerk, obsolete term, see repeater officer.

repeater officer; *relay clerk*; in charge of telegraph repeater instrument at relay station; watches correct functioning, makes necessary adjustments and renders periodic reports.
sorting clerk and telegraphist (Post Office); is employed in provincial post office as sorter (751) *g.v.* and/or telegraphist *g.v.*, and/or counter clerk *g.v.*

telegraph clerk; *unofficial term*, may be telegraphist or counter clerk and telegraphist in London, or sorting clerk and telegraphist *g.v.* in provinces.

telegraphist (Post Office); is employed in the Central Telegraph Office, London, to operate instruments for transmitting telegrams and cablegrams; sometimes designated according to the type of apparatus

used, e.g. *handotist*, *gellist g.v.* in branch post offices, telegraphic duty is performed by counter clerk and telegraphist *g.v.*
telegraph operator; operates telegraphic instruments for transmitting and receiving telegrams and cablegrams.

756.—TELEPHONE OPERATORS.

call office attendant (Post Office); is in attendance at public telephone call offices to assist users by obtaining required number, etc.; collects fees and holds general charge of the telephonic instruments.

car-taker-operator (Post Office); resides on premises of a small telephone exchange, and performs part or whole duties of telephonist *g.v.*
exchange attendant (Post Office); agrees to provide accommodation for small telephone exchange on his own premises and acts as telephonist *g.v.*

night and Sunday telephone attendant (Post Office); performs night and Sunday duty as telephonist *g.v.* at small telephone exchanges.

night operator, night telephonist (Post Office); performs night duty as telephonist *g.v.* at large telephone exchanges.

telephonist (Post Office); operates switchboard in telephone exchange, during day time, to make connections between instruments of subscribers and other persons using telephones.

757.—LIFT ATTENDANTS.

carrier, elevator attendant (textile mills); *see* hoist attendant.
hoist attendant, hoistman; carrier (textile mills); *elevator attendant* (textile mills); in textile trades, works hoist or lift (by hand, hydraulic or electric power) to carry up or down bobbins, etc., from one part of mill to another; frequently done by bobbins carrier (359) *g.v.*; in grain sailing and waiting trade, works hoisting apparatus (usually by hand) whereby sacks or bags are raised to or lowered from floor to floor of mill or malt-house; in other industries, operates hoist or lift (by hand, hydraulic or electric power) for raising and lowering goods and/or workers from one level of factory, etc., to another; sometimes specifically designated according to kind of hoist worked, e.g. *hydraulic hoistman*; *cf.* lift attendant; *cf.* hoist engine man (350).

lift attendant, lift boy, lift girl, lift lad, lift man, lift worker; operates and controls levers of an electric or hydraulic lift, working between different floors of a business house; *cf.* hoist attendant.

758.—MESSENGERS.

assistant head messenger (Post Office); is in charge of under-post messengers *g.v.* allocates duties, maintains discipline, and is responsible to head messenger (753) *g.v.*
attendant (Govt. Dept.); assists head of technical section in a museum, gallery, etc., by cleaning and shifting exhibits, keeping records of permanent and loan exhibits specimens, etc., distributing files, letters, etc., and running messages; usually supervised by a senior attendant called *chief attendant*.

baker's boy; barrow boy; assistant baker's vanman or barrowman (776) *g.v.* on his rounds by delivering loaves at customers' houses or by taking charge of horse and van while baker's vanman interviews householder; *also* as errand boy *g.v.*

bank messenger; carries pouches containing bills of exchange, banker's drafts, cheques for clearance, etc., between banks and other banks in London and communications between head office and suburban branches of

own bank; carries bullion and boxes containing customers' valuables or securities to and from rails in strong room; loads and unloads bullion into and from taxi-cab or other vehicle, and accompanies clerk in charge of bullion on journey in vehicle; in small branch banks, sometimes lights and attends to office fires or heating apparatus, etc.; sometimes also acts as resident caretaker (931) g.v. and is responsible for cleaning of bank.

barrow boy: (i) see baker's boy; (ii) an errand boy or shop boy g.v. delivering goods with help of hand barrow.

book collector: receives from book-seller (770) g.v. list of books not in stock, ordered by customers, and goes round to publishers to obtain them; usually delivers books which are however, sometimes fetched by collector's boy; g.v.; pays publishers for books, in cash, at trade prices, unless employer had running account with publisher; cf. book publisher's collector (942).

book deliverer: delivers books from a circulating library to private houses; usually rides bicycle carrier.

boy messenger: posts letters, despatches, telegrams, delivers messages and light parcels, cleans and fills ink-pots and does similar odd jobs in banks, insurance offices, business houses, etc.

boy messenger (Post Office): (i) see telegraph messenger; (ii) a messenger g.v. working inside G.P.O.

bungee lad: a milk boy g.v. who helps bungee man (770) g.v. in delivering milk from milk float.

collector's boy: assists book collector g.v. by fetching, from publishers, usually in a cycle carrier, parcels of books which are too heavy to be carried by hand; is usually employed part time on other duties, e.g. packing parcels of books, delivering parcels of books to customers.

colliery letter boy, colliery post boy: a boy messenger g.v. employed by colliery company.

commisnaire: usually a member of the Corps of Commisnaires employed to undertake messenger work of considerable responsibility, e.g. bank messenger g.v. will attend at entrance of hotels, theatres, cinemas, banks, insurance offices, business houses, etc., to direct and assist enquirers, keep out undesirable persons etc.; cf. attendant, cinema, theatre (889), door attendant (917).

commisnaire (G.P.O.): a member of the Corps of Commisnaires engaged by G.P.O. to deliver telegrams during night.

delivery boy, see errand boy.

district messenger: licensed messenger; delivers messages, letters, fetches and delivers parcels, makes purchases on behalf of customers, pilots them to required places, stands in theatre queues, and performs services of a varied character; is attached to District Messenger and Theatrical Ticket Co. Ltd., who lend him services, according to a specified scale of charges, to the public.

doctor's boy: delivers medicines, prescriptions, etc., to patients' houses; frequently acts, in addition, as page boy (900) g.v. at surgery.

errand boy: delivery boy, parcel deliverer, shop boy; (i) delivers goods from a retail shop, warehouse, etc., to customers' premises on foot, or by bicycle, tricycle carrier, or van; runs errands, delivers bills and accounts; sweeps and dusts shop or warehouse; takes down shutters, cleans brass and windows, etc.; (ii) runner, errand runner, froflier; takes messages, fetches and carries tools, materials, refreshments, etc., for employees in factories and workshops, from one room or department to another; sometimes specifically designated, e.g. cycle errand boy.

errand girl; runner, small runner, trotter; as for errand boy, but usually delivers goods on foot only; in clothing trades, is sometimes employed as matcher (429) g.v.

girl messenger (Post Office): obsolete, see girl probationer.

girl probationer (Post Office): girl messenger; performs minor duties, such as carrying forms and papers, etc., in headquarter departments of Post Office; attends compulsory classes to qualify by examination for higher appointments.

insurance messenger: carries documents (policies, deeds, mortgages, etc.) from own insurance office to other insurance offices, or to banks, etc., or from head office to district offices, or vice versa, and performs other duties of messenger g.v.; sometimes also acts as resident caretaker (921) g.v. and is responsible for cleaning and heating of office.

licensed messenger, see district messenger.

messenger: (i) carries messages, parcels and documents, sorts and delivers files and papers; directs and escorts enquirers; sometimes acts as commissnaire, porter (759), doorkeeper (917) g.v.; in Government offices, sometimes performs duties of a quasi-clerical nature; (ii) in some clothing trades, sometimes does work of matcher (429) g.v.; sometimes specifically designated, e.g. dock messenger.

milk boy: assists milk deliverer (770) g.v. on his rounds or himself acts as deliverer; collects empty bottles and cans from customers' houses; in intervals between rounds, assists at work in washing bottles, cans and churns.

night messenger: (i) a district messenger g.v. employed on night duty; (ii) a bank messenger g.v., or other messenger, employed on night duty as night watchman (963) g.v. patrolling premises, attending to telephone, etc. office orderly; a civilian employed as messenger g.v. in a military office.

parcel deliverer, see errand boy.

portress (for commercial firm), as for errand boy.

pot boy (builders, etc.): fetches beer for workers on buildings, works of construction, etc.; boils up water for tea, etc.

runner, small runner: (i) see errand boy; (ii) see errand girl.

sample boy: acts as messenger g.v. to commercial traveller (773) and usually also carries samples; cf. bagman (759).

shop boy, see errand boy.

showroom page: a messenger g.v., usually a girl, waiting on showroom assistants (775) g.v. in drapery, millinery, etc., establishments.

submarine company's messenger: as for telegraph messenger, delivering cablegrams received by cable company.

tailor's shop girl; errand girl g.v.: carrying material and finished garments between tailoring workshop and wholesale or retail bespoke tailor.

telegraph messenger (Post Office): boy messenger; delivers telegrams, and takes back reply (if any); attends compulsory classes to qualify by examination for higher appointments; trotter; (i) see errand boy; (ii) see errand girl.

tube messenger: takes written messages, and other documents from tube attendant (769) g.v. to destination in works or large offices; sometimes also does work of tube attendant (769).

walter (Stock Exchange): a messenger g.v. who delivers telegrams and other communications to members on floor of Stock Exchange; sometimes also acts as doorkeeper (917) g.v.; waters floor periodically with watering can to lay dust; after closing of Exchange, sweeps up litter from floor and puts it in bins for removal.

759—PORTERS (not elsewhere enumerated).

auxiliary porter (Post Office): as for auxiliary postman (753); for duties see porter.

bridge porter, see town porter.

bagman (Post Office): sorts and checks returned mail bags, and issues them as required.

bagman: barrow man, sample man, sample carrier, travellers' porter; carries samples for commercial traveller (773) g.v. by hand or by truck; may be attached to outdoor staff of commercial traveller or may work on own account as out porter g.v. at railway station; accompanies commercial traveller on his rounds and assists him in unfastening and fastening packages of samples.

company promoter; acts as agent for proprietors of a business or enterprise in making all preliminary arrangements for flotation of a limited company; sometimes acquires an interest in an enterprise requiring capital for development and finds a limited company as a speculation.

financier; general term denoting anyone engaged in financial transactions, banking on a large scale, company promoting, etc. money changer; money dealer; at exchange money of one country for that of another at current rate of exchange less small percentage as fee. money dealer; (1) see money changer; (2) see broker, exchange.

ORDER XXVI.—PERSONS EMPLOYED IN ENTERTAINMENTS AND SPORT.

Sub-Order I.—Persons Employed in Entertainments and Sport.

880.—MANAGERS, LESSEES OF THEATRES, PICTURE THEATRES, CONCERT HALLS, ETC.

acting manager; see business manager; cf. actor.

advanced agent; goes on ahead of touring theatrical company, circus, etc., and makes arrangements for advertising, accommodation, etc.

assistant stage manager; as for stage manager (q.v.), when he acts as and for whom he depicts; usually acts as prompter (887) (q.v.) during performance.

business manager; acting manager (business); has charge of all "front of the house" arrangements in a theatre; engages contracts, and pays theatre staff; has charge of box office and all accounts; directs advertisement.

producer; is responsible for the production of play or show; decides positions and movements of actors (885) (q.v.) position of scenery and properties on the stage; indicates interpretation to be given to each speech; approves dresses, properties, design of scenery; directs rehearsal.

stage manager; is responsible for smooth running of performance; satisfies himself that scenery, lighting, properties, etc., are in order; sees that all artists are on premises prior to performance, and if they are not, instructs undersecretary (885) (q.v.) to take part of absent performers; sees that artists are not prolonged; is in charge of everybody and everything on stage; receives reports from master carpenter (874), property master (881) and electrician (807) (q.v.) that everything under their charge is in order.

theatrical manager; undertakes, on his own account or for others, management of a theatre; arranges production; engages, controls and pays company and staff; is often himself proprietor or leasee of theatre; cf. business manager.

881.—THEATRICAL, FILM HIRING AND VARIETY AGENTS.

agent, band agent, concert agent, lecture agent, theatrical agent, variety agent; conducts an agency by which bands, lectures, concert, theatrical or variety artists respectively are put in touch with organizers of public performances, theatrical managers, etc.; keeps register; arranges terms of contract, i.e., salary, dates, duration; often arranges bookings, itineraries, and expensives advertising arrangements of performances. agent's manager; in general conduct of an agency, not being himself proprietor; duties as for agent; sometimes specifically designated, e.g. band, concert, film hiring, theatrical or variety agent's manager.

film hiring agent; film renter; acquires, by purchase or arrangement, right to hire a cinematograph proprietor's film; arranges trade shows of own film (sometimes done by producer (880) (q.v.)); lets films on hire; agrees terms, conditions and itinerary.

882.—FILM PRODUCERS, FILM STUDIO MANAGERS.

director of production, see producer, cinema.

film editor; assembles film negatives by joining them together with gum; verifies negatives as to continuity of story; frequently also writes sub-titles; is sometimes a film producer (q.v.).

producer, cinema, film; director of production; makes arrangements for cinematograph production, and superintends staging and photographing; directs action of players and is generally responsible for production.

studio manager, film studio manager; is in charge of film studio where cine-matograph films are exposed, developed and printed, and of staff, including scene shifters (887), electricians (807) (q.v.), etc.; gives instructions for putting up scenery as and when required by film producer (q.v.); does not, as a rule, deal with correspondence or arrange for exhibition of films.

883.—SHOWMEN; FAIR AND ROUNDABOUT PROPRIETORS AND MANAGERS.

amusement caterer, manager, owner, proprietor of fair, roundabout, show, swings, etc.; showman; owner or manager of travelling circus or fair, swings, roundabouts, patch and jolly or puppet show, etc.; provides amusements also at garden parties, gala, etc.; may direct staff of workers in erection and dismantling of shows.

manager of feast; an amusement caterer or showman (q.v.) who organizes amusements at wakes or on feast or gala days; may also organize bazaars, etc.

884.—PROPRIETORS AND MANAGERS OF OTHER ENTERTAINMENTS AND SPORTS.

clerk of the course; is sole person responsible to stewards of Jockey Club (in case of flat racing) or to National Hunt Committee (in case of steeplechasing) for all arrangements in connection with race meetings; inspects course periodically and confers with directors of racing club (his employees) regarding stakes, programmes, race cards, etc.; superintends marking of distances horses have to run; attends races and acts as mediator between stewards and any disputing parties; generally superintends all race course staff.

clerk of the scales; is responsible that jockey (885) (q.v.) rides at correct weight, as laid down in racing calendar; sees all jockeys weighed before race, and first four jockeys after race; superintends weighing and enters up weights in a book; is responsible to Jockey Club for proper carrying out of duties.

courtesy clerk; is in charge of arrangements for sport of dog coursing; records events and results.

handicapper; watches form of competitors, to guide him in deciding handicaps; allows weights to be carried by horses in handicap races, or, in case of foot races, starts to be resolved by certain competitors; advises racing authority or executive accordingly.

judge; (1) (steeple racing) is stationed at winning post and "places" horses in accordance with their order; is paid by owners of courses attended, and is usually under the direct control of the Jockey Club stewards; (2) (coursing) watches dog coursing race from convenient standpoint and decides which dog is winner.

master of ceremonies (dance hall); arranges and regulates dances, entertainments; band as to time, duration, etc., of dances, and is responsible for general conduct of dances.

rink floor manager: is in control of the floor staff and floor of skating rink. **Instructional instructor**, **skate boy** (323), **skate storeman**, **arranger**, occasionally, with **bandmaster** (385) (q.v.), programmes of music, dances, etc., but is not himself musical conductor; gives instructions for removal of any disorderly person; is responsible for running of the floor, its beginning and finishing of skating and clearing of floor when skating finishes.

starter: is responsible to the executives of the meetings he attends for the starting arrangements of a race; of *race meeting*, when all horses are in line, pulls a lever which releases a white tape drawn across course, so the start for the race to commence; reports disobedience of jockeys (385) (q.v.) to steward (race course) (q.v.); at *ordinary athletic meeting*, *yacht race*, etc., starts competitors by firing off gun or pistol.

steward (race course): is appointed with others by race course executive to take charge of racing at a race meeting; has power to disqualify winning horses when an objection is raised; enquires into conduct of jockeys (385) (q.v.) racing at a meeting; and if found guilty of disobedience or reckless riding, has power to fine or suspend them; makes report to Jockey Club.

885.—ACTORS, etc.

actor, **actress**: plays a part in theatrical production; impersonates and portrays character by speech and gesture; sometimes specifically designated, e.g. *classical actor*, *actress*.

actor manager: a theatrical manager (389) (q.v.) who is himself an actor, usually playing a part in play produced at his theatre; may also be producer (389) (q.v.). **actor vocaliser**: a professional singer (385) (q.v.) with dramatic training, qualified to play in operas, etc.; cf. *operatic singer* (388).

artiste: general term for a professional actor, dancer or entertainer; includes comedian, comedienne, acrobat, entertainer, humorist, roofer, ventriloquist, tragedian, trapeze artist; sometimes specifically designated, e.g. *comedy artiste*, *music hall artiste*, *variety artiste*.

chorus girl: a member of musical comedy or variety chorus.

comedian, **comedienne**: plays a humorous part in a theatrical or cinematograph production, or stage humorous songs in a music hall, or other entertainment.

dancer, **danceuse**: general term for one who performs dances, either alone, with others or in a troupe or ballet, at a theatre, music hall, etc.; often specifically designated according to kind of dance performed, e.g. *ballet dancer*, *eccentric dancer*, *dog dancer*, *de danseur*.

phantomist: an actor (q.v.) who performs in dumb show.

professional: general term sometimes used for any person engaged professionally in the theatrical profession.

super: *usher-on*; plays minor or "supplementary" part on stage, as a part which requires only dumb impersonation or "walk-on".

understudy: learns one or more parts in a theatrical production; attends rehearsals and each performance; and takes part if required by absence of actor or actress understudied; often also plays small part or walk-on.

walk-on, *see super*.

886.—MUSICIANS.

accompanist: plays, usually on a piano-forte, accompaniment of a song, or of a solo on a violin or other instrument at public entertainments; may also accompany soloist at practice.

bandmaster: conducts a band of instrumentalists (q.v.); selects music to be played; rehearses and conducts performance; cf. *musical director*.

bandman: general term for any member of a band of instrumentalists (q.v.); sometimes specifically designated, e.g. *military bandman*.

bell ringer: rings bells, usually in churches, either by pulling on a rope or ropes which cause the bells to swing in the belfry, or by playing on a keyboard connected to an electrically-driven mechanism for striking the bells; cf. *bell-ringer*.

chorifactor: a professional singer (q.v.) in a choir.

conductor, **musical conductor** (theatre, etc.), *see musical director* (theatre).

drummer: plays drums and percussion instruments, i.e. triangle, cymbals, glockenspiel, etc., in a band.

hand bell ringer: plays bells by ringing, one after another, a number of handbells, giving notes of different pitch, usually member of troupe or company.

instrumentalist, *see musician*.

musical director (theatre): *see director*, (theatre, etc.); leads or directs orchestra, band or chorus, organ, etc.

musician: *see musician*; general term for a professional player of one or more musical instruments, usually a member of an orchestra or band; term not generally used of vocalist (q.v.); includes bassoonist, 'cello, clarinetist, cornetist, flautist, fiddler, French horn player, harpist, oboist, pianist, trombonist, trumpeter, violinist, violoncellist, etc.

operatic artist, **artiste**; **operatic singer**: a singer (q.v.) with dramatic training who specialises in singing in operas; *see voice vocalist* (385).

organist: plays organ at churches, or cathedrals, or in concerts or other entertainments; sometimes specifically designated, e.g. *church organist*.

singer, **vocalist**: general terms for any person who sings at concerts, music halls, recitals, etc., or in operas, concertos, etc., in return for a fee or salary; sometimes specifically designated, e.g. *chorus singer*, *operatic singer* (q.v.), *professional singer*.

887.—STAGE HANDS, CINEMA AND LIMELIGHT OPERATORS.

biocope operator, *see cinematograph operator*.

cell boy: is responsible for notifying actors (385) (q.v.) and other performers shortly before they are due to appear on the stage; calls the half-hour, quarter-hour and five-minute before the curtain goes up; in *film producing*, calls out names of chorus actors and actresses (385) (q.v.) in dressing-room corridors when time has come for their appearance in scene.

cinematograph, *operator*, *see cinematograph operator's assistant*.

cinematograph operator, **cinema operator**: *biocope operator*; regulates electric motor operating machine which projects cinematographic picture on to screen, or in small provincial theatre, operates machine by hand; exhibits lantern slides of amusements, advertisements, etc., during intervals to show; adjusts lantern and projector to correct focus and illumination; fits in spoils and rewinds projected spoils when not so indicated by cinematograph operator (q.v.); carries out necessary minor repairs to apparatus; is sometimes a skilled electrician (397) (q.v.).

cinematograph operator's assistant, *see super*; *see super*; helps cinematograph operator (q.v.) by arranging spoils of film, lantern slides, etc., in sequence for projection; also operates machine in operator's absence; repairs broken films with gum; takes off, from machine, spoil containing film which has been shown on screen, and rewinds it on another spool, by hand; hands fresh spoils of film to operator; and stores away projected film.

dayman: is employed for a few hours in morning to clear stage and remove scenery after previous night's performance and to prepare stage for next performance.

dresser, **costume actor** (385), **actress** (385), and **music hall artiste** (388) (q.v.) to change their costumes; keeps costumes in order and ready for use; is sometimes a sewing woman (405) (q.v.) and does minor repairs; in case of music hall artiste or touring company, is responsible for packing and care of luggage.

flyman; *operator*, under direction of head flyman (q.v.), overhead appliances for raising and lowering of scenery by means of pulley ropes; works in dais.

flyman, **head**, **leading**, **charge hand** (theatre): is in charge of flyman (q.v.) and himself helps to operate overhead appliances for raising or lowering scenery.

limelight operator: has charge of and manipulates lantern, on perch or standard in wings of stage or back of auditorium; casts "spot" light on performers; throws beam of coloured light on stage by inserting slides in lantern; is generally a qualified electrician (397) (q.v.); in *small provincial theatre*, duties are usually performed by cinematograph operator (q.v.).

prompter: stands in wings of theatre to prompt when an actor (385) (q.v.) forgets his lines; in *opera*, reads *aria* over and continuously the whole libretto, when stood in front of footlights; in *theatrical prompting* is usually done by assistant stage manager (389) (q.v.).

property man: sets and clears stage of properties either under direction of master carpenter (474) or property master (q.v.); in *film studio*, is in charge of wigs, clothes, furniture and other properties and issues or procures them as required.

property master: is responsible for the safe keeping, issue, repair and, sometimes, making of stage properties; superintends selling and removing of properties.

scene shifter, **scene hand**, **stage hand**, **stage settler**: removes scenery and places fresh scenery in position, when required, at a theatre, music hall, film studio, etc.

stage machinist: has charge of and keeps in repair stage machinery; supervises working of winches, pulleys, trap doors, etc., used on stage at theatre, music hall, etc.; is usually either a master electrician (397) (q.v.) or master carpenter (theatre) (474) (q.v.).

wardrobe mistress: has charge of stage wardrobe of female members of theatrical company; an acquaintance does minor repairs to clothes, or has one or two dress-makers (405) (q.v.) working under her to do such repairs; in *amateur plays*, also has charge of stage wardrobe of male members.

888.—RACE-HORSE TRAINERS; JOCKEYS AND TRAINING STABLE ATTENDANTS.

apprentice (training stable): a boy, usually instructed to a horse trainer (q.v.), learning to become a jockey; rides horses in training and in races; in addition, grooms and feeds horses, cleans stables, prepares bedding, and makes himself generally useful.

groom (born rarely used in a racing establishment); *see stable lad* (racing stable).

headman, **head lad**: superintends work of stable men; employed in or about a racing stable; breaks sick or injured horses under direction of trainer or veterinary surgeon; occasionally rides horses at exercise in absence of trainer (q.v.).

jockey: rides horse in horse race and whilst in training for event.

manager (racing stable), **secretary-manager**: is usually in charge of business side of a training stable; arranges for transport of horses and jacks to race meetings; orders forage, medicines, saddles, etc., and attends to correspondence; usually pays wages of stable employees, and arranges entries of horses for races on instruction from owner or trainer (q.v.).

stable lad, **stable boy**: groom; is employed at racing stables to look after horses and keep clean stables; also rides horses at exercise; grooms, feeds down, feeds and exercises outside in harness; sometimes treats sick or injured horses under direction of veterinary surgeon.

trainer, **manager** or **headman** (q.v.); is usually too busy to ride horses at races.

trainer: manages racing stables and superintends training of horses; usually arranges entries of horses, under his charge, for races; has expert knowledge of horses and of their training, and is usually a

veterinary surgeon; may be proprietor of stable; accepting horses for training
training stable attendant; prepares horses' manure, lights and attends fire underneath copper in which it is heated; helps to clean and feed horses, and does other odd jobs in or about training stables, etc.
travelling lad (racing stables); travels to race meetings with horses, occupying, with stable lads (q.v.) under his charge, compartment next to horses; on arrival, superintends stabling, grooming, and feeding of horses under his charge; saddles horses for race; in horse-race, supervises safe loading of horses, in barrow-horse, for return journey.

889.—MONEY TAKERS, CHECK TAKERS, JANITORS, PROGRAMME SELLERS, ATTENDANTS.

attendant, cinema, theatre; janitor, waiter, and usher; (1) takes tickets at entrance to auditorium and conducts patrons to their seats; sells programmes, chocolate, light refreshments, etc.; covers and uncovers seats; (2) directs patrons in vestibule, acts as doorman, cleans and serves advertisement boards and photograph frames, during performance removes objectionable persons, if necessary.

attendant, ring; prepares arena of circus, tournaments, etc., by carrying loose ring and fixing up perimeter to be used by performer; removes them from ring after performance.

box office clerk, box office keeper; issues tickets and takes money for current or future performances at a box office at entrance to theatre, music hall, etc.; may also deal with telephone enquiries with regard to price of seats and accommodation available; cf. box office telephone operator.

box office manager; is in charge of arrangements for issuing tickets and for booking seats at a theatre, music hall, etc., usually assisted by box office clerk (q.v.); deals with returns from outside ticket selling agencies; renders return of receipts from sale of tickets, etc. to business manager (889) (q.v.).

box office telephone operator; attends to telephone in box office of theatre, music hall, etc., answering enquiries with regard to price of seats and accommodation available, and booking seats for patrons.

check taker; a cinema or theatre attendant (q.v.) who collects checks and tickets from patrons entering auditorium of theatre, music hall, etc.; sometimes directs people to their seats, and performs other miscellaneous duties.

chocolate seller; sells chocolate and other sweetmeats from a tray in theatre or sports grounds and other places of amusement; cf. bookie or seller (890) (T.T.).

collector; general term for person who collects money or tickets at a public entertainment, including check taker, money taker, turnstile attendant (q.v.).

gatemans, see ushers.

green coat; a uniformed attendant who appears before certain and changes numbers at sides of programme to indicate items of programme about to be shown, term almost obsolete.

housekeeper (theatre); is in charge of cleaners (892) (q.v.) at a theatre, music hall, etc., and is responsible for seeing that the work is properly done; in most London theatres, is resident at theatre.

janitor, see attendant, cinema.

lakeman; a uniformed attendant employed in entrance hall of theatre and music halls, etc.; stands at carriage door when patrons are arriving or departing; calls hackmen required by patrons; term almost obsolete.

money taker; is employed at pay desk of cinema, turnstile of sports ground, etc., issuing tickets of admission in exchange for cash.

page (cinema); a uniformed junior attendant at a cinema/theatre; directs patrons to box office and to auditorium; assists cinema attendant (q.v.) generally.

pie gate keeper, pleasure pie gate keeper; takes money or tickets at entrance to pier; issues season tickets, selling tickets, etc.; sometimes acts as barmaid, drink (q.v.) for pier concert, etc.; posts up announcements, posters, etc.

programme boy, girl, seller; (1) sells programmes, etc., often also chocolate and cigarettes, in a public place of entertainment; may show patrons to their seats and/or serve light refreshments in auditorium; (2) sells beer cards, etc., etc., at race course, cricket or sports ground.

stage doorman; a theatrical attendant (q.v.) in charge of stage door of a theatre, music hall, etc., to prevent entrance of unauthorized persons; often also acts as time-keeper (894) (q.v.) and as private telephone exchange operator (756) (q.v.).

stiltman; gate-man; controls people entering circus, exhibition, tournament, etc., and controls traffic at exit gates.

turnstile attendant, man; takes money at turnstile at entrance to sports ground, pier, exhibition, race course, etc.

usher, seat usher, (theatre, etc.); see attendant, cinema, theatre; term almost obsolete.

890.—BOOKMAKERS.

bookmaker; accepts and records bets, i.e., completes book of bets, usually at race meeting; estimates and declares, from time to time, odds he is prepared to give or accept on field or particular horse, or other competitor in sporting or athletic contest.

bookmaker's clerk (course); is employed by bookmaker to accept and record bets, and to compile "book"; also accepts and verifies claims lodged by successful parties to transactions.

bookmaker's runner; *bookmaker's* term; is employed by bookmaker (q.v.) on commission, to accept bets from persons in street, at factory, etc.; illegal occupation.

commission agent, turf commission agent; places bets on behalf of owners or trainers (888) (q.v.) with bookmakers or turf accountants (q.v.); is sometimes paid a small commission, but is usually remunerated by inside knowledge which principle's invitations give him, and which enables him to back horses for himself advantageously, may also place bets for members of general public.

professional bookie; makes a business of betting on races; usually obtains names of horses likely to win from owners and trainers (888) (q.v.); studies form of horses; summarizes losses bet on behalf of owners and trainers, see commission agent.

skive (Epsom); along term, see book.

tip-tat, tip-tacker; takes up position from which transactions in various rings at a race course can be observed and signals to bookmaker employing him, by waving his arms, variations in odds accepted against horses.

tipster; turf adviser; sells to customers on course or through newspaper shops, letters, telegrams, etc., or other agencies, names of horses it is anticipated will win in specified races.

tonk, bookmaker's tonk; *skive* (Epsom); (1) see bookmaker's runner; (2) employed by bookmaker (q.v.) to visit training quarters surreptitiously and attempt to obtain information about chances of trainer's horses.

turf adviser, see tipster.

turf accountant; (England and Wales) a bookmaker (q.v.) who accepts bets from recognized clients on credit system, in which money does not change hands until after race; settles accounts periodically as soon as he has a bookmaker (q.v.) who agreed, (Scotland) a bookmaker (q.v.) who accepts bets and money from clients prior to race; settles account either daily or weekly.

turf correspondent; furnishes racing news and reports to newspapers and sporting journals; selects probable winning horses for publication in sporting columns of newspaper.

899.—OTHER OCCUPATIONS.

acrobat, trambler; entertains audience at music hall, circus, etc., by performing acrobatic feats; a trapeze artist (q.v.) who performs hazardous feats on trapeze, involving the projection of the body through the air at some distance from ground, natural trambler; trains animals to perform tricks and exhibit them before public; greases and feeds animals; keeps cages, kennels, etc., clean.

acrobater; teaches pupils how to use law and acrob.

acrobatic groundman (cricket); helps groundman (q.v.) in mowing and rolling turf, marking out pitch, preparing wicket, watering ground, etc.

athletic artist; entertains at music hall, circus, etc., by display of physical strength and skill in some form of athletics; keeps in training by physical exercises and practice in his particular sport.

baggage-man; (1) is usually employed only at particular theatres or music halls, etc., where different companies appear each week; meets members of company at railway station; arranges transport of properties and scenery to theatre or music hall; delivers personal luggage at lodgings, end at end of week, arranges transport of luggage, scenery and property back to railway station; is occasionally also employed as theatre or music hall attendant (889) (q.v.); (2) is touring or theatrical cover, is responsible for the safe-keeping and insurance of all professional properties, scenery, etc.

ball boy (music courts); attends upon players, retrieving balls and returning them to play; whitens balls and assists groundman (q.v.) to mark out court, erects nets, etc.

billiard marker; keeps account of scores made by players and announces them on scoring board in public billiard hall; allocates tables to players and provides them with balls, cues, chalk and sometimes with refreshment; coaches learners, plays with patrons, and collects fees for use of table.

bowler; a professional cricketer (q.v.) employed by cricket club to bowl at matches; gives batting practice to members; also plays in matches when required.

boxer, professional boxer; pugilist; earns living by boxing in public contests or competitions for prize money; keeps fit and in training by physical exercises, shadow boxing, punching bag, sparring with assistants, etc.; also often acts as instructor.

coddler, coddly, golf coddler; carries clubs for golfer who hires him for the round; assists golfer (q.v.) to mark down ball as it falls or to retrieve ball that is lost, off green close club.

coddle master; takes charge of coddies (q.v.) and, as hiring master, arranges sets; is sometimes in charge of workshop where clubs are repaired and generally works under club professional golfer (q.v.) as assistant professional.

cartoonist; executes "lightning" sketches, usually with charcoal pencil on large sheet of paper, at music hall or other entertainment, or before cinematograph camera.

chairvoyant, see fortune teller.

clown; provides humorous interludes during and between performances at a circus; is usually an acrobat or trambler (q.v.); takes clown's part in harlequinade or pantomime.

coach; teaches members of a sports club, school, etc., the rudiments of games, e.g., cricket, football, golf, and by helpful criticisms assists them to acquire proficiency; may also teach individuals for a fee; is usually a professional player, sometimes retired; sometimes specifically designated, e.g., cricket coach, football coach, rowing coach, etc.

conjuror, prestidigitator, professor of legerdemain; performs sleight of hand and conjuring tricks at music hall, or other entertainment; is very often also a juggler and an illusionist (q.v.); sometimes also a ventriloquist (895) (q.v.).

contortionist; performs feats requiring abnormal bodily contortions, at music hall, circus, etc.

counting skipper; holds dogs in patent leash called a "skip" at dog coursing contests and slogs. *s.* release, leash, by pulling a cord, when signal to start is given; *s.* sometimes a dog trainer or a kennelman (q.v.).

dancing partner (professionally); an expert dancer engaged by proprietor or manager of dancing hall or by individual dancer, to act as partner when required and to teach ball-room dancing for a fee.

dog breaker, dog trainer; trains young dogs to run in coursing races, to perform tricks, to track, chase, etc.; may also break young sporting dogs to gun, teaching them to "point" and retrieve, sometimes specifically designated, e.g. greyhound trainer.

dogman, see kennelman.

equestrian, equestrian artist; performs spectacular feats of horsemanship in circus, tournament, etc.; in private, performs new feats, trains horses; may also groom and care for horses.

equilibrium; performs balancing feats, walking on tight rope, etc., at music hall, circus, etc.; in private, performs new feats, performs exercises to maintain physical fitness.

futurist teller; clairvoyant, *see*; professes to foretell the future by means of cards, a crystal, sand, etc.

golf course man; under the direction of green keeper (q.v.), rolls greens daily for removal of worn casts, mows and sweeps them; mows fairway periodically; cuts rough from time to time; relays young greens when necessary; keeps sand and lime filled; rakes bunkers, etc.

golfer, professional golfer; plays golf in matches for prize; often combines this occupation with expertness of golf course and gives lessons to members of club for fee; usually makes clubs for sale to members or others.

groundsman, ground attendant; keeper of cricket or football field at sports ground in playing condition; supervises mowing and rolling of ground; supervises work of assistant groundsman (q.v.) and laborers, in attending to tracks, fencing, terraces and stands, marking of playing fields with white lines, whitewashing of goal posts, etc., repairing broken nets, clearing up litter from ground, etc.; often specifically designated, e.g. football groundsman, cricket groundsman, etc.

gymnasium instructor, gymnastic instructor; trains youth or class in performance of physical exercise and gymnastics with or without apparatus; visits schools.

gymnast; performs at music hall or other entertainment, a variety of gymnastic feats on horizontal bar, parallel bars, vaulting horse, etc.

canteen manager (wv); buys supplies for and is in charge of canteen supplying alcoholic liquors as well as food and non-alcoholic drinks.

hotel controller; checks waiters' service bills and money taken; sees that all contracts for supply of food, etc., are fully carried out; checks expenditure and keeps it within proper limits; keeps accounts, usually with assistance of bookkeepers and clerks (893), whom he supervises.

hotel foreman; is in charge of male cleaning maintenance and portage staff; often acts for hotel keeper in engagement, discharge and removal of staff; duties are usually superintending but in small hotels is frequently also a general utility man.

hotel inspector; visits hotels run by syndicates or brewers, etc., and checks stocks and receipts; tests spirits and wine for specific gravity; reports on general arrangements, management and similar matters.

hotel manager; manages and conducts the business of hotel; engages and supervises staff; orders supplies of food and other necessities; deals with complaints; responsible for accounts, expenditures and general good conduct of hotel.

hotel proprietor; owns and controls one or more hotels; frequently also acts as manager (q.v.) of one of them.

inn keeper, landlady (inn), landlord (inn); (*see inn keeper*); owner or manager for owner or syndicate, an inn (a small country hotel).

licensed victualler; provides victuals or refreshments and also sells alcoholic liquor for consumption on the premises of hotel, inn or public house.

off-licence shop assistant; serves customers with liquor in a beer, wine and spirit shop for consumption off the premises.

provider (gun store, dockyard); a cantinier manager (q.v.) in a gun store or dockyard.

publican; manager or owner of public house licensed to sell beer and often wines and spirits also, either on or off the premises.

railway refreshment room manager; serves supplies of food and drink for and generally superintends railway refreshment room.

tavern keeper, *see inn keeper*.

temperance hotel keeper; manages an unlicensed establishment, available for the reception of guests, and frequently including a restaurant or café, open to the public; duties *see for* hotel manager (q.v.).

915.—BARMEN.

barman, barmaid, bar assistant, bar attendant, bar tender; attends to and serves customers with beer, spirits, food, etc., at the bar of hotel, inn, etc.; in small establishments may be required to undertake certain domestic duties, e.g., cleaning bar, counters, washing glasses, dusting; sometimes specifically designated, e.g., *outdoor barman*.

beer carrier; a pot boy (q.v.) who delivers sets of bottles of beer from public-house to customers for consumption off the premises.

licensed victualler's assistant, *see for* barman.

potman, pot boy; collects up empty glasses, etc., in hotel, public house, etc.; cleans cellar and performs any odd job such as cleaning the bar, brass-work, washing glasses, etc.

tapster; draws liquors from cask, by inserting tap through bung; originally a synonym of barman; work mostly done by cellarman (455) (q.v.).

916.—WAITERS.

waiter (refreshment room); usually a punctuated waiter or waitress, who arranges tables, in dining or refreshment room, shows customers to seats, reserves tables when required, and generally overlooks work of waiters or waitresses at a certain number of tables.

waiter, waitress (buffet, canteen, hotel, smoke-room, etc.); sets tables and serves customers or guests with food from service room, stillroom, bar or kitchen.

waiter (casual, jobbing, occasional, private); a waiter (q.v.) who hires out his services for special functions.

waiter, commit; youth learning business of waiter, makes waiter by fetching dishes from service room or kitchen; performs minor waiting duties; often cleans tables.

waiter, day; sets and waits at tables during day meals.

waiter (domestic); a waiter (q.v.) who sometimes performs duties of footman (360) (q.v.).

waiter, wine; supplies guests or customers with wine, spirits or meals, usually obtaining supply from wine butler (360) (q.v.), but sometimes buying it off the premises.

917.—HALL AND HOTEL PORTERS; DOORKEEPERS AND CARRIAGE ATTENDANTS.

door attendant; hall man, hotel attendant, lobby boy or man, hall porter; guards public entrance to prevent entry of unauthorised persons; opens and closes door, receives visitors or callers; (in hotels, etc.) sees to luggage, carries it to bedrooms or directs other porter or boy to do so; replies to telephone calls, posts letters left for post collection; duties vary according to size of establishment.

doorboy, *see for* porter (360).

doorkeeper; is employed at entrance to office, hotel, etc., directs visitors to offices, etc., required, and to keep post unauthorised persons.

doorman (doorman); stands at entrance to cinema, preserves order in entrance hall, directs cinema; cleans brasswork, etc., and does other odd jobs when cinema is closed to public.

hall boy, *see for* porter (360).

hallman, lobby boy or man, *see door attendant*.

night watchman (hydro), *see porter, night*.

porter, cloak, *see for* door attendant.

porter, college; is in charge of gate at a college, answers enquiries; at resident college, looks after at first hour; takes names of students entering late.

porter, day, *see porter, hotel*.

porter at flats, *see porter, resident*.

porter, hall, *see door attendant*.

porter, hotel; is in charge of porter staff in hotel, hotel, club or private establishment; supervises and allocates work; responsible for discipline.

porter, head (hospital); supervises work of hospital porters (928) (q.v.) and is responsible for the work and conduct; reports cases of misconduct or unsatisfactory work on part of porters to office; keeps record of cases coming into hospital, and sometimes assists in clerical work of office; on occasional occasions, he is present at the work of the ward of infection of hospital; is usually employed on duties similar to those of hospital porters, e.g., answering inquiries and directing visitors or patients to wards or departments, answering telephones, and delivering messages by telephone, calling doctors, passing and putting letters, carrying patients to wards or to the operating theatre.

porter, hotel; day porter; acts as general porter, and carries guests' luggage in and out, up to rooms, etc.; in small hotels, may also perform odd domestic duties, e.g., carrying coals, cleaning brass-work, cf., luggage porter (729).

porter (lodging); opens door, attends to messages, and guards main entrance to lodging house to prevent entry of unauthorised persons; may also clean premises, except bedrooms.

porter, night; night watchman (*hydre*); attends to hotel visitors during night, acts as watchman, receives late arrivals, and arranges for their accommodation; in large establishments supervises cleaning (main hall, staircase, public rooms) done during night.

porter, resident; *porter at hotel*; a resident official in charge of residential dwellings, on behalf of proprietor; keeps keys of vacant flats, answers enquiries; is responsible for care and cleanliness of property; sees to central heating, etc. **porter, school**; a responsible man, employed at school, entrusted with miscellaneous duties which vary as between schools, such as keeping the gate, ringing the bell at certain hours, making appointments, leaving stationery, putting lights out and locking up buildings at night.

porter, station; mania trains and conveys luggage of visitors to and from hotel, or outside porter (*TSR*).

porter, stores; supplies and conveys from stock stores to the various departments of a large hotel. **postman, private**; carries letters and parcels between post office and hotel, sees to despatch of letters in hotel boxes and attends to general postal requirements of hotel visitors.

918.—LAUNDRY WORKERS; WASHERS, IRONERS MANGLES

blocker; a shirt or collar machinist (*q.v.*) who carries out one stage of the ironing of starched collars or starched parts of a shirt on an ironing machine.

bluer; receives clothes from rinse and places them in bluing water to whiten. *i.e.* correct yellowing; makes fresh bluing water from time to time by dissolving blue in water.

body ironer; lays articles of body linen, e.g. shirt bodies, in position on a body linen ironing machine; sets machine in motion and changes position of garment to expose unstarched parts to action of machine; stops machine and removes garment, when smooth and dry.

house ironer; a shirt machinist (*q.v.*) who irons fronts of stiff-fronted shirts on a special ironing machine.

collender hand, **collender minder**, **collender**; several terms for women or girls employed in ironing flat articles, e.g. sheets, towels, tablecloths, in a laundry, by passing them through a collender; works either in front of or behind machine; includes shaker out, feeder, taker off, and folder (*q.v.*).

collender, see taker-off.

chooker, see marker.

clear starcher; a starcher (*q.v.*) who starches curtains, dresses, etc., with boiled starch.

collar curler, see shaper.

collar dresser, see collar machinist.

collar ironer (hand); irons, polishes and curls collars by hand using special iron.

collar machinist; **collar dresser**; general term for any person ironing starched collars by machine in a laundry, including collar curler (or shaper), blocker or polisher (*q.v.*).

copper woman; stands at copper in small laundry, putting in "whites" (i.e. for boiling and taking them out later, when sufficiently cleaned).

coupler, see packer and sorter.

cut ironer; a shirt machinist (*q.v.*) who irons starched cuffs on an ironing machine, curtain stretcher, etc. **framer.**

cylinderer; lays out the silk, etc., on steam-heated copper cylinder to dry and be finished.

decoumum hand; a collender hand (*q.v.*) who attends a special mark of collender, called a decoumum.

dollyman, see washing machine attendant.

domestic laundry worker; **laundrywoman (domestic)**; does any work in a small domestic laundry or private house such as washing, ironing, sorting, etc.

dryer; takes work from hydros, hangs on frames and passes it through drying room, **examiner**; examines articles after washing, drying or dressing for best work and for any defects or stains caused by process.

feeder; a collender hand (*q.v.*) who receives "flat" work (towels, blankets, etc.) to be ironed from shaker-out (*q.v.*) and places article as flat as possible between moving rollers; keeps it flat and straight, guiding it with hands.

finery machinist; general term for any person ironing delicate articles by machine in a laundry.

folder; a collender hand (*q.v.*) who folds by hand work after it has been taken off the collender, or ironing machine, by taker-off (*q.v.*); stacks folded articles on adjacent tables or places on racks; sometimes works with another folder for large articles.

framer, curtain framer; **curtain stretcher**; stretches blinds and curtains on frames and runs frames on to heated presses to dry curtains; usually done by collender hand (*q.v.*).

glosser, see polisher.

go-ferrer, go-ferrer; holds and manoeuvres folds of body linen, curtains, etc., between smoothing jaws of power puffing machine; steps and starts machine by foot lever.

hand ironer; smooths articles of wearing apparel, bed or table linen by hand by rubbing on table with stove heated, electric or gas iron.

hand washer; washes by hand silk, coloured articles, fansels, etc., that cannot safely be washed in machine.

hang-up; hangs up clothes on drying racks or on lines out of doors; *cf.* dryer.

house laundrymaid; combines duties of housemaid (*q.v.*) and laundrymaid (*q.v.*).

hydro attendant, hydro hand, hydro man; places wet linen in centrifugal hydro extractor, which drives water out of articles; empties and generally attends to machine.

ironer (flat iron); carries flat irons to and fro between ironers and heating stove.

ironer; may be either hand ironer or collar or shirt machinist (*q.v.*).

launderer; general term, applying to all units within a laundry.

launderess; **laundrymaid**; general term applying to all women workers in a laundry or on laundry work in private house or institution.

launder hand (bath); washes by hand towels and costumes which have been used by bathers; in large establishments may use washing machine and collender.

launder keeper; owns and in many cases manages a laundry.

laundermaid, see laundress.

laundermaid (domestic); washes, starches, dries and does clothing and household linen in private house.

launderman; washwoman, washer; receives soiled linen from sorters and puts it in washing machine; first "breaks down" linen in warm or cold water, then boils up clothes in fresh water, rinses with fresh warm water and "blues" (*see bluer*).

launderman (domestic), *see domestic laundry worker.*

launder worker; general term for any worker in a laundry.

machinist, see collar machinist and shirt machinist.

manager, managereuse; controls and organizes the staff of the laundry; sometimes makes up the starch solution.

marker keeper; a manager (*q.v.*) who does mangle for persons doing their own washing.

mangler; puts dampened linen, etc., through hand or power driven mangle to smooth out creases; folds linen by hand both before and after mangle.

marker, checker, taker; examines articles received to find customer's private marking or defects (i.e. holes or tears) in materials; "marks" or "tags" article and enters it in ledger before sending to sorting section; marks defects by stitching round the hole in red thread and notes them in a book.

neck bender; a shirt machinist (*q.v.*) who irons starched neckbands of shirts on specially constructed ironing machine.

packer and sorter; **coupler, packer, sorter**; examines, checks on lists, packs and sorts cloth as received from customers; sorts the clean linen, checks articles by customers' lists and packs in parcels or hamper.

polisher, collar polisher; **glosser**; a collar machinist (*q.v.*) who receives ironed and starched collars from the blocker (*q.v.*) and irons them again on special glossing machine.

preparer; damps down; *i.e.* sprinkles water upon dried work and folds it for pressing.

receiver, see receiving office assistant (TSR); may also do work of packer and sorter (*q.v.*).

rinsor; receives clothes from washing machine attendant, rinses them in fresh warm water, either by hand or in rinsing machine, and passes them to bluer.

shaker-out; a collender hand (*q.v.*) who shakes out creases from wet "flat" work (*q.v.*) at collender (*q.v.*) in readiness for feeder (*q.v.*) at collender machine.

shaper; **collar shaper**; a collar machinist (*q.v.*) who receives collars after they have been blocked and polished, and passes them through a special machine which shapes or curls them.

shirt and collar dresser, shirt and collar machinist; a laundry machinist who combines the work of both shirt machinist and collar machinist (*q.v.*).

shirt blocker; irons by hand back skirts, etc., of starched, the starched parts of which have been dealt with on a machine.

shirt dresser, see shirt machinist.

shirt ironer; irons shirts throughout, both starched and unstarched, usually by hand.

shirt machinist; **shirt dresser**; general term covering any worker engaged in ironing the starched parts of shirts on ironing machines, and includes house ironer, shirt ironer, neck bender, and blocker (*q.v.*).

sorter, see packer and sorter.

starcher; soaks clothes, etc., in starch solution in tub at machine; then passes through wringer covered wringer to remove excess of starch.

steam presser operator; places articles flat on steam-heated bed of machine; pulls down weighted lid by means of lever and presses article.

starcher, see marker.

taker-off, collender; a collender hand (*q.v.*) who takes clothes, linen, etc., from back of collender (ironing) machine and passes to folder (*q.v.*).

washer; may be either a hand washer (*q.v.*) or washing machine attendant (*q.v.*).

washwoman; wash private families for the washing of clothes, household linen, etc., or takes in washing at her own house.

wash-house foreman; superintends work of other wash-house men in laundry, wash-house man, wash man, *see laundryman.*

washing machine attendant; **dollyman**; places work in rotary washing machine, adds water, soap, soda, etc., as may be necessary; starts and stops machine by switches or levers; regulates the time of the process; removes articles when finished.

wet cleaner; washes by hand in a careful and scientific way, using a small brush and various special soap solutions.

wringer attendant; operates hand or power driven wringer to extract surplus water or starch from clothes, linen, etc.; decides time between rollers from board; starts and stops machine by means of levers.

919.—MANAGERS, ATTENDANTS OF BATHS AND WASH-HOUSES.

attendant, bath (hydre); a private bath attendant (*q.v.*) who also gives treatment, undertakes pouring, and sometimes serves the patient meals.

bath attendant, public baths attendant; attends swimming bath attendant; allows swimming bath, is responsible for their general cleanliness, and supplies towels and costumes if required.

bathing attendant, bathing machine attendant, bathing places attendant; allocates bathing machines, boxes or tents; is responsible for their general cleanliness, and provides towels and costumes if required.

bath keeper, see superintendent (baths).

bath man; prepares baths and sometimes manages the body for remedial or hygienic purposes.

bathroom attendant; cleans out baths, in hydre and hotels; removes soiled towels; waits on bathers, if required.

cooling room attendant; *turkish bath attendant*; waits on bathers in cooling rooms of *turkish bathing establishment*; assists them in undressing and dressing; takes charge of clothes; prepares and serves light refreshments; cleans premises and assists in maintaining fire.

manager (spa baths); manages baths where water from mineral springs is used; supervises staff; orders food and other commodities required; controls expenditures; deals with any complaints.

matron (baths); superintends domestic and cleaning arrangements of public baths, especially when used by women.

money taker, office attendant; receives money at ticket office and issues a pass or ticket for personal admission; also issues towels and cosmetics.

owner or proprietor (bathing machine); owns and lets bathing machines at fixed rates; often also does work of bathing machine attendant (q.v.).

private bath attendant; cleans out bath after each bath, and removes soiled towels, &c.

resident working attendant; dusts and cleans premises of bath or washhouse; also attends on bathers.

champooer (turkish bath); rubs, soaps and douches bathers after they have perspired sufficiently; usually has two assistants, and rubs medicated stimulants as directed or prescribed; usually stokes fire from time to time.

superintendent (baths); *back keeper*; in charge of public baths; supervises staff, makes frequent inspections of bath cubicles, heating furnaces to ensure that plant is in order and that work is being done efficiently; deals with correspondence and complaints; keeps accounts; usually a practical engineer acting as an advisory capacity as such; reports to Baths Committee.

superintendent (public wash-house); responsible for conduct of public wash-houses, usually in conjunction with public baths; duties as for superintendent (baths) (q.v.); sometimes a qualified laundry engineer (314).

turkish bath attendant, *see* cooling room attendant.

wash house man, wash house woman; allocates stalls, issues tickets and generally assists superintendent of public wash house in running of laundry machinery.

920.—HAIR DRESSERS, MANICURISTS, CHIROPODIST.

artist in hair, *see* hairdresser.

barber; a hairdresser's assistant (q.v.) in a man's hairdressing establishment.

barber's boy, *see* lacky boy.

beauty specialist, beauty doctor; *cosmetologist specialist*; manages face, neck and arms, prescribes face creams, washes, powders, and colorings; manicures hands and feet; removes superfluous hair by electrolysis and other means; removes warts, moles, birth marks, warts, by means of electric and other treatments.

chiropodist; *corn cutter*; cuts, trims or corrects toe nails, corns and callous growths of the feet; treats and corrects malformations of the toes and general defects of the feet.

coiffure, *see* hairdresser.

complexion specialist, *see* beauty specialist.

corn cutter, *see* chiropodist.

dye, *see* tint.

general hand, *see* hairdresser's assistant.

gent's hand, *see* hairdresser's assistant.

hairdresser; *artist in hair*, *coiffure*; working proprietor of hairdressing salon; for operations *see* hairdresser's assistant.

hairdresser's assistant; *gent's* or *ladies' hand*, *general hand*; cuts, champoos, singles, waves, arranges, dyes, and bleaches human hair; shaves beard; manages sale; sometimes gives electrical treatment to promote growth of hair and health of scalp; sometimes also does hairdressing work (423).

ladies' hand, *see* hairdresser's assistant.

lather boy; *barber's boy*; assists hairdresser or barber, lathering face before shaving, removing soap, sponging and powdering after shaving, also assists in cleaning apparatus and sweeping floor.

manicurist; cuts, trims, files, cleans, and polishes finger nails, removing cuticle and underlying general care of the nails; removes warts, etc.

champooer; an assistant in large hairdressing establishment who specialises in shampooing, i.e. washing the hair with soap and hot water or spirit.

tint; *dye*; washes and applies tint or colour to human hair on the head or in the manufacture of wigs.

trichologist; a hairdresser (q.v.) who is qualified to advise as to treatment of hair, both from medical and hairdressing considerations.

WATER; waves hair on human head by various means, e.g. (i) water waving, i.e. wetting hair and pressing it into shape by hand or by using a waving iron; (ii) manual waving, by using hair irons or wavers; (iii) permanent waving, by rolling strands of hair over an inserting the rolls into tubes, heating the tubes electrically and thus maintaining the wavy form induced by rolling.

921.—CARETAKERS AND OFFICE KEEPERS.

armoury keeper; (i) in charge of arms, armour, etc. in armoury of a large private establishment or such as large army, etc., cleaned and oiled; (ii) may also be in charge of rifles, etc., in drill hall, rifle club or gymnasium.

barback warden; has charge of all stores belonging to barrack buildings as apart from those held on indent by the units occupying the barracks; is responsible for the care of barracks when empty.

caretaker; (i) (assembly rooms, drill hall, lecture hall, museum, office, public rooms, shrine hall, etc., school, college, etc.); *custodian*, *janitor*, responsible for building and contents; keeps clean or supervises cleaning staff; tends fire or heating apparatus in winter; acts as deputy secretary for meetings, etc.; generally lives on premises; (ii) (club, institute, dance hall, etc.); as above, but may also cater for refreshments on occasion; (iii) (domestic); *house warden*; takes charge of and keeps clean a private house, bungalow, houseboat, etc., in absence of occupier; usually lives on premises; (iv) (church, chapel, mission hall, etc.); is responsible for care and cleanliness of church, etc., directs women cleaners; acts as vergor (Church of England); (v) (dwelling, flat, house, alone, etc.); *steward*; in resident charge of blocks of dwellings, flats, etc.; keeps keys of vacant flats; is responsible for cleanliness of hall, staircases, etc.; keeps boiler stoked, where there is central heating; (vi) (junior); *housekeeper*, *office keeper*; in resident charge of block of offices; keeps keys of vacant offices; directs staff of cleaners; usually engaged and pays them; keeps boiler stoked, where there is central heating; sometimes provides hot lunches and teas for office staff; (vii) (shooting box); in resident charge of shooting box; during season usually acts as servant to owner.

curator, *see* caretaker, usually of public buildings.

custodian (castle), *see* warden.

garage warden; a caretaker (q.v.) of omnibus company's garage.

housekeeper, *see* caretaker, if in resident charge of a block of offices or other similar buildings; *cf.* housekeeper (369).

houseminder, *see* caretaker (domestic).

janitor, *see* caretaker; may also act as doorkeeper (317) (q.v.).

keeper; (i) *see* caretaker; (ii) *see* warden.

lobby keeper; a caretaker (q.v.) in charge of lobby of large block of residential flats or mansions.

mansions superintendent; in charge of porterage and lift staff in large block of residential flats; engages and discharges staff; keeps keys of vacant apartments, etc.; patrols building to ensure that porters are doing work satisfactorily; deals with complaints as to cleanliness of stairs, corridors, working of lifts or any matters relating to duties of porters.

mortuary keeper; responsible for care and cleanliness of a mortuary; usually present at post-mortem examinations; may wash and prepare body for burial.

news room keeper; a caretaker (q.v.) of a news room not forming part of premises of public library; cleans premises, tends fire and heating apparatus, arranges journals for readers of standards and tables; preserves order in reading room.

office keeper, *see* caretaker (office).

steward, *see* caretaker (flat).

warden, warden; *custodian*, *keeper*; is a resident or caretaker (q.v.) in charge of old castle or other place of interest; acts as guide to visitors.

922.—CHARWOMEN, OFFICE CLEANERS.

charwoman, char, char lady, cleaner; *janney woman*; a daily non-resident domestic worker who renders casual assistance in a household, office or elsewhere (scrubbing, cleaning, etc.).

cleaner (bank, hall, library, museum, office, school, etc.); sweeps, cleans and dusts premises of bank, office, etc.; polishes brass work, etc.; makes fire if necessary; usually part-time worker, working night and morning.

cleaner, brass (office); cleans and polishes brass or copper fittings in offices.

cleaner, wall office cabinet (G.P.O.); cleans, with wet brush, windows, walls and floor of telephone call boxes.

cleaner, church; assists church caretaker (321) (q.v.) in cleaning of church by scrubbing floors, darning, etc.

cleaner, house; a charwoman (q.v.) who scrubs or cleans the interior of houses, usually on charge of tenancy.

cleaner, ship's; a charwoman (q.v.) who does rough cleaning work in cabins and saloons of passenger vessels in dock.

cleaner, step; scrubs, washes and cleans steps; may also clean windows.

janney woman, *see* charwoman.

scrubber; does rough hard cleaning of premises, scrubbing off dirt, grease, etc., from doors and steps; *cf.* charwoman.

923.—CARPET BEATERS, VACUUM CLEANERS, WINDOW CLEANERS.

beater; (i) removes dust from carpets, hangings, etc., by beating by hand with a stick; (ii) feeds carpet into beating or cleaning machine.

cleaner, carpet; cleans carpets by removing stains, marks, grease, etc., when necessary, using sponge, soap and water or cloth saturated with spirit, applied by hand.

cleaner, vacuum; holds nozzle of vacuum cleaning apparatus in hand and runs it over carpet, curtain, upholstery, etc., causing the removal of dust by suction.

cleaner, window; rubs window pane with damp chamois leather or with cloth wrung out of dilute methylated spirit or chalk mixture; polishes with soft dry cloth.

finder, carpet; finds carpets after they have been cleaned or beaten, and ties them ready for dispatch.

opener, carpet; unfolds carpets received at depot for beating and cleaning purposes; adds identification marks and notes general condition.

orter, carpet; sorts carpets as to cleaning process; after cleaning reverse and packs for dispatch.

924.—CHIMNEY SWEEPS.

sweep, chimney sweep; *chimney cleaner*, *the cleaner*; sweeps chimney with a circular brush which is pushed to the top of the chimney by means of a series of wooden rods screwed or jointed together; in Scotland pushes brush down from top of chimney; takes away fallen soot in bags.

925.—UNDERTAKERS.

bearer, assists in carrying body to grave, carrying coffin from premises to hearse and from hearse to grave.

blackman, *see* undertaker; (Lancashire term).

embalmer, injects disinfecting chemicals into the blood vessels to preserve a dead body; generally prepares for transport or burial.

funeral director, funeral furnisher, *see* undertaker.

superintendent, *see* funeral director, (Scottish term).

undertaker, *blackman* (Lancashire), *funeral director, funeral furnisher, superintendent* (Scottish); superintends arrangements and is responsible for conduct of a funeral; estimates cost, measures body for coffin; sometimes prepares the body for burial.

undertaker's shop assistant, attends to callers in undertaker's shop; sells artificial flower wreaths, etc.; assists in polishing coffins; goes with undertaker's van to assist in carrying coffin into house; may also carry out duties of *bearer* (S.V.); *watcher*; watches by coffin during night preceding funeral; required by Jewish ritual.

926.—OTHERS IN PERSONAL SERVICE.

ambulance corps worker, is an ambulance man (S.V.) who belongs to a recognized First Aid Corps, *cf.* S. St. John.

ambulance man, renders first aid to the injured pending medical attention, applies restoratives and artificial respiration when necessary; binds up wounds and fractures.

assistant (railway ordering), *see* attendant, buffet.

assistant manageress (railway catering), a counter hand (S.V.) who is second in charge of railway refreshment room. In absence of manageress (S.V.), acts in her place, superintending staff, keeping stores and ordering supplies.

attendant, aronde, *see* aronde *beadle*, *aronde* policeman, *aronde* porter, opens gates in morning; police *aronde* during day to see that regulations are not infringed; prevents admission of undesirable persons; answers enquiries and directs strangers; looks gates in evening.

attendant, art school, waits upon teachers, pupils, etc., at a school of art, taking messages, carrying articles.

attendant, bath, in charge of a bath or hut, where quarrymen sleep, or where unemancipated male farm or estate servants are housed; does simple domestic work; prepares meals.

attendant (buffet, café, saloon, etc.), assistant (railway ordering), attends to and serves customers with refreshments; *cf.* waiter (918).

attendant (cab, cab rank or cabman's shelter), answers calls for cabs, taxis, etc., at cab stand; where shelter exists on rank, supplies cooked food to drivers; keeps cab shelters clean.

attendant, chair, *see* attendant, *mat* letter; sets out chairs, etc., in parks, on beaches, etc., and collects the charge made for temporary use.

attendant, cloak room (hotels, dance halls, etc.), receives and is responsible for personal effects, hats, wraps, umbrellas, etc., left by patrons in cloak room; issues tickets and collects fees.

attendant, coffee hall, serves customers and renders general assistance at a coffee-stall, *cf.* waiting up.

attendant, dining car, *conductor dining car, conductor* (railway), sets and waits at tables in dining cars on railways.

attendant, dining hall, dining room, *cf.* dining hall maid; sets and clears tables, and waits in dining hall; also assists in keeping hall clean.

attendant, dispensary (dentist's or doctor's surgery), a waiting room attendant (S.V.) employed in a dispensary; examines prescriptions prepared weekly by patients to ensure that they come within dispensary regulations; delivers medicine from dispenser; keeps surgery and apparatus clean.

attendant, dormitory, sweeps, cleans, and keeps tidy the dormitories of a college, school or other institution; makes beds; sometimes prepares weekly laundry lists.

attendant, female (P.O. Medical Department), gives general assistance to Medical

Officer of P.O. Medical Department, renders first aid, treats minor cases, etc.

attendant, invalid's, attends generally to the personal wants of an invalid, serving food, washing bath chair, etc.

attendant, ladies' waiting room, *see* lavatory attendant.

attendant (lavatory, lavrine), ladies' waiting room attendant; is responsible for care and cleanliness of lavatories, etc., supplies clean towels; in public lavatories, collects fees, when payable.

attendant, mess room; (1) (workpeople's messroom) prepares and cooks meals; warms up diner's own food; waits on diners; cleans canteen or messroom; washes up; (2) (army messroom) *see* waiter (918).

attendant, mid-day (special school), looks after mentally or physically defective children during mid-day interval in a school.

attendant, mineral spring, serves and waits on customers in pump rooms at spas.

attendant, school playground, looks after children in a school playground; maintains discipline; sometimes conducts drill and organizes games.

attendant, seat, *see* attendant, chair.

attendant, waiting room, attends to needs of persons in a waiting room; makes appointments; answers telephone; makes persons in and out of waiting room; sometimes also does simple clerical work.

attendant, workhouse (female inmates), assists in dressing, washing and keeping inmate's ward of a workhouse; serves meals; acts up food if necessary and acts generally as personal attendant in any way required.

bar assistant or attendant (temperance hall), serves at the bar of a temperance hall; duties as for barman (911).

basket man, or boy (railway); serves luncheon and tea baskets to railway passengers; also collects and backs in heads (hospital, etc.); discharges term in boys' hospitals; duties now performed by local porter (917) (S.V.).

bedder, *see* bed maker (university college).

bed maker; (1) (lodging house) makes beds, cleans and tidies bedrooms or children's beds; (2) (university college) *see* bedder; (3) makes beds and does all lighter (cleaning) duties in all rooms on a staircase serviced by agent (Oxford) or gyp (Cambridge) (S.V.); makes beds and puts in order the bedrooms of residents (hotels or students).

boot black, *see* black; cleans and polishes boots, etc. at a small stand near a station or in a busy thoroughfare.

brewer (coffee tavern), brews or prepares coffee for drinking at stall or tavern; *cf.* brigade boy; a member of brigade of boys organized to supply casual domestic service; lives in hostel.

carer, *see* shelter inspector; visits and inspects almshouse shelters, maintained or owned by special society; reports regularly to management committee on each shelter, as to state of repair, cost of maintenance, staff, food supply, etc.

calendar (job drying and dry cleaning), dries and iron-curest, blinks, etc., in one operation by passing through calendaring machine; *cf.* calendar hand (915).

collier, collier-up, *see* knocker-up.

carver, serves most into portions for serving in restaurants; in lodging and boarding houses is generally also responsible for supervision of preparation of customer's assistant; assists a caterer (911) (S.V.) in one branch or another of his business; usually *see* waiter (918) (S.V.).

chair ticket inspector, inspects tickets issued as receipt for money paid for the temporary use of chairs in park, on beach, etc.

chip potato cleaner, washes potatoes by means of scrubbing brush or broom in water in a pall or bucket; peels by hand with a knife; usually also cleans into chips with a knife by hand or by machine powered by a lever; may also clean fries, tables, etc. of fat saloon or kitchen.

cleanser, *see* guide.

clothes cleaner, garment cleaner; general terms for workers engaged in dry or wet cleaning clothes; *see* dry cleaner (929), wet cleaner (915).

clothes presser, garment presser; irons and presses coats and other heavy goods after cleaning or drying, by means of hot iron and damp cloth or by use of steam press *cf.* Hoffman press.

chrome glosser (S.V.) and *chrome's*; cleans chrome carcases, covers, etc., by dipping in a special glazing solution, and then ironing by hand or machine.

conductor (Pullman car), in charge of Pullman Co.'s saloon railway car, collects fares for use of the car, superintends the serving of light refreshments and receives payment therefor.

conductor (railway dining car), dining car conductor, *see* attendant, dining car.

cookery centre assistant, cleans premises of a school of cookery; washes dishes and utensils used in demonstrations and for diners served to students; prepares vegetables; serves and sometimes cooks dinners provided from canteen for school children.

cook inspector, inspects the work of cooks in large restaurants or kitchens of caterers; examines finished dishes before they are sent out; reports to management.

cook's boy, performs various minor duties in kitchen of hotel, restaurant or large private establishment, such as clearing fish, plucking and drawing poultry, preparing and cutting up vegetables for soup, boiling and measuring ingredients; differs from cook's apprentice (900) (S.V.) in that there is no undertaking to give instruction in cooking.

counter hand, sells light refreshments, and washes, alcoholic drinks, the coffee, etc. to customers at counter of bar or buffet; may be required to clean counters and assist with washing up; may also perform duties of still room hand (900) (S.V.).

courier (tourist agent), travels with tourists at home or abroad; shows way and answers inquiries; sees to clearing of baggage, secures hotel accommodation, acts as guide and interpreter, suggests likely places of interest, and generally sees to the comfort of tourists.

curbide nurse, *see* attendant; recruits children at orphanage; cleans and dresses them; serves food, feeds by hand if necessary; keeps premises clean; treats children if necessary for minor ailments.

day boy, odd boy; a non-resident domestic servant, doing odd household jobs, running errands, etc.

dining hall maid, *see* attendant, dining hall.

dispatch man (caterer's); receives orders and sends meals out to be consumed at the premises.

dry cleaner, *French cleaner*; soaks articles, usually wearing apparel, in spirits (naptha, benzoline or petroleum), places them in rotary washing machine also containing spirit, then transfers them to a centrifugal drying machine to extract spirit.

dye, dyer and cleaner, re-dyes articles of clothing, upholstery, etc., by dipping in vats of colour in solution, mixes colours and regulates temperature of the dye vats, may first clean, if necessary, *see* wet cleaner (915).

estate constable, guards an estate, patrols the grounds, sees to security of gate, locks, etc.

fletcher; general term for workers in finishing department of job drying and dry cleaning works; *see* clothes presser, calendarer, glosser, cylinderer (918), ironer, ironer and finisher, gaffer (918), presser.

fire lighter; cleans fireplaces, lays, lights and maintains fires in large establishments; carries coal.

fish fryer, fries fish and chip potatoes in wire baskets dipped in butter and in boiling fat in hooks or pans; cleans frying range.

floor polisher, cleans and polishes floors of wood, mosaic, linoleum, etc., by rubbing with floor polish and a cloth mop manipulated by hand.

French cleaner, *see* dry cleaner.

gillie, gillie, a personal attendant or outdoor valet who accompanies his employer or his friends on a shooting, shooting or deer stalking expeditions; assists in carrying

fishery tackle, tackle, bait, guns, lures, baits, etc.; keeps poachers from fishing or shooting poachers.

glove cleaner; a dry cleaner (q.v.) who removes dirt from gloves; may also clean by wet method, see wet cleaner (915).

glove stretcher; cleans and stretches gloves with glove stretchers, in finishing department after drying or cleaning.

guide for blind children; acts as guide to a horse for blind children, or conducts blind children from their homes to school guide; cleaners; (1) conducts visitors, parties of school children, etc. round angaria, galleries, museum, and other places of interest, giving general and historical information, and sometimes short explanatory lectures; (2) (mountain), leads individuals or parties to summits of or across mountains by recognized paths; warns them of danger; recommends necessary precautions; points out features of interest, gives information on history, legends, etc. of the district; (3) (tourist agency) is engaged by tourist agency to conduct travellers round towns and other places of interest, pointing out and describing the principal features.

gyp; a male personal servant to resident members of a college at Cambridge University; works for rooms on a "staircase"; assists bedmaker (q.v.) in all better domestic duties; carries water and coals; lights fires; serves meals from kitchen; may also wait at dinner in hall; cf. *serv.*

ham and beef cutter; slices ham and beef in ham and beef shop, restaurant or dining room, using carving knife or slicing machine.

handy man; odd man; does odd jobs about a house, such as small repairs to locks and bells, cleaning boots, carrying coals, etc.

helper, dining centre; lays and clears tables, waits, clears and generally assists at a dining centre.

hospital orderly, hospital porter; attends at entrance of hospital or infirmary to direct and assist patients and visitors; makes up furnaces, fetches stores by wheel or trolley, packs and unpacks cases; hands patients to and from operating theatre, etc.

hostel assistant; keeps hostel clean; waits on the boarders.

hotel forist; responsible for the purchase, care and arrangement of all floral decorations in a hotel.

hotel yardman; does unskilled outdoor work at a hotel, watering horses, sweeping yard, etc.

hut keeper, *as for attendant bothy.*

infirmary porter, *as for hospital orderly.*

inspector (dining car); *see steward (dining car).*

ironer, ironer and finisher, ironer and presser (dyeing and cleaning); presser; iron and presses (or finishes) articles after they have been cleaned or dyed, with flat iron (generally heated by gas or electricity) or on American patent steam pressing machine, called *finishing press*.

jobbing butler; a non-resident manservant, who acts as butler for special occasions in private families where no regular butler is kept; cf. *butler* (900).

knife cleaner; cleans steel of knives with emery powder on knife board or in knife machine; usually employed in restaurants, etc.; occasional occupational term.

knocker-up; *caller, call-up, night caller*; wakes up workpeople in their homes daily by rapping or knocking at their windows at a fixed time each working day.

layer-out of the dead; washes, lays-out, prepares and dresses body for burial.

linen checker; checks linen of an institution or its tenants from laundry, and on issue for use; and sends soiled linen to laundry.

linkman; shows guests or pilgrims at night to and from carriages or motors; calls vehicles by number; (term practically obsolete).

bonded store and vault keeper, see for warehouseman, bonded.

bonding storeman, see warehouseman, bonded.

cold air stores manager; has charge of cold air stores; controls and supervises staff, and is responsible for proper storage of goods and their receipt and despatch.

counterman (lat class) (drugs and fine chemicals); is in charge of packing and despatch room, and is responsible for making up and packing of mixed order for chemicals, etc.; requisitions bottles, labels, wrapping, papers, boxes, barrels, and chemicals from stockkeeper (941) *q.v.*

counter-off, warehouse; checks and records numbers of articles entering or leaving warehouse.

despatcher, despatch clerk, despatch man; goods despatcher, addresses packers, goods, and despatches them from warehouse, obtaining and filing carman's signatures for receipt of goods; keeps books showing consignees, nature of packages, etc., usually keeping separate books for each railway company or carriage contractor; *cf.* newspaper despatcher (943).

foreman (warehouse, etc.), warehouse foreman; head warehouseman, overlooker (warehouse); supervises packing, loading, and despatch of goods from warehouse furniture depository, or other place of storage; directs and controls workers therein; sometimes also prepares statements of goods loaded, trucks used, etc.; often further distinguished according to branch of industry, e.g. foreman packer, foreman yard packer, warehouse foreman, packer foreman, etc.

gauger (bonded warehouse); goes round warehouse with Excise officer; sets-up gages, i.e. places them on blocks to render level for capacity test; starts, i.e. knocks out, bungs; replaces bung, with mallet, after tests; when not so employed, assists in loading and unloading casks, packing cases, etc., for receipt or despatch, *cf.* storeman (distillery) (941).

give-out (hosiery); a warehouseman *q.v.* issuing yarn, etc., in a hosiery factory.

grain superintendent, granary keeper, see warehouseman grain.

head warehouseman, see foreman.

order man; a warehouseman *q.v.* who draws goods from store, makes up, packs and despatches them, in fulfilment of orders received through post or firm's travellers.

overlooker (warehouse), see foreman; sometimes specifically designated according to status, e.g. second overlooker, under overlooker.

packer; a warehouseman *q.v.* employed in certain minor textile trades where smallwares, etc., are stored in racks.

receiver, see for warehouseman.

receiving house keeper (docks), see warehouse keeper.

safe deposit keeper, custodian; guards safes and strong rooms of safe deposit establishment, shows customers to their safes and takes note of persons entering and leaving strong rooms.

safe deposit manager; is in charge of safe deposit establishment, and responsible for safety of articles deposited; interviews clients, arranges rents.

stock keeper, stocker, stock room man, stockman; a warehouseman *q.v.* who keeps stock book showing amount of stock (as distinguished from stores, which are normally raw or semi-manufactured materials, or tools, for use in manufacture or production), and quantities of goods passing through warehouse or stock room; checks clerk books periodically against stock in hand; *cf.* stockholder (789); in some firms (e.g. cornet making), also interviews travellers and buys materials.

stock taker, wool warehouse; a stock keeper *q.v.* employed in warehouse wherein is stored raw wool awaiting processes; in particular, knows various grades of wool stored, keeps stock books and maintains stock,

taker-in, piece; takes in work from weavers (370) q.v.; measures it with yard stick, examines cloth and hems it in, recording defects against weaver concerned; forwards records to wages clerk (833) q.v.

vat keeper; a bonded warehouseman q.v. who has charge of vats in which wines or spirits are stored, and superintends addition or withdrawal of liquor.

vault keeper; a bonded warehouseman q.v. who has charge of vaults in which wines or spirits are stored, and is responsible for due observance of terms of bond; supervises cooper (477) q.v. or other workers employed in vaults; in P.L.A. service, reported direct to dock superintendent (731) q.v.

warehouse keeper (dock); receiving house keeper; has charge of warehouse premises and is responsible for safe custody, locking them up at night, etc.; keeps necessary records of goods passing in and out; if under P.L.A., forwards statements to collector of dues (731) q.v.

warehouseman, warehouse; general terms for any man employed in any capacity in or about a warehouse, (i) in unloading or unpacking goods, in carrying or trucking them, in weighing them, in packing and addressing them and preparing them for despatch, etc.; (ii) in keeping account of stock, and of goods received or despatched, and in getting out orders; (iii) in inspecting work of subordinate workers; often also performs one or more of a great variety of other duties, according to industry or business, e.g. unpacking, preparation, and care of raw or semi-manufactured materials, and issuing them to other workers; examining finished goods, and rejecting or sending back for correction, those that are imperfect; keeping account of faults in weaving; waiting upon salesman (775) q.v., etc.; sometimes (loosely) used in sense of stockkeeper (941) q.v.; often further distinguished according to nature of duties or class of goods handled, e.g. brown warehouseman (warehouse linen), cake q.v. (oil cake) warehouseman, carrier's warehouseman, cloth warehouseman, corn warehouseman, cotton warehouseman, nickel warehouseman, oil warehouseman, rag warehouseman (rag sorting), rough warehouseman (rough quilting), etc.

warehouseman, bonded; bonding storeman; a warehouseman q.v. in a warehouse where goods subject to Customs or Excise duty are received and stored, "under bond" that duty will be paid when goods are cleared for consumption.

warehouseman, grain; grain superintendent, granary keeper; a warehouseman q.v. in granary, besides general warehouse duties, supervises discharge of grain from ships by elevators, into warehouses and necessary weighing arrangements before grain is placed in store; ensures that daily inspections are made by grain examiners (942) q.v.; examines parcels of grain reported as of low quality and reports to owner.

warehouseman, wool; is employed in wool sorting warehouse as a wool stock keeper q.v. or otherwise; is responsible for condition of sorted wool and for its distribution and despatch.

warehousewoman, as for warehouse-
TEAR

wool stock keeper; keeps stock books showing amounts of sorted and of unsorted wools in wool sorting warehouse.

941.—STOREKEEPERS.

assistant stockkeeper (Post Office), supervises warehousemen (940) and assistants (942) q.v., and is responsible for carrying out of instructions regarding his section of Post Office Stores Department.

chief stockkeeper (Post Office), superintends several branches of Post Office Stores Department, and instructs stockkeepers q.v. in charge of individual branches.

drug keeper, drug storekeeper (textile printing); keeps stores of colouring matters, mordants, and other chemicals, etc., for use in textile printing, and issues supplies as required.

explosives man, magazine keeper, magazine storekeeper, magazine man, powder magazine attendant, powder distributor, powder man; is in charge of stocks of explosives, which he checks in or issues to workmen as required; is responsible for seeing that instructions regarding persons entering magazine, locking doors, etc., are carried out.

material man (copper mines); a stockkeeper q.v. who stores and issues supplies of various material and tools for use in or about mine.

pattern keeper, pattern stockkeeper; keeps store of patterns, templates, etc.; sometimes also keeps records of patterns and drawings made; often further designated, e.g. smith's pattern keeper.

powder salesman (metalliferous mines), as for explosives man.

receiver of arms (small arms); a stockkeeper q.v. who receives guns, rifles, etc., from works and sends them to store house; keeps simple book record of deliveries.

spelterman (galvanising sheds); a stockkeeper q.v. who keeps stock of spelter or zinc and delivers supplies to galvanising baths.

stockkeeper (textile mills); a stockkeeper q.v. in charge of wool, tops, yarn, etc.; sometimes specifically designated, e.g. top stockkeeper, yarn stockkeeper.

stockkeeper, store holder, store minder, storeman, storer, store room man, stores issuer, storeman, warehouse man; maintains records, and issues as required, stores, i.e. (naturally) raw or semi-manufactured materials, tools, explosives, fuel, oil, etc., for use in production or repair, as distinguished from stocks of finished articles, cf. stockkeeper (940); this distinction, however, is not always strictly observed; often further distinguished according to article stored, or according to article stored, e.g. iron stockkeeper, blue paint stockkeeper, bottle stockkeeper, cut and bolt stockkeeper, standing frame stockkeeper, tool stockkeeper.

stockkeeper, negative (photographers); receives negatives from printing department, names and numbers them and enters in record book; stores negatives in boxes and returns to printing department as required.

stockkeeper, plate (accumulators); keeps store of accumulator plates, for use in making or repairing electrical accumulators.

stockkeeper (Post Office); is in charge of staff in branch of Post Office Stores Department; supervises assistant stockkeepers, storemen, warehousemen (940) and porters (755) q.v.

stockkeeper, victualling; has charge of stores for victualling superintendent (750) q.v.

storeman, storer, store room man, storeman, store issuer, see storekeeper.

storeman (distillery); supervises necessary operations, directing labouring staff, from drawing off of spirit from stills until casking ready for despatch; attends to cocks controlling flow of spirit from stills to vats in stores; ascertains strength of spirit by use of Sykes hydrometer and thermometer and adds distilled water to spirit, if necessary, to reduce; gives reads with dip rod to ascertain quantities and sees to despatch

of same; in bonded warehouse, determines strength under supervision of spirit clerk (939) q.v. and Excise officer.

storeman, flax; flax and yarn storeman; is in charge of store containing line, i.e. baled flax or hemp; keeps record of quantity in hand; is sometimes also in charge of utensils used in preparing and spinning yarn, and of stock of spun yarn.

storeman (Post Office); is employed on less skilled duties in handling of stores in Post Office Stores Department; checks packages into store from van; notes particulars of contents and makes examination as to condition; puts goods in proper position in store; makes out consignment vouchers for goods leaving stores; checks packages to van.

storeman (railway); issues sponge cloths, oil, tallow, waste, brushes and other stores required by engine men (701) q.v.; keeps records of incoming and outgoing stores; requisitions for additional stores as required; renders periodical statements of stores in stock.

storeman (beer making); receives orders from office and supervises packmen who look out different kinds of casks in stock room or warehouse to make up orders; may himself assist in packing operations.

warehouse man, see stockkeeper.

weight binder; a stockkeeper q.v. in tapes, smallwares, and elastic web industry.

white cloth man; a stockkeeper q.v. in charge of white cloth store, in textile printing industry.

942.—WAREHOUSE AND STOREKEEPERS' ASSISTANTS (NOT LACE WAREHOUSE HANDS).

bench hand, bench worker (news-papers); an assistant, despatches, newspaperer; counts newspapers into bundles; packs bundles, and despatches them to newsgate; does other similar work in warehouse department of a newspaper office or of a wholesale newspaper's establishment, usually working at a bench.

booker (glass), glass caller-over, see marker-down.

book publisher's collector; makes up bookellers' orders by going round shelves in stock room and picking out books required; orders from warehouse books not in stock, sometimes employed on outside work, collecting books from other publishers and from bookellers; cf. book collector (755).

chamberman (cold storage), see cold storage hand.

checker; verifies, by comparing with order or delivery note, weight, number, grade, etc., of goods received or despatched; often further distinguished according to nature of industry or class of goods checked, e.g. sack checker, tea checker.

clerical labourer (Government dockyard); assists in storehouse, in checking and ordering stores, and does unskilled clerical work in Government dockyard.

cold storage hand, cold stores labourer, chamberman (cold storage); carries goods in and out of cold storage chamber; stacks or unstacks them in position, and does other labouring work in connection with cold storage.

counterman (2nd class) (drugs and fine chemicals); measurer, weigher (drugs and fine chemicals); measures or weighs out chemicals; bottles, packs, and makes up orders received from 1st class counterman (940) q.v.

counterman, dry; a counterman, 1st (940) or 2nd q.v. engaged in packing dry, i.e. solid, chemicals, into boxes, bottles, bags, etc., using shovel, scoop, etc.

counterman, wet; a counterman, let (940) or 2nd q.v. engaged in packing liquid chemicals into bottles, casks, drums, etc., hand pouring from small vessel or from tap.

examiner, grain; looker and grain examiner; under direction of grain superintendent (940) g.v. daily inspects grain throughout warehouse, searching for signs of deterioration through damp, overheating, rats, weevil, etc.; reports results of inspection; if necessary arranges for grain to be moved by conveyor belt from one part of warehouse to another.

examiner, sack; examines sacks in warehouse to ensure that they have been properly cleaned and rendered. may also act as sack checker q.v.

feet sorter; sorts and grades feets, i.e. scraps of textile material, in a feet dealer's warehouse.

giver-out, card wire; gives out wire from warehouse case, for in manufacture of card clothing.

lifter, see warehouse labourer.

marker-down; looker (glass), glass roller-over; counts finished piece or rolled glass as it is received in warehouse, recording size, weight per square foot, quality, etc. often helps in moving plate and sheet glass; checks sizes on glass plates and sheets, as required; checks out and records particulars of glass leaving warehouse measurer (drugs and fine chemicals), see counterman (2nd class).

newspaper despatcher, newspaper worker; see bench hand (newspapers).

order hand (commercial firm); see warehouseman (940) or order man (940) g.v. by getting out and putting away goods required to fulfil orders.

plier (jam making); pot stacker, stacker; a stockroom hand q.v. employed in stacking-down jars of jam, i.e. pushes uncovered jars in trolleys to stock room and there piles them in smallest possible space, to stand for several days before covering.

publisher's assistant; a warehouse hand q.v. in a publisher's establishment.

puller boy, puller-in (glass); packs blown glass articles on trucks and pulls or pushes or transfers glass from one warehouse to another.

runner, see toppler.

selectors ripper; a warehouse hand q.v. who wipes oil and dust from scissors, knives, razors, etc., with chamois leather, in preparation for packing.

shifter, see warehouse labourer.

stacker, pot stacker, see plier (jam making).

stacker and packer, see toppler.

stock room assistant, stock room hand; puts finished goods, as received, in proper place in stock room; sorts out goods required to fulfil orders, ready for packing and does other similar work in stock room; sometimes also keeps records of receipts and issues.

store boy, storehouse boy, store-keeper's assistant, stores attendant, stores assistant, stores labourer; assists in handling, receiving, and issuing of stores (raw or semi-manufactured materials, oil, spare parts, etc.) in store room; in warehouses also keeps records of stores received and issued; procures duties vary with industry; sometimes distinguished according to class of stores handled e.g. rivet stores attendant.

stower (grain milling), see toppler.

stewer, jute; carries and stacks raw jute or jute goods in warehouses and store room, under direction of warehouseman or storekeeper (940) g.v.

stower (tinplate); stacks boxes of tinplate in sorting room or warehouse.

tool finder; finds tools for skilled workmen; precise duties vary with industry, e.g., in tube making industry, sorts into sizes and examines dies and plugs.

toppler, warehouse toppler; runner, packer and packer, stower; a warehouseman's assistant q.v. who conveys sacks of flour, grain, bran, etc., from packing room and stacks them one on

top of another, in tiers, in warehouse; sometimes specifically designated, e.g. bran toppler.

trucker, warehouse; warehouse un-loader, warehouse assistant, warehouseman's assistant, see warehouse labourer.

warehouse boy; delivers goods, runs messages, and assists in warehouse generally.

warehouse girl; does packing, labelling, and similar light work either in receiving department or in finished goods department of a warehouse.

warehouse hand, warehouse worker; general term for any person employed in warehouse, usually in receiving, stacking, loading or unloading, weighing, or checking goods, or in trucking or carrying them from place to place; or in getting out orders, packing, labelling, and despatching, etc., but sometimes combines these with other duties e.g., in railway workshops, sometimes looks over finished articles, checks, wraps up, and packs; in umbrella making, fits umbrellas with cases and tassels.

warehouse labourer; lifter, shifter, warehouse assistant, warehouseman's assistant, warehouse trucker, warehouse un-loader; stacks goods or takes them from stock, unloads vans and trucks, rolls barrels, carries or trucks goods from place to place and does other labouring work in warehouse, under direction of warehouseman (940) g.v.

weigher; (i) weighs goods in bulk on scales or weighing platform; (ii) weighs small parcels in scales; (iii) (grain miller) weighs a specific quantity of grain or flour into each sack; (iv) (drugs and fine chemicals), see counterman (2nd class).

943. HOOKERS, LAPPERS, MAKERS-UP, AND PLAITERS.

nicter (hovery, wool); ties up hanks of wool or woollen garments in form convenient for bundling.

holder (in Chebriek dyeworks), see maker-up.

belt finder (flannellette); a maker-up q.v. or an assistant to maker-up, who turns in raw end of flannellette after it has been rolled.

buncher, bank buncher, yarn buncher; hooker; makes up banks of yarn into bunches, for despatch, tying them with yarn or with cord.

handler, see maker-up, bundle (yarn), and maker-up, cloth; often further distinguished according to class of article handled, e.g. piece bandler, yarn handler; cf. bandler, press bandler (flax and hemp); sciner; puts together necessary number of banks of yarn to form a bundle, a standard measurement in the trade; cf. maker-up, bundle (yarn).

bundler, press; delivery room press bandler; bundle presser, cloth presser, presser, pressman; minds a power bundling press, of any type; places cloth in press, and switches on pressure to compress it; secures compressed cloth with twine.

carder (tapes, smallwares, etc.); reeler (tapes, smallwares, etc.); twister; winds braid, tape, or other smallwares on to cards or reels, by hand machine, from bobbin; places into machine on machine card or reel, makes initial turn of tape, etc., thereon by hand, and turns handle to wind on remaining tape; cuts off tape, etc. when sufficient wound, usually guided by automatic measuring recorder; cf. carder (353) and (363).

chopper (tarpetts), as for measurer.

cleanser, see plaiter.

cleanser, piece; removes stains, spots, etc., from piece goods before they are lapped, by sponging them with soap and water, or by chemical means.

creasing and lapper; minds a creasing and lapping machine, as for plaiter crispier, see plaiter (hand).

clutter (cotton); winds cotton yarn from bobbins into skeins or knots, for despatch to dyers, etc.; places bobbin on spindle and draws off yarn, by hand, winding it with an 8 motion over two vertical rods fixed on a bench.

cutler, see plaiter.

dresser, pattern (making-up); prepares by folding, stitching, etc., patterns, principally silk, ready for pattern maker q.v.

folder, cloth folder, piece folder, folder-up; see plaiter; often further distinguished as follows: to article folded, e.g. sheet folder.

folding machine, mindler, see plaiter (machine).

foreman maker-up; superintends all processes connected with folding, stamping, ticking, parceling and final despatch of goods in making-up department.

foreman packer; is in charge of packers q.v. and responsible for packing, pressing, and despatching of yarn, cloth, etc., by parcel.

gimp, windup; minds a machine which winds gimp on to reels, for convenience in transport; as for carder (tapes, smallwares, etc.).

grosser; a yarn handler q.v. who counts out hanks or skeins of yarn into bundles of a gross, and presses them together in hand or hydraulic press having also permitting tying of yarn under pressure; lays paper wrappings, and twine on back of press, operates press and ties yarn, cf. bundler, press.

hanker, see buncher.

hooker, cloth hooker, piece hooker, hooker-and-lapper; piece; folds cloth, and simultaneously measures it, by passing it backwards and forwards between two hooks placed at a prescribed distance apart, and fastening it in place by a slight bend on selvage.

knorter, see maker-up, handle (yarn).

knorter (thrown silk); hard silk knorter; two knorters; knorters together both ends of a reel or skein of silk to enable ends to be identified when skein is unwound.

lap layer; unrolls from roll three or four yards of cloth and forms this into series of small laps (pleat folds), so facilitating display at examination of cloth as roll; secures lapped roll by binding with tape, ready for despatch; often done by maker-up q.v.

lapper, lapper-up, lap man, cloth lapper, see plaiter.

lapper, apprentice; see under-lapper.

lapper (flax and hemp); examines, measures, cuts, and folds finished flax or hemp cloth; sometimes combines this with work of packer (949) g.v.

lapper, gimp; winds gimp, by hand, on cards, ready for sale.

lapper, line; makes up certain types of cord, or lines, by hanks, and winds end and tail hank; as for reeler (not silk) (367) g.v. reeler (finishing).

lapper, machine, as for lapper.

lapper (tape), tape lapper; minds and does a lapping machine, which winds tape from bobbins into knots or skeins; guides tape from bobbins to two pegs, starts up machine causing pegs to rotate; stops machine and cuts tape with scissors when sufficient wound.

maker-up; bolter (Chebriek), trimmer (silk trade); makes up piece goods or yarns in bundles or packages for despatch or for storage; often further distinguished according to class of goods made up, e.g., smallware maker, twist maker-up.

maker-up, bundle (yarn); bundler, knorter, knut tier, press bandler, yarn maker-up; makes up into bundles hanks of yarn and secures them by knitting one bank round rest; is responsible for selecting yarn, for quality of yarn sent out, for rejection of bad yarn, and for parceling and stamping.

bottler; fills bottles, by hand or machine, and passes them forward for labelling; sometimes also inserts cork or stopper, and seals it; often further distinguished according to article bottled, e.g. blacking bottles, scent bottles, sweet bottles.

box dresser; lines cardboard boxes with paper; labels box, and attaches lace paper edging.

boxes, box-maker; box hand, folder (overall); packs goods in wooden or cardboard boxes; for additional work also performs as packer; often further distinguished according to article packed, e.g. shirt boxes, hosiery boxes (or box hands), metal polish boxes, cf. boxer, chocolate.

boxer, chocolate; boxes finished chocolate in layers, between sheets of paper, or in rows separated by paper wrappings.

box filter (artist's colours); places colours, tubes and pans of colour into artist's colour box; places labels on to indicate colours; puts in brushes, palette, bottle of linseed oil, and dippers, i.e. pans for mixing colour; wraps box in paper and places in cardboard carton.

box hand, see boxer; often further distinguished according to article packed, e.g. blue box hand, polish box hand.

brander (case making), case brander; brands names and designs, on cases, cases barrel heads, unmanufactured case boards, etc., (i) by furnace-heated treadle-operated, branding machine; places barrel head, etc., on heated press plate and depresses treadle; feeds furnace with waste wood, etc.; (ii) by gas-heated, belt-driven, gummed-branding machine; places case boards in magazine, admits machine to take required size of boards and starts-up machine so that boards pass through automatically.

bright worker; counts fish books into packets and wraps them up.

bundler; (packs and wraps) counts sacks or bags into bundles of specified size; sometimes combines this with work of tier, e.g., (paper and board making) as for packer.

bundler's second hand, see tier (iron strip or hoop).

capper; a packer, e.g. who puts caps on lids or cartons of liquid blacking, metal polish, etc.; usually also tightens cap, although this is sometimes done by cap tightener, e.g. cap tightener; a packer, e.g. who screws lids on bottles of metal polish, etc.

carder; ties, stitches, strings, or otherwise fixes articles on cards for retailing; often further distinguished according to article carded, e.g. comb carder, book and eye carder.

case (files, saws), as for wrapper.

case, tin case (tinplate works), as for boxer.

closer (hoof polish); see lifter.

cloth sticker (needles); gathers needles in band clamp and sticks points into a piece of cloth attached to paper wrapper.

compressor, as for labor.

counter (bolts), see bagger-up.

counter girl (tapes, etc.), as for laborer.

coverer, pot, see finisher, jam.

dosener, boot lace; makes up boot or shoe lace into bundles of a dozen pairs, and secures them with twine.

emballer, see wrapper.

filler; fills bags, tins, boxes, bottles, cartons, etc., by hand or machine, with finished articles for sale; sometimes specifically designated according to nature of article or of receptacle, e.g. bag filler, blacking filler, box filler, case filler, metal polish filler, packet filler, etc.

filler, box filler (tea); places finished matches into inners of boxes by hand, and pushes filled inners into box cover; sometimes done by slider (see, cf. nesting hand (matchbox) 999).

filling machine attendant; a filler, e.g. attending a filling machine; places bottles, etc., on tray and tray into

position on endless belt feed; regulates flow through filling nozzles and keeps these clear of obstruction.

finisher, box; (cigar trade), see laborer.

finisher, jam; pot coverer, pot packer, topper and wrapper; labels jams, etc.; tins, particularly covers top of jars or bottles of jam, cf. tier, jam; sometimes also does work of wrapper, e.g.

finisher, lead; general term for any worker engaged in boring, labelling, and, perhaps, black lead.

feller, see trimmer, sometimes specifically designated, e.g. typewriting fold feller.

folder (overall making trade), see boxer.

gimping machinist; moulder (lines); places small linen patterns on bed of gimping machine and turns handle so that edges of cloth are gimped (pinked) by cutting rollers, to prevent fraying; arranges number of patterns and mopsis in appropriate position, using wire, metal fasteners, etc., on pattern card.

gluer (photographic plates); packs-in-brass; wraps boxes of plates in paper, and glues paper in position.

golfer, ball, weight and wrapper; weighs finished golf balls to ensure that none exceeds maximum weight; wraps them in paper, and places them in cardboard box.

hooper, case hooper, iron hooper (packing cases); hooper of packing cases; binds shable iron bands round packing cases, and makes them fast by nailing them to case.

hosiery layer; folds finished garment, wraps it in paper and places in box ready for despatch, if necessary, in sets, or in less necktie round collar.

label boy; labels goods for despatch under direction of packer, e.g.

labeller; box finisher (cigar trade); affixes labels either to goods themselves, e.g. rods, bundles of tape, bundles of pencils, or to tins, boxes, cases, cartons, casks, jars, etc., containing goods; sometimes fills in particulars on label, or addresses blank label before attaching; sometimes also does wrapping up and tying; sometimes specifically distinguished according to article labelled, e.g. bobbin labeller, bottle labeller, metal polish labeller, sheep dip labeller.

labeller (nerated waters, beer, etc.); takes bottles from rack and places in case; if labelling machine connected with bottling plant; moves lever controlling automatic feed of labels and damping and fixing apparatus; removes labelled bottles and replaces in rack.

labeller (matchbox); winds machine which automatically feeds cut pieces of wood to form, respectively, inner match box and outer cover, and which pastes blue paper on inner side and label on cover; inserts into machine spools of paper as required, fills match box and presses cut wood into slide feed.

lapper, see wrapper.

lapper-up (cutlery); passer, wrapper-up (cutlery); wraps finished cutlery in waxed paper and acts as final passer, returning defective articles for correction.

lifter (hoof polish); closer, topper; puts lids on tins, cartons, etc., by hand, after they have been filled, by lifter, box (margarine); lines wooden boxes with grease proof paper, and helps generally in packing of margarine.

liner, packing case; lines packing cases with paper or other material, usually merely placing sheets of paper in case; normally done by packer, e.g., cf. liner, packing case (sheet metal) 384.

looker-up (boot and shoe trade), see maker-up, machine attendant (tea packing); tea wrapper; attends machine which automatically weighs tea, fills and labels packets for retail sale; inserts

paper rolls into machine for cutting into wrapper shapes, and labels, and replenishes paste troughs used in sticking-on labels to packets, cf. packer, tea.

maker-up; looker-up (boot and shoe);

(i) puts together articles required to complete an order; or makes up standard quantities of pens or other articles, and puts them in small boxes, or other light coverings, ready to be packed in cases; or puts finishing touches to an article, to prepare it for sale; (ii) general term to cover workers making up and packing goods, e.g. boxer, packer, wrapper.

maker-up (felt hats), see packer, light.

maker - up (handkerchiefs); puts finished handkerchiefs in bundles of twelve; ties them up; presses them in a hydraulic press, ready for parceling; sometimes also ornaments them (see ornament) and boxes them.

marker, bag marker, bale marker, box marker; marks bales, bags or boxes with sticks or stumps, indicating nature of contents, destination, etc.; cf. stenciller.

marker for branding cases; places chalk or other marks on cases, indicating weight of contents, destination, etc., in preparation for branding.

moulder (hoes); sticks labels on packets or boxes of hoes.

moulder (lines), see gimping machinist.

nailer, box nailer; box sealer; nails lids on wooden boxes or cases, either by hand or, when operating a power-driven nailing machine, by placing box beneath plunger and depressing treadle lever; cf. packer.

nailer-up (galvanized sheets); nails up packets of galvanized sheets, and secures them with metal strip.

neater (cardboard boxes); puts finished cardboard boxes one inside another, ready for despatch.

ornament (handkerchiefs); examines, counts, and folds handkerchiefs; ties them up in an attractive manner, ready for boxing, and tuckering; sometimes also puts them in fancy boxes and tickets them.

overlooker, cigarette packing machine; is in charge of a number of machines operated by cigarette packing machine attendants, e.g. makes necessary adjustments to machines.

packer; (i) wraps small filled containers (tins, jars, bottles, etc.) in paper, and labels them; (ii) places goods in bales, barrels, boxes, cases, cartons, crates, or other receptacles, adding, if necessary, straw, sawdust, wood wool, or other shock-absorbing material; secures bale, case, etc., by nailing, cording, or other means; sometimes also brands or marks cases, or performs other secondary procedures thereupon; sometimes specifically designated according to class of article packed, branch of industry, or method of packing, e.g. case packer, cop packer, export packer, chocolate packer.

packer (baking powder); places empty tins for filling on a belt which carries them automatically into packing or filling machine; or removes filled tin after they have passed under office of machine; sees that machine is running correctly and remedies any slight defects; cf. filling machine attendant.

packer (biscuits); arranges biscuits in tins, according to definite pattern; inserts sheets of paper, where necessary, to separate different kinds or layers of biscuits.

packer, butt; a packer of butts, i.e. a superior quality of leather; stacks leather into piles and reaps-up; or places in canvas wrapper and stitches together; wraps up ends; sometimes also packs off; cf. packer, offal.

packer (clog soles); recovers from office staff, list of items for clog soles; selects soles in pairs, fastening them together by nailing to a strip of leather; puts out these leather strips; packs soles in bags, labelling latter with sizes of soles therein.

packer, cop; packs cops, i.e. yarn wound on cardhooks, etc., tubes, in skips and cases; delivers and weighs singly skips, etc., examines ticket on set of cops before packing, to see that quality and fineness of yarn are correctly described, and enters particulars of size and weight of packed cops in notebook for wages purposes; works in paper and makes-up skip for despatch after packing.

packer, egg; opens cases of eggs, and examines for breakages, etc.; sometimes inspects eggs against electric or other light to eliminate bad eggs; repacks eggs into new cases, with fresh wood wool.

packer, farman; hand packer, leading packer; is in charge of packing department, directs packers and loaders *q.v.* and is generally responsible for packing and despatch of goods.

packer (grain milling); minds machine which fills bags with weighed amount of meal or flour; fastens each mouth to machine chute; moves lever to start-up machine; removes filled sack, ties-up and stacks; occasionally checks weight of filled sacks.

packer, floor (grain milling) (448).

packer, hand, see packer, foreman.

packer-in-brown, see gluer.

packer, leading, see packer, foreman.

packer, lights (felt hats); maker-up (felt hats); covers hats with paper and packs in cartons, for placing in stock, or, for packing by rough packer *q.v.*

packer, margarine; (i) slices, blocks, or rolls margarine by hand; weighs, papers and boxes it, or is employed interchangeably on one or more of above operations; (ii) puts margarine with a wooden shovel into a packing worms turning inside machine, which also push margarine out in required form (½ lb., 1 lb., etc., lumps, rolls or blocks); (iii) packs margarine in large quantities, in bulk packing room.

packer, offal; (i) (leather) a packer of waste and low grade leather; *cf.* packer, butt; (ii) (milling) a packer of bran and other offal; fastens sack to chute from offal container (oppressor), moves lever to allow offal to fall into sack; stops flow of offal when sack filled, removes and weighs sack to ensure correct amount therein, ties-up and stacks sack.

packer, pot, see finisher, jam.

packer, rough (felt hats); receives cartons from light packer *q.v.* or from warehousemen (940) *q.v.* and packs them in crates.

packer, tea; tea weigher; one of two workers who weigh tea for retail sale (i) folds paper into packet form, leaving an end open; inserts under nozzle of chute automatically fed from scale pan which tips when correct weight of tea contained therein; (ii) folds-down open end of filled packet and pastes-on label by hand, using paste brush; *cf.* machine attendant (tea packing).

packer, textile; arranges textiles, clipped and sorted, in layers in wooden boxes for despatch to cloth manufacturers.

packer (wallpaper); (i) (usually male) operates a machine which compresses cylindrical bales of paper; places paper in machine, feeds leather bands round paper and either works lever in a skated wheel or tightens handle round paper, *cf.* start-up machine to effect, tension; passes steel hands round compressed bale, using hand tool and removes bale from machine; (ii) (usually female) stitches compressed bales of paper in sackcloth.

packer (wholesale tailoring); receives garments from workrooms; sorts them into bundles of similar garments, sizes, etc., marks them, and despatches them to destination.

packer-and-staker (clozes); packer-labourer; places cloze in racks, according to size, for storage; packs cloze for transport; sometimes combines this with work of polisher (429) *q.v.*, and of clasper (439) *q.v.*

packer-hooper (tinplate); packs sheets and blackplates in bundles, binds round with iron hoops, links ends of hoops and hits flat with hammer.

packer-labourer, see packer-and-staker.

packing machine attendant, cigar-ethn attend automatic cigarette packing machine; feeds packing machine with cigarettes or with cases, labels, or shells and slides or places papers, when filled, in boxes.

paper dresser; a wrapper-up *q.v.* engaged in wrapping cotton piece goods. **paperer;** wraps goods in paper, usually in preparation for subsequent packing in boxes, cases, or other substantial coverings; sometimes specifically designated according to class of goods packed, *e.g.* clay tobacco pipe paperer.

paperer, book to gut; places fish-bones, or gut, in wrappers and envelopes.

paperer, tin; lines tin with oiled paper, in preparation for packing; sometimes also assists in packing.

paperroller; makes up goods, usually already wrapped, into parcels for despatch; usually in retail quantities or in quantities not requiring packing in cases, etc.; sometimes specifically designated, *e.g.* black lead paperroller, blue paperroller, lead paperroller.

paperer, see lapper-up (cutlery).

pinner, label; sheet label pinner; threads a number of printed sheets of labels over two pins, willing hole on each side of each sheet, hands sheets thus threaded to guillotine cutter (558) who is thus able to cut labels in true alignment for use in blue, starch, etc., packing.

paperer, paper; pressman (waste paper); as for baker.

putter-up (hosiery); as for tier-up.

putter-up (wool); engaged in wool stapler's warehouse; puts-up wool into canvas wrappers, by suspending canvas at corners from a beam, tread-down raw wool in centre of canvas, pulling wrapper tight and temporarily fastening with two-sided hook, sewing-up canvas and removing hook.

roller (plum), pin roller; rolls up sheets of finished pins, after they have been stuck by pin sticker (279) *q.v.*

rocker, roller-up (tapes, etc.), see blacker, roll.

roper; binder, binder-up; secures coiled ropes by passing thinner rope through centre and round outside of coil, and then fastening.

sample maker (handkerchiefs); collects, arranges, folds, tickets, and packs or sews into box, handkerchiefs intended for samples.

sealer, box, see nailer.

sealer, patrol can, see wiper and sealer.

sealer-out (polish, etc.), see tray layer.

shaker-in (steel pens), as for boxer. **slider (matchbox);** receives boxes, filled with matches by box filler *q.v.*, and slides or pushes them into covers made by slide machine attendant (498) (*q.v.*).

sprinkler putter-in, see tipper.

stamper, box, as for marker, bale.

stamper, machine; puts goods in position in a hand-stamping machine, and moves levers, thereby bringing down stamp and affixing trade mark or other distinguishing mark to goods; fits into position, screwing, unscrewing, etc., dies, as necessary. **stencil, box stenciler, as for marker, bale.**

stitcher, bale; sews up overlapping joints of canvas wrappers of bales, with packing needle and twine.

stitcher-up (yarn); stitches up canvas lining of skips which have been packed with yarn.

straw boy (pottery); assists packer (944) *q.v.* by placing straw between articles to be packed, and by pinning ware in convenient position for packer.

straw pad maker; a packer q.v. who makes flat pads of straw covered with paper for use in protecting woodwork, metal frames, etc., from damage in transport.

stringer; handles press bandler (943) *q.v.* on banding press by tying up bundles.

stripper; puts paper strips round tins or blocks of boot polish, black lead, blue, etc., as for bander; sometimes specifically designated, *e.g.* blue stripper.

tahhar, hosiery, as for labeller.

tambourer; (Turkish term); rolls up delicate wool, silk, etc., cloth on tambours, i.e. wooden frames covered with paper, places tambour in holders in winding machine, wraps end of cloth and paper wrapping round tambour and switches-on power drive so that cloth and protective wrapping are wound simultaneously; *cf.* tambourer (Lancashire) (407).

taper, taper-up; puts tape round made-up textile goods (sheets, pillowcases, etc.) or after making of them, for despatch; so as to hold them together and to avoid creasing.

thresher-up, see wiper (clog rears).

ticker, ticket tacker, as for labeller; sometimes specifically designated, *e.g.* bobbin ticker.

tier, tier-up; puts up goods in preparation for despatch; work closely similar to that of paroller or of wrapper *q.v.*; sometimes specifically designated according to article tied, or nature of packing, *e.g.* bag tier, bale tier, firewood tier, ream tier, shirt tier-up, etc.

tier, bag-blue; packs blocks of blue in calico bag; places calico into mould, inserts hane, gathers calico to form bag and ties ends of bag with string. **tier, cork block;** sticks tin gutted fish-bones in a cork, for foreign markets, and ties shank ends together with twine.

tier (iron strip or hoop); handler's second hand; ties up bundles of scrap with wire after folding, in iron or steel strip or hoop mail, for return of metal to melting furnace.

tie, jam; put tier, jam (topper); ties tops and wrappings on bottles or jars of jam with string.

tilleter; wraps textile piece goods in tillet cloth (a special glazed waterproof cloth) for export to certain foreign markets; wraps canvas outside of tillet, secured by sewing, tinfolier; roller; wraps cocoas, chocolates, liquors, etc., in tinfall, by hand or by feeding, and watching working of automatic machine; sometimes specifically designated, *e.g.* chocolate, cocoa, liquorice, type-wrapping, ribbon tinfallier.

tipper (black lead, etc.); sprayer putter-in; puts perforated metal cap inside neck of tin bottle containing black lead or other similar goods, in liquid or powdered form, to facilitate sprinkling.

topper (boot polish), see ladder.

topper, jam, see tier, jam (topper); ties tops and wrappings on bottles or jars of jam with string.

topper and wrapper (jam), see finisher, jam.

tray layer; seifer-out (polish, etc.); arranges empty tins on trays, which are conveyed by endless band under nozzles of polish filling machines; sometimes done by filling machine attendant *q.v.*

trusser, see baler.

tucker; folds and closes up packets of needles by tucking in ends of wrapping.

warehouseman (rough), see hagger-up (boite).

weigher, *tas*; (i) *see* machine attendant (*tea packing*); (ii) *see* packer, *tea*.

weighman, *alum*, or *for packer*.

wirer (slag iron); *threder-up*; ties up clog irons in six-pair bundles, with wire, for storing or for despatch.

wirer and sealer (tins): petrol can sealer; wires up, by hand, cans of petrol, benzene, etc., and seals them by affixing a metal seal on wire and cap.

wrapper, *wrapper-up*, *wrappas*; embosser, *wrapper*; (i) wraps goods (by hand or machine) in paper, tinfoil, or other light protective covering, ready for packing in cases, etc.; or in more substantial coverings, ready for immediate despatch; (ii) wraps cycles, tyres, framework of beds, etc., in paper, tarred rope, or other protective covering, to prevent damage in transport; (iii) (matchbox) wraps boxes of matches, in dozens, in a wrapper, and pastes wrapper to seal package; (iv) (civvy) *see* lappper-up (civvy); (v) (jewellery) wraps pieces of jewellery in tissue paper and puts it in case, usually velvet-lined, ready for despatch; sometimes also wraps case in paper; sometimes specifically designated according to class of article, e.g. black lead wrapper, cake wrapper, chocolate wrapper, cap wrapper, etc.

wrapper-and-boxer (umbrella); wraps umbrella or parasol in paper, and boxes them; sometimes also does work of umbrella looper (4229) *q.v.*

ORDER XXX.—STATIONARY ENGINE DRIVERS, DYNAMO AND MOTOR ATTENDANTS.

950.—STATIONARY ENGINE AND CRANE DRIVERS.

serial ropeway controller; controls serial ropeway, used for conveying stone, ore, etc., about a mine or quarry, by moving lever connecting mechanism with steam engine; sometimes also Stokes bellows and controls steam pressure valves; moves clutches connected to winding shafts to control winding operations; *cf.* electric conveyer driver (954).

air compressor or compression attendant, *air compressor* or *compression man*; as engine attendant *q.v.* in charge of power-driven air compression plant, used for power transmission, for driving machinery or working pneumatic tools; controls machinery, for regulating supply of petrol, electric current, etc.; reads compression gauge; regulates speed of running machinery to maintain pressure evenly at required level; cleans, lubricates and regulates oil feed, renews piston rings and does other minor repairs; sometimes also does other incidental work, e.g. for road drill compression plant, has charge of drills and hose; on very large plant, may be a charge hand, with several assistants or attendants working under him.

air pump attendant (sugar refining); a pump attendant *q.v.* in charge of vacuum pump, used for drawing away steam from sugar boiling pans, to reduce boiling point; also reads vacuum gauges and regulates speed of pumps; work sometimes done by engine attendant *q.v.*, in charge of other machinery besides air pump.

alternator attendant; attends a number of alternators, i.e. machines generating an alternating current of electricity of high voltage; *cf.* engine attendant (electric generating room).

apparatus man, apparatus engine-man; screens engine-men, screens motor man; an engine driver *q.v.* in charge of engine which works

machinery used to raise coal from one level to another for screening purposes.

assistant blast engine man, *blast engine driver* (iron and steel); assists blowing engine man *q.v.*; feeds engine, fills lubricating cups, sees to working of oil feeds and does other similar work under direction of blowing engine man.

assistant turbine driver; junior turbine driver. Former driver's assistant; a learner employed in works engine room or electrical generating station, where turbines are installed, training to become a turbine driver *q.v.*; does all machinery and other general work, gradually advancing to greater responsibility; takes place of turbine driver at intervals; learns to take charge of plant connected with turbines, e.g. blowers, fans, switchboard, feeders.

auxiliary plant attendant; has control of auxiliary plant, e.g. pumps, in a power house, factory, etc.; cleans, oils and greases plant, examines working parts from time to time and does minor repairs.

bell engine man; in charge of an engine and winch used for raising a ball to be released at a certain height for the purpose of breaking up scrap iron by impact; applies power drive (electric or steam) and operates clutch lever which engages ball, raises to desired height and releases it; sometimes also Stokes boiler fire, reads steam gauges and regulates head of steam.

blast engine man, *see* blowing engine man.

blower (stone quarries), *blow engine man* (coal mines); an engine attendant *q.v.* in charge of engine which works ventilating plant supplying air to mines and quarries.

blower man, blower house man (gas works); (i) an engine attendant *q.v.* in charge of blowing plant (usually electrical) which causes gas to be forced at any required pressure into any or all gas mains running from gas works; observes pressure meter readings and adjusts valves accordingly; (ii) *etc.* oil gas engine room attendant.

blowing engine man, blowing engine driver, blowing engine tender; blast engine man; an engine driver *q.v.* who attends to blast engine and plant, for blowing air into blast furnaces and converters in steel works, or for driving blowers and fans.

brakesman, *engine*, *see* *winder*.

captain attendant; an engine attendant *q.v.* operating a power-driven capstan.

coal breaker engine man, *crusher engine man*; an engine attendant *q.v.* who drives engine used for crushing coal, at coal mine, cokery plant, or gas works.

coal conveyor attendant (gas works); attends to plant (usually electrically-driven) inside retort house, conveying coal from outside conveyors to hoppers of gas retorts; switches on power-drive motor and conveyor, pulls open slide over each hopper to allow coal to fall through, pushes slide back when hopper is full; moves friction switch in and out causing conveyor to move backwards and forwards as desired, coal falling into hoppers automatically.

coal plant attendant; (i) attends to electrical band conveyor outside retort house, where coal is dumped by derrickman *q.v.*; switches on or off power-drive, and greases wheels of conveyor when necessary; attends to coal crushing drum, switching off power to stop conveyor when both of crusher become choked with coal; (ii) in steel-driven plant, starts and stops conveyor by means of levers connected with steam engine; sometimes also fires, cleans and generally attends to boiler of engine; *cf.* coal conveyor attendant.

cold storage engineer, *see* engine attendant (cold storage).

compressor, compressor attendant, compressor driver, compressor man, *as for air compressor attendant*, but the compression may be applied to gas, etc., instead of air.

convoyer, *convoyer*; conveyor attendant; traverser driver, an engine attendant *q.v.* who attends to engine or motor which drives conveying plant, i.e. an endless belt, chain of buckets, for conveying material from quarry, fuel to furnace, etc.

crabber, *see* winch attendant.

crane cleaner; cleans, oils and greases cranes, tightening rivets, etc.

crane driver, crane man, crane engine man, crane tender, crane hoister, crane attendant; operates overhead travelling, or other cranes for hoisting, loading, unloading, or moving material in workshops, mines, quarries, wharves, etc., or on construction work; controls levers which bring into action gears for winding and unwinding crane-cable round drum, for raising and lowering crane arm, for turning crane, and in some cases, for propelling crane along crane platform; Stokes steam boiler and maintains steam pressure by aid of gauge, or controls fuel or power supply, according as the crane is driven by steam, petrol, electric, or other power; often specifically designated according to type of crane or purpose for which used, e.g. electric crane driver, hydraulic crane driver, steam crane driver, tip crane driver, crane driver, loco; a crane driver *q.v.* who operates a combination locomotive crane for shunting wagons and lifting material.

crane man, *engine*; a crane driver *q.v.* who operates crane carrying ladle into which metal is run from Bessemer converter in steel works.

cransman, *basin action*; soaking pit cransman, *winder-up*; a crane driver *q.v.* who operates power crane for lowering steel billets or blooms into heating or "soaking" pits and raising them therefrom when they have been heated to temperature required for rolling.

cransman, pit; a crane driver *q.v.* who operates crane for conveying pig iron from pig bed to pig breaker or to store.

cransman, pithead; a crane driver *q.v.* who operates crane for all lifting work in connection with casting pits (in steel manufacture); places ladles in position to receive molten steel when converter or furnace is tapped, and moves them from mould to mould in pit as directed by power (183) *q.v.*

cransman, soaking pit, *see* "crane man, heating pit."

crusher engine man, *see* coal breaker engine man.

eyelone extractor, *see* tar extractor.

derrickman; a crane driver *q.v.* operating a derrick, i.e. a crane with an arm which can be moved in any direction, often also fitted with self-acting grab, steam or electrically-driven, used for picking up coal, etc.; controls power-drive of derrick (*see* crane driver) and directs movement of arm and hook of levers; greases and cleans derrick.

dip engine man, dock engine man; an engine attendant *q.v.* who drives engine operating a cable ropeway or other apparatus for drawing minerals out of a dip coal or "dock" in a mine; *cf.* incline engine man.

donkey engine man, donkey engine driver, donkey man; an engine attendant *q.v.* in charge of a donkey engine, i.e. a small auxiliary engine, not supplying main motive power but generally fed by steam from main boilers; by moving levers, clutches, etc., connects donkey engine with capstans, hoists, aerial ropeways, etc.; sometimes also has charge of other machinery.

donkey man, shore; a donkey engine man *q.v.* employed at a dock, wharf, etc.; *cf.* donkey man (736).

donkey pumpman; **feedman**, an engine attendant *q.v.* who attends small auxiliary engine which drives boiler feed pump.

doek engine man, *see* dip engine man.

driver (engine), *see* engine attendant.

endless rope engine driver; a haulage driver *q.v.* who attends to engine working drums of endless rope haulage system in coal mine.

engine attendant, **engine driver**, **engine man**, **engine master**, **engine tender**, **engine tender**, **power engine man**, **stationary engine driver**; **driver (engine)**, **engineer**; controls stationary engine by moving lever which switches on power-drive, by turning tap or valve which controls gas or oil supply or supply of hydraulic power or other means; watches gauges, indicating steam pressure, or other power-unit generated, regulates engine's speed of running; cleans and oiled engine by hand or file lubricating cups, seeing that oil feed apparatus is working correctly; sometimes also cleans, oiled, and generally attends to plant running in connection with stationary engine, *e.g.* fans, pumps, compressors, etc.; usually does minor repairs, *e.g.* fitting new piston rings or gudgeon pins, sometimes capable of overhauling and doing heavy repairs; sometimes specifically designated, *e.g.* electric engine attendant, elevator engine man, gas engine attendant, hoist engine man, hydraulic engine man, lift engine man, rolling mill engine driver, stamping engine attendant, stamping engine driver (pulverising ore), ventilating engine man.

engine attendant (cold storage); cold storage engineer; (i) electrical plant starts machine by putting in main switch and working handle of rheostat; opens valves; reads gauges, stops and starts sections of plant to maintain even running of plant and cleans plant; controls flow of ammonia to maintain temperature in storage chamber; remedies minor irregularities or repairs minor breakdowns; (ii) (steam plant) attends to steam engines and compressors, and directs stokers (561) *q.v.* open valves to start engine; starts condenser and vacuum pump by operating various inlets and exhaust valves, regulates compressor by adjusting ammonia valve and opening steam valve; oils, etc., as above.

engine attendant (electric generating room); an engine attendant *q.v.* in charge of stationary engines or turbines generating electrical power for lighting works and driving machinery, also of switchboard controlling distribution of power; manipulates switches to equalise load between dynamos; attends to feeders supplying current to different parts of the works and other units; cleans and lubricates machinery under his charge.

engine cleaner; engine worker; cleans, oils, and greases stationary engines.

engine driver's assistant; assists engine driver *q.v.* and takes charge of engine in his absence; under engine driver's orders, controls supply of fuel or feeds to engine, scrutinises gauges, fills lubricating cups, etc., and stands by to assist driver by handing tools, etc., in case of breakdowns; is responsible for cleaning parts of stationary engine.

engineer (engine attendant), *see* engine attendant; sometimes specifically designated, *e.g.* hoisting engineer, steam engineer, woolen engineer.

engineer (acetylene gas plant); controls and operates gas engine or electric motor used for driving compression pumps; oils, cleans, and, if necessary, does minor repairs to compression pumps and to gas engine or electric motor used for driving pumps; regulates power to maintain even pressure in charging pipes.

engine worker, *see* engine cleaner.

exhaustor driver, **exhaustor engine driver**, **exhaustor man** (gas works); an engine attendant *q.v.* in charge of engine driving exhausters or gas pumps, used to draw gaseous products from reborts and through condensers, and to drive it through rest of cleaning apparatus, *i.e.* washers, scrubbers, purifiers and sulphuric acid extractors, to gas holder; starts and stops engine; reads gauges and regulates valves; oils and cleans plant.

fan engine driver, **fan engineman**, **fan attendant**, **fan driver**, **fan man**; an engine attendant *q.v.* in charge of engine-driven fans used for ventilation in mines, etc., for supplying forced draught to boilers or other purposes; oils and cleans engine and mechanism; sometimes also stokes boiler fires and sometimes has charge of engine plant; *cf.* electric fan attendant (554).

feedman, *see* donkey pumpman.

gantry drop man, **gantry engine man**, **gantry lift man**, **gantry man**, **gantry man**; controls and operates engine (electric or steam) supplying motive power to gantry crane or transporters in steelworks, iron-works, etc., principally used at steel works for loading furnaces with coke, lime, metal, etc., or in shipyards, docks, railway sidings, for lifting trucks or other heavy articles; is usually an experienced crane driver *q.v.*

gas drawdown (iron, steel works); a winch attendant *q.v.* in charge of winch or gear for drawing out blooms from reheating furnaces.

grab driver; a crane driver *q.v.* who operates and controls a crane electric, steam or hydraulic) equipped with a grab for lifting coal, etc.

grain elevator attendant; an engine attendant *q.v.* who attends to grain elevator; oils, cleans and greases it, when necessary.

haulage driver, **hauling engine driver**, **hauling engine attendant**, **hauling engine conductor**, **hauling engine man**, **hauling engine taster**; **taker-up**; an engine driver *q.v.* who attends hauling engine which draws minerals, in mines and quarries, along engine planes from workings to bottom of shaft, or by drift to surface.

hoist brakeman; a hoist driver *q.v.* who operates hoist at blast furnace used for conveying loaded barrows of coal, coke or iron ore from bottom to top of furnace and for bringing back empty barrows.

hoist driver, **hoist man**; operates a hoist used for raising and lowering luggage, merchandise, materials, or other goods, as distinguished from passengers; oils, cleans and greases hoist when necessary, but usually does not repair breakdowns; *cf.* hoist man (757).

hot bank crane-man; a crane-man *q.v.* who stacks finished product of iron and steel rolling mill, while still hot, on banks or stages, using tower crane.

incline engine man; in charge of engine supplying power for hauling minerals, rubbish, etc., up, or lowering them down, an incline (inclined shaft) at a mine, quarry, brickworks, etc., usually by means of an endless rope.

junior turbine driver, *see* assistant turbine driver.

kila engine driver; drives, oils and attends to engine driving revolving gear of kila in which charcoal is re-fired or re-charred for further use; sometimes done by leading hand (char house) (442) *q.v.*

laundry engineer; **stoker-engineer (laundry)**; operates and controls engine supplying power to machinery in laundry; reads pressure gauges, keeps steam pressure steady at required level; cleans and oils machinery; changes driving belts and does other minor repairs; in smaller laundries, also acts as boiler man (361) *q.v.*; *cf.* laundry engineer (244).

loopholeman (aerial ropeway); is stationed at loop or bend of an aerial ropeway and controls aerial ropeway controller *q.v.* by pushing, etc., carriers containing stone, ore, etc., round loop at end of aerial ropeway, if they stick.

marine bell attendant; an engine attendant *q.v.* who drives engine machinery working suction pipe or grain elevator, *i.e.* marine bell for unloading grain from a vessel.

mill engine man; (i) an engine man *q.v.* in charge of power engine of a mill; (ii) driver who attends to engine which supplies motive power to "cogging" mills, "finishing" mills, or other machinery of iron and steel rolling mills.

navy driver, **steam navy driver**; **steam excavator driver**; an engine man *q.v.* working a "steam navvies" which diggers or "steam shovel" which digs out clay, sand, gravel, chalk, etc., and loads it into wagons, oil gas engine room attendant; blower man, blower house man (gas works); an engine attendant *q.v.* in charge of turbine driving fans which blow air into furnaces used in the manufacture of water gas or oil gas; sometimes also attends to subsidiary plant, *e.g.* pumps; *cf.* pump attendant, starts, stops, cleans, regulates and oils plant; sometimes also does minor repairs.

pump attendant, **pump driver**, **pumper**, **pump house attendant**, **pump man**, **pumpman**, **pump minder**, **pump tender**, **pump engine man**, **pumping engine driver**, **pumping engine man**; an engine driver *q.v.* in charge of power-driven pump; controls power drive (petrol, electric or driving belt) and repairs pump rings and does other minor repairs; examines reading of vacuum gauge, regulating speed of pump to maintain vacuum at required depth; sometimes further designated, *e.g.* electric pump attendant, electric pump man, sewage pump attendant, vacuum pump driver.

pump driver (vacuum cleaning); a pump attendant *q.v.* who stands by electrically, petrol- or steam-driven vacuum pump used in vacuum cleaning, sets in motion or stops action by means of a lever; watches pressure gauge to maintain correct pressure to ensure vacuum.

acetylene engine man, **acetylene motor man**, *see* apparatus man.

skip engineman; an engine attendant *q.v.* in charge of power-driven machinery used for propelling skips containing pig iron, scrap or other materials to and from furnaces in iron and steel works.

slag ladle engine man, **slag loco driver**, **slag loco man**; an engine man *q.v.* in charge of engine which supplies power for moving ladle containing slag (in iron or steel works).

steam excavator driver, *see* navy driver.

stoker-engineer (laundry), *see* laundry engineer.

taker-up, *see* haulage driver.

tar extractor, **tar spray pumper** (gas works); **gysone extractor**; an exhaustor driver *q.v.* operating and controlling a pump for driving gases generated in coke ovens through iron pipes to cooling and condensing chambers, where first stage in process results in condensation of tar.

universal driver, *see* conveyor driver.

turbine driver, **turbine engine man**; opens steam or water valve to start turbine, adjusting steam, water and oil regulators until turbine work smoothly; watches vacuum and water pressure gauges and other automatic devices; sees that bearings are not overheated; sometimes does minor repairs, *e.g.* a pump for driving gases generated in coke ovens through iron pipes to cooling and condensing chambers, where first stage in process results in condensation of tar.

turbine driver's assistant, *see* assistant turbine driver.
 tyre man, tyre pump attendant; a pump attendant *g.v.* who starts, stops, cleans, greases, and generally supervises pumps which force cold water rapidly and continuously through water jackets of turbines in a blast furnace and drive hot water into condensers, cooling towers, and spraying tanks, and so maintain circulation of water through system.
 washer engine man; an engine attendant *g.v.* in charge of engine used to drive machines for washing coal, crushing engine drivers, who wash and clean it; clears coal jams and does other incidental work in connection with plant.
 water wheel driver, water wheel attendant; opens and closes, by means of governor, inlet valve which controls flow of water through wheel; or opens and closes sluices by means of wheel or lever; cleans and greases gear and shafting of water wheel; often also operates and controls plant, *g.v.* circular saw, driven from water wheel.
 winch attendant, winch driver, wincher, winchman (steam), winchover; an engine man *g.v.* who operates and controls engines driving power winches or derricks used for hauling or lifting heavy weights in mines, steel works, shipyards, docks, factories, etc.; cf. winch, winchman (359), winchman (730).
 winder, engine winder, winding engine driver, winding engine attendant, winding engine man, winding brakeman; engine brakeman; an engine driver *g.v.* in charge of winding engine at surface of mine or quarry, used for raising or lowering workmen, minerals, timber, etc.; when "all clear" is given, pulls lever, causing cage to move up or down; watches gauge showing position of cage, and regulates speed of ascent or descent; applies brake gradually, preventing excessive strain on winding cable as cage stops; is responsible for safety of workers in cage during winding.
 winder-out, *see* crane-man, hoisting pit.

961.—BOILER FIREMEN AND STOKERS.

assistant stoker; stoker's assistant; removes slag and clinker from sides of furnace, by raking or scraping; removes riddings, and assists stoker generally.

boiler blower (blast furnace); opens and closes valves to regulate flow of hot exhaust gases from blast furnace to boilers; if supply of exhaust gas is not sufficient, lights and attends to coal gas firing apparatus.

boiler charge hand (gas works); in charge of all main stationary boilers in gas works, supervises boiler firemen *g.v.*; is responsible for maintenance of steam pressure, stoking of boiler fires and cleaning of boilers.

boiler attendant, boiler fireman (stationary engines), boiler fire, boiler man, boiler minder, boiler stoker, boiler tender, engine fireman, engine stoker, firehold man, fireman (boiler), fireman (stationary engine), fire, fire tender, furnace man (boilers), furnace stoker (boilers), steam boiler attendant, steam boiler man, steam raker, stoker (boths, boilers, engines); fire breaker; stokes fires which heat boilers used for raising steam to drive engines, pumps, etc., for heating baths, steam coils, etc., for steam brush cleaning, etc., or for use in making water gas; also water supply to boilers and maintains steam pressure; usually also rakes out ashes.

boiler man, acid boiler man, sulphuric acid boiler man; a boiler fire-

man *g.v.* who feeds and attends boilers which supply steam to leaden chambers used in manufacture of sulphuric acid.

orange engine boy (quarries); stokes boiler of crane, also signals to driver for raising or lowering.

firebeater; (i) *see* boiler fireman; (ii) *see* fire raker.

fireman, dust destructor; a boiler fireman *g.v.* stoking and attending to fires of refuse destructor, and also feeding hoppers in which refuse is placed for lowering into furnace. fireman (gas works); stationed below arguing and discharging stages in retort house, in charge of opening and closing of furnace doors; rakes clinker from furnaces with long rake; cf. fireman (363).

fire raker (boilers); firebeater; rakes out and removes scales and clinker from boiler fires; usually done by boiler fireman *g.v.*

hydraulic boiler man, hydraulic fireman; a boiler fireman *g.v.* raising steam to drive engine which compresses water for hydraulic purposes.

leading stoker, shift foreman stoker; is in charge of shift of stokers in electricity power house, waterworks, or other public works or industrial undertaking; is often responsible for stokers *g.v.* by boiler attendants or stokers *g.v.*; delegates duties, inspects boiler gauges, furnaces, etc., from boiler to boiler, and reports defects or irregularities to steam engineer or to engine attendant (360) *g.v.* stoker's assistant, *see* assistant stoker.

surface fireman; a boiler fireman *g.v.* employed at surface of coal mine.

962.—BOILER SCALERS.

boiler cleaner, boiler scaler, boiler scouter, boiler tube cleaner, boiler tube and fire cleaner; scaler, scaler boy (shipbuilding); removes "scale" (furfurated deposit) from inner surfaces of boilers and from boiler tubes (if any), by chipping with hammer and chisel, by scraping with scrapers, or by chemical means; removes sludge from inside of boilers; brushes out dust, soot and ashes from flues and funnels; cleans boiler tubes (if any), cleans tube joints, and repairs leaks; cleans and washes out fuel economisers (if boiler is fitted with these) and refits caps; sometimes done by boiler fireman (363) *g.v.*

economiser cleaner, economiser scaler, economiser scouter, *see* boiler cleaner.

scaler, scaler boy (shipbuilding), *see* boiler cleaner.

sliger; a boiler fireman (363) or a trimmer (369) *g.v.*, specially employed in large boiler houses or in gas works, etc., for lifting and breaking clinker in fire boxes, with a tool called a slice.

963.—GAS PRODUCER MEN.

acetylene gas maker; (i) employs acetylene containing carbide of calcium when it has been used; cleans carbide receptacle and generator, and recharges them; regulates supply of water to generator and of gas to holders; (ii) *see* generator man.

assistant tanner (glass); a gas producer man *g.v.* producing gas for use in tanner (122) *g.v.* in melting glass; cf. assistant tanner (130). black man, *see* gas plant attendant.

bye-burn gas man (steel works); a gas producer *g.v.* employed at a steel works, either to take place of any regular man who may be absent, or to take long week-end shift, to

enable day and night shifts to change over.

charging rack attendant (acetylene gas); charges cylinders with acetylene gas by attaching them to nozzles (arranged in series on racks through which the acetylene gas is passed); seals and weights cylinders when full; regulates, by means of cocks, supply of gas to various racks.

fireman, gas fireman (producer gas), *see* gas plant attendant.

fireman, water gas fireman; water gas maker's assistant, water gas man; opens doors of water-gas generating furnace at frequent intervals, inserts long iron bars through grid below furnace to raise bottom of furnace; rakes clinker protected about grid.

gas maker, gas man (producer gas); (i) *see* gas plant attendant; (ii) *see* water gas driver.

gas plant attendant, gas plant fireman, gas producer, gas producer man, gas producer attendant, gas producer man, gas stoker (producer gas); block man, fireman (producer gas), gas fireman (producer gas), gas maker (producer gas), gas man (producer gas), producer stand, producer man; feeds with fuel, furnaces or retorts, gas producer, which generates gas used for heating furnaces, kilns, drying chambers, etc.; cleans out gas producer, controls supply of air (and of water, with water gas), and tends to gas producer, and is responsible for quality of producer gas supplied.

generator man (acetylene gas); acetylene gas maker; fills hoppers on generators with calcium carbide, using a long-handled scoop; regulates supply of water in generators, so as to keep an even flow of gas to gas holders; opens traps at intervals, allowing "sludge" (pure lime and water) to flow into sludge pit.

pitman (acetylene gas); pumps "sludge," i.e. pure lime and water from sludge pit, generator man (acetylene gas), with a hand pump, into filtering drums or into presses; these have corrugated plates, covered with linen, weight of which presses water out of lime, and form fine impo hard corrugated slabs; runs off water, removes and stacks lime.

producer band, producer man, *see* gas plant attendant.

water gas driver, water gas maker, water gas operator; gas stoker, gas man (producer gas), water gas man; operates valves regulating blast by which coke in water generating gas plant, i.e. a small cylindrical furnace, is heated to required temperature; when coke is at required temperature, operates another valve, turning on steam, which is forced through coke, generating "water" gas, or *see* admixture with commercial gas at gas works; turns on blast to re-heat coke, and steam to generate fresh supply of water gas; watches state of generator through observation hole, tips coke into generator, with assistance of coke man (362) *g.v.*; regulates down valve which governs reversal of flow of steam or gas; does other incidental work to plant.

water gas maker's assistant, *see* fireman, water gas.

water gas man; (i) *see* water gas driver; (ii) *see* fireman, water gas.

964.—DYNAMO, MOTOR AND SWITCHBOARD ATTENDANTS.

accumulator attendant, accumulator charger, cell charger, *see* battery attendant.

assistant sub-station attendant; supervises correct working of engines or generators in sub-stations, lubricates and cleans machinery,

etc.; assists in cleaning switchboards; under supervision of a skilled substation attendant, and assists sub-station attendant *q.v.* generally.

assistant switchboard attendant; takes meter readings and keeps records in connection with switchboard; works under supervision of switchboard attendant *q.v.*; sometimes in charge of switchboard for short intervals.

auxiliary plant attendant (electricity supply); attends to setting, cleaning and renewal of brushes and brush-gear; cleans commutators and cuts down *vacuo* between segments; cleans auxiliary motors; attends to oil levels of bearings, and is responsible for operation of auxiliary plant and for keeping it clean.

battery attendant, battery man, battery hand; accumulator attendant, accumulator charger, cell charger; charges electrical accumulators for electric lighting or power purposes and cleans them when they require it; periodically recharges cell with a portable voltimeter, checks and boosts up "backward" cells, i.e. cells whose voltage is lower than in remaining cells; cleans internal short circuits, and replaces by hand defective separators; keeps acid in each cell up to level of tap of platen; keeps temperature of solution gravities, taken by means of hydrometer.

controller boy, controller driver (iron and steel); operates switchboard to control electrically, skids, rollers, etc., in rolling mill.

driver (electricity supply); starts and stops, by means of valves and switches, one or more of electric generating machines in a power station, under direction of shift engineer (501) *q.v.*; supervises correct running of machines, lubricates them, and keeps them in proper order; watches pressure gauges.

dynamo attendant; has charge of dynamos generating electric current; oils and greases them, and keeps them in running order; adjusts them, as required, to meet varying demands upon them (technically known as "loads"); keeps clean commutator brushes and switchboard; executes minor repairs to dynamos, renews brushes, etc.

electric conveyor driver, electric transporter driver; controls electric motor which drives a conveyor, used for transporting material, mechanically, about a mine, quarry, factory, or other premises; superintends its working, and oils, cleans and greases various parts of conveyor.

electric fan attendant; switches on electric current supplying power to ventilating fans; regulates speed of fans by adjusting gearing; adjusts brushes on commutators, oils motor and fans; often also has charge of other plant.

electric haulage driver; for electric conveyor driver in charge of electric motor operating haulage plant used for moving material in a mine, quarry, factory, etc.

electric motor attendant, electric motor man; motor man (electric); operates and controls electric motors in a factory, etc., by means of levers connecting starting switches, oils them, and keeps them clean; sometimes also does small repairs.

electric plant attendant; general term for attendant on any electrical machine at an electricity supply station; includes auxiliary plant attendant, dynamo attendant, power house attendant, battery attendant, switchboard attendant, transformer attendant.

motor driver (colliery); motor man (electric); general term for workers operating and controlling electric motors, used for pumping, ventilating, or haulage purposes; is responsible for their general upkeep

and smooth running; includes electric conveyor driver, electric fan attendant, electric haulage driver.

motor man (electric); (i) see motor driver (colliery); (ii) see electric motor attendant.

power house attendant (electric), power house man; attends to engines, generators, and switchboards in small electrical power house attached to a factory, etc., manufacturing power for its own use; combines duties which, in a larger establishment, would be divided between switchboard attendant, driver, and auxiliary plant attendant *q.v.*

recorder attendant (electricity supply); volt boy, volt chaser; employed at small sub-station, where hand volt regulators are used to take and record meter readings; also keeps voltage constant at rheostat.

substation attendant; attends to switchboard work (see switchboard attendant) and to starting of engines at an electric sub-station, usually under direction of a charge hand (501) *q.v.*; in small stations, may be in charge of deputy charge of station, i.e. he may attend to operations of static or rotary converting plant, superintend cleaning of machines, and supervise other workmen generally.

switchboard attendant, switchman; controls main and auxiliary switchboards, regulates supply of current and loading of generators; switches generators into and out of service, as required, watches meters or indicators to ascertain that required voltage of supply is maintained, and records readings periodically, regulating pressure and quantity of electricity and loading of generators.

telpher attendant, telpher driver (gas works), telpher motor driver, telpher motor man; is responsible for, and operates, levers controlling electrical motor which works a telpher (a light car conveying materials about works, suspended from and running on aerial cables).

transformer attendant; employed at electrical sub-station where rotary power is not installed; keeps transformers clean; maintains oil levels in oil glasses on plant; opens and closes switches, switching transformers into and out of main circuits according to load, i.e. amount of current required; examines transformers to ensure that wire and porcelain insulators are in good condition; connects wires, fits on new insulators, and does other small repairs as required.

volt boy, volt chaser, see recorder attendant.

ORDER XXXI—OTHER AND UNDEFINED WORKERS.

900.—EMPLOYERS AND MANAGERS (not elsewhere enumerated).

sewage farm manager; has charge of sewage disposal works, where, if also a farm, the farming is subcontracted. is responsible for satisfactory working of all plant; superintends workers and conducts sales of waste, manure; orders supplies; issues instructions as to cartage; may make certain simple analytical tests of effluent, etc.; cf. farm manager (105).

901.—FOREMEN AND OVER-LOOKERS (not elsewhere enumerated).

foreman (rag sorting); receives bales of rags; gives out work to rag sorters (904) *q.v.* and supervises their work; keeps record of work done; sometimes does work of rag passer *q.v.*

rag passer; a foreman *q.v.* who examines sorted rags and passes them if they are up to standard. superintendence of mill distributors; has charge of gang of mill distributors (900) *q.v.* and is responsible for the proper distribution of bales, etc., and the complete circularisation of districts or areas as instructed by advertising agent; renders report on areas covered, men engaged, wages paid, etc.

902.—TIMEKEEPERS AND GATEKEEPERS.

assistant timekeeper; assists timekeeper *q.v.* with minor clerical duties; may have charge under timekeeper of less important entrance to works, etc.; takes charge in timekeeper's absence.

check station man; an assistant timekeeper *q.v.* in charge of check board on which workmen hang checks for timekeeping purposes; hangs board up and takes it down at specified times; assists timekeeper *q.v.* in recording daily and weekly hours worked by each worker on time sheets.

gatekeeper, gateman; opens and shuts yard gates, guards entrance to works, checks goods and persons coming in and out; sometimes acts as timekeeper *q.v.* and/or weighman *q.v.*

lavatory checker; sits in cabin at lavatory, takes workmen's checks as they pass through turnstile and records time each man is absent from work.

lodging boy, lodge girl; assists lodgeman *q.v.* at gates of textile mill or factory, acts as messenger, etc.

lodge keeper, lodgeman, lodge porter; (i) a gatekeeper *q.v.* occupying lodge at gates of factory or textile mill; (ii) opens and shuts gates of grounds attached to large private house or estate, checks goods and persons coming in or out; usually in telephonic communication with house; nearly always resident with his family in lodge and carries out other duties, e.g. as gardener (103), gamekeeper (910) *q.v.*

penmhole keeper, see watch house keeper.

porter of the close; opens and shuts gates to close of cathedral, etc., at times; carries, patrols precincts of cathedral, etc.; may act as guide and have other duties, e.g. keep keys, keep grounds tidy, sweep leaves.

portress, as for gatekeeper or lodge keeper.

timekeeper; (i) records time of entry and departure of workpeople in a book; (ii) has charge of timekeeping clocks and check boards and superintends "clocking" in and out; locks and unlocks clock mechanism at specified times; prepares card for each worker with name and number; sometimes computes hours worked during week, and makes return to cashier's department on time sheets; sometimes in charge of gate and weighbridge at factories and workshops; cf. gatekeeper.

watch-house keeper; penmhole keeper; a lodge keeper *q.v.* who guards gates of a Lancashire cotton mill.

903.—WATCHMEN.

canal wharf watchmen; a watchman *q.v.* in charge of canal side wharves and cargo left thereon.

constable, policeman (private); a watchman *q.v.* usually wearing uniform; is frequently an ex-police constable on pension; sometimes specifically designated e.g. private constable, private policeman, reservoir policeman, river policeman (water supply).

ship keeper; a watchman *q.v.* who lives and sleeps on board ship in dock and protects ship from intruders; is generally entrusted that ship's gear used in loading and unloading is not damaged, may supervise dockmen (736).

tideman (canal authority); a watchman g.v. in charge of lock and canal company's premises when lock keeper (741) is not on duty, i.e. when tide is out and lock not in use.

patrol (factory or works), watchman, watcher; patrols and guards, by night or day, mines, quarries, works, factories, water supplies, etc., to prevent theft, risk of fire, pollution damage or trespass; sometimes also in factories tends and stokes boiler or furnace fire, and checks time of night workers; sometimes specifically designated according to time of duty or place guarded, e.g. night watchman, day watchman, night watchman, coal spinner watchman, cotton watchman, reservoir watchman, watchman, ship's; attends to lights, moorings, and general safety of ships, during non-working hours of crew, while vessels are afloat and undergoing repair in shipyards, harbours, docks, etc.

964.—RAG, BONE, BOTTLE, ETC., SORTERS.

classifier (paper mill); a sorter g.v. who sorts rags at a paper mill.
cloth sorter and refiner; a sorter g.v. who sorts better class rags.
grader, grader and sorter, passer, picker, sifter, sorter; picks over heap of waste materials and sorts into small heaps according to kind, colour, grade, and condition; sometimes specifically designated according to waste sorted, e.g. hunt picker, linen picker, rag picker, rag sorter, flannel sorter, linen sorter, merino sorter, metal sorter, scrap metal sorter, stocking sorter, cotton waste sorter, new cotton sorter, old cotton sorter, paper sorter, woollen waste sorter.
sorter, bottles; sorts bottles according to size and shape; sometimes does bottle washing.

sorter, marine store; a sorter g.v. engaged in first sorting of miscellaneous waste or "ship's junk" for sale to other waste merchants.
sorter, new clip; a sorter g.v. engaged in sorting new rags, i.e. tailor's cuttings and other fragments of clothing, hosiery, etc., that have not been worn; cf. new clip sorter (360).

sorter, rags; a sorter g.v. who sorts old ropes for sale to rope manufacturers; may also tease out rope fibre.

966.—DROVERS.

drover, cattle drover; (i) drives cattle, sheep or pigs to and from market, fair, etc. for farmers (911) or cattle dealers (770) g.v.; is usually assisted by a sheep dog or other trained dog; (ii) drives imported cattle from ships to lairs or pens and feeds and looks after cattle wharf; sometimes cleans out lairs, etc.; cf. kairman.
kairman, cattle kairman; cleans out and looks after cattle pens (lair) where cattle are kept at cattle wharves or for the night on long journeys to markets or buyers; feeds and waters animals; may also do work of drover g.v.

970.—GENERAL LABOURERS OR OTHER UNSKILLED WORKERS (not elsewhere enumerated).

ash wheeler, ashes wheeler, ash hawk fitter, ash labourer, ash man, ash pit cleaner, ash pit collector, ash trimmer; coal and ash wheeler, cinderman, cinder getter, cinder wheeler, gas pitman, nuker (sift works), shuck wheeler, sifter; a labourer employed in sorting, ridding, milks, etc.; rakes out or shovels ashes from ash pits and fires into barrows; wheels away barrows and tips them on ash dump; removes dust dirt and soot from boiler chambers.

ballast burner; burns clay to form slag in heaps for roadway or building purposes or on railway, etc., and shankments; piles clay waste shovels in a heap, mixing in proportion of crumbed coal; erects boarding in relation to wind to cause forced draught; watches burning and tends heap with shovel, as necessary, to ensure complete combustion.
barge man (post bawker), or forer, man.

bill deliverer, bill distributor; delivers bills, circulars, etc., from house to house in a prescribed area; distributes bills to passers-by in streets, etc., according to instructions received from superintendent of bill distributors (951) g.v.

block boy (scavenging); a street orderly boy g.v. who does scavenging work in or around a block of buildings or section of roadway.

board carrier, boardman, see sand-wichman.

bottle washer, bottle rinsers; bottle cleaner; (i) (chemical works, etc.) soaks bottles in tanks of water; brushes interiors and exteriors of bottles with a bottle brush by hand; rinses bottles in tanks containing clean water; places in racks in drying chamber; (ii) (beer bottling) places bottles in tray, lowers tray into galvanised water tanks or places bottles in a wheel which, revolving by its own weight, i.e. loaded with bottles, carries bottles through water contained in tank at base of wheel; brushes interiors and exteriors of bottles by means of electrically-driven revolving brushes; rinses interiors by injecting jets of clean water into inverted necks of bottles.

breeze wheeler (gas works); shovels clinker and breeze from water trough below furnace doors into hoppers; wheels them away and tips them on dump, fills trough with water as required.

chain hester, chain carrier, chain man; carries chain, staff and reel for surveyor in road, estate, mine, etc., surveying, holds end of chain to mark during measurement; holds staff while surveyor takes levels with level or theodolite.
chairer (railway sleepers); carries "chairs" and places in position on sleepers ready for platelayers (577) g.v.; may also built chair home and otherwise assist platelayer.
cinderman, cinder getter, cinder wheeler, see ash wheeler.

cleaner, aggregate (drainage); brushes daily air gratings or drainage systems and keeps them free from obstruction.

cleaner, harth; removes weeds, silt, etc., from shoe adjoining wharves, with rake and shovel.

cleaner, boiler house; assists fireman (951) g.v. in boiler house by shovelling or raking out cinders from ash pit and wheeling in barrow to cinder heap; sweeps walls and floors of boiler house, wheels coal from coal boiler to boiler.

cleaner, bottle, see bottle washer.

cleaner, dairy vessel; scolds and washes, with boiling water or over steam jet, milk cans, churns, and other utensils used in milk distribution.

cleaner, drum and barrel; rolls empty drums and barrels to cleaning shed; inserts nozzle of flexible iron pipe into bung hole and admits steam to opening valve, rolls drum over drainage channel where hot surplus oil is drained away.

cleaner, engine room; cleans polished metal surfaces of engine room rails, etc., with rag and polish; sweeps up floor and assists engineer or engine driver (930) generally.

cleaner (factory floor), floor cleaner; sweeps out daily and washes or scrubs periodically factory floors before arrival or after departure of workers.
cleaner (grain milling); cleans silk sieving cylinders of flour milling machines every few hours while in

motion, using a hand brush; brushes flour from inside of machine and sweeps up floors.

cleaner, guiley; guiley man; sweeps, cleans and brushes guileys and drains in and around factories, works or other buildings.

cleaner (polish); wipes clean with rag, tin or bottles after they have been filled with polish, black lead, etc.

cleaner, rail, see sweeper.

cleaner, sack (milling); (i) shakes sacks by hand to empty out any residue of previous contents, ready for re-use; (ii) shakes sacks by machinery of varying types, e.g. puts sack from one drum to another, sack to be pulled inside out, removes sack and shakes it by hand; or, puts sack in slot of machine which cleanses it by means of beaters; or, places a number of sacks in revolving wire cage.

cleaner, tile (electric railway); washes glazed tiles at electric railway stations; occupational term obsolete; now graded as porter (700) g.v.

cleaner, tip (coal wharf); sweeps with brush and sweeps borings of coal tip; does other accumulations of coal dust.
cleaner, yard; hard labourer, gardener, hard sweeper, gardener, hard sweeper; sweeps up and (if necessary) washes down yards of factories, works, and other buildings; cleans guileys (arg cleaners, guiley); generally does other similar work in yard, e.g. loading and unloading vans.

coal and ash wheeler, see ash wheeler, coal heaver, coal hagger, coal bag filler; fills coal from trucks or stacks into bags; weighs sack on weighing machine; assists coalman g.v. to carry sacks of coal from coal yard or weighing machine to coal cart.

coal man; loads bags or sacks of coal into coal cart or trolley; drives a horse and cart or trolley, and sometimes hawks and sells sacks of coal in streets; carries sacks of coal from cart to house cellar, cf. coal man (779).
coal porter; coal wharf man; one of a gang of men engaged in unloading coal from barges; conveys it in baskets or sacks to weighing room, at gas works, factories, etc.; may also trim coal for gas, or push coal truck to tip and back empty to coal hopper; cf. coal porter (759).

coal sifter (not at colliery); screens or sifts dust from high grade coal, in coal yards, by shovelling against wire sieve, or by loading coal into automatic screening machine.

coal weigher from stack (gas works); weighs trams (or tubs) of coal filled at coal stock on their way to crushing house and/or from thence to retort house, or boiler house.

coal wharf man, see coal porter.

collator (waste); collects waste material from factories, business and private houses, etc., is usually a van driver (719) or hawker (777) g.v.; cf. tatter, punter (waste).
cinderman (local authority); removes silt from deep of surface water drain with long-handled scoop; keeps drains, gratings, clear of leaves, etc.; sometimes also flushes drains; cf. sewer flusher; usually a corporation labourer g.v.

ding boy, see street orderly boy.

dust sifter; salsop labourer; searches with a long rake among dust and refuse for refuse dump for marketable waste, e.g. bones, metal, rags, etc.; in same way salvages marketable waste from picking belt of dust destructor.
flusher, road flusher; cleans roads and asphalt pavings by flushing with hose from street hydrant; squeegee surface water to nearest drain with long-handled squeegee; usually a corporation labourer g.v.

flusher, sewer flusher; flushes road drains and sewers with water from water cart using liquid or powdered disinfectant; usually a corporation labourer g.v.

gas pitman, see ash wheeler.
grain weigher (elevator); weighs, checks and records weight of grain in sacks before removal to elevator.

clock window; periodically visits public buildings, institutions, works, factories, etc., and winds clocks, cleans and polishes glass faces, makes minor adjustments to clocks according to contracts; occasionally carries out minor repairs, cf. clock jobber (323).

common keeper; a keeper appointed by the local governing authority to guard a common, trees, animals, birds, etc., from destruction, directed by the public, and generally to enforce local by-laws.

competition secretaries; scrutinise answers to newspaper or magazine competitions and reports to editor submitting winning entries for final adjudication.

crane signalman, crane slinger, see slinger

directory compiler; visits business premises and dwelling-houses in a prescribed area and compiles a list of names and addresses of occupiers according to trades or professions, etc., for editor; collects information for preface and brief description of town, borough, etc., giving details regarding population, local authorities, staple industries, etc.; checks names and addresses for annual revisions of directory; solicits advertisements for advertisement pages.

disinfecter; visits premises after a case of major infectious diseases, e.g. scarlet fever, to disinfect bedroom, nurse's room, etc.; sprays rooms with formaldehyde, using fog pump, removes bed and personal clothing for disinfection at local disinfecting station; usually an employee of local health authority.

disinfecter, telephone, see steriliser (telephone)

dispensary collector; calls at private dwellings in poor quarters to collect weekly contributions due for medical attention received at dispensary; sometimes makes follow-up reports to medical superintendent.

distraining broker; carries out distrainments for debt on goods, furniture, etc., under bill of sale or order of the Court; effects entry to debtor's premises, values and attaches furniture, etc., to cover amount of debt; installs and instructs resident bailiff or broker's man q.v.

diver; general term for anyone who works under water, wearing special diving dress which excludes water and is weighted at feet and round body to counterbalance weight; communicates with assistants and foreman above water by telephone in helmet or by signals pulled on life line; duties vary according to class of work on which engaged, e.g. (i) (public works) prepares and super-sizes laying of foundations under water for bridges, piers, breakwaters, etc.; uses pick and shovel, directs, by rope signals, blocks of concrete to be lowered into position on sea or river floor; pushes and heaves blocks into place with crossbar; disengages tackle; removes sub-structures, e.g. piles, by boring with power drill or by sawing; (ii) (salvage) explores submerged wrecks, etc.; sometimes does temporary repairs to enable vessel to be refloated; clears obstructions, cargo and other articles to be salvaged, and attaches tackle for hoisting to surface; (iii) (waterworks) examines walls and floors of reservoirs and carries out such repairs as can be effected without emptying reservoir, e.g. cementing cracks, cleaning inlets and outlets of obstructions, etc.

diver's attendant, diver's linesman, diver's signalman, diver's tender, diver's life line man, linesman (for diver); assists diver q.v. into, and adjusts diving dress; lowers him into water, holds life lines, and takes signals; turns wheel of air pump and controls air supply while diver is under water, by watching pressure gauge.

dog breeder; is engaged in breeding various types of thoroughbred dogs as a business or profession; feeds and exercises dogs; nurses and gives medical attention to sick dogs.

drain tester; tests drains to discover possible leakage at joints or broken pipes, using either chemical smoke test or water test; renders report to local health authority and local authority.

ferro preserver; plants certain kinds of ferns in special glass cases in ferro soil for show purposes or transport, and carries out potting; usually done by nursery gardener (313) q.v.

filterman (sewage farm); opens and shuts valves of sprinkler to control flow of water to filters; occasionally sweeps channel round filter works; periodically empties filter of sludge, cleans walls and bottom and fills with fresh sludge.

fire appliance cleaner; makes periodic visits to buildings, etc., for purpose of cleaning and testing working efficiency of all fire extinguishing appliances; inspects and refills charge in patent fire extinguishers; examines hydrant, hose and nozzle and tests water pressure with pressure gauge; cleans and polishes all bright metal parts.

fireman (private or theatre); is in charge of fire extinguishing apparatus in theatres, music halls, etc.; makes periodic tests of all water hydrants; must be instructed in all public performances and is responsible for keeping exits clear; may be directly responsible to local authorities issuing licences to theatre.

fish breeder, fish butcher, pisciculturist; breeds fish, especially trout and salmon, at hatcheries, farms, etc., for stocking rivers or for market; supervises work of fish hatchery assistants q.v.

fish keeper, assistant; assists fish breeder q.v. keeping hatcheries in proper order, giving food to fish, setting adult fish, "stripping" eggs from female and adding "milt" from male fish in special tanks or ponds; raising small fry for removal and sale.

fish keeper; guards fishing rights on estates and prevents unauthorised persons fishing or trespassing; sometimes attends sportsmen or fishing parties, providing bait, etc., may have combined duties of fish keeper and game keeper (310) q.v.

flap keeper (sanitation); greases and clears obstructions daily from iron flaps, fitted to sewer outlets to prevent entry of solid waste.

floral decorator; decorates ball rooms, tables, churches, etc., with flowers, ferns, palms, etc., in various designs or colour schemes for special functions.

glazier, see lamp attendant

glass mender, repairer, riveter, or for chain repairer; hangs-on, see slinger.

harpooner; one of a crew in whale boat; rows in chase of whale; fires harpoon with explosive head from gun in bow of boat; pays out cable as whale dives, assists in fensing operations, working tackle or cutting blubber and whalebone from carcass with spade-like knives.

horse slaughterer; knacker; slaughters horses by means of humane killer; removes dead horses to his yard; usually cuts up carcasses for commercial purposes.

interpreter; usually a person with a specialised knowledge of two or more languages, including the spoken idiom, who acts as intermediary between those speaking different languages at law courts, international conferences, hotels, railway stations, etc.; sometimes acts as courier (325) q.v. to travellers visiting foreign countries.

kenel man (veterinary); feeds, administers medicine, cleans and takes general care of dogs, cats and other animals in kennels of veterinary surgeon.

knacker, see horse slaughterer

lamp attendant, lamp lighter, lamp man, lamp trimmer; (i) gas fitter; lights and extinguishes public gas lamps in a prescribed area, by means of long pole (torch) with which he turns tap on and off; and, if necessary, lights gas; cleans lamp glasses and renews mantles, etc.; (ii) switches on and off public and domestic electric light; cleans globes; renews carbons and generally adjusts or trims arc lamps; cf. arc lamp assistant (398).

landlord's belliff; executes distasteful, e.g. taking possession of goods, furniture, etc., on landlord's premises, remaining in possession until rent is paid; cf. broker's belliff.

linesman (for diver), see diver's attendant

marked constable; regulates traffic, etc., in markets; enforces by-laws; usually a uniformed official employed by local authority.

market keeper, market manager; has charge of the market; enforces local by-laws; allows space to auctioneers, stall holders, etc.; collects rents; is generally responsible for cleanliness, etc., of market, and enforcement of by-laws.

marquee erector, marquee fixer, see tent erector

menagerie keeper; feeds and attends to a collection of wild animals kept for exhibition purposes; sometimes travels with animals and exhibits them in country towns; cf. showman (323).

mortuary attendant; assists mortuary keeper (321) q.v. in keeping premises clean and disinfected, assists in preparing bodies for burial and at post-mortem examinations; carries bodies from and to mortuary on stretcher or in coffin.

naturalist; collects, mounts, buys and sells live or mounted specimens of birds, insects, fish, animals, trees, flowers, etc.; often also studies their habits.

park keeper, patrol park, prevents trespass, damage to plants and shrubs, or disorderly conduct; generally enforces observance of by-laws; usually a uniformed official employed by a local authority.

picture cleaner, see picture restorer

picture liner; rules line or makes other decoration, usually geometrical in form, round picture on mount with ink or wash colour.

picture mounter; affixes pictures to suitable cardboard or gilt mounts prepared by framing, usually with starch, paste, or colour mountant, or by patent heated press process; may also frame pictures, cf. picture framer (350).

picture restorer; picture cleaner; repairs, restores and cleans old and damaged pictures (oil paintings) removes old varnish by carefully applying spirit solvent on soft swab; retouches painted surface; backs by pasting or glazing on new canvas or board, torn or broken parts of picture; re-varnishes; cleans out all possible dirt; removes stains with solvents, applied with swab or brush, and cleans with soft erasers; remounts; sometimes also frames pictures, cf. picture framer (345).

pisciculturist, see fish breeder

possession man, see broker's belliff

professional solicitor - (competition); seeks out all possible probable positions of an advertisement newspaper or magazine competition and sells them through medium of advertisement to prospective competitors.

range warden; patrols a forest or park, reporting on growth of plantations, prevents trespass and poaching; may shoot rabbits; sometimes collects rents of cottages on estate.

recorder (gramophones); adjusts and uses a recording machine in taking master records, superlatons, from a technical point of view, band, musicians, singers (356) q.v. or other persons making record.

rent balliff, *see* broker's balliff.

rifle shooter; tests accuracy of small arms by shooting therewith at target on rifle range; notes any adjustment necessary in sights; sometimes himself adjusts sights; returns rifle to works for other structural faults, *c.f.* in bore.

rigger; erects staging, tripods, and other temporary lifting tackle with assistance of labourers for use of slinger *c.v.*; is sometimes responsible for slinging of heavy machinery; *c.f.* slinger.

salvage corps, member of; a member of fire brigade or other salvage corps; secures and removes goods, furniture, etc., from buildings, which have been burned by fire, or otherwise damaged; sometimes removes effects during progress of fire to save them from damage by fire, water, etc.

seed room assistant; makes up orders for, weighs and encloses in paper envelopes or boxes, flower, vegetable or farm seeds in seed room for seedsmen (770) *c.v.*

seed sorter; (i) sorts seeds by means of sives according to condition or size into different receptacles, in seed merchant's warehouse; (ii) where seeds are sorted and cleared by electrical machinery, hand picks sorted seeds spread on a bench to remove bad or discoloured seeds.

ship's fumigator; fumigates ships with sulphur, charcoal, etc., fumes, for purifying vessels after infectious disease, or for destroying beetles, vermin, etc.; seals outlets; prepares braziers for burning sulphur, charcoal or chemical compounds producing other vermin-destroying gas; opens outlets when process complete.

sign fixer, *see* advertisement fixer.

slinger; crane signaller, crane slinger, hanger-on; fastens wire or rope sling round bidders, machinery, heavy articles or loads;

attaches sling to hook on crane rope, gives directions to crane driver (854) *c.v.* by signalling with arm for lifting and transporting goods as required; unhooks sling, sometimes further designated, *c.g.* boiler slinger, sleeper mill slinger.

slinger, forger; adjusts chains and tackle to raise heavy ironwork and to sling it towards steam hammers in accordance with blacksmith's instructions; usually done by blacksmith's helper (379) *c.v.*

steriliser (telephone); telephone disinfecter; visits businesses and private premises periodically to clean and scrub with disinfecting fluid the mouthpieces and receivers of telephone instruments.

sweeping machine man (roads); drives a horse-drawn or petrol-driven machine brush up and down a road or street to sweep up dust, refuse, etc.; usually employed by local authority.

taxidermist; animal preserver, animal stuffer, bird preserver, bird stuffer; preserves and stuffs the skins of animals, birds, fish, reptiles, etc., removes skin from dead body with special knives, scissors, pliers, etc., taking care to preserve scales, feathers, hairs, etc., in natural state; rubs preservative solutions into the skin; makes body foundation or manikin by building up, on wire foundation or armature, with paper, macké, adhesive tape, etc., to give a natural attitude and to show as exactly as possible the form, muscles, etc.; covers manikin with skin and with a special mounting causes it closely to adhere; finally dresses feathers, scales, etc., affixes eyes, teeth, claws, etc.; sometimes mounts specimen in case with representations of natural surroundings.

teasle clipper; clips off by hand with large scissors, the leaves or beard at base of teasle flower head; clips off stalk a few inches below flower head.

teasle cutter; cuts off top and base of flower head of large teasles used in hosiery trade, by holding by hand against two circular knives.

teasle sorter; sorts teasles according to size (19 size), throwing them into different boxes for packer (845) *c.v.*

tent erector, tent fixer; marquee erector, marquee fixer; (i) assembles the various parts of marquee or tent, canvas tent, poles, ropes, etc.; drives in pegs to hold staying ropes; (ii) supervises the work of erection by labourers.

university constable; patrols streets in neighbourhood of university; arrests students for specified misdemeanours; works under direction of Proctor, to whom all evidence is submitted.

warder (museum); guards collection of articles, stuffed animals, or other valuable historical or interesting objects; prevents damage by the public; sometimes acts as guide to visitors; usually has care of keys and opens and closes museum at stated times.

waterman (sewage farm); opens and closes sluice gates by which effluent from filters is distributed in irrigation system of sewage farm; inserts stops as required in water channels; greases sluice gates and keeps them and channels free from obstruction; often also works as farm labourer (694) *c.v.*

zoological gardens keeper; guards, feeds, and tends animals, reptiles, birds, fish, insects, etc.; cleans out cages and enclosures; prepares special food as required; under instructions administers medicine and tends sick animals in sanatorium.

ALPHABETICAL LIST OF OCCUPATIONAL TERMS SHOWING THE CODE NUMBER OF THE HEADING TO WHICH EACH IS TO BE REFERRED.

The figures denote the Code Number of the Heading under which the Occupation will be found.

If an Occupation is expressed by more than one word, and is not found under the first, it should be sought under each successive word.

Sometimes an Occupation which does not appear in the Alphabetical List may be found under a description which is only a slight variant from it.

ebonite moulder	652	elastic brace creaser	426	electric sign fixer	318
ebonite turner	652	elastic brace maker	419	electric sign maker	318
ebonite vulcaniser	651	elastic creaser	374	electric tinser	279
ebonite worker	650	elastic hosiery finisher	374	electric track labourer (rail- way)	577
ebonite worker (mixing, mould- ing)	652	elastic knoop knitter	374	electric train conductor	702
ebony cutter	481	elastic loom builder	610	electric train guard	702
ebony handle maker	498	elastic rubber winder	208	electric tramcar driver	722
eccentric dancer	893	elastic spring fitter	414	electric transporter driver	954
ecological iron worker	226	elastic thread warper	387	electric truck driver	785
ecological sculptor	374	elastic thread winder	387	electric truck operator	785
ecological wood carver	415	electrical and telegraph super- intendent	700	electric van driver	726
economiser cleaner	952	electrical apparatus tester (G.P.O.)	300	electric welder	243
economiser scaler	952	electrical drill	372	electric welder and cutter	249
economiser scurfer	952	electrical engineer	305	electrification ganger	581
e.o. worker	143	electrical engineering fitter	305	electro-brasser (screws)	278
edge blacker	429	electrical fitter (engineering)	316	electrode maker	639
edge cutter	252	electrical fitter (G.P.O.)	316	electro depositor	252
edge fudge wheeler	429	electrical fitter (G.P.O.)	316	electrolytic chlorine worker	143
edge glider (bookbinder's)	538	electrical fittings maker	105	electro monner	285
edge glider, card	649	electrical furniture maker	105	electro plaque depositor	282
edge grinder	429	electrical inspector	308	electro-plater	282
edge inker	639	electrical instructor, technical (fireways)	729	electro-plating assistant	299
edge minder (floor cloth)	384	electrical instrument maker	309	electrotypist	324
edge minder (textile finishing)	429	electrical instrument maker	309	electrotypist's assistant	324
edge paper	429	electrical mechanic	309	elevator assembler	474
edge, black (glasses)	334	electrical superintendent, resi- dent	305	elevator assembly (cement, etc. works)	099
edge, blank	105	electrical superintendent, resi- dent	305	elevator attendant, coal (gas works and electricity supply)	699
edge, clear-ware	419	electrical ware maker	105	elevator attendant, grain	950
edge (clothing)	419	electrical wire drawer	288	elevator attendant (textile mill)	757
edge (cups)	419	electric wireman	311	elevator attendant, wet char	950
edge, gilt	538	electric battery maker	318	elevator engine man	849
edge (gramophone record)	449	electric bell fitter	309	elevator man, beam (gas works)	699
edge, metal	358	electric bell maker	309	elevator man (coke works)	089
edge, object glass	133	electric bulb blower	124	elevator man (four mill)	699
edge (optical lens)	133	electric cable laying labourer	311	elevator man (four mill)	449
edge, rough	133	electric car brakeman	722	elocutionist	885
edge (spectacle lens)	133	electric conduit joiner	311	elocutionist	072
edge (textile)	399	electric conveyor driver	954	elocutionist	949
edge (tiles)	105	electric crane driver	950	embalmer	925
edge, tile	105	electric detonator maker	148	embalmer (envelope)	552
edge (tin box)	279	electric driller	231	embalmer (floor cloth, etc.)	639
edge (typewriter ribbons)	358	electric engine attendant	950	embalmer (glass)	126
edge runner	429	electric fan attendant	304	embalmer (hats)	278
edge setter	419	electric furnace maker (chemi- cals)	143	embalmer (jewellery and plate)	283
edge stitcher	238	electric furnaceman (foundry)	182	embalmer (leather dressing)	385
edge tool bander	279	electric handle driver	954	embalmer, leather (bookbind- ing)	532
edge tool cutter-out	279	electrician	311	embalmer (metal)	254
edge tool examiner	278	electrician, assistant	305	embalmer (paper making)	518
edge tool fader	278	electrician, chief	301	embalmer, paper (stationery)	552
edge tool fitter	278	electrician, chief (cable ship)	301	embalmer (stationery)	394
edge tool forge	190	electrician, chief (film pro- ducing)	305	embalmer (stationery)	552
edge tool forger's striker	190	electrician (factory)	305	embalmer, sword hilt	278
edge tool grinder	237	electrician, house	311	embalmer (wallpaper)	552
edge tool gripper	279	electrician-in-chief (cable ship)	300	embalmer (wood)	635
edge tool handler	279	electrician (Post Office)	305	embalmer to the blind	558
edge tool hardener	220	electrician (rolling stock)	305	embalming feeder	639
edge tool japaner	241	electrician (sea-going)	749	embalming machine attendant	485
edge tool jobbing grinder	237	electrician (theatrical, music halls, etc.)	305	embalming machinist, wood	485
edge tool machineman	278	electrician (tramways)	305	embalming machine	449
edge tool peeler	282	electrician's assistant	319	embroiderer	407
edge tool plaster (nickel)	190	electrician's assistant (film producing)	319	embroiderer, appliqué	407
edge tool plaster (smith)	238	electrician's labourer	319	embroiderer, gold	407
edge tool roller	176	electrician's mate	319	embroiderer, machine (lace)	378
edge tool setter	278	electrician's maker	309	embroiderer, machine (lace)	378
edge tool setter (grinder)	190	electric indicator maker	309	embroiderer, machine (lace)	378
edge tool stamper	190	electric jointer (electric cables)	311	embroiderer, military	407
edge tool stamper, heavy	190	electric light attendant (elec- tricity supply)	699	embroiderer, silver	407
edge tool striker	190	electric light attendant (main- tenance)	311	embroiderer, Swiss	407
edge trimmer	429	electric light circuitman	311	embroiderer	407
edgeware maker	279	electric light fitter	311	embroidery book maker	278
edge worker (scientific instru- ments)	278	electric light man (sea going)	749		
editor, film	852	electric meter assembler	309		
educational agent	090	electric meter fitter	309		
ed cutler	911	electric meter repairer	309		
ed shoeman	911	electric meter tester	308		
ed shop keeper	911				
edf man, crude glycerine	149				
edf man (glycerine recovery)	149				
edf purifier	149				
egg blender	474				
egg box maker	474				
egg breaker	449				
egg candler	449				
egg case maker	474

wire armanring machine	318
wire bender (aeroplane)	279
wire bender (textile machinery)	278
wire bender (rubbers)	279
wire blind writer	594
wire blocker	268
wire blocker, bat	428
wire blocker, millinery	262
wire bender	262
wire brusher	265
wire brush maker	633
wire cable maker	265
wire card maker	279
wire clip maker	279
wire coverer (cables)	319
wire coverer (gutta percha)	319
wire coverer, gutta percha	319
wire coverer, bat	429
wire coverer (India rubber)	319
wire coverer, India rubber	319
wire cutter (needles)	279
wire drawer	268
wire drawer, automatic	268
wire drawer, brass	268
wire drawer, bronze	268
wire drawer, card	268
wire drawer, copper	268
wire drawer, electrical	268
wire drawer, fine	268
wire drawer, gold and/or silver	291
wire drawer, music	268
wire drawer, pinion	268
wire drawer, reed (textile machinery)	268
wire drawer, stem (electric bulbs)	268
wire drawer, tinplate (wireless valves)	268
wire dresser, card	238
wire dresser, gold and/or silver	290
wire examiner	308
wire fastener	318
wire filler	290
wire finisher	268
wire fastener	318
wire former	318
wire frame maker	278
wire galvaniser	234
wire gauge maker	269
wire girer-out	279
wire band (cables)	319
wire jointer (brass)	311
wire jointer, gun	276
wire pointer (welded)	318
wireless apparatus installer	308
wireless apparatus maker	308
wireless engineer	305-7
wireless engineer, chief (aero-drome)	300
wireless operator	754
wireless telegraphist	754
wireless telegraph operator (Post Office)	754
wireless watcher	754
wire maker	268
wire maker, barb	268
wire maker, eye	268
wireman (cycles)	278
wireman, electrical	311
wireman (electrical, telephone, telegraph)	311
wireman, indoor	311
wireman (re-inforced concrete)	279
wireman, telegraph	311
wireman, telephone	311
wireman (telephone exchange)	311
wireman, telephone switch-board	311
wireman and truer-up	318
wireman's assistant	319
wireman's laborer	319
wireman's mate	319
wire mattress frame maker	474

	Code Number.		Code Number.		Code Number.
wool locker-corer	360	wraper (rubber tyres)	689	yard foreman (omnibus)	716
wool maker-up	365	wraper, starch	448	yard foreman, passenger	764
wool merchant	770	wraper, tube	699	yard foreman (railway)	764
wool mixer	362	wraper (warehouses)	949	yard foreman (saw mill)	471
wool neutraliser	364	wraper and-boxer (umbrellas)	948	yard inspector, goods	700
wool oiler	369	wraper (bookbinding)	332	yard inspector (railway)	700
wool opener (felt manufac- ture)	362	wraper man	449	yard inspector (tramways, omnibus)	714
wool packer	389	wraper mender	419	yard labourer	970
wool porter	399	wraper-up	949	yard labourer, boiler	970
wool puller	338	wraper-up (cutlery)	949	yard labourer (cement, patent fuel, etc., works)	279
wool runner	389	wraper-up (jewellery)	949	yard labourer (coco works)	689
wool sampler	788	wraper-up, scythe	279	yard labourer (colliery)	648
wool scourer (cloth)	364	wraper-up, sickle	279	yard labourer (farm)	622
wool scourer (raw material)	361	wraper writer	788	yard labourer (foundry)	183
wool shrinker	361	wrath maker, artificial	688	yard labourer (metal mine)	656
wool sorter	360	wrath maker (artificial flowers)	688	yard labourer (wood)	489
wool sorter, foreman	352	wrench	278	yard maker	489
wool sorter's apprentice	360	wrencher	278	yard man (builder's)	564
wool stapler	360	wrench finisher	278	yardman (farm)	622
wool stapler (dealer)	770	wrench forger	190	yardman, hotel	622
wool steamer	389	wreath, professional	989	yardman, iron (saw)	276
wool stock keeper	940	wringer attendant	916	yardman (leather)	338
wool store man	389	wringer (gun cotton)	146	yardman (livestock stable)	338
wool stripper	364	wringer-out	429	yardman, metal	729
wool stripper (combining)	364	wringman	389	yardman (metal or engineer- ing works)	279
wool take-off (combining)	365	writer, assistant (ship)	737	yardman (railway)	700
wool take-off (sorting)	389	writer, Beall's	556	yard man, timber	700
wool trapper	362	writer, card (factory or works)	939	yard master	700
wool tuft cutter (carpets)	338	writer, dial	339	yard master, assistant	700
wool warehouseman	940	writer, fascia	504	yard porter	706
wool washer (leather)	338	writer, glass	584	yard regular	704
wool washer (textile)	361	writer, law	339	yard scavenger	704
wool wash-house man	361	writer, letter	594	yard signaller (railway)	704
wool weigher	389	writer, lithographic	529	yardman	700
wool weigher-in	389	writer, ornamental	529	yardman (blast furnace)	279
wool weigher-out	389	writer, poster	584	yardman, chief	700
wool weighman	389	writer, poster (signwriter)	584	yardman (farm)	622
wool winder	367	writer (ship)	787	yardman, porter	704
wool basket fitter	688	writer, shorthand	389	yardman (railway)	704
wool basket liner	688	writer, show card	543	yard sweeper	970
wool board hand (cutlery)	276	writer, sign	584	yard baller, coat	367
wool box fitter	688	writer (signwriter)	584	yard baller (cotton)	367
wool box liner	688	writer, ticket	546	yard baller, warp	367
wool box maker	473	writer, tin ticket	546	yard baller (woollen)	367
worker (glass)	134	writer, title	546	yard baller, woollen	367
worker-off	435	writer, window ticket	546	yard bleacher	389
worker-round	279	writer, wire blind	594	yard boiler	384
workhouse attendant (female inmates)	929	writer, wrapper	789	yard boy	389
working attendant, resident	919	writer to the trade	594	yard butcher (textile mill)	943
working foreman (contractor's)	561	writing desk maker	473	yard butcher (wool warehouse)	943
working foreman (railway)	796	writing fluid grinder	153	yard bundler	943
working foreman (kitchen)	681	writing fluid maker	158	yard carter	399
working housekeeper	900	writing pad maker	556	yard conditioner	399
working jeweller	298	writing plate finisher	576	yard counter (examiner)	379
working optician	133	writing plate maker	576	yard counter (for maker-up)	399
workman (glass)	124	writing plate polisher	576	yard dumper	399
workman's examiner	641	wrought nail maker (forged)	190	yard drawer	399
workman's inspector	641	wrought nail maker (hand)	278	yard dresser	399
works agent	670	wrought nail pointer	278	yard dryer (flax and hemp)	398
works and ways department labourer	561	wrought nail shanker	278	yard dryer (knapping)	398
works clerk	638	wuzzor	398	yard dryer (printing)	398
works engineer (electricity)	650			yard dyer	381
workshop foreman (optical glass)	121			yard dye, cord	359
works keeper (water works)	638			yard examiner	379
works lighting engineer (elec- tricity supply)	691			yard finisher (bleaching)	390
works superintendent (elec- tricity)	890			yard finisher (bank)	399
works superintendent (tram- ways)	714			yard lad	399
work wheeler	279			yard lad, reeling room	399
worm boy (patent fuel)	699			yard layer-out	399
worm cutter	290			yard leader (rope and twine)	289
wormed shaker	279			yard loft man	396
wormer	209			yard locker	379
wormer's runner	279			yard maker-up	943
worming fitter (screws)	211			yard man	399
wormed filler (carpets)	367			yard packer, foreman	943
wormed funder (carpets)	389			yard picker	379
wormed winder	367			yard piler (carpets, etc.)	943
woven hanger maker	576			yard piler (textile warehouse)	943
woven wire spring mattress maker	269			yard polisher	398
wraper (black lead)	949			yard polisher, hank	398
wraper, block	688			yard polisher (mosquito netting)	396
wraper, cane	949			yard polisher, warp	396
wraper (cardboard boxes)	559			yard preparer	398
wraper, chocolate	949			yard printer, carpet	383
wraper, cop	949			yard printer, cotton	383
wraper (matches)	949			yard reder (rope, twine)	367
				yard remover	399
				yard setter (knapping)	399
				yard shaker and header	399
				yard sizer	389
				yard softener	398

yarn sorter (examining) ...	379	yarn washer (carpets) ...	386	zinc fixer ...	278
yarn sorter (grading) ...	388	yarn washer, silk ...	393	zinc goods maker ...	264
yarn spinner ...	385	yarn weigher (for winder) ...	399	zincing man (copper) ...	149
yarn spinner, rope ...	385	yarn weigher-out ...	395	zinc labourer ...	279
yarn splicer, coir ...	396	yarn winder (sables) ...	319	zinc nail machine feeder ...	279
yarn splicer (silk) ...	398	yarn winder, coir ...	367	zinc nail machine minder ...	254
yarn splitter ...	367	yarn winder (not silk) ...	367	zinc etcher ...	526
yarn splitter, warp ...	384	yarn winder, rope ...	367	zincographic machine minder ...	529
yarn splitter, warp (dyeing) ...	367	yarn winder (silk) ...	371	zincographic printer ...	529
yarn spooler (rope and twine) ...	393	Yaryan man (paper) ...	143	zinc picker ...	279
yarn spreader ...	399	yeast horse man ...	455	zinc plate worker ...	264
yarn stocker ...	399	yeast man ...	455	zinc pot maker ...	193
yarn stockkeeper ...	441	yeast presser ...	458	zinc printer ...	529
yarn storer (bristone) ...	398	roll cleaner ...	399	zinc recovery hand ...	279
yarn storer (cotton yarn) ...	398	zeoman ...	011	zinc rod drawer ...	268
yarn storer, warp ...	398	Yorkshire dresser ...	369	zinc roller ...	178
yarn stretcher (gossipping) ...	398	youaker ...	080	zinc roofer ...	226
yarn stretcher (silk) ...	398			zinc sampler ...	278
yarn stripper ...	399			zinc sash bar stamper ...	254
yarn taken-away ...	399			zinc sheder ...	264
yarn tester ...	398			zinc tube drawer ...	269
yarn twister (cotton) ...	366			zinc white maker ...	152
yarn warper ...	367			zinc worker ...	264
yarn warper, coir ...	367			zoological gardens keeper ...	969

Z

zincage man ...	276
zinc corrugator ...	278
zinc cutter ...	264

APPENDIX.

List of terms the code numbers of which it is proposed to change for the 1931 Census. These terms have been indicated in the Dictionary thus: †

Occupational Term.	Present Code Number.	Proposed Code Number.	Occupational Term.	Present Code Number.	Proposed Code Number.
Accumulator sawyer ...	319	279	Bottom leveller ...	498	486
Action filer (patent) ...	649	238	Box iron filer and finisher	210	278
Ageing machine minder ...	398	384	Brace-maker ...	419	410
Age tender ...	398	384	Brake attendant (tramways) ...	714	729
Age man ...	398	384	Brake examiner (tramways) ...	714	729
Age ...	398	384	Brake inspector (tramways) ...	714	729
Age minder ...	398	384	Brakesman (coal drops) ...	714	729
Allocation clerk ...	929	938	Brass instrument maker ...	648	278
Allowance man (brewery) ...	459	929	Brass musical instrument maker	648	278
Alternator attendant ...	459	954	Breaker-off (brass foundry) ...	279	185
Alum kieve man ...	148	145	Breaker-up (brass foundry) ...	279	185
Alum maker ...	148	145	Breast washer ...	279	089
Angle cuttersman ...	518	538	Breast wheeler ...	699	670
Amline ager ...	398	384	Brumstone stove man ...	398	384
Are lamp assistant ...	698	989	Brush case maker ...	473	688
Are lamp cleaner ...	698	989	Brush-cut ...	459	970
Are lamp trimmer ...	698	989	Brush varnisher ...	689	689
Ari metal fitter's mate ...	231	279	Bolt worker (lumps) ...	318	138
Ash boy ...	709	970	Bong maker ...	499	488
Ash filter ...	709	970	Burner (pig iron) ...	278	171
Ash lad ...	709	970	Burner (tin ore) ...	056	171
Ash loader ...	709	970	Burner fitter (gas works) ...	698	285
Ash man ...	709	970	Burner-in ...	518	188
Ash pit labourer ...	709	970	Button cleaner ...	689	619
Ash pit man ...	709	970	Button dipper ...	689	619
Ash wheeler (chemical works) ...	145	970	Cabin boy ...	066	929
Ash wheeler (gas, electricity, waterworks) ...	699	970	Cable welder ...	311	248
Axis box finisher ...	278	188	Can dodger ...	363	399
Axis bush finisher ...	278	188	Can heater-out ...	363	399
Baby car hood maker ...	658	419	Canteen man (brewery) ...	459	929
Backer ...	398	384	Cannery slicer ...	419	418
Backer-up (gramophone records) ...	648	262	Cap solderer (electric lamps) ...	318	262
Back filter ...	398	384	Cap solderer ...	709	706
Back filling mangle ...	398	384	Card enter ...	519	528
Back fill mangle ...	398	384	Card examiner (tramways) ...	714	729
Back starcher ...	398	384	Card inspector (tramways) ...	714	729
Back starch filler ...	398	384	Cardman ...	279	729
Bag stitcher ...	419	429	Carriage attendant ...	702	929
Bag tank man (sugar) ...	449	970	Carriage fitter (railway) ...	475-6	210
Bag washer (sugar refining) ...	449	970	Carriage manager ...	700	706
Bander (textile finishing) ...	399	419	Carriers' runner ...	719	729
Band sewer-ra. (wool spinning) ...	398	419	Cash maker (brush, jewel, pipe, &c.) ...	473	688
Banker hand ...	072	575	Cash brusher-out ...	459	970
Bank rider (coal drops) ...	744	704	Cash drainer ...	459	970
Bank rider (railway) ...	577	709	Cash filter ...	459	970
Bar inspector (tramways) ...	714	729	Cash steamer ...	459	970
Bar chopper ...	499	639	Cash washer ...	459	970
Bar cleaner ...	499	639	Caster ...	414	989
Bar cutter ...	499	639	Catgut maker ...	688	638
Bar grinder ...	499	639	Catgut spinner ...	688	638
Bar picker ...	499	639	Cattle foreman ...	700	706
Bar scraper ...	499	639	Chain examiner ...	731	278
Bar shaver (l) ...	499	639	Chain repairer (harness) ...	378	190
Bar sewer ...	499	639	Chalk wheeler ...	089	970
Bar stripper ...	499	639	Change house keeper ...	056	929
Bar workar ...	499	639	Change house man ...	056	929
Barrel washer (brewery) ...	459	970	Changing house keeper ...	056	929
Barrel washer (paints and oils) ...	159	970	Changing house man ...	056	929
Bassinet hood maker ...	658	419	Checker (jib) ...	278	942
Bath fitter ...	278	252	Chemical apparatus maker ...	322	138
Batton maker ...	486	481	Chief hoisting tester ...	729	720
Bayman (steel works) ...	279	970	Cinder sifter ...	709	970
Bayonet grip maker ...	498	486	Clammer (dies, seals, &c.) ...	278	254
Bead and bagle stringer ...	639	638	Clark (wood winding) ...	398	399
Belt tenter ...	047	545	Clay wheeler ...	099	970
Bender ...	222	190	Cleatler ...	220	279
Binder (sheep hook) ...	532	558	Clinical thermometer blower ...	822	124
Blanker (gold tub) ...	298	296	Clinical thermometer divider ...	822	126
Blanket edger ...	384	419	Clock assembler (meters) ...	309	323
Bleacher (explosives) ...	143	380	Clock hand (electric meters) ...	309	323
Bleacher (foreman) ...	380	359	Clock maker (electric meters) ...	309	323
Bleach chopper (il) ...	072	575	Clock man (electric meters) ...	309	323
Blecker (silk finishing) ...	398	384	Cloth enter (electric cables) ...	584	819
Block scabbler ...	072	575	Cloth carriage attendant ...	702	929
Block soapier ...	072	575	Cloth saloon attendant ...	702	929
Block scraper ...	072	575	Coach body monitor ...	475-6	654
Blout worker ...	082	278	Coach fitter (railway) ...	475-6	210
Body fitter ...	475-6	658	Coach monitor ...	475-6	654
Body monitor ...	475-6	658	Coal handler ...	699	970
Body minder ...	043	044	Coal labourer ...	709	706
Boorman ...	043	044	Coal labourer (electricity supply) ...	699	970
Boom inspector (tramways) ...	714	729	Coal tender (minerals) ...	744	704
Boer ...	279	200	Coal wheeler (chemical works) ...	149	970

Occupational Term.	Present Code Number.	Proposed Code Number.	Occupational Term.	Present Code Number.	Proposed Code Number.
Coal wheeler (gas, electricity) ...	699	970	Fret sawyer ...	481	498
Coal wheeler (petrol fuel, etc.) ...	699	970	Gang boy ...	581	929
Coke wheeler ...	699	970	Ganger (tramways) ...	716	561
Compo press man ...	567	688	Gas lighter (gas works) ...	639	989
Compo press worker ...	567	688	General labourer ...	279	970
Confidential agent ...	771	799	Gilder (house decorations) ...	692	485
Contact maker ...	318	279	Gilder (vehicles) ...	535	485
Copper brazer and plate worker ...	262	264	Gimping machinist ...	945	534
Cork collar ...	638	639	Gland packer ...	709	279
Cork drawer-off ...	499	639	Glede washer ...	479	989
Cork stripper ...	499	639	Glede dryer ...	159	158
Cotton preparer (artificial silk) ...	149	362	Glede layer-out ...	159	158
Cotton spool packer ...	369	349	Gold duster (printer's) ...	637	648
Coupler ...	073	489	Gold silk roller ...	298	298
Count house boy ...	056	753	Gold silk stumper ...	298	298
Count house cut ...	056	753	Grain fencer ...	700	706
Count house keeper ...	056	922	Gramophone assembler ...	648	279
Count house maiden ...	056	922	Gramophone fitter ...	648	279
Count house woman ...	056	922	Gramophone matrix fitter ...	648	279
Covered string maker ...	698	279	Grass boiler ...	279	159
Coverer (aeroplane) ...	504	658	Grass extractor (wooden mill) ...	598	384
Coverer (aerost. skeels) ...	406	429	Grass man (wool) ...	599	158
Cresler ...	365	399	Grass workman ...	599	158
Curtain knitter ...	376	419	Grid maker ...	498	474
Cutleryman (wall-paper) ...	548	658	Grinder (china clay or sand) ...	074	099
Cutter (sawed) ...	449	485	Gripe mender ...	049	190
Dash grinder ...	089	099	Grip maker ...	498	486
Diamond mill cleaner ...	638	273	Gripper (dog sleds) ...	498	486
Digger ...	414	429	Groomster ...	149	949
Dimension quarryman ...	072	676	Gullotine cutter (paper mill) ...	518	558
Deck sampler ...	740	789	Gullotine cutter (printer's) ...	548	558
Drainer (brewery) ...	469	970	Gullotine hand (wall paper) ...	548	558
Dresser (builder's) ...	654	581	Gullotine man (paper mill) ...	518	558
Drawer and marker ...	298	286	Gut drawer ...	688	628
Drawer (jute) ...	358	368	Gut finisher ...	688	628
Dresser ...	073	578	Gut maker ...	688	628
Drawer ...	034	096	Gut spinner ...	688	628
Drum cleaner ...	159	970	Gut string maker ...	688	628
Drum finisher ...	398	384	Gymbler ...	398	224
Drum washer (glycerine) ...	149	970	Hall marker ...	298	286
Dry Boy ...	056	929	Hall mark stamper ...	298	286
Dryer (canvas dressing) ...	418	429	Hardener's assistant (saws) ...	220	279
Dryer (cycles) ...	241	279	Hard mopper ...	688	499
Dry house attendant ...	056	929	Hat leather binder ...	419	410
Dry house boy ...	056	929	Head stageman ...	741	740
Dry house man ...	056	929	Heaver-over ...	178	279
Dry man ...	056	929	Hoist man ...	399	757
Dry mangler ...	398	384	Hoist tender ...	399	757
Duster ...	538	548	Holer (wood wind instruments) ...	486	486
Duster-off ...	538	548	Hollower (dog sleds) ...	498	486
Dyer and cleaner ...	929	581	Homster ...	119	104
Dyer (job) ...	929	581	Hood coverer (perambulators) ...	658	419
Enamel maker ...	108	158	Hooker-on ...	979	979
Engine plane man ...	043	044	Hose sticher ...	609	418
Engine tuber (loose) ...	210	222	Hosery stover ...	398	384
Engraver's painter (tertile printing) ...	399	278	Hot water filter (S) ...	240	251
Excavator (slate, stone, &c.) ...	071	561	Hydraulic press attendant ...	519	949
Excavator (builder's) ...	664	581	Hydraulic press hand ...	519	949
Eyeblet machinist ...	549	559	Hydraulic press man ...	519	949
Fancy finisher ...	638	498	Hydrophosphate agr. ...	398	384
Fencing maker ...	474	499	Incubator maker ...	498	474
Fibrous solderer ...	318	138	Index cutter ...	648	558
Filler ...	478	499	Indigo ager ...	398	384
